9. Applications submitted prior to the effective date of the new rules that include a request for waiver of 47 CFR 73.207 will be processed under the current minimum spacing rules only and not under the new contour protection rules. Applications submitted on or after the effective date must specify whether they are to be processed under the new contour protection rules. Amendments submitted on or after the effective date (including amendments to applications on file prior to the effective date) also must specify whether they are to be processed under the new contour protection rules. The Commission believes that it would be improper to presume, without an explicit election, that an applicant chooses processing under the new contour protection rules, as this entails some risk that future modifications of its facilities might become restricted as the result of protection of actual, rather than maximum, facilities. Therefore, in the absence of a specific request by the applicant, including the required supplementary exhibit as described below, the Commission will presume that the applicant intends the application to be processed under the minimum spacing rules only and not under the new contour protection rules.

10. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, the Commission notes that adoption of these provisions will provide broadcasters with an alternative and increased flexibility in selecting the most beneficial antenna site.

**Additional Exhibit Required**

11. The provisions contained in this action have been analyzed with respect to the Paperwork Reduction Act of 1980, and have been found to impose a new or modified information collection requirement on the public. Implementation of any new or modified requirement will be subject to approval by the Office of Management and Budget as prescribed by the Act.

12. Applicants requesting processing pursuant to 47 CFR 73.215 must submit additional information as follows, together with FCC Form 301 ("Application for Authority to Construct or Make Changes in a Commercial Broadcast Station"), or FCC Form 340 ("Application for Authority to Construct or Make Changes in a Noncommercial Educational Broadcast Station"), as appropriate. The information to be submitted as an exhibit is a complete engineering study to establish the lack of prohibited overlap of contours involving affected stations. The engineering study must include the following:

(a) Protected and interfering contours, in all directions (360°), for the proposed operation.

(b) Protected and interfering contours, over pertinent arcs, of all short-spaced assignments, applications and allotments, including a plot showing each transmitter location, with identifying call letters or file numbers, and indication of whether facility is operating or proposed. For vacant allotments, use the reference coordinates as transmitter location.

(c) When necessary to show more detail, an additional allocation study utilizing a map with a larger scale to clearly show prohibited overlap will not occur.

(d) A scale of kilometers and properly labeled longitude and latitude lines, shown across the entire exhibit(s). Sufficient lines should be shown so that the location of the sites may be verified.

(e) The official title(s) of the map(s) used in the exhibit(s).

13. Accordingly, *it is ordered* That 47 CFR Part 73 is amended as set forth below. This action is taken pursuant to authority contained in sections 4 and 303 of the Communications Act of 1934, as amended. *It is further ordered* That this proceeding is terminated.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

**List of Subjects in 47 CFR Part 73**

Radio broadcasting, FM broadcast stations, Minimum distance separation requirements, Directional antennas (FM), Short-spaced antenna sites (FM).

For the reasons set forth in the preamble, 47 CFR Part 73 is amended as follows:

**PART 73—[AMENDED]**

1. The authority citation for 47 CFR Part 73 continues to read as follows:

**Authority:** 47 U.S.C. 154 and 303.

2. 47 CFR 73.207 is amended by revising paragraph (a) to read as follows:

**§ 73.207 Minimum distance separation between stations.**

(a) Except for assignments made pursuant to §§ 73.213 or 73.215, FM allotments and assignments must be separated from other allotments and assignments on the same channel (co-channel) and on nearby adjacent channels by not less than the minimum distances specified in paragraphs (b) and (c) of this section. The Commission will not accept petitions to amend the Table of Allotments, applications for new stations, or applications to change the channel or location of existing assignments unless transmitter sites meet the minimum distance separation requirements of this section, or such applications conform to the requirements of §§ 73.213 or 73.215. However, applications to modify the facilities of stations with short-spaced antenna locations authorized pursuant to prior waivers of the distance separation requirements may be accepted, provided that such applications propose to maintain or improve that particular spacing deficiency. Class D (secondary) assignments are subject only to the distance separation requirements contained in paragraph (b)(3) of this section. (*See* § 73.512 for rules governing the channel and location of Class D (secondary) assignments.)

* * * * *

3. 47 CFR 73.209 is amended by revising paragraph (b) and removing paragraph (c), as follows:

**§ 73.209 Protection from interference.**

* * * * *

(b) The nature and extent of the protection from interference afforded FM broadcast stations operating on Channels 221-300 is limited to that which results when assignments are made in accordance with the rules in this subpart.

4. A new section 47 CFR 73.215 is added to read as follows:

**§ 73.215 Contour protection for short-spaced assignments.**

The Commission will accept applications that specify short-spaced antenna locations (locations that do not meet the domestic co-channel and adjacent channel minimum distance separation requirements of § 73.207); Provided That, such applications propose contour protection, as defined in paragraph (a) of this section, with all short-spaced assignments, applications and allotments, and meet the other applicable requirements of this section. Each application to be processed pursuant to this section must specifically request such processing on its face, and must include the necessary exhibit to demonstrate that the requisite contour protection will be provided. Such applications may be granted when the Commission determines that such action would serve the public interest, convenience, and necessity.

(a) *Contour protection.* Contour protection, for the purpose of this section, means that on the same channel and on the first, second and third adjacent channels, the predicted interfering contours of the proposed station do not overlap the predicted protected contours of other short-spaced assignments, applications and allotments, and the predicted interfering contours of other short-spaced assignments, applications and allotments do not overlap the predicted protected contour of the proposed station.

(1) The protected contours, for the purpose of this section, are defined as follows. For all Class B and B1 stations on Channels 221 through 300 inclusive, the F(50,50) field strengths along the protected contours are 0.5 mV/m (54 dBμ) and 0.7 mV/m (57 dBμ), respectively. For all other stations, the F(50,50) field strength along the protected contour is 1.0 mV/m (60 dBμ).

(2) The interfering contours, for the purpose of this section, are defined as follows. For co-channel stations, the F(50,10) field strength along the interfering contour is 20 dB lower than the F(50,50) field strength along the protected contour for which overlap is prohibited. For first adjacent channel stations (±200 kHz), the F(50,10) field strength along the interfering contour is 6 dB lower than the F(50,50) field strength along the protected contour for which overlap is prohibited. For second adjacent channel stations (±400 kHz), the F(50,10) field strength along the interfering contour is 20 dB higher than the F(50,50) field strength along the protected contour for which overlap is prohibited. For third adjacent channel stations (±600 kHz), the F(50,10) field strength along the interfering contour is 40 dB higher than the F(50,50) field strength along the protected contour for which overlap is prohibited.

(3) The locations of the protected and interfering contours of the proposed station and the other short-spaced assignments, applications and allotments must be determined in accordance with the procedures of paragraphs (c), (d)(2) and (d)(3) of § 73.313, using data for as many radials as necessary to accurately locate the contours.

(b) Applicants requesting short-spaced assignments pursuant to this section must take into account the following factors in demonstrating that contour protection is achieved:

(1) The ERP and antenna HAAT of the proposed station in the direction of the contours of other short-spaced assignments, applications and allotments. If a directional antenna is proposed, the pattern of that antenna must be used to calculate the ERP in particular directions. See § 73.316 for additional requirements for directional antennas.

(2) The ERP and antenna HAAT of other short-spaced assignments, applications and allotments in the direction of the contours of the proposed station. The ERP and antenna HAATs in the directions of concern must be determined as follows:

(i) For vacant allotments, contours are based on the presumed use, at the allotment's reference point, of the maximum ERP that could be authorized for the station class of the allotment, and antenna HAATs in the directions of concern that would result from a non-directional antenna mounted at a standard eight-radial antenna HAAT equal to the reference HAAT for the station class of the allotment.

(ii) For existing stations that were not authorized pursuant to this section, including stations with authorized ERP that exceeds the maximum ERP permitted by § 73.211 for the standard eight-radial antenna HAAT employed, and for applications not requesting authorization pursuant to this section, contours are based on the presumed use of the maximum ERP for the applicable station class (as specified in § 73.211), and the antenna HAATs in the directions of concern that would result from a non-directional antenna mounted at a standard eight-radial antenna HAAT equal to the reference HAAT for the applicable station class, without regard to any other restrictions that may apply (e.g. zoning laws, FAA constraints, application of § 73.213).

**Note to paragraphs (b)(2)(i) and (b)(2)(ii):** Until further notice, contours for existing Class A assignments, Class A applications not requesting authorization pursuant to this section, and Class A allotments are based on the presumed use of an ERP of 6000 Watts, and antenna HAATs in the directions of concern that would result from a non-directional antenna mounted at a standard eight-radial antenna HAAT equal to 100 meters. This temporary provision will be removed after the final resolution of proposals in MM Docket No. 88-375.

(iii) For stations authorized pursuant to this section, except stations with authorized ERP that exceeds the maximum ERP permitted by § 73.211 for the standard eight-radial antenna HAAT employed, contours are based on the use of the authorized ERP in the directions of concern, and HAATs in the directions of concern derived from the authorized standard eight-radial antenna HAAT. For stations with authorized ERP that exceeds the maximum ERP permitted by § 73.211 for the standard eight-radial antenna HAAT employed, authorized under this section, contours are based on the presumed use of the maximum ERP for the applicable station class (as specified in § 73.211), and antenna HAATs in the directions of concern that would result from a non-directional antenna mounted at a standard eight-radial antenna HAAT equal to the reference HAAT for the applicable station class, without regard to any other restrictions that may apply.

(iv) For applications containing a request for authorization pursuant to this section, except for applications to continue operation with authorized ERP that exceeds the maximum ERP permitted by § 73.211 for the standard eight-radial antenna HAAT employed, contours are based on the use of the proposed ERP in the directions of concern, and antenna HAATs in the directions of concern derived from the proposed standard eight-radial antenna HAAT. For applications to continue operation with an ERP that exceeds the maximum ERP permitted by § 73.211 for the standard eight-radial HAAT employed, if processing is requested under this section, contours are based on the presumed use of the maximum ERP for the applicable station class (as specified in § 73.211), and antenna HAATs in the directions of concern that would result from a nondirectional antenna mounted at a standard eight-radial antenna HAAT equal to the reference HAAT for the applicable station class, without regard to any other restrictions that may apply.

**Note to paragraph (b):** Applicants are cautioned that the antenna HAAT in any particular direction of concern will not usually be the same as the standard eight-radial antenna HAAT or the reference HAAT for the station class.

(c) Applications submitted for processing pursuant to this section are not required to propose contour protection of any assignment, application or allotment for which the minimum distance separation requirements of § 73.207 are met, and may, in the directions of those assignments, applications and allotments, employ the maximum ERP permitted by § 73.211 for the standard eight-radial antenna HAAT employed.

(d) Stations authorized pursuant to this section may be subsequently authorized on the basis of compliance with the domestic minimum separation distance requirements of § 73.207, upon filing of an FCC Form 301 or FCC Form

VOL 54 ISS 44 MR 8 1989 UMI

340 (as appropriate) requesting a modification of authorization.

(e) The Commission will not accept applications that specify a short-spaced antenna location for which the following minimum distance separation requirements, in kilometers (miles), are not met:

| Relation | Co-channel | 200 kHz | 400/800 kHz |
|---|---|---|---|
| A to A | 82 (51) | 42 (26) | 25 (16) |
| A to B1 | 119 (74) | 66 (41) | 46 (29) |
| A to B | 143 (89) | 88 (55) | 67 (42) |
| A to C2 | 143 (89) | 84 (52) | 53 (33) |
| A to C1 | 178 (111) | 111 (69) | 73 (45) |
| A to C | 203 (126) | 142 (88) | 93 (58) |
| B1 to B1 | 138 (86) | 88 (55) | 48 (30) |
| B1 to B | 175 (109) | 114 (71) | 68 (43) |
| B1 to C2 | 163 (101) | 105 (65) | 56 (34) |
| B1 to C1 | 200 (124) | 134 (83) | 74 (46) |
| B1 to C | 233 (145) | 169 (105) | 105 (65) |
| B to B | 211 (131) | 145 (90) | 71 (44) |
| B to C2 | 200 (124) | 134 (83) | 68 (43) |
| B to C1 | 241 (150) | 169 (105) | 77 (48) |
| B to C | 270 (168) | 195 (121) | 105 (65) |
| C2 to C2 | 163 (101) | 105 (65) | 55 (34) |
| C2 to C1 | 196 (122) | 130 (81) | 74 (46) |
| C2 to C | 224 (139) | 169 (105) | 105 (65) |
| C1 to C1 | 224 (139) | 156 (98) | 79 (49) |
| C1 to C | 249 (155) | 186 (117) | 105 (65) |
| C to C | 270 (168) | 209 (130) | 105 (65) |

**Note to paragraph (e):** Until further Notice, the Commission will not accept applications that specify short-spaced antenna locations pursuant to this section wherein the proposed distance separation is less than the normally required distance separation in § 73.207 by more than 8 kilometers (5 miles). This temporary restriction will be removed when the Commission determines that available resources are sufficient to allow the timely processing of additional applications proposing short-spaced locations using contour protection.

5. 47 CFR 73.311 is amended by revising paragraph (a) and adding a new paragraph (b)(4) as follows:

**§ 73.311 Field strength contours.**

(a) Applications for FM broadcast authorizations must show the field strength contours required by FCC Form 301 or FCC Form 340, as appropriate.

(b) * * *

(4) In determining compliance with § 73.215 concerning contour protection.

6. 47 CFR 73.316 is amended by revising paragraphs (b), (c)(1), (c)(2), and (c)(3), and by adding paragraphs (c)(4), (c)(5), (c)(6), (c)(7), and (c)(8), to read as follows:

**§ 73.316 FM antenna systems.**

* * * * *

(b) *Directional antennas.* A directional antenna is an antenna that is designed or altered for the purpose of obtaining a non-circular radiation pattern.

(1) Directional antennas that have a ratio of maximum to minimum radiation in the horizontal plane of more than 15 dB will not be authorized.

(2) Directional antennas that have a radiation pattern which varies more than 2 dB per 10 degrees of azimuth will not be authorized.

(c) * * *

(1) A complete description of the proposed antenna system, including the manufacturer and model number of the proposed directional antenna. It is not sufficient to label the antenna with only a generic term such as "dipole". A specific model number must be provided. In the case of individually designed antennas with no model number, or in the case of a composite antenna composed of two or more individual antennas, the antenna must be described as a "custom" or "composite" antenna, as appropriate. A full description of the design of the antenna must also be submitted.

(2) A relative field horizontal plane pattern of the proposed directional antenna. A single pattern encompassing both the horizontal and vertical polarization is required, rather than separate patterns for horizontal and vertical polarization. A value of 1.0 must be used to correspond to the direction of maximum radiation. The plot of the pattern must be oriented such that 0° corresponds to the direction of maximum radiation or alternatively, in the case of an asymmetrical antenna pattern, the plot must be oriented such that 0° corresponds to the actual azimuth with respect to true North. The horizontal plane pattern must be plotted to the largest scale possible on unglazed letter-size polar coordinate paper (main engraving approximately 7" x 10") using only scale divisions and subdivisions of 1, 2, 2.5, or 5 times 10 to the Nth power. Values of field strength less than 10% of the maximum field strength plotted on that pattern must be shown on an enlarged scale. In the case of a composite antenna composed of two or more individual antennas, the pattern required is that for the composite antenna, not the patterns for each of the individual antennas.

(3) A tabulation of the relative field pattern required in paragraph (c)(2) of this section. The tabulation must use the same zero degree reference as the plotted pattern, and must contain values for at least every 10°. In addition, tabulated values of all maximas and minimas, with their corresponding azimuths, must be submitted.

(4) Sufficient vertical patterns to indicate clearly the radiation characteristics of the antenna above and below the horizontal plane. Complete information and patterns must be provided for angles of ±10° from the horizontal plane and sufficient additional information must be included on that portion of the pattern lying between +10° and the zenith and −10° and the nadir, to conclusively demonstrate the absence of undesirable lobes in these areas. The vertical plane pattern must be plotted on rectangular coordinate paper with reference to the horizontal plane. In the case of a composite antenna composed of two or more individual antennas, the pattern required is that for the composite antenna, not the patterns for each of the individual antennas.

(5) A statement that the antenna will be mounted on the top of an antenna tower recommended by the antenna manufacturer, or will be side-mounted on a particular type of antenna tower in accordance with specific instructions provided by the antenna manufacturer.

(6) A statement that the directional antennas will not be mounted on the top of an antenna tower which includes a top-mounted platform larger than the nominal cross-sectional area of the tower in the horizontal plane.

(7) A statement that no other antennas of any type are mounted on the same tower level as a directional antenna, and that no antenna of any type is mounted within any horizontal or vertical distance specified by the antenna manufacturer as being necessary for proper directional operation.

(8) In the case of applications for license upon completion of antenna construction, a statement from a licensed surveyor that the antenna has been installed pursuant to the manufacturer's instructions and is in the proper orientation.

* * * * *

**47 CFR Part 73**

**[MM Docket No. 88-114; FCC 89-43]**

## Broadcast Services; Deregulatory Review of Technical and Operational Regulations for Television Stations

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rules.

**SUMMARY:** This action amends certain technical and operational regulations for television broadcast stations. This action continues the Commission's deregulatory review of technical and operational regulations for various radio services. It is intended to delete burdensome or outdated television broadcast regulations that are no longer needed.

**EFFECTIVE DATE:** April 13, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Bernard Gorden, Mass Media Bureau, (202) 632-9660.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Report and Order* adopted February 7, 1989, and released February 28, 1989. The full text of this action is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this action may also be purchased from the Commission's copy contractors, International Transcription Services, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

### Summary of Report and Order

1. This action deletes certain technical and operational television broadcast regulations that are outdated and unnecessary. The majority of comments filed in response to the *Notice of Proposed Rule Making (Notice)* in this proceeding generally supported these rule amendments.

2. *Separate operation of TV aural and visual transmitters.* Television broadcasts are usually composed of both picture and sound signals. The picture and sound generally are transmitted simultaneously via separate video and audio transmitters. Under certain conditions, however, programs may consist of picture and sound transmissions that are unrelated to one another. For example, TV stations may provide an additional broadcast service in the form of an audio program with or without visual material, or a video informational bulletin board with or without related sound information. Such a service might display the text of news, weather, and other reports. Currently, such service is restricted by our rules to "graveyard hours" (12 midnight to 6 a.m.), or for only 15 minutes just prior to a station regular sign-on time, if after 6 a.m. When those provisions were adopted in 1980, the Commission was concerned that broadcasters might over use this form of service by filling their program day with audio-only or video-only bulletin board-like informational service, in place of normal programming during regular operational hours.

3. Upon reviewing the comments, all of which supported the proposed relaxation, the Commission can find no basis for continuing to preclude licensees from making a wider range of programming judgments. The Commission believes that the public interest would better be served by allowing licensees to establish the duration and time of day deemed to be most appropriate for transmitting separate audio or video services. Therefore, the Commission is amending § 73.653 by eliminating all time restrictions pertaining to the transmission of separate aural and video service.

4. *Power meter calibration.* The rules currently require that a television broadcast licensee have the capability to determine the station's visual power at all times. The most popular method of complying with this regulation is use of a power meter that must be calibrated at least once every 6 months. Because the rules also stipulate that this meter should be calibrated as often as necessary to ensure compliance with the appropriate power level, we find that the 6-month calibration requirement to be redundant.

5. While the comments filed in response to the *Notice* supported the requirement to perform meter calibration as often as needed, they recommended that the Commission eliminate the periodic 6-month calibration period as being duplicative of the general calibration requirement. Accordingly § 73.663 is amended to reflect this decision.

6. *Color burst signal requirement.* The color burst is a special synchronizing signal, transmitted within the television picture signal, that enables the TV receiver to decode the color information for proper display on the screen. During the transmission of black-and-white video programming, color burst signals do not benefit reception. In fact, they have the potential to degrade the picture quality if transmitted along with certain black-and-white picture signals. Thus, the rules currently require that the color burst signal be omitted during the extended transmission of black-and-white programming.,

7. In recent years however, broadcasters have encountered certain operational disadvantages in omitting the color burst signal during black-and-white program production. Modern video equipment technology now utilizes the color burst signal for more than its original purpose of conveying transmitted color reference information. Popular types of video processing equipment now rely on the color burst for timing and synchronization information to correct video signal stability or timing errors. For example, many production video tape recorders (as opposed to most consumer equipment) require the color burst signal for proper operation. Consequently, broadcasters have occasionally requested and received waivers of our color burst rules on a case-by-case basis. Also, some broadcasters have suggested that the color burst omission requirement should be eliminated because they believe that today's television receivers have been developed to the point that they are immune to picture degradation caused by the color burst signal.

8. On the other hand, some television receiver manufacturers are skeptical, recalling that older model receivers have in fact experienced black-and-white picture degradation due to the color burst and that current receivers may not be totally immune either. Thus, the manufacturers generally prefer that the current color burst omission standard be retained.

9. While the comments were divided over the extent of picture degradation caused by the presence of the color burst, the Commission notes that the color burst omission requirement was established as a quality control regulation and does not relate to preventing or restricting cochannel or adjacent channel interference. However, the comments have focused our attention on the fact that the current requirement has become a television receiver interoperability standard. Thus, television sets are currently designed and produced in accordance with the traditional objectives of the color burst omission requirement. Therefore, the Commission believes the current rule should be retained as a *recommended* standard instead of an absolute broadcast operating requirement. This approach is consistent with a 1985 action taken by the Commission with respect to standards relating to maximum horizontal and vertical blanking intervals (*see Report and Order*, MM Docket No. 79-145, 50 FR 13971, April 9, 1985). Therefore, § 73.699 is amended accordingly.

10. *Equipment installation and safety specifications.* The rules currently contain requirements pertaining to the construction and installation of transmission systems and studio equipment, as well as related safety procedures. These requirements were imposed many years ago, when it was common for broadcasters to design and build their own facilities. Today, nearly all broadcasters acquire their transmission system equipment from manufacturers that must design it to meet the safety requirements imposed by other regulatory agencies (*e.g.*, OSHA and various local and state agencies).

11. The comments favored elimination of the current requirements, but

BEST COPY AVAILABLE

VOL 54 ISS 44 MR 8 1989 UMI

suggested that an advisory reference to pertinent federal, state, local or other recognized safety organizations standards and procedures would be appropriate. The Commission agrees and amends § 73.687 accordingly.

12. *Reference table for conversion of minutes and seconds to decimal parts of a degree.* This table contains mathematical conversions for minutes-to-decimal and seconds-to-decimal parts of a degree. These values may be used in the calculation of geographical distance separations between television channel assignment locations. They were placed in the rules to provide the means for consistent and accurate calculations before the advent and widespread availability of electronic calculators and computers.

13. The commenters agreed with the Commission that the table has become superfluous and no longer needed because of the universal availability of electronic calculators and computers that provide far more accuracy. Therefore, the Commission is deleting from § 73.698 the reference table of minutes and seconds converted to decimal parts of a degree.

14. *Antenna radiation pattern limitations.* Television broadcasting directional antennas may be useful in improving service, *e.g.*, to reduce radiation over large bodies of water and concentrate it over populated areas. In such cases, the antennas must normally comply with restrictions that limit the ratio of the maximum radiated power at any point in the antenna pattern to the minimum radiated power at some other point in the pattern (the degree of suppression or null). The Commission adopted these limits in the early 1950s. It concluded at that time that the limits were needed because of the difficulty in determining the actual radiated pattern of an antenna with very sharp nulls. Additionally, early antenna patterns were considered unstable, and more subject to television picture "ghosting" degradation in null areas because of the exaggerated signal strength ratio that is possible between the directly received signal and other reflected signals.

15. However, over the years broadcasters have been granted waivers to exceed the current ratio limits in order to more effectively limit the power radiated over large bodies of water, or to avoid excessive signal radiation toward the face of a hill or mountain, which could reflect the signal and cause "ghosting" degradation. Also, the current ratio limits have no relationship with the spacing criteria used to control interstation interference. Thus, the *Notice* proposed that these limits be eliminated.

16. The comments, however, have convinced the Commission that while waivers permitting the use of non-restricted radiation patterns are often appropriate (as described above), such operation might not be advisable in all situations, particularly in cases involving tightly located or short-spaced stations. The comments further expressed concern over the Commission's ongoing FM directional antenna proceeding, which is addressing a similar issue, but which does contemplate the short-spacing of FM station antenna sites (*see* MM Docket No. 87-121, 53 FR 12779, April 19, 1988). The comments emphatically reject such short-spacing in the case of TV stations. Thus, the Commission's proposal to eliminate the current ratio limits received only qualified support. Moreover, the record is inadequate in terms of suggesting what degree of relaxation in the limits might be appropriate. Because of the current controversy over the circumstances in which directional antennas should be authorized, and because the Commission's current waiver process appears adequate in dealing with unusual situations, elimination of the current rule does not appear to be a matter of great urgency. Accordingly, the Commission believes the appropriate course of action is to retain the current rules for the time being, and reconsider this matter at some time in the future if circumstances warrant.

17. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, the Commission notes that adoption of these provisions will provide broadcasters with alternatives and increased flexibility in meeting their operational requirements.

18. The rule amendments contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980, and found to contain no new or modified form, information collection, and/or record keeping, labeling, disclosure, or record retention requirement; and will not increase or decrease burden hours imposed on the public.

19. Accordingly, *it is ordered that*, Pursuant to authority contained in sections 4(i) and 303 of the Communications Act of 1934, as amended, Part 73 of the Commission's Rules and Regulations are amended as set forth at the end of this document. *It is further ordered*, That this proceeding is terminated.

**Donna R. Searcy,**

*Secretary, Federal Communications Commission.*

**List of Subjects in 47 CFR Part 73:**

Radio broadcasting.

**Appendix**

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 73 [AMENDED]**

1. The authority citation for Part 73 continues to read as follows:

**Authority:** 47 U.S.C. 154 and 303.

2. Section 73.208 is amended by removing paragraphs (c)(1) (i) and (ii) and revising paragraph (c)(1) to read as follows:

**§ 73.208 Reference points and distance computations.**

* * * * *

(c) * * *

(1) Convert the latitudes and longitudes of each reference point from degree-minute-second format to degree-decimal format by dividing minutes by 60 and seconds by 3600, then adding the results to degrees.

* * * * *

3. 47 CFR 73.653 is revised in its entirety to read as follows:

**§ 73.653 Operation of TV aural and visual transmitters.**

The aural and visual transmitters may be operated independently of each other or, if operated simultaneously, may be used with different and unrelated program material.

4. 47 CFR 73.683 is amended by revising paragraph (b)(3) to read as follows:

**§ 73.683 Determining operating power.**

* * * * *

(b) * * *

(3) The meter must be calibrated with the transmitter operating at 80%, 100%, and 110% of the authorized power as often as may be necessary to maintain its accuracy and ensure correct transmitter operating power. In cases where the transmitter is incapable of operating at 110% of the authorized power output, the calibration may be made at a power output between 100% and 110% of the authorized power output. However, where this is done, the output meter must be marked at the point of calibration of maximum power output, and the station will be deemed to be in violation of this rule if that power is exceeded. The upper and lower limits of permissible power deviation as determined by the prescribed calibration, must be shown upon the meter either by means of adjustable red markers incorporated in the meter or by red marks placed upon the meter scale or glass face. These markings must be checked and changed, if necessary, each time the meter is calibrated.

5. 47 CFR 73.687, Transmission system requirements, is amended by revising paragraph (d), and removing paragraphs (e), (f) and (h), and redesignating paragraph (g) as (e) to read as follows:

**§ 73.687 Transmission system requirements.**

* * * * *

(d) The construction, installation, and operation of broadcast equipment is expected to conform with all applicable local, state, and federally imposed safety regulations and standards, enforcement of which is the responsibility of the issuing regulatory agency.

* * * * *

**§ 73.698 [Amended]**

6. 47 CFR 73.698, Tables, is amended by removing and reserving in its entirety Table I.

7. 47 CFR 73.699, Figure 6, is amended by revising Note 8 to read as follows:

**§ 73.699 TV engineering charts.**

* * * * *

Figure 6, Television Synchronizing Waveform for Color Transmission

**Notes**

* * * * *

8. It is recommended that color bursts signal be omitted during monochrome transmission.

* * * * *

**§ 73.4272 [Removed]**

8. 47 CFR 73.4272 is removed in its entirety.

## DEPARTMENT OF DEFENSE

### 48 CFR Parts 204, 219, and 252

### Federal Acquisition Regulation Supplement; Small Business Competitiveness Demonstration Program

**AGENCY:** Department of Defense (DoD).

**ACTION:** Interim rule (Extension of comment period).

**SUMMARY:** The Defense Acquisition Regulatory Council published an interim rule with request for public comment on January 27, 1989 (54 FR 4246), to revise the Department of Defense Federal Acquisition Regulation Supplement (DFARS) Parts 204, 219, and 252 to further implement FAR Subpart 19.10 and the December 22, 1988 joint Office of Federal Procurement Policy (OFPP) and Small Business Administration (SBA) interim policy directive and test plan implementing Title VII of the "Business Opportunity Development Reform Act of 1988", Pub. L. 100-656 (53 FR 52889). The original date for submission of comments, February 27, 1989, has been extended to April 15, 1989, to accommodate the requests of interested parties.

**DATE:** Written comments on the interim rule should be submitted to the address shown below not later than April 15, 1989, to be considered in the formulation of a final rule.

**ADDRESS:** Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OASD(P&L) (M&RS), Room 3D139, The Pentagon, Washington, DC 20301-3062. Please cite DAR Case 88-322 in all correspondence related to this subject.

**FOR FURTHER INFORMATION CONTACT:** Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202) 697-7266.

**Charles W. Lloyd,**

*Executive Secretary, Defense Acquisition Regulatory Council.*

## DEPARTMENT OF ENERGY

### Office of the Secretary

### 48 CFR Parts 932 and 952

### Acquisition Regulation; Prompt Payment Policies, Procedures and Contract Clauses

**AGENCY:** Department of Energy (DOE).

**ACTION:** Final Rule.

**SUMMARY:** This final rule amends the Department of Energy Acquisition Regulation (DEAR), by deleting the DOE unique prompt payment policies, procedures and contract clauses established in the DEAR to implement the requirements of the Prompt Payment Act (Pub. L. 97-177; May 21, 1982), and requires the use of the prompt payment policies, procedures and contract clauses recently established, on a Federal-wide basis, in the Federal Acquisition Regulation (FAR).

**EFFECTIVE DATE:** The requirements of this amended regulation are effective as of March 8, 1989.

**FOR FURTHER INFORMATION CONTACT:** Rudolph J. Schuhbauer, Business and Financial Policy Division (MA-422), Procurement and Assistance Management, Washington, DC 20585, (202) 586-8175

Paul A. Gervas, Office of the Assistant General Counsel for Procurement and Finance (GC-34), Washington, DC 20585, (202) 586-6906.

**SUPPLEMENTARY INFORMATION:**

I. Background
II. Procedural Requirements
A. Review Under Executive Order 12291
B. Review Under the Regulatory Flexibility Act
C. Review Under the Paperwork Reduction Act
D. Review Under the National Environmental Policy Act
E. Public Hearing
III. Public Comments

**I. Background**

Under Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254), the Secretary of Energy is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in that position. Accordingly, the DEAR was promulgated with an effective date of April 1, 1984 (49 FR 11922, March 28, 1984), 48 CFR Chapter 9.

The purpose of this final rule is to revise the DEAR, as necessary, to implement the requirements of the Prompt Payment Act as implemented by Office of Management and Budget (OMB) Circular A-125, Prompt Payment, and FAR Subpart 32.9, Prompt Payment, which was published in the **Federal Register** (53 FR 3688, February 8, 1988) as Federal Acquisition Circular 84-33.

A brief description of the DEAR amendments follows:

DEAR Section 932.111, Contract Clauses, is deleted in its entirety.

DEAR Subpart 932.71, Contract Payments, is deleted in its entirety.

DEAR Subpart 932.9, Prompt Payment, is added as a new subpart in order to establish certain DOE specific policies and procedures required to implement the prompt payment provisions specified in FAR Subpart 32.9.

Under Part 952, Solicitation Provisions and Contract Clauses, Section 952.232, including Subsections 952.232-1 through 952.232-8, 952.232-10, and 952.232-70 through 952.232-73, is deleted in its entirety.

**II. Procedural Requirements**

*A. Review Under Executive Order 12291*

In accordance with the requirements of Executive Order 12291 (46 FR 13193, February 27, 1981), this rulemaking has been reviewed by DOE. DOE has concluded that the rule is not a "major rule" because its promulgation will not

VOL 54 ISS 44 MR 8 1989 UMI

result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete in domestic or export markets. Accordingly, a regulatory impact analysis is not required.

*B. Review Under the Regulatory Flexibility Act*

This rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. This rule will simplify DOE's implementation of Pub. L. 97–177, by requiring use of the Federalwide prompt payment policies, procedures, and contract clauses prescribed in FAR Subpart 32.9, rather than the unique DEAR provisions established by DOE in 1984. Accordingly, this rule will have no impact on interest rates, tax policies or liabilities, the costs of goods or services or other direct economic factors. It will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

*C. Review Under Paperwork Reduction Act*

No information collection or recordkeeping requirements are imposed by this amended rule. Accordingly, no OMB clearance is required by section 350(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et seq.).

*D. Review Under the National Environmental Policy Act*

DOE has concluded that promulgation of this rule would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 et seq., 1976), or the Council on Environmental Quality regulations (40 CFR Part 1020), and therefore does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

*E. Public Hearing*

The Department has concluded that this final rule does not involve a substantial issue of fact or law, and that the rule should not have a substantial impact on the nation's economy or large numbers of individuals or businesses. This rule will result in uniform implementation of the Federal-wide prompt payment provisions recently established in the FAR. Therefore, pursuant to Pub. L. 95–91, the DOE Organization Act, the Department did not hold a public hearing on this rule.

**III. Public Comments**

This final rule is based on the Notice of Proposed Rulemaking (NOPR) that DOE published in the **Federal Register** on November 9, 1988 (53 FR 45294), wherein public comments were invited for the 30-day period ending December 9, 1988. No public comments were received.

**List of Subjects in 48 CFR Parts 932 and 952**

Government procurement.

For the reasons set out in the preamble, Chapter 9 of Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, DC on February 27, 1989.

Berton J. Roth,

*Deputy Assistant Secretary for Procurement and Assistance Management.*

**PART 932—CONTRACT FINANCING**

1. The authority citation for Parts 932 and 952 continues to read as follows:

Authority: (42 U.S.C. 7254; 40 U.S.C. 486(c)).

**§ 932.111 [Removed]**

2. Section 932.111 is removed in its entirety.

**Subpart 932.71—[Removed]**

3. Subpart 932.71, consisting of sections 932.7100, 932.7101, 932.7102, 932.7103, 932.7104, 932.7105, 932.7106 and 932.7107 and subsections 32.7107–1 and 932.7107–2, is removed in its entirety.

4. Part 932 is amended by adding a new Subpart 932.9, Prompt Payment, consisting of §§ 932.908 and 932.970, as follows:

**Subpart 932.9—Prompt Payment**

932.908 Contract clause.
932.970 Implementing DOE policies and procedures.

**Subpart 932.9—Prompt Payment**

**§ 932.908 Contract clause.**

(c) The contracting officer shall incorporate paragraph (c), *Electronic Funds Transfer*, promulgated as Alternate II at FAR 52.232–25, in solicitations and contracts containing the basic Prompt Payment clause or its Alternate I as prescribed at FAR 32.908(a) and FAR 32.908(b), respectively.

**§ 932.970 Implementing DOE policies and procedures.**

(a) *Invoice payments.* (1) *Contract Settlement Date.* For purposes of determining payment due dates on a final invoice pursuant to paragraph (a)(2)(ii) of the basic Prompt Payment clause and (a)(2)(i)(B) of its Alternate I at FAR 52.232–25, contract settlement occurs when the contracting officer determines that the contractor has complied with all contract terms and conditions, including all administrative requirements (e.g., execution and delivery of contractor's release of claims, execution of understandings setting forth final indirect cost rates, and establishment of final contract price). In addition, for purposes of determining any interest penalties under cost-type contracts, the effective date of contract settlement shall be the effective date of the final contract modification issued to acknowledge contract settlement and to close out the contract.

(2) *Constructive acceptance periods.* It is expected that, in the majority of cases, Government acceptance or approval can occur within the standard constructive acceptance or approval periods specified in paragraphs (a)(6)(i) of the basic Prompt Payment clause and (a)(5)(i) of its Alternate I at FAR 52.232–25. However, the contracting officer should coordinate these provisions with the DOE official(s) that will be responsible for performing the acceptance and/or approval function(s). Where the contracting officer determines, in writing, on a case-by-case basis, that it is not reasonable or feasible for DOE to perform the acceptance or approval function within the standard period, the contracting officer should specify a longer constructive acceptance or approval period, as appropriate. Considerations include, but are not limited to, the nature of supplies or services involved, geographical site location, inspection and testing requirements, shipping and acceptance terms, and available DOE resources.

(b) *Contract Financing Payments.* (1) The standard payment due date, to be specified by the contracting officer in paragraphs (b)(2) of the basic Prompt Payment clause and its Alternate I at FAR 52.232–25, shall normally be 30 days for progress payments and 30 days for interim payments on cost-type contracts.

(2) Contracting officers may specify payment due dates that are less than the standard when a determination is made,

in writing, on a case-by-case basis, that a shorter contract financing payment cycle will be required to finance contract work. In such cases, the contracting officer should coordinate with the finance and program officials that will be involved in the payment process to ensure that the contract payment terms to be specified in solicitations and resulting contract awards can be reasonably met. Consideration should be given to geographical separation, workload, contractor ability to submit a proper request, and other factors that could affect timing of payment. However, payment due dates that are less than 7 days for progress payments or less than 14 days for interim payments on cost-type contracts are not authorized

**PART 952—SOLICITATION PROVISION AND CONTRACT CLAUSES**

**§§ 952.232, 952.232–1, 952.232–2, 952.232–3, 952.232–4, 952.232–5, 952.232–6, 952.232–7, 952.232–8, 952.232–10, 952.232–70, 952.232–71, 952.232–72, and 952.232–73—[Removed]**

5. Subpart 952.2 is amended by removing section 952.232 and subsections 952.232–1, 952.232–2, 952.232–3, 952.232–4, 952.232–5, 952.232–6, 952.232–7, 952.232–8, 952.232–10, 952.232–70, 952.232–71, 952.232–72, and 952.232–73.

BILLING CODE 6450–01–M

**DEPARTMENT OF TRANSPORTATION**

**National Highway Traffic Safety Administration**

**49 CFR Part 580**

**[Docket Number 87–09; Notice 9]**

**RIN: 2127–AC42**

**Odometer Disclosure Requirements**

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Interim final rule; request for comments.

**SUMMARY:** This interim final rule is in response to a recent amendment to the Truth in Mileage Act (contained in the Pipeline Safety Reauthorization Act of 1988). The amendment concerns powers of attorney used in connection with mileage disclosures and requires NHTSA to promulgate regulations concerning their use.

This rule permits, in limited circumstances when a title document is physically held by a lienholder, the use of a secure power of attorney form. It allows a transferor to make the required odometer disclosure on a secure power of attorney form, issued by a State, that would authorize the transferee to exactly restate the mileage on the title document on the transferor's behalf. Similarly, this rule allows a transferee to authorize this transferor to sign the disclosure on the title document, on behalf of the transferee. To the extent that they are consistent with the new law, this rule grants, in whole or in part, three petitions for reconsideration.

This notice is published as an interim final rule without notice and the opportunity for comment. However, NHTSA requests comments on this rule. Following the close of the comment period, NHTSA will publish a notice responding to the comments and, if appropriate, NHTSA will amend the provisions of this rule.

**DATES:** Comments on this interim rule are due no later than April 7, 1989. This interim final rule becomes effective on April 29, 1989, unless a permanent final rule is issued thirty days prior to that date.

**ADDRESS:** Written comments should refer to the docket number of this notice and should be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. (Docket hours are 8 a.m. to 4 p.m.)

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202–366–1834).

**SUPPLEMENTARY INFORMATION:**

**Background**

To implement the Truth in Mileage Act of 1986 and to make some needed changes in the Federal odometer regulations, the National Highway Traffic Safety Administration (NHTSA) published a notice of proposed rulemaking (NPRM) on July 17, 1987. 52 FR 27022 (1987). The agency received numerous comments on the NPRM, representing the opinions of new and used car dealers, auto auctions, leasing companies, State motor vehicle administrators, and enforcement and consumer protection agencies. Each of the comments was considered and a final rule was published on August 5, 1988. 53 FR 29464 (1988).

As required by the Truth in Mileage Act, the August 1988 final rule requires the transferor of a motor vehicle to provide a mileage disclosure on the title document or, if the title document does not include a space for the mileage disclosure (during the phase-in period), or if the vehicle has not been previously titled, it requires the transferor to make a written disclosure of mileage on a separate document. Also as required by that statute, that final rule requires that title documents be manufactured or otherwise set forth by a secure process to deter counterfeiting and alteration; requires that at the time of issue, the titles include the mileage disclosure; adds disclosure requirements for lessors and lessees; and adds retention requirements for lessors and auction companies. In addition, consistent with the statute, the rule amends the form and content of the odometer disclosure statement. The August 1988 rule also prohibits a person from signing the disclosure as both the transferor and transferee in the same transaction in order to guard against a situation where only one party to the transaction would be aware of the disclosure. Finally, that rule clarifies the definition of transferor and transferee and extends the record retention requirement for dealers and distributors.

The Agency received seven petitions for reconsideration of the August 1988 final rule. In addition, we received numerous letters concerning the final rule and supporting the petitions. These petitions requested that NHTSA reconsider the provisions of the final rule that: (1) Prohibit a person from signing the odometer disclosure statement as both the transferor and transferee in the same transaction; (2) define "transferor" and "transferee"; (3) define "secure printing process"; (4) concerned the language included on the odometer disclosure statement; and (5) require dealers and distributors to retain, for five years, a copy of every odometer disclosure statement, including the transferee's signature, that they issue and receive. These petitions and letters have been placed in the docket. Before the Agency could fully consider the petitions, Congress enacted the Pipeline Safety Reauthorization Act of 1988, Pub. L. 100–561.

Section 401 of the Pipeline Safety Reauthorization Act, which amends section 408(d)(1) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1988(d)(1), concerns the use of certain powers of attorney in connection with the required mileage disclosure. Although the Truth in Mileage Act generally requires that a vehicle seller (or other transferor) make the required disclosure on the vehicle's title, Congress determined that, under certain limited conditions when the title document is physically held by a lienholder, the transferor should not be precluded from making the disclosure on a secure power of attorney form which

VOL 54 ISS 44 MR 8 1989 UMI

includes a space for the required odometer disclosure information. This secure power of attorney form would be given to a buyer (transferee), authorizing him to restate, on the title document, the mileage disclosed by the seller on the secure power of attorney form, if State law otherwise permits. Congress found that precluding such uses of powers of attorney could cause an undue burden on dealers when a consumer's title is held by a bank or other lienholder. Because the consumer does not have the vehicle's title document, the consumer would be unable to complete the disclosure on the title unless: (1) The consumer returned to the dealer after the dealer paid off the lien and received the title from the lienholder, or (2) the title was mailed by the dealer to the consumer, completed by the consumer, and mailed back to the dealer. Both of these alternatives were seen by Congress as interfering with usual commercial transactions. 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Dingell).

To resolve this problem and to alleviate potential costs for dealers and consumers, the new amendment specifies that a secure power of attorney form, which includes a mileage disclosure by the transferor, may be used when the transferor's title document is physically held by a lienholder, if otherwise permitted by State law. The new law directs the agency to prescribe the form and content of the power of attorney/disclosure document and reasonable conditions for its use by the transferor, "consistent with this Act and the need to facilitate enforcement thereof." More specifically, the new law requires that the form: (1) "be issued by a State to transferees in accordance with paragraph (2)(A)(i) * * *" (Paragraph (2)(A)(i) concerns the issuance of documents that are set forth by a secure printing process or other secure process.); (2) include an odometer disclosure statement and other information as NHTSA deems necessary; and (3) be submitted to the State by the person granted the power of attorney. It also requires NHTSA's rule to provide for the retention of a copy of the power of attorney and to ensure that the person granted the power of attorney completes the disclosure on the title consistent with the disclosure on the power of attorney form.

**Scope**

Consistent with the statutory mandate, this interim final rule grants, in whole or in part, three of the petitions for reconsideration. This interim final rule also implements the portion of the Pipeline Safety Reauthorization Act of 1988 that concerns the use of powers of attorney to disclose mileage.

NHTSA has also granted, in whole or in part, four petitions for reconsideration in a Notice of Proposed Rulemaking (NPRM) published in today's **Federal Register**. Generally, the NPRM concerns the definition of transferor and transferee with regard to the person who acts as agent for the transferor and transferee. It also concerns the relationship between the retention requirement applicable to dealers and distributors and the requirement that the transferee's signature appear on the odometer disclosure statements.

NHTSA has denied, in whole or in part, three petitions for reconsideration of the final rule published on August 5, 1988, because they are inconsistent with the new statute. For reasons discussed in the document denying the petitions, two other petitions were also denied. The denial notice is published in today's **Federal Register**.

**Misuse of Powers of Attorney in Odometer Fraud Schemes**

Although the July 1987 proposed rule to implement the Truth in Mileage Act did not include a regulatory provision explicitly concerning the use of powers of attorney, we stated in the preamble to the proposed rule that we recognize that powers of attorney are necessary in certain transactions. Someone acting on behalf of a deceased or incompetent owner would use a power of attorney from those owners to transfer the vehicles to a third party. In addition, the spouse of overseas military personnel, or of someone out of town or otherwise unavailable, may have a power of attorney from a husband or wife to transfer a vehicle to a third party. However, we emphasized that powers of attorney that allow a person to sign a disclosure as both the transferor and transferee result in only one party to the transaction being aware of the previous mileage disclosures. This could jeopardize the integrity of the "paper trail," the evidence of rollbacks that Congress intended to enhance by enacting the Truth in Mileage Act. 52 FR 27026 (1987).

The American Association of Motor Vehicle Administrators (AAMVA), the Wisconsin Department of Transportation (Wisconsin), and the National Association of Consumer Agency Administrators (NACAA) agreed with our position. AAMVA noted that a power of attorney that allows a person to sign the disclosure as both the buyer and the seller creates a situation ripe for fraud, if that person is intent on rolling back the vehicle's odometer. Several of AAMVA's members concurred in this position. Wisconsin suggested that a new paragraph be added to section 580.5 providing that no person may sign a disclosure as both the transferor and transferee.

Other commenters, concerned that the title had to be present at the time of sale ("title present"), hoped that the use of a power of attorney would ease the burden that title present might have imposed. A coalition of commenters (the "coalition"), consisting of AAMVA, the National Auto Auction Association (NAAA), the National Automobile Dealers Association (NADA), the National Independent Automobile Dealers Association (NIADA), the Automotive Trade Association Executives, and the American Car Rental Association, suggested the use of a special power of attorney. (Although the coalition used the term "secure power of attorney," we are referring to its suggestion by the term "special power of attorney." This helps to differentiate between the statutorily permitted secure power of attorney and the coalition's suggestion.) The coalition proposed that this special power of attorney would (1) Be set forth by a secure process; (2) contain the appropriate Federal odometer disclosure statement; and (3) be fully completed, dated, and signed by the transferee. Upon receipt of the transferor's title, the initial transferee would negotiate the title and complete the transferor's statement based on the transferor's special power of attorney and mileage disclosure thereon. The title, together with the special power of attorney and all subsequent reassignments, would be presented to the State with any application for title.

We reviewed AAMVA's comments and the suggestions of Wisconsin and the coalition in light of our investigative experience which showed that powers of attorney had been abused in the furtherance of odometer fraud schemes. The following two schemes, uncovered during NHTSA's investigations, are illustrative of the use of a power of attorney to commit odometer fraud:

(A) The transferor, a leasing company, sold several vehicles to a wholesale dealer and gave this dealer a power of attorney to execute the odometer disclosure statements on its behalf. The buying dealer rolled back the odometer on the vehicles, entered the lower mileage on the disclosure statements, and signed the disclosures as both the buyer and the seller. The buyer then sent a copy of the statements to the leasing company where they were filed.

(B) A new car dealer purchased a used vehicle and received a separate odometer disclosure staement on which his transferor certified that the odometer reflected the actual mileage of the vehicle. The new car dealer sold the car before he received the title, certifying that the odometer reflected the vehicle's actual mileage. The new car dealer then received the title, which had a blatantly altered odometer reading in the reassignment space on the reverse side of the title. Using the power of attorney that he received from his buyer, the new car dealer signed the disclosure as both the transferor and transferee. He never advised his buyer of the mileage problem. [Note: Other title problems that could be ignored by unscrupulous persons include higher mileage on the face of the title than on the reassignment on the reverse side and a certification that the odometer reading does not reflect the actual mileage.]

Based on the comments from AAMVA, NACAA, and Wisconsin and our own investigative experience, we adopted Wisconsin's suggestion and added a new § 580.5(h). This provision prohibits a person from signing the disclosure as both the transferor and transferee in the same transaction.

We did not adopt the suggestion of the coalition of commenters for several reasons. First, we had modified the proposed requirement in the NPRM of July 1987 that the title be present at the time of transfer of ownership and addressed the primary concern of the commenters by permitting the disclosure to be made "in connection with the transfer of ownership," rather than "at the time of transfer of ownership." Second, we were concerned that the coalition's suggestion would interfere with the integrity of the paper trail, which Congress intended to enhance by enacting the Truth in Mileage Act. Under the coalition's suggestion, only one party to the transfer would see the odometer disclosure (which would have been on the title). The power of attorney could be easily discarded and a new one forged and submitted to the State by any of the parties to subsequent transfers, since the issuance of the special power of attorney forms would not be controlled in any way. Finally, this process would place a burden on State titling offices to review additional documentation, check for conformity of the information contained on the documents, and maintain additional records. Accordingly, the final rule of August 1988 implemented the Truth in Mileage Act, while allowing the States the maximum discretion in complying with these requirements. 53 FR 29469, 29472, 29475 (1988).

**Petitions for Reconsideration**

In petitions filed with the agency, NADA, NIADA, and NAAA asked NHTSA to reconsider § 580.5(h), the provision which prohibits a person from signing the disclosure as the transferor and transferee in the same transaction. The agency also received many letters in support of the petitions. The petitioners claimed that customers would not return to dealers to sign the disclosure on the title. They alleged that a customer's failure to return would result in costs associated with locating these people, administrative costs for mailing and/or duplicating titles, and increased inventory costs in States where the dealer must have the title present at time of sale. This would result in higher vehicle prices as dealers would pass these expenses on to the consumer. Alternatively, they argued that if customers did return, this return visit would result in lost time at work and other costs. They also claimed that a person signing the disclosure as the buyer and the seller did not create a situation ripe for fraud, that the provision conflicted with State laws and was contrary to Federal law. Additional information concerning these petitions is included in the denial of petitions for reconsideration published in today's **Federal Register**.

The petitioners asked that NHTSA eliminate section 580.5(h). Alternatively, the petitioners suggested that NHTSA permit the use of a special power of attorney or require title sets, a two-part title system where the owner holds the title and the lienholder holds a notice of security interest filing.

**Congressional Mandate**

Before the agency could fully consider these petitions, Congress enacted the Pipeline Safety Reauthorization Act, Pub. L. 100-561. Section 401 of the Act, which amends section 408(d)(1) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1988(d)(1), concerns the use of limited powers of attorney in connection with mileage disclosure. The purpose of this provision is to resolve a technical problem for purchaser: of used motor vehicles (dealers), without increasing the burden on States or lessening our ability to fight odometer fraud. 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Whittaker). Congress determined that NHTSA's August 1988 final rule, which prohibits a person from signing an odometer disclosure statement as both the transferor and transferee in the same transaction, could have the effect of precluding the use of a power of attorney in certain instances. Recognizing that the Truth in Mileage Act of 1986 requires a disclosure, including the transferee's signature, on the title, Congress found that limiting the use of powers of attorney could cause an undue burden on dealers and consumers when a consumer's title is held by a bank or other lienholder. Because the consumer does not have the vehicle's title in these instances, the consumer, as a transferor, would be unable to complete the disclosure on the title unless: (1) The consumer returned to the dealer after the dealer paid off the lien and received the title from the lienholder, or (2) the title was mailed by the dealer to the consumer, completed by the consumer, and mailed back to the dealer. Both of these alternatives were rejected by Congress. "It is not reasonable to assume that the consumer will come back to the dealer several days or weeks later to fill in a title received from the bank by the dealer after paying off the lien. It is also not safe to rely on the mails to send the valuable title document to the consumer or to rely on the consumer to return the document in a timely fashion." 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Dingell).

To resolve the problem and alleviate potential costs for dealers and consumers, the new law specifies that a power of attorney authorizing the dealer to disclose mileage on the title on behalf of the consumer may be used when the transferor's title document is physically held by a lienholder, if otherwise permitted by State law. The new law does not require the States to allow the use of a power of attorney for the purpose of mileage disclosure. However, if a State chooses to permit the use of powers of attorney in connection with mileage disclosure, the State itself must issue the power of attorney form, and the form must be consistent with the requirements of the law and the regulations promulgated thereunder. The new law directs the agency to prescribe the form and content of the power of attorney/disclosure document and reasonable conditions for its use by the transferor. More specifically, the new law requires that the form: (1) "be issued by a State to transferees in accordance with paragraph (2)(A)(i) * * *" (Paragrpah (2)(A)(i) concerns the issuance of documents that are set forth by a secure printing process or other secure process.); (2) include an odometer disclosure statement and other information as NHTSA deems necessary; and (3) be submitted to the State by the person granted the power of

VOL 54 ISS 44 MR 8 1989 UMI

attorney. It also requires NHTSA to provide for the retention of a copy of the power of attorney form and to ensure that the person granted the power of attorney completes the disclosure on the title consistent with the disclosure on the power of attorney form.

We note that in some States, a secure power of attorney is not necessary to ensure that the mileage disclosure of the customer trading in a vehicle to a dealer is included on the vehicle's title document. For example, some States record all lien information on computerized recordkeeping systems and allow the registered owner to hold the title document. Other States have adopted a two-part title system under which the registered owner holds the title document and the lienholder holds a notice of security interest filing. Under either system, because the vehicle owner would have the title document, he could make the disclosure on the title and would not need to use a power of attorney form. In these States, the provisions of the new law would not apply, and the disclosure signed by the transferor would continue to be required on the vehicle's title document.

**Interim Final Rule**

This notice is published as an interim final rule, without prior notice and opportunity to comment. NHTSA believes that there is good cause for finding that notice and comment rulemaking is impracticable, unnecessary, and contrary to the public interest in this instance, since it would prevent compliance with the February 1, 1989 statutory deadline for issuance of a final rule. This finding is also based on the agency's view that given the April 29, 1989 effective date of NHTSA's August 1988 final rule which could result in an undue burden on dealers and consumers when a consumer's title is held by a bank or other lienholder, relief from the August 1988 rule is imperative.

As an interim final rule, this regulation is fully in effect and binding after its effective date, unless NHTSA issues a permanent final rule thirty days prior to that time. No further regulatory action by NHTSA is essential to the effectiveness of this rule. However, in order to benefit from comments which interested parties and the public may make, we are requesting that comments be submitted to the docket for this notice. All comments submitted in response to this notice will be considered by the agency. Following the close of the comment period, NHTSA will publish a notice responding to the comments and, if appropriate, NHTSA will amend the provisions of this rule.

Consistent with the provisions of the new law concerning the security of the power of attorney forms, this interim final rule revises § 580.4, which concerns the security of title documents. Although the legislative history indicates that the power of attorney forms must be "no less secure than the title document itself", 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Dingell), we believe that we can satisfy our statutory obligation to require secure forms and avoid unnecessary financial burdens upon the States by including a provision that is consistent with our position on the security of reassignment documents. Since the August 1988 final rule requires that reassignment documents be set forth by "a secure process", not necessarily the same process used to secure the title, this rule requires that the power of attorney forms also be set forth by "a secure process". Accordingly, we are changing the title of § 580.4 to read "Security of titles documents and power of attorney forms", and we are amending that section to require that power of attorney forms issued pursuant to § 580.13 and § 580.14 be set forth by a secure process.

The new law does not give NHTSA explicit statutory authority to require the States to control the power of attorney forms by any type of numbering system. Therefore, we have not limited the administrative discretion of the States in this area even though we recognize that it is common practice to control secure documents. This is also consistent with our position concerning reassignment documents. However, nothing in the Act or this rule should be read to preclude a State from using control techniques on these documents.

Since section 401 of the Pipeline Safety Reauthorization Act has the effect of allowing a person to sign an odometer disclosure statement on the title as both the transferor and the transferee in specified circumstances, we are amending § 580.5(h), which prohibits a person from signing an odometer disclosure statement as both the transferor and transferee in the same transaction. This amendment to § 580.5(h) permits a person to sign an odometer disclosure statement as both the transferor and transferee if the requirements of the new § 580.13 and § 580.14, which NHTSA is adding below, have been met.

In accordance with the Congressional mandate, we are adding a new § 580.13. Under this section, if permitted by State law, a transferor whose motor vehicle title document is physically held by a lienholder may give his transferee a power of attorney for the purpose of mileage disclosure on the title document. The power of attorney must be on Part A of a secure form issued by the State and must contain a space for the transferor to disclose the mileage.

The disclosure required to be made by the transferor to the transferee on the power of attorney form parallels the disclosure required to be made by the transferor to the transferee on the title and on a separate odometer disclosure statement. While this rule sets forth the information which must be disclosed, we are adding, in Appendix E, a sample power of attorney form that the States which elect to provide power of attorney forms may adopt. The form must be separated into parts A, B, and C. However, each State is free to organize, in each part, the information required by this rule in any way it wishes.

As required by the new law and to ensure the integrity of the paper trail, we are requiring the transferee exercising the power of attorney to restate the mileage on the transferor's title exactly as it appears on the transferor's disclosure on the power of attorney form. In addition, this rule requires the transferee to submit the original power of attorney form to the State with an application for title and the transferor's title. This could be accomplished at one of two times. The transferee could apply for title in his own name and submit the secure power of attorney form and his transferor's title. Alternatively, the transferee could submit the secure power of attorney form after selling the vehicle, with the title and his purchaser's title application, provided his purchaser permits him to apply for title on behalf of the purchaser. As noted by Representative Clement, "Limiting the use of the power of attorney to this "first sale" instance should assist auto dealers in completing the sales transaction while affording sufficient safeguards against odometer fraud." 134 Cong. Rec. H10081 (daily ed. October 12, 1988) (remarks of Rep. Clement). It would ensure that the State would be able to compare the transferor's disclosure on the power of attorney form with the transferee's disclosure, on behalf of the transferor, made on the title pursuant to the power of attorney. If the transferee were not required to submit the power of attorney to the State with the application for title and the transferor's title, the integrity of the paper trail would be at risk, because subsequent transferors could discard the power of attorney, forge a new one, and alter the mileage on the title. (As noted above, we recognize that even with securely printed titles, some alterations have been, and may continue to be, undetected upon initial review by State Departments of Motor Vehicles.) Additionally, the paper trail would be in jeopardy if the transferee submitted only the power of attorney form and no title documents. This could result in the transfer of the vehicle to an out-of-state buyer. The title would be in one State and the secure power of attorney form in another; they could not be easily compared. This would be similar to the problems with the current use of a separate odometer disclosure statement. Therefore, we believe that this submission of the original power of attorney form to the titling State is necessary to prevent the misuse of the forms and to facilitate enforcement of the anti-fraud provisions of the law.

As requested during the debate in the House of Representatives on the amendment, NHTSA has also considered other instances when a secure power of attorney may be necessary so as not to alter or interfere with proper business transactions. We have considered whether to permit a transferee to give his power of attorney to his transferor for the purpose of acknowledging the mileage disclosure. For example, if the transferor is a dealer who does not have possession of the title, because the vehicle was a trade-in and the lienholder has not yet released title, should the buyer, the transferee, be permitted to give a power of attorney to the transferor/selling dealer to acknowledge the mileage disclosure on his behalf? This power of attorney from the transferee to the transferor would allow the tranferor to sign the title as both the transferor and transferee in the same transaction. To alleviate any potential commercial or business problems that could result in costs to dealers when they have not yet received the title upon which they must make a mileage disclosure, because the title is physically held by the lienholder of the person who traded in a car to the dealer, we are adding a new § 580.14 that permits a transferee to give his power of attorney to his transferor for the purpose of reviewing the title and any reassignment documents to determine whether there are any mileage discrepancies and, if there are no mileage discrepancies, to sign the title, acknowledging the disclosure. This power of attorney must include a disclosure from the transferor to the transferee that parallels the disclosure required to be made by the transferor to the transferee on the title document and on the separate odometer disclosure statement. In addition, because this power of attorney would allow the same person to sign the title as the transferor and transferee in the same transaction, the appointment of the transferor as the tansferee's attorney-in-fact must be made on Part B of the same secure power of attorney form, issued by a State, upon which the transferor was appointed the attorney-in-fact by his transferor pursuant to § 580.13. This will enable purchasers to examine the previously issued power of attorney for alterations, erasures, and other marks, and to learn the name of the prior owner without the additional cost of a title search. This is the same information that purchasers would receive if the title was not held by a lienholder since, under the Truth in Mileage Act of 1986, the transferor is required to disclose mileage on the vehicle's title, if the title contains a space for the disclosure. This rule requires that a transferee who is granted a power of attorney from his transferor and who applies for title in his own name must show his purchaser, upon his purchaser's request, a copy of the previous owner's title, including the odometer disclosure completed on behalf of the previous owner, and a copy of the power of attorney form completed by the previous owner. Similarly, if a purchaser decides not to appoint his transferor as his attorney-in-fact pursuant to § 580.14, the transferor must show his purchaser a copy of the previous owner's title and a copy of the power of attorney form completed by the previous owner.

To ensure that a person who exercises a power of attorney, either under § 580.13, alone, or under §§ 580.13 and 580.14, is fully aware of his obligation and his liability for any action that is inconsistent with the power of attorney, this interim final rule requires, under a new § 580.15, that the person exercising a power of attorney, either under § 580.13 or under §§ 580.13 and 580.14, complete, on Part C of the secure power of attorney form issued by the State, a certification that he has received and reviewed the title and any reassignment documents and that there are no indications of mileage discrepancies. Any mileage discrepancies void the powers of attorney. A violation of this section could result in fines and/or imprisonment.

We have also considered other instances in which a secure power of attorney that would allow a person to sign a disclosure as the transferor and transferee in the same transaction should be permitted. Some have suggested that a secure power of attorney should be permitted when a title is lost or misplaced. We have carefully balanced the potential convenience of permitting a power of attorney in this circumstance against the serious potential for undermining the law enforcement purposes of the law. (As we have explained above, a person signing a mileage disclosure as both the transferor and transferee creates a situation ripe for fraud when the person signing the disclosure is intent on rolling back the odometer.) On balance, we have concluded that the possible increase in inconvenience does not outweigh the increased opportunity for odometer fraud. Furthermore, we have not been made aware of any business or commercial problems associated with this conclusion that would be comparable to the problems associated with titles physically held by lienholders. Especially because lost or misplaced titles can be replaced, and because we can limit the possible misuse of secure power of attorney forms, we have not extended the use of these secure powers of attorneys to situations in which the transferor's title is lost or misplaced.

NHTSA invites comments on other situations in which a secure power of attorney form may be necessary and appropriate.

Finally, section 401 of the Pipeline Safety Reauthorization Act requires NHTSA to promulgate a regulation that provides for the retention of a copy of the power of attorney form. Therefore, we are amending § 580.6 which concerns odometer disclosure statement retention by adding a new paragraph (c). Under this new paragraph, motor vehicle dealers and distributors who are granted a power of attorney by their transferor are required to retain, for five years, a photostat, carbon, or other facsimile copy of each power of attorney form that they receive. These documents must be retained at the primary place of business of the dealer or distributor in an order that is appropriate with business requirements and that permits systematic retrieval. This new paragraph (c) is consistent with the retention requirements of the August 1988 final rule that is applicable to dealers, distributors, and lessors. Like that final rule, the storage provision of this amendment is phrased broadly to include any media by which information may be stored, provided there is no loss of information.

**Federalism Assessment**

Congress found that limiting the use of powers of attorney in connection with mileage disclosure could cause an undue burden on dealers and consumers when a consumer's title is physically held by a bank or other lienholder. To resolve the

VOL 54 ISS 44 MR 8 1989 UMI

problem and alleviate potential costs for dealers and consumers, the new law specifies that a power of attorney may be used, if otherwise permitted by State law. The law specifies that the form be securely printed and include a disclosure. This interim final rule does not impose any requirements upon the States other than those imposed by the law. Nevertheless, this action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this interim final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The States may decide not to allow the use of powers of attorney in connection with mileage disclosure and, therefore, would not be required to print conforming forms.

**Regulatory Impacts**

*A. Costs and Benefits to Dealers, States, and Consumers*

NHTSA has analyzed this rule and determined that it is neither "major" within the meaning of Executive Order 12291, nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. A regulatory evaluation of the impacts of this proposal has been prepared and place in Docket 87-09, Notice 9. Any interested person may obtain a copy of this regulatory analysis by writing to NHTSA Docket Section, 400 Seventh Street, SW., Washington, DC 20590, or by calling the Docket Section at (202) 366-4949.

*B. Small Business Impacts*

The agency has also considered the impacts of this rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. The net increase in annual operating costs resulting from this interim final rule would be an estimated $4.1 million for States and localities and an estimated $4.5 million to $8.6 million to dealers. We estimate that there are 75,000 dealers that would be effected by this rule. Therefore, the cost to each dealer would be approximately $60.00 to $80.00. Small businesses (dealers) will need to spend the same time executing each form as will large businesses (dealers). It is not possible to minimize this burden. However, since these small entities will make fewer sales than large businesses, they will spend less time on these forms. Furthermore, while the States may charge dealers for these secure power of attorney form, the estimated cost of these documents is only approximately five cents per form. Accordingly, no regulatory flexibility analysis has been prepared. However, the agency invites comments from small businesses on this issue.

*C. Environmental Impacts*

NHTSA has considered the environmental implications of this rule, in accordance with the National Environmental Policy Act, and determined that it will not significantly affect the human environment. Accordingly, an environmental impact statement has not been prepared.

*D. Paperwork Reduction Act*

The office of Management and Budget (OMB) has already approved NHTSA's information collection requirements that require consumers, dealers, distributors, lessors, and auction companies to disclose and/or retain odometer disclosure information. [OMB #2127-0047]. This rule expands the scope of those requirements to include transferrors who authorize their transferee to exactly restate the mileage disclosure on the title as they have disclosed it on a power of attorney form issued by a State. It also expands the scope of the requirements to include transferees who use a secure power of attorney form to authorize their transferors to review the title for discrepancies and acknowledge mileage disclosure on their behalf. Finally, this rule expands the scope of the information collection requirements to include dealers and distributors who retain a copy of the secure power of attorney form. Therefore, these new requirements are also considered to be information collection requirements as that term is defined by OMB in 5 CFR Part 1320. Accordingly, this rule will be submitted to OMB for its approval pursuant to the requirements of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* Comments on these information collection requirements should be submitted to Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Office for NHTSA. It is requested that comments sent to OMB also be sent to the NHTSA rulemaking docket for this proposed action.

**Public Comments**

Interested persons are invited to submit comments on this interim final rule. It is requested, but not required, that ten copies be submitted.

All comments must not exceed fifteen pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the fifteen page limit. This limitation is intended to encourage comments to detail their preliminary arguments in a concise fashion.

All comments received before the close of business on the comment closing date listed above will be considered and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Following the close of the comment period, NHTSA will publish a notice responding to the comments and, if appropriate, NHTSA will amend the provisions of this rule. Comments received too late for consideration will be considered as suggestions for future rulemaking action. The agency will continue to file relevant information as it becomes available. It is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments by the docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

In consideration of the foregoing, 49 CFR Part 580 is amended as follows:

**PART 580-[AMENDED]**

1. The authority citation for Part 580 continues to read as follows:

**Authority:** 15 U.S.C. 1988; delegation of authority at 49 CFR 1.50(f) and 501.8(e)(1).

2. Section 580.4 is revised to read as follows:

**§ 580.4 Security of title documents and power of attorney forms.**

Each title shall be set forth by means of a secure printing process or other secure process. In addition, any other documents which are used to reassign the title shall be set forth by a secure process. Power of attorney forms issued pursuant to §§ 580.13 and 580.14 shall be issued by the State and shall be set forth by a secure process.

3. Section 580.5 is amended by revising paragraph (h) to read as follows:

**§ 580.5 Disclosure of odometer information.**

* * * * *

(h) No person shall sign an odometer disclosure statement as both the transferor and transferee in the same transaction, unless permitted by § 580.13 or § 580.14.

4. Section 580.8 is amended by adding paragraph (c) to read as follows:

**§ 580.8 Odometer disclosure statement retention.**

* * * * *

(c) Dealers and distributors of motor vehicles who are granted a power of attorney by their transferor pursuant to § 580.13, or by their transferee pursuant to § 580.14, shall retain for five years a photostat, carbon, or other facsimile copy of each power of attorney that they receive. They shall retain all powers of attorney at their primary place of business in an order that is appropriate to business requirements and that permits systematic retrieval.

5. Section 580.13 is added to read as follows:

**§ 580.13 Disclosure of odometer information by power of attorney.**

(a) If the transferor's title is physically held by a lienholder and if otherwise permitted by State law, the transferor may give a power of attorney to his transferee for the purpose of mileage disclosure. The power of attorney shall be on a form issued by the State to the transferee that is set forth by means of a secure printing process or other secure process, and shall contain, in Part A, a space for the information required to be disclosed under paragraphs (b), (c), (d), and (e) of this section and in Part B, a space for the information required to be disclosed under § 580.14. The form shall contain, in Part C, a space for the certification required to be made under § 580.15.

(b) In connection with the transfer of ownership of a motor vehicle, each transferor whose title is physically held by a lienholder and who elects to give his transferee a power of attorney for the purpose of mileage disclosure, must appoint the transferee his attorney-in-fact for the purpose of mileage disclosure and disclose the mileage on the power of attorney form issued by the State. This written disclosure must be signed by the transferor, including the printed name, and contain the following information:

(1) The odometer reading at the time of transfer (not to include tenths of miles);

(2) The date of transfer;

(3) The transferor's name and current address;

(4) The transferee's name and current address; and

(5) The identity of the vehicle, including its make, model, year, body type, and vehicle identification number.

(c) In addition to the information provided under paragraph (b) of this section, the power of attorney form shall refer to the Federal law and state that providing false information or the transferee's failure to submit the form to the State may result in fines and/or imprisonment. Reference may also be made to applicable State law.

(d) In addition to the information provided under paragraphs (b) and (c) of this section,

(1) The transferor shall certify that to the best of his knowledge the odometer reflects the actual mileage; or

(2) If the transferor knows that the odometer reading reflects mileage in excess of the designed mechanical odometer limit, he shall include a statement to that effect; or

(3) If the transferor knows that the odometer reading differs from the mileage and the difference is greater than that caused by calibration error, he shall include a statement that the odometer reading does not reflect the actual mileage and should not be relied upon. This statement shall also include a warning notice to alert the transferee that a discrepancy exists between the odometer reading and the actual mileage.

(e) The transferee shall sign the power of attorney form, print his name, and return a copy of the power of attorney form to the transferor.

(f) Upon receipt of the transferor's title, the transferee shall complete the space for mileage disclosure on the title exactly as the mileage was disclosed by the transferor on the power of attorney form. The transferee shall submit the original power of attorney form to the State, with the application for title and the transferor's title.

6. A section 580.14 is added to read as follows:

**§ 580.14 Power of attorney to review title documents and acknowledge disclosure.**

(a) If the transferor does not have the title document of the vehicle because it is physically held by the lienholder of his transferor and if otherwise permitted by State law, the transferee may give a power of attorney to his transferor to review the title and any reassignment documents for mileage discrepancies, and if no discrepancies are found, to acknowledge disclosure on the title. The power of attorney shall be on a form issued by the State to the transferee that is set forth by means of a secure printing process or other secure process, and shall contain, in Part A, the information required to be disclosed under § 580.13. The form shall also contain, in part B, a space for the information required to be disclosed under paragraphs (b), (c), (d), and (e) of this section and, in Part C, a space for the certification required to be made under § 580.15.

(b) In connection with the transfer of ownership of a motor vehicle, each transferee of a transferor who does not have the title document because it is physically held by the lienholder of his transferor and who was granted a power of attorney by his transferor for the purpose of mileage disclosure, may appoint his transferor as his attorney-in-fact to review the title and any reassignment documents. This power of attorney must include a mileage disclosure from the transferor to the transferee and must be signed by the transferor, including the printed name, and contain the following information:

(1) The odometer reading at the time of transfer (not to include tenths of miles);

(2) The date of transfer;

(3) The transferor's name and current address;

(4) The transferee's name and current address; and

(5) The identity of the vehicle, including its make, model, year, body type, and vehicle identification number.

(c) In addition to the information provided under paragraph (b) of this section, the power of attorney form shall refer to the Federal law and state that providing false information or the transferee's failure to submit the form to the State may result in fines and/or imprisonment. Reference may also be made to applicable State law.

(d) In addition to the information provided under paragraphs (b) and (c) of this section.

(1) The transferor shall certify that to the best of his knowledge the odometer reflects the actual mileage; or

(2) If the transferor knows that the odometer reading reflects mileage in excess of the designated mechanical odometer limit, he shall include a statement to that effect; or

(3) If the transferor knows that the odometer reading differs from the mileage and the difference is greater than that caused by calibration error, he shall include a statement that the odometer reading does not reflect the actual mileage and should not be relied upon. This statement shall also include a warning notice to alert the transferee that a discrepancy exists between the odometer reading and the actual mileage.

(e) The transferee shall sign the power of attorney form, print his name.

(f) The transferor shall give a copy of the power of attorney form to his transferee.

(g) If a transferee elects to return to his transferor to sign the disclosure on the title when the transferor obtains the title from the lienholder and does not

VOL 54 ISS 44 MR 8 1989 UMI

transferor and transferee requested that NHTSA eliminate this provision. Alternatively, they ask NHTSA to allow a person to use "a special power of attorney" to appoint the other party to the transfer as his attorney-in-fact to sign the disclosure on his behalf. The petitioners consider "a special power of attorney" to be one that is (1) set forth by a secure printing process; (2) contains the appropriate Federal disclosure; (3) is completed, signed, and dated by the transferee; and (4) submitted to the State with the title and all subsequent reassignments. Before NHTSA could fully consider these petitions, Congress passed an amendment to the Truth in Mileage Act, which addresses many of the points raised by these petitions. NHTSA has issued an interim final rule, which appears elsewhere in today's Federal Register, to implement the new law. To the extent that they seek changes inconsistent with today's rule, NHTSA has denied the petitions in part, including the requests to eliminate entirely the provision of the final rule that prohibits a person from signing the odometer disclosure statement as the transferor and transferee in the same transaction or to permit the use of a special power of attorney. In addition, the petition concerning the security of documents asked for no specific relief and it is also denied. Finally, we have denied the petition that requested that the exemption from the disclosure requirements for vehicles ten years old and older be included on the disclosure statements.

**SUPPLEMENTARY INFORMATION:**

**Background**

To implement the Truth in Mileage Act of 1986 and make some needed changes in the Federal odometer rules, the National Highway Traffic Safety Administration (NHTSA) published a notice of proposed rulemaking (NPRM) on July 17, 1987. 52 FR 27022 (1987). The agency received numerous comments on the NPRM, representing the opinions of new and used car dealers, auto auctions, leasing companies, State motor vehicle administrators, and enforcement and consumer protection agencies. Each of the comments was considered and a final rule was published on August 5, 1988. 53 FR 29464 (1988).

As required by the Truth in Mileage Act, the August 1988 final rule requires the transferor of a motor vehicle to provide mileage disclosure on the title document or, if the title document does not include a space for the mileage disclosure (during the phase-in period), or if the vehicle has not been previously titled, it requires the transferor to make a written disclosure of mileage on a separate document. Also as required by that statute, the final rule requires that title documents be manufactured or otherwise set forth by a secure process to deter counterfeiting or alteration; requires that at the time of issue, the titles include the mileage disclosure; adds disclosure requirements for lessors and lessees; and adds retention requirements for lessors and auction companies. In addition, consistent with the statute, this rule amends the form and content of the odometer disclosure statement. The rule also prohibits a person from signing the disclosure as both the transferor and transferee in the same transaction, in order to guard against a situation where only one party to the transaction would be aware of the disclosure. Finally, this rule clarifies the definition of transferor and transferee and extends the record retention requirement for dealers and distributors.

The Agency received seven petitions for reconsideration of the final rule. In addition, we received numerous letters concerning the final rule and supporting the petitions. These petitions requested that NHTSA reconsider the provisions of the final rule that: (1) Prohibit a person from signing the odometer disclosure statement as both the transferor and transferee in the same transaction; (2) define "transferor" and "transferee"; (3) concern the "secure printing process" for titles and reassignment documents; (4) concern the language included on the odometer disclosure statement; and (5) require dealers and distributors to retain, for five years, a copy of every odometer disclosure statement, including the transferee's signature, that they issue and receive. These petitions and letters have been placed in the docket. Before the Agency could fully consider these documents, Congress enacted the Pipeline Safety Reauthorization Act of 1988, Pub. L. 100-561.

Section 401 of the Pipeline Safety Reauthorization Act, which amends section 408(d)(1) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1988(d)(1), concerns the use of certain powers of attorney in connection with the required mileage disclosure. Although the Truth in Mileage Act generally requires that a vehicle seller (or other transferor) make the required disclosure on the vehicle's title, Congress determined that, under certain limited conditions when the title document is physically held by a lienholder, the transferor should not be precluded from making the disclosure on a secure power of attorney form which includes the required odometer disclosure information. This secure power of attorney form would be given to a buyer (transferee), authorizing him to restate, on the title document, the mileage disclosed by the seller on the secure power of attorney form, if State law otherwise permits. Congress found that precluding such uses of powers of attorney could cause an undue burden on dealers when a consumer's title is held by a bank or other lienholder. Because the consumer does not have the vehicle's title document, the consumer would be unable to complete the disclosure on the title unless: (1) The consumer returned to the dealer after the dealer paid off the lien and received the title from the lienholder, or (2) the title was mailed by the dealer to the consumer, completed by the consumer, and mailed back to the dealer. Both of these alternatives were seen by Congress as interfering with usual commercial transactions. 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Dingell).

To resolve this problem and to alleviate potential costs for dealers and consumers, the new amendment specifies that a secure power of attorney form, which includes a mileage disclosure by the transferor, may be used when the transferor's title document is physically held by a lienholder, if otherwise permitted by State law. The new law directs the agency to prescribe the form and content of the power of attorney/disclosure document and reasonable conditions for its use by the transferor, "consistent with this Act and the need to facilitate enforcement thereof." More specifically, the new law requires that the form: (1) Be issued by a State to transferees in accordance with paragraph (2)(A)(i) * * *" (Paragraph (2)(A)(i) concerns the issuance of documents that are set forth by a secure printing process or other secure process.); (2) include an odometer disclosure statement and other information as NHTSA deems necessary; and (3) be submitted to the State by the person granted the power of attorney. It also requires NHTSA's rule to provide for the retention of a copy of the power of attorney and to ensure that the person granted the power of attorney completes the disclosure on the

give his transferor a power of attorney to review the title and any reassignment documents, upon the transferee's request, the transferor shall show to the transferee a copy of the power of attorney that he received from his transferor.

(b) Upon subsequent transfer of the vehicle and upon request of the purchaser, the transferor, who was granted the power of attorney by his transferor and who now holds the title to the vehicle in his own name, must show to his purchaser the copy of the previous owner's title and the power of attorney form.

7. A section 580.15 is added to read as follows:

**§ 580.15 Certification by person exercising power(s) of attorney.**

(a) A person who exercises a power of attorney either under § 580.13 alone, or under §§ 580.13 and 580.14 must complete a certification that he has reviewed the title and any reassignment documents for mileage discrepancies and that no discrepancies exist. This certification shall be under Part C and on the same form as the powers of attorney executed under §§ 580.13 and 580.14, and shall include:

(1) The signature and printed name of the person exercising the power of attorney;

(2) The address of the person exercising the power of attorney; and

(3) The date of the certification.

(b) Any mileage discrepancies void the powers of attorney.

8. An Appendix E is added to read as follows:

**Appendix E—Power of Attorney Disclosure Form**

**Warning:** This Form May Be Used Only When Title Is Physically Held By Lienholder. This Form Must Be Submitted To The State By The Person Exercising Powers Of Attorney. Failure To Do So May Result In Fines And/Or Imprisonment.

VEHICLE DESCRIPTION

Year _____ Make _____

Model _____ Body Type _____

Vehicle Identification Number _____

**Part A. Power of Attorney to Disclose Mileage**

Federal law (and State Law, if applicable) requires that you state the mileage upon transfer of ownership. Providing a false statement may result in fines and/or imprisonment.

I, _____ (transferor's name, Print) appoint _____ (transferee's name, Print) as my attorney-in-fact, to disclose the mileage, on the title for the vehicle described above, exactly as stated in my following disclosure.

I state that the odometer now reads _____ (no tenths) miles and to the best of my knowledge that it reflects the actual mileage unless one of the following statements is checked.

___ (1) I hereby certify that to the best of my knowledge the odometer reading reflect the mileage in excess of its mechanical limits.

___ (2) I hereby certify that the odometer reading is NOT the actual mileage.

WARNING—ODOMETER DISCREPANCY.

**[Docket Number 87-08; Notice 8]**

**RIN: 2127-AC42**

**Odometer Disclosure Requirements**

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Denial of petitions for reconsideration.

**SUMMARY:** This is in response to five petitions for reconsideration of the National Highway Traffic Safety Administration's final rule concerning odometer disclosure requirements. Numerous letters were also submitted on this subject. These petitions request that NHTSA reconsider the provisions of the final rule that: (1) Prohibit a person from signing the odometer disclosure statement as both the transferor and transferee in the same transaction; (2) require that titles and reassignment documents be set forth by a "secure printing process"; and (3) concern the information included on the odometer disclosure statement.

The petitions concerning the provision that prohibits a person from signing the odometer disclosure statement as both

VOL 54 ISS 44 MR 8 1989 UMI

title consistent with the disclosure on the power of attorney form.

Consistent with this statutory mandate, NHTSA has issued an interim final rule that is published elsewhere in today's **Federal Register**. That rule permits a person to sign an odometer disclosure statement as both the transferor and transferee in the same transaction, if the disclosure is based on a secure power of attorney. In addition, NHTSA has issued an NPRM that is also published in today's **Federal Register**. The NPRM attempts to clarify the definition of transferor and transferee by proposing a new definition for each of those terms. Finally, in response to the two petitions for reconsideration that concern the disclosure and retention requirements, that NPRM proposes to require the transferee to return a copy of a signed odometer disclosure statement to his transferor.

**Scope**

To the extent the petitions request relief that is not proposed to be granted in the NPRM or is not granted in the interim final rule, this notice denies, in whole or in part, five petitions for reconsideration. These petitions request that NHTSA reconsider the provisions of the final rule that: (1) Prohibit a person from signing the odometer disclosure statement as both the transferor and transferee in the same transaction; (2) require that titles and reassignment documents be set forth by a "secure printing process"; and (3) concern the information included on the odometer disclosure statement.

**Security for Motor Vehicle Titles**

The Truth in Mileage Act of 1986 requires that, beginning April 29, 1989, each State motor vehicle title must be set forth by a secure printing process or other secure process. To implement this statutory requirement, we proposed to define "secure printing process" and "other secure process" as "any process which deters and detects counterfeiting and/or unauthorized reproduction and allows alterations to be visible to the naked eye". 3M requested that the definition be amended to read, in lieu of "visible to the naked eye", "easily detected under recommended viewing conditions". 3M stated that the definition as proposed could be interpreted to mean without the aid of a verification device and asserted that any verification process that precludes the use of a supporting device was too restrictive. Because the intent of the Truth in Mileage Act is to provide a paper trail for the protection of consumers, we stated that any alteration should be visible to the purchaser who would not routinely have a verification device. We adopted the definition as proposed.

To implement the provisions of the Truth in Mileage Act that require the security of motor vehicle titles, we also proposed the addition of a new § 580.4. This section proposed to require that motor vehicle titles be set forth by a secure printing process or other secure process. It also proposed to require that any documents used to reassign the title be set forth by the same secure process. To assist the States in their efforts to issue motor vehicle titles that comply with the requirements of the Truth in Mileage Act and the regulations implementing the Act, we proposed to include an Appendix A consisting of a list of technologies that we deemed to be secure processes. We proposed that Appendix A would include intaglio, high resolution, and micro-line printing, security paper, erasure sensitive background inks, and security lamination. The comments concerning the proposed § 580.4 and Appendix A were divergent. 3M suggested that NHTSA require the title to be set forth by one of the secure processes in Appendix A and that Appendix A be amended to include all available security processes which would be ranked as to the level of security that they provide. The American Association of Motor Vehicle Administrators (AAMVA) and several member jurisdictions commented that Appendix A was superfluous and unnecessary, and requested that it be deleted. In addition, these commenters also requested that the agency permit reassignment documents to be printed by a secure process, not necessarily the same secure process as the title.

To allow for the maximum administrative discretion on the part of the States, we did not adopt 3M's suggestion to list and rank all secure processes. Appendix A was adopted with minor technical changes. We noted that the States are permitted to choose alternative methods of security beyond those listed in Appendix A. In addition, we adopted the suggestion of AAMVA and its member jurisdictions with regard to reassignment documents. Accordingly, the final rule of August 1988 permits reassignment documents to be set forth by a secure process, but not necessarily the same process as the title.

3M filed a petition for reconsideration. 3M stated, "* * * it is incumbent upon 3M to respond for reconsideration of the final ruling. 3M agrees with the intent of the final ruling, but feels that further clarification is required to prevent any misunderstanding of the assumptions made by NHTSA relative to 3M's security lamination and the consumer protection afforded by its inclusion on title documents issued by individual states." 3M then explained its security lamination and claimed that NHTSA's reference to 3M's security lamination "does not take the consumer verifiable feature into consideration and gives the impression that the intent of the law is not met with its incorporation."

Paragraph 2(b) of Appendix A lists security laminate under the heading: "Methods to allow alterations to be visible to the naked eye." NHTSA finds no inaccuracies concerning security lamination in the preamble to the final rule of August 1988, nor in Appendix A, and 3M fails to be specific in its allegations. Furthermore, 3M has not requested the agency to take any specific action. Therefore, 3M's petition for reconsideration is denied.

**Disclosure of Odometer Information: Exemptions**

With regard to the information concerning the odometer required to be disclosed by the transferor to the transferee, we proposed a new § 580.5. This section proposed to continue to require certain information that the agency had already required and to include some additional provisions. While the proposed regulation set forth the information which would be disclosed, it also included, in Appendices B and C, sample disclosure forms which could be followed. Appendix B was a sample disclosure form which a State may wish to include on its titles. Appendix C was a sample disclosure form which could be used if the vehicle was not titled on a title that conforms to the law and our regulations (during the phase-in period) or if the vehicle had not been previously titled, such as a new vehicle or a vehicle imported into the United States from a foreign country. With some minor changes, § 580.5 and Appendices B and C were adopted as proposed.

We also proposed a new § 580.6 which proposed to exempt certain transferors from issuing odometer disclosure statements. This section proposed to exempt the transferors that NHTSA currently exempts. Specifically, among other transferors, NHTSA proposed to continue to exempt a transferor of a vehicle that is twenty-five years or older from the requirements of issuing an odometer disclosure statement. We received numerous requests to lower the vehicle's age. AAMVA, several of its member jurisdictions, and a coalition of commenters (the "coalition") consisting of AAMVA, the National Automobile Dealers Association (NADA), the National Auto Auction Association (NAAA), the National Independent Automobile Dealers Association (NIADA), the Automotive Trade Association, and the American Car Rental Association, suggested that the exemption be given to the transferor of a vehicle that is ten years old and older. The National Association of Consumer Agency Administrators recommended that the absolute maximum age of a vehicle for which the transferor should be required to issue an odometer disclosure statement is fifteen years. The Director of the California Department of Motor Vehicles proposed that the regulation be changed to exempt transferors of vehicles that are six years or older. Oregon noted that the State legislature amended Oregon law to require odometer disclosure information only for vehicles eight years old and newer. NHTSA considered each of the suggestions and the August 1988 final rule exempts a transferor of a vehicle ten years old and older.

A private citizen filed a petition for reconsideration concerning the odometer disclosure requirements and the exemption for a transferor of a vehicle ten years old and older. Referring to Appendices B and C, he recommends that the exemption for vehicles ten years and older be incorporated into the disclosure forms. He feels that a statement noting the exemption would clarify the regulatory requirements for the benefit of persons who buy and sell automobiles for personal use.

While entitling his letter a petition for reconsideration, this individual does not explain why compliance with Appendices B and C of the rule is not practicable, is unreasonable, or is not in the public interest. *See*, 49 CFR 553.35. Rather, he seems to suggest that NHTSA amend the appendices. As noted in the preamble to the final rule, the appendices are examples and do not introduce any new requirements or restrictions into the law. 53 FR 29471 (1988). Therefore, what this individual is actually suggesting is that NHTSA amend the provisions concerning the disclosure of odometer information, § 580.5, to require the transferor to inform his transferee that, because the vehicle is ten years old or older, the transferor is not required to disclose the vehicle's mileage. To adopt this suggestion at this time could impose unnecessary financial burdens on the States that have already begun to revise their titles to conform with the requirements of the Truth in Mileage Act and the final rule. It could also impose similar burdens on dealers and distributors who have already placed orders for separate disclosure statements and/or sales contracts that contain odometer disclosure statements that meet all statutory and regulatory requirements. Furthermore, this suggested statement would not alert buyers and sellers to their legal obligations, but rather merely advise them of an exemption from those obligations. The benefits to be gained from this suggested statement would not outweigh the significant costs that could be imposed on the States and the automobile industry. Therefore, we are denying this petition, but may consider this suggestion at the time of any future rulemaking. We note that the States and dealers, distributors, and other transferors may include a provision of an odometer disclosure statement that a transferor of a vehicle ten years old or older is not required to disclose the vehicle's mileage to his transferee.

**Powers of Attorney**

*A. Background; Misuse in Odometer Fraud Schemes*

Although the July 1987 proposed rule to implement the Truth in Mileage Act did not include a regulatory provision explicitly concerning the use of powers of attorney, we stated in the preamble to the proposed rule that we recognize that powers of attorney are necessary in certain transactions. Someone acting on behalf of a deceased or incompetent owner would use a power of attorney from those owners to transfer the vehicles to a third party. In addition, the spouse of overseas military personnel, or of someone out of town or otherwise unavailable, may have a power of attorney from a husband or wife to transfer a vehicle to a third party. However, we emphasized that powers of attorney that allow a person to sign a disclosure as both the transferor and transferee result in only one party to the transaction being aware of the previous mileage disclosures. This could jeopardize the integrity of the "paper trail", the evidence of rollbacks that Congress intended to create by enacting the Truth in Mileage Act. 52 FR 27026 (1987).

The American Association of Motor Vehicle Administrators (AAMVA), the National Association of Consumer Agency Administrators (NACAA), and the Wisconsin Department of Transportation, Motor Vehicle Division, (Wisconsin) agreed with our position. AAMVA noted a power of attorney that allows a person to sign the disclosure as both the buyer and the seller creates a situation ripe for fraud, if that person is intent on rolling back the vehicle's odometer. Several of AAMVA's members concurred in this position. Wisconsin suggested that a new paragraph be added to § 580.5 providing that no person may sign a disclosure as both the transferor and transferee.

Other commenters, concerned that the title had to be present at the time of sale ("title present"), hoped that the use of a power of attorney would ease the burden that title present might have imposed. The coalition suggested the use of a special power of attorney. (Although the coalition used the term "secure power of attorney", we are referring to the coalition's suggestion by the term "special power of attorney". This will help to differentiate between the statutorily permissible secure power of attorney and the power of attorney proposed by the coalition.) The coalition proposed that this special power of attorney would (1) be set forth by a secure process; (2) contain the appropriate Federal odometer disclosure statement; and (3) be fully completed, dated, and signed by the transferee. Upon receipt of the transferor's title, the initial transferee would negotiate the title and complete the transferor's statement based on the transferor's special power of attorney and mileage disclosure thereon. The title, together with the special power of attorney and all subsequent reassignments, would be presented to the State with any application for title.

We reviewed AAMVA's comments and the suggestions of Wisconsin and the coalition in light of our investigative experience which showed that powers of attorney have been abused in the furtherance of odometer fraud schemes. The following two schemes, uncovered during NHTSA's investigations, are illustrative of the use of a power of attorney to commit odometer fraud:

(A) The transferor, a leasing company, sold several vehicles to a wholesale dealer and gave this dealer a power of attorney to execute the odometer disclosure statements on its behalf. The buying dealer rolled back the odometer on the vehicles, entered the lower mileage on the disclosure statements, and signed the disclosures as both the buyer and the seller. The buyer then sent a copy of the statements to the leasing company where they were filed.

(B) A new car dealer purchased a used vehicle and received a separate odometer disclosure statement on which his transferor certified that the odometer reflected the actual mileage of the vehicle. The new car dealer sold the car before he received the title, certifying

VOL 54 ISS 44 MR 8 1989 UMI

that the odometer reflected the vehicle's actual mileage. The new car dealer then received the title, which had a blatantly altered odometer reading in the reassignment space on the reverse side of the title. Using the power of attorney that he received from his buyer, the new car dealer signed the disclosure as both the transferor and transferee. He never advised his buyer of the mileage problem.

Note: Other title problems that could be ignored by unscrupulous persons include higher mileage on the face of the title than on the reassignment on the reverse side and a certification that the odometer reading does not reflect the actual mileage.

Based on the comments from AAMVA, NACAA, and Wisconsin and our own investigative experience, we adopted Wisconsin's suggestion and added a new § 580.5(h). This provision prohibits a person from signing the disclosure as both the transferor and transferee in the same transaction.

We did not adopt the suggestion of the coalition of commenters for several reasons. First, we had modified the proposed requirement in the NPRM of July 1987 that the title be present at the time of transfer of ownership and addressed the primary concern of the commenters by permitting the disclosure to be made "in connection with the transfer of ownership", rather than "at the time of transfer of ownership." Second, we were concerned that the coalition's suggestion would interfere with the integrity of the paper trail, which Congress intended to enhance by enacting the Truth in Mileage Act. Under the coalition's suggestion, only one party to the transfer would see the odometer disclosure (which would have been on the title). The power of attorney could be easily discarded and a new one forged and submitted to the State by any of the subsequent transferees, since the issuance of the special power of attorney forms would not be controlled in any way. Finally, this process would place a burden on State titling offices to review additional documentation, check for conformity of the information contained on the documents, and maintain additional records. Accordingly, the final rule of August 1988 implemented the Truth in Mileage Act, while allowing the States the maximum discretion in complying with these requirements. 53 FR 29469, 29472, 29475 (1988).

*B. Petitions for Reconsideration*

In petitions filed with the agency, NADA, NIADA, and NAAA asked NHTSA to reconsider § 580.5(h), the provision which prohibits a person from signing the disclosure as the transferor and transferee in the same transaction. The agency also received many letters in support of the petitions. The petitioners correctly noted that this provision would prohibit a seller from giving his buyer, and conversely, a buyer from giving his seller, a power of attorney to sign the disclosure on the title. The basis for the petitions is the fear that customers buying from, and selling to, automobile dealers will not return to the dealers to sign the disclosure on the title, although the customer's failure to sign the title would be in violation of the Federal law and could result in fines and/or imprisonment. The petitioners claimed that customers failing to return to the dealer to sign the disclosure on the title would interfere in the sales of vehicles and result in costs associated with locating these people, administrative costs for mailing and/or duplicating titles, and increased inventory costs in States where the dealer must have the title present at time of sale. This would result in higher vehicle prices as dealers would shift these expenses to the consumer. Alternatively, they argued that if customers did return, this return visit would result in lost time at work, travel time, and other costs. They also claimed that a person signing the disclosure as the buyer and the seller did not create a situation ripe for fraud, that the provision conflicted with State laws and was contrary to Federal law.

The petitioners asked that NHTSA eliminate § 580.5(h). Alternatively, the petitioners suggested that NHTSA permit the use of special powers of attorney or require title sets, a two-part title system where the registered owner holds the title to his vehicle and the lienholder holds a notice of security interest filing.

*C. Congressional Mandate*

Before the agency could fully consider these petitions, Congress enacted the Pipeline Safety Reauthorization Act, Pub. L. 100–561. Section 401 of the Act, which amends section 408(d)(1) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1988(d)(1), and concerns the use of limited powers of attorney in connection with mileage disclosure. The purpose of this provision is to resolve a technical problem for purchasers of used motor vehicles (dealers), without increasing the burden on States or lessening our ability to fight odometer fraud. 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Whittaker). Congress determined that NHTSA's final rule, which prohibits a person from signing an odometer disclosure statement as both the transferor and transferee in the same transaction, could have the effect of precluding the use of a power of attorney in certain instances. Recognizing that the Truth in Mileage Act of 1986 requires a disclosure, including the transferee's signature, on the title, Congress found that limiting the use of powers of attorney could cause an undue burden on dealers and consumers when a consumer's title is held by a bank or other lienholder. Because the consumer does not have the vehicle's title in these instances, the consumer, as a transferor, would be unable to complete the disclosure on the title unless: (1) The consumer returned to the dealer after the dealer paid off the lien and received the title from the lienholder, or (2) the title was mailed by the dealer to the consumer, completed by the consumer, and mailed back to the dealer. Both of these alternatives were rejected by Congress. "It is not reasonable to assume that the consumer will come back to the dealer several days or weeks later to fill in a title received from the bank by the dealer after paying off the lien. It is also not safe to rely on the mails to send the valuable title document to the consumer or to rely on the consumer to return the document in a timely fashion." 134 Cong. Rec. H10079 (daily ed. October 12, 1988) (remarks of Rep. Dingell).

To resolve the problem and alleviate potential costs for dealers and consumers, the new law specifies that a power of attorney authorizing the dealer to disclose mileage on the title on behalf of the consumer may be used when the transferor's title document is physically held by a lienholder, if otherwise permitted by State law. The new law does not require the States to allow the use of a power of attorney for the purpose of mileage disclosure. However, if a State chooses to permit the use of powers of attorney in connection with mileage disclosure, the State itself must issue the power of attorney form, and the form must be consistent with the requirements of the law and the regulations promulgated thereunder. The new law directs the agency to prescribe the form and content of the power of attorney/disclosure document and reasonable conditions for its use by the transferor. More specifically, the new law requires that the form: (1) "be issued by a State to transferees in accordance with paragraph (2)(A)(i) * * *" (Paragraph (2)(A)(i) concerns the issuance of documents that are set forth by a secure printing process or other secure process.); (2) include an odometer disclosure statement and other information as NHTSA deems

necessary; and (3) be submitted to the State by the person granted the power of attorney. It also requires NHTSA to provide for the retention of a copy of the power of attorney form and to ensure that the person granted the power of attorney completes the disclosure on the title consistent with the disclosure on the power of attorney form.

We note that in some States, a secure power of attorney is not necessary to ensure that the customer trading in a vehicle to a dealer makes a mileage disclosure on the vehicle's title document. For example, some States record all lien information on computerized recordkeeping systems and allow the registered owner to hold the title document. Other States have adopted a two-part title system under which the registered owner holds the title document and the lienholder holds a notice of security interest filing. Under either system, because the vehicle owner would have the title document, he could make the disclosure on the title and would not need to use a power of attorney form. In these States, the provisions of the new law would not apply, and the disclosure signed by the transferor would continue to be required on the vehicle's title document.

To implement section 401 of the Pipeline Safety Authorization Act of 1988, NHTSA has published an interim final rule in today's **Federal Register**. Consistent with the new law, this rule allows the use of a secure power of attorney that would permit a person to sign a disclosure as both the transferor and transferee in the same transactions, in specified instances. NHTSA has also published an NPRM in today's **Federal Register**. Although the NPRM and the rule responds to most of the requests set forth in the petitions for reconsideration, this notice will respond to the issues not addressed in today's NPRM and interim final rule.

*D. The Agency Response to the Petitions*

1. Costs to Dealers and Consumers

The petitioners claimed that § 580.5(h) would result in significant costs to dealers and consumers and, therefore, that compliance with the section is not practicable, is unreasonable, and is contrary to the public interest. The petitioners claimed that customers would not return to dealers to sign the disclosure on the title, and that this inaction would result in costs associated with locating these people, administrative costs for mailing and/or duplicating titles, and increased inventory costs in States where the dealer must have the title present at time of sale. This would result in higher vehicle prices as dealers would shift these expenses on to the consumer. Alternatively, they argued that if customers did return, this return visit would result in lost time at work and other costs. NIADA estimates that the costs associated with this section are $170,000,000. (17,000,000 used cars sold each year × $10 per car.) NADA estimates the costs of this section to be $365,100,000.

Consistent with section 401 of the Pipeline Safety Reauthorization Act of 1988, and balancing the need for strong odometer laws against the potential business problems in used vehicle sales presented in our original rule, in an interim final rule, we have issued an amendment to § 580.5(h) which permits the use of a secure power of attorney in certain limited instances. The interim final rule is published elsewhere in today's **Federal Register**.

In reviewing these petitions, including the data provided by NIADA and NADA, NHTSA undertook to reanalyze its *Regulatory Evaluation—Final Rule Implementing the Truth in Mileage Act* (April 1988). This new evaluation, *Regulatory Evaluation—Restrictions on Power of Attorney Resulting from Implementation of the Truth in Mileage Act*, has been placed in the docket for this notice and interested persons may obtain a copy by writing to NHTSA Docket Section, 400 Seventh Street, SW., Washington, DC 20590, or by calling the Docket Section at (202) 366–4949. In light of these costs estimates and the interim final rule, the petitioners have not demonstrated that compliance with § 580.5(h) is not practicable, is unreasonable, and is contrary to the public interest.

2. Fraud and § 580.5(h)

NADA claims that the number of instances where franchised dealers have discarded and/or forged separate odometer disclosure statements is insignificant and that there is an insignificant level of fraud by franchised dealers or their employees acting on behalf of customers under powers of attorney. NADA attributes this to the legal sanctions imposed upon those acting in a manner inconsistent with the terms of a power of attorney. NADA argues further that § 580.5(h) may nevertheless promote fraud by unscrupulous dealers. NADA claims that these dealers are likely to forge the transferor's or transferee's signature on the title, in order to transfer a vehicle that a customer has traded-in but for which the customer has not returned to sign the title.

As noted above, section 401 of the Pipeline Safety Reauthorization Act and the interim final rule which is published elsewhere in today's **Federal Register**, permit the use of a secure power of attorney under certain limited conditions when the title documents is physicially held by a lienholder. Therefore, the major portion of NADA's concerns have been addressed. The new law and the interim final rule have balanced the business concern raised in the event that a title document is held by a lienholder against the need for an enhanced paper trial to deter and detect odometer fraud. However, as we have explained above, a person signing a mileage disclosure as both the transferor and transferee creates a situation ripe for fraud when the person signing the disclosure is intent on rolling back the vehicle's odometer. Therefore, neither the law nor the interim final rule permit a person to sign a disclosure statement as the transferor and transferee in the same transaction in the event that title is lost, misplaced or otherwise unavailable; we have amended § 580.5(h), but we have not eliminated it in its entirety. Increasing the number of situations in which the same person is permitted to sign the disclosure as the transferor and transferee increases the opportunity for odometer fraud. Because lost or misplaced titles can be replaced and because we can limit the possible misuse of secure power of attorney forms, we have not proposed to extend the use of secure power of attorney forms to situations in which the transferor's title is lost or misplaced.

3. The Administrative Procedures Act and NHTSA's Rulemaking Regulations

NADA and NIADA assert that the agency must reconsider § 580.5(h) because that section did not appear in the proposed rule published on July 17, 1987. They claim that the agency violated the Administrative Procedures Act, 5 U.S.C. 553, and the agency's regulation concerning rulemaking, 49 CFR Part 553, by failing to provide notice and comment.

Contrary to the petitioners' assertion, the agency did provide notice and an opportunity for comment. The very cases cited by NIADA in support of its allegation find that the Administrative Procedures Act does not require an agency to publish in advance every precise proposal which it may ultimately adopt as a rule. The test of adequacy of notice of proposed rulemaking is whether it fairly appraised interested parties of the issues involved. In the NPRM, we addressed NIADA's question about whether a power of attorney could be granted so that the transferor could sign a disclosure on behalf of the

VOL 54 ISS 44 MR 8 1989 UMI

transferee, to avoid any problems when the vehicle was subject to an existing lien. In response to this inquiry, the preamble to the NPRM discussed that NHTSA recognizes that powers of attorney are necessary in certain transactions. 52 FR 27028 (1987). The coalition, which included these petitioners, commented on the use of a power of attorney that would allow a person to sign the disclosure as the transferor and transferee in the same transaction. The rulemaking record supports our conclusion that they did have notice and were provided an opportunity to comment on the power of attorney issue.

In any event, the NIADA argument is largely moot insofar as titles held by lienholders are concerned. Consistent with section 401 of the Pipeline Safety Reauthorization Act of 1988, as noted above, we have issued an interim final rule amending § 580.5(h) to address the lienholder issue. The interim final rule is published elsewhere in today's **Federal Register**. We have requested comments on the interim final rule. Following the close of the comment period, NHTSA will publish a notice responding to the comments and, if appropriate, NHTSA will amend the provisions of this rule. Thus, NIADA will have an opportunity to comment.

4. The Regulatory Flexibility Act

NADA and NIADA requested that the agency reconsider section 580.5(h) and its regulatory flexibility determination. Both petitioners submit that a power regulatory flexibility analysis would include regulatory alternatives.

At the time the NPRM and final rule were published, the agency certified that neither rulemaking would have a significant economic impact on a substantial number of small entities. No alternatives were presented because the agency cannot impose different requirements on small dealers as opposed to new dealers, or new car dealers as opposed to used car dealers or wholesalers. Odometer fraud is not limited to a particular segment of the automobile industry.

5. Petitioners' Suggested Alternatives

The petitioners request, as they did when commenting on the NPRM, that the agency permit the use of a special power of attorney. This special power of attorney would (1) be set forth by a secure process; (2) contain the appropriate Federal odometer disclosure statement; and (3) be fully completed, dated, and signed by the transferee. Upon receipt of the transferor's title, the initial transferee would negotiate the title and complete the transferor's statement based on the transferor's special power of attorney and mileage disclosure thereon. The title, together with the special power of attorney and all subsequent reassignments, would be presented to the State with any application for title.

We have carefully considered the petitioners' request but have decided to deny it. We have concluded that granting the request would interfere with the integrity of the paper trail, which Congress intended to enhance by enacting the Truth in Mileage Act without providing any compensating commercial advantages that would outweight the law enforcement concern. The special power of attorney could be easily discarded and a new one forged, since the issuance of the special power of attorney forms would not be controlled in any way. For the agency to spend resources to investigate whether the powers of attorneys were, in fact, securely printed when there is no limit on who could print these documents, would detract from the time that could be spent on odometer fraud investigations. Indeed, the agency has experienced investigatory problems pursuing cases involving unsecure powers of attorney. Furthermore, to allow the person granted the power of attorney to reassign the title and pass along the power of attorney could result in a subsequent transferor discarding the actual document and forging a false power of attorney.

The petitioners also requested that NHTSA require the States to adopt a two-part title system or a system that records all lien information on computerized recordkeeping systems and allows the registered owner to hold the title. We have not adopted this alternative. We have allowed the States the maximum administration discretion possible in complying with the Federal requirements. We note that the States may also petition for approval of alternative mileage disclosure requirements under section 580.11 of the August 1988 final rule.

In an interim final rule published in today's **Federal Register**, the agency implements the provisions of the Pipeline Safety Reauthorization Act that concerns the use of a secure power of attorney to disclose mileage. The interim final rule permits a person to sign the disclosure on the title as the transferor and transferee in the same transaction in certain limited circumstances. Congress' action addresses the major problem posed in the petitions and we are implementing that law. A balance has been struck between the potential problem in the sale of used cars and legitimate enforcement concerns.

Except to the extent they are granted in today's interim final rule, NHTSA has concluded that these petitions have not otherwise provided any reasonable basis for changing § 580.5(h) of the final rule published on August 5, 1988. Accordingly, these petitions are denied.

Issued on March 3, 1989.

**Diane K. Steed,**

*National Highway Traffic Safety Administrator.*

BILLING CODE 4910-59-M

## INTERSTATE COMMERCE COMMISSION

### 49 CFR Parts 1105 and 1152

**[Ex Parte No. 274 (Sub-No. 6; Sub-No. 10A)]**

### Environmental Compliance; Out-of-Service Rail Line Exemptions

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Final rules.

**SUMMARY:** The Commission adopts final rules set forth below to codify its policy of routinely staying the effectiveness of out-of-service class exemptions where an informed decision on pending environmental and historic preservation issues cannot be made prior to the date the exemption authority would otherwise become effective; and eliminating the requirement that petitions for stay involving environmental issues be filed within 10 days of the service of the notice. The rules also address procedures regarding environmental issues, and public use conditions. The rules will give the Commission the opportunity to consider and resolve environmental and historic preservation issues before permitting an exemption to become effective, and allow the public a greater opportunity to be heard regarding these matters. A notice of proposed rulemaking in this proceeding was served June 30, 1988 and published in the **Federal Register** on July 1, 1988 at 53 FR 24971.

**DATE:** The rules will be effective on April 7, 1989.

**FOR FURTHER INFORMATION CONTACT:** Joseph H. Dettmar, (202) 275-7245. (TDD for hearing impaired, (202) 275-1721.)

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289-4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 275-1721.)

These rules will not have a significant adverse effect on the quality of the human environment or energy conservation. Instead, they codify certain procedures (and explain and expand others) that promote heightened environmental scrutiny.

It is certified that these rules will not have significant impact on a substantial number of small businesses.

**List of Subjects**

*49 CFR Part 1105*

Environmental impact statements, Reporting and recordkeeping requirements.

*49 CFR Part 1152*

Administrative practice and procedure, Environmental protection, National resources, Railroads, Reporting and recordkeeping requirements.

**Authority:** 5 U.S.C. 553 and 559, 42 U.S.C. 4332; and 49 U.S.C. 10321, 10505, 10903, 10904, and 10906.

Decided: February 16, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Simmons. Commissioner Phillips concurred in the result.

**Noreta R. McGee,**

*Secretary.*

Title 49, Subtitle B, Chapter X, Parts 1105 and 1152 of the Code of Federal Regulations are amended as follows:

## PART 1105—GUIDELINES FOR IMPLEMENTATION OF THE NATIONAL ENVIRONMENTAL POLICY ACT OF 1969

1. The authority citation for 49 CFR Part 1105 continues to read as follows:

**Authority:** 49 U.S.C. 10321, 10505, 10903–10906; 16 U.S.C. 1247(d); 42 U.S.C. 4332; and 5 U.S.C. 553 and 559.

2. Section 1105.10 is amended by adding a new paragraph (g)(3) to read as follows:

**§ 1105.10 Commission procedures and public involvement.**

* * * * * *

(g) * * *

(3) In out-of-service rail line exemption proceedings under 49 CFR 1152.50, the Commission, on its own motion, will stay the effective date of individual notices of exemption when an informed decision on pending environmental and historic preservation issues cannot be made prior to the date that the exemption authority would otherwise become effective.

* * * * * *

## PART 1152—ABANDONMENT AND DISCONTINUANCE OF RAIL LINES AND RAIL TRANSPORTATION UNDER 49 U.S.C. 10903

3. The authority citation for 49 CFR Part 1152 continues to read as follows:

**Authority:** 5 U.S.C. 553, 559, and 704; 11 U.S.C. 1170; 16 U.S.C. 1247(d); and 49 U.S.C. 10321, 10362, 10505, 10903, 11161, 11162, 11163, *et seq.*

4. Section 1152.50(d)(3) is revised to read as follows:

**§ 1152.50 Exempt abandonments and discontinuances of service and trackage rights.**

* * * * * *

(d) * * *

(3) The Commission, through the Director of the Office of Proceedings, shall publish a notice in the **Federal Register** within 20 days after the filing of the notice of exemption. Petitions to stay the effective date of the notice on other than environmental or historic preservation grounds must be filed within 10 days of the publication. Petitions to stay the effective date of the notice on environmental or historic preservation grounds may be filed at any time but must be filed sufficiently in advance of the effective date in order to allow the Commission to consider and act on the petition before the notice becomes effective. Petitions for reconsideration, comments regarding environmental, energy and historic preservation matters, and requests for public use conditions under 49 U.S.C. 10906 and 49 CFR 1152.28(a)(2) must be filed within 20 days after publication. The exemption will be effective 30 days after publication, unless stayed. If the notice of exemption contains false or misleading information, the use of the exemption is void *ab initio* and the Commission shall summarily reject the exemption notice.

5. Section 1152.50(d) is amended by redesignating paragraphs (d)(4) and (d)(5) as paragraphs (d)(5) and (d)(6) and by adding a new paragraph (d)(4) to read as follows:

* * * * * *

(d) * * *

(4) In out-of-service rail line exemptoin proceedings under 49 CFR 1152.50, the Commission, on its own motion, will stay the effective date of individual notices of exemption when an informed decision on pending environmental and historic preservation issues cannot be made prior to the date that the exemption authority would otherwise become effective.

6. Newly redesignated § 1152.50(d)(5) is revised to read as follows:

* * * * * *

(d) * * *

(5) A request to implement interim trail use and rail banking under 16 U.S.C. 1247(d) and 49 CFR 1152.29 should be filed with the Commission and served on the railroad within 10 days of publication of the notice of exemption in the **Federal Register**. A notice or decision to all parties will be issued if use of the exemption is made subject to environmental, energy, historic preservation, public use and/or interim trail use and rail banking conditions.

# Proposed Rules

Federal Register
Vol. 54, No. 44
Wednesday, March 8, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 51

[Docket Number FV-88-204]

### Snap Beans; Grade Standards

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This action would revise the voluntary U.S. Standards for Grades of Snap Beans. The South Florida Vegetable Exchange (the Exchange), which represents the majority of snap bean growers in South Florida, has requested the standards be revised to bring them into conformity with current cultural and harvesting practices. The Agricultural Marketing Service (AMS), in cooperation with industry, has the responsibility to develop and improve standards of quality, condition, quantity, grade, and packaging in order to encourage uniformity and consistency in commercial practices.

**DATE:** Comments must be postmarked or courier dated on or before May 8, 1989.

**ADDRESS:** Interested parties are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Standardization Section, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2056 South Building, Washington, DC 20090-6456. Comments should reference the date and page numbers of this issue of the **Federal Register** and will be made available for public inspection in the above office during business hours.

**FOR FURTHER INFORMATION CONTACT:** Paul W. Manol at the above address, or call (202) 447-5410.

**SUPPLEMENTARY INFORMATION:** This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been designated as "non-major" under the criteria therein.

Pursuant to the requirements set forth in the Regulatory Flexibility Act, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities. The proposed revision of the standards for snap beans will not impose substantial direct economic cost, recordkeeping, or personnel workload changes on small entities, and will not alter the market share or competitive position of these entities relative to large businesses.

This action proposes changes to the U.S. Standards for Grades of Snap Beans as set forth in §§ 51.3830-51.3844 (7 CFR 51.3830-51.3844). This proposal is set forth in order to bring the standards into conformity with current harvesting and marketing practices. The United States Standards for Grades of Snap Beans were last revised on August 1, 1936. The Exchange has requested the following revisions which are proposed herein:

First, a general section would be added specifying the types of beans covered by this standard. Although the current standards apply to snap, pole, and wax beans, according to the Exchange, there exists some confusion in the industry as to what types of beans may be certified by the U.S. Standards for Grades of Snap Beans.

Next, the U.S. Combination and Unclassified grades would be eliminated because they are rarely used and may create confusion in the marketplace.

With the majority of beans now being mechanically harvested rather than handpicked, the Exchange indicates that the industry is finding that with the newer, more tender varieties of beans, it is increasingly difficult to meet the requirements of the grade due to the higher percentages of broken beans in any lot resulting from the harvesting process. The current standards for U.S. Fancy and U.S. No. 1 grades allow ten percent total defects, including not more than 5 percent serious damage, including therein not more than 1 percent soft rot. For the U.S. No. 2 grade, ten percent total defects are allowed including not more than 1 percent soft rot. The new standard would be revised as follows:

(a) *U.S. Fancy:* Ten percent for beans in any lot which fail to meet the requirements of the grade, including not more than 3 percent damage by broken beans. Additionally, within the ten percent tolerance, not more than 5 percent shall be allowed for defects causing serious damage, including therein, not more than 1 percent for beans affected by soft rot.

(b) *U.S. No. 1:* Thirteen percent for beans in any lot which fail to meet the requirements of the grade, including not more than ten percent for grade defects other than broken beans, including not more than 5 percent shall be allowed for defects causing serious damage, including therein, not more than 1 percent for beans affected by soft rot.

(c) *U.S. No. 2:* Fifteen percent for beans in any lot which fail to meet the requirements of the grade; including not more than ten percent serious damage by grade defects other than broken beans, including therein, not more than 1 percent for beans affected by soft rot.

Therefore, the proposal would lessen the restriction for broken beans only in the U.S. No. 1 and U.S. No. 2 grades, while further restricting the percentage of broken beans allowed in the U.S. Fancy grade. This further restriction would allow growers who "hand-pick" beans to market their product under a grade that reflects the quality difference due to harvesting and packing techniques.

Currently, the maxium tolerance for defects permitted in any grade is ten percent and individual packages may contain up to one and one-half times this amount. The proposal would allow maxium defects of thirteen percent and fifteen percent in the U.S. No. 1 and U.S. No. 2 grades respectively. Therefore, it would be necessary to revise the application of tolerances whereby individual packages may contain up to one and one-half times the thirteen percent tolerance or the fifteen percent tolerance, provided that the average for the entire lot averages within the maximum tolerance specified for the grade. Thus paragraph (a) of § 51.3836, Application of tolerances, would be revised to read as follows: For tolerances of ten percent or more, individual packages may contain not more than one and one-half times the tolerance specified. *Provided*, that the average for the entire lot is within the tolerance specified for the grade.

Finally, the definition of "Similar Varietal Characteristics" would be updated and simplified. The current definition references specific varieties that are not among those that are being widely grown. In addition, since varieties change in popularity over time, the Exchange stated that a revised definition should provide that beans of different colors or types shall not be mixed within the same container.

### List of Subjects in 7 CFR Part 51

Fresh fruits, Vegetables and Other products (Inspection, certification, and standards).

For reasons set forth in the preamble, the subpart—United States Standards for Grades of Snap Beans, 7 CFR Part 51, shall be amended as follows:

## PART 51—FRESH FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

1. The authority citation for 7 CFR Part 51 continues to read as follows:

Authority: Secs 203, 205, 60 Stat. 1087 as amended, 1090 as amended [7 U.S.C. 1622-1624].

1. In Subpart—United States Standards for Grades of Snap Beans, § 51.3829 is added to read as follows:

### General

**§ 51.3829 General.**

These standards can be applied to all beans used in their entirety rather than shelled beans, and includes varieties such as snap, pole, and wax beans. These standards do not apply to varieties such as fava, lima, pinto, or calico beans.

**§§ 51.3832 and 51.3834 [Removed and Reserved]**

3. Section 51.3832 and 51.3834 are removed and reserved.

4. Paragraphs (a), (b), and (c) of § 51.3835 are revised to read as follows:

### Tolerances

**§ 51.3835 Tolerances.**

* * * * *

(a) *U.S. Fancy.* Ten percent for beans in any lot which fail to meet the requirements of the grade, including not more than 3 percent damage by broken beans. Additionally, within the ten percent tolerance, not more than 5 percent shall be allowed for defects causing serious damage, including therein, not more than 1 percent for beans affected by soft rot.

(b) *U.S. No.* 1. Thirteen percent for beans in any lot which fail to meet the requirements of the grade, including not more than 10 percent for grade defects other than broken beans, including that not more than 5 percent shall be allowed for defects causing serious damage, including therein, not more than 1 percent for beans affected by soft rot.

(c) *U.S. No.* 2. Fifteen percent for beans in any lot which fail to meet the requirements of the grade, including not more than 10 percent for grade defects other than broken beans, including therein, not more than 1 percent for beans affected by soft rot.

5. Paragraph (a) of § 51.3836 is revised to read as follows:

### Application of Tolerances

**§ 51.3836 Application of Tolerances.**

* * * * *

(a) For tolerances of 10 percent or more, individual packages may contain not more than one and one-half times the tolerances specified: Provided, that the average for the entire lot is within the tolerance specified for the grade.

* * * * *

6. Section 51.3837 is revised to read as follows:

**§ 51.3837 Similar varietal characteristics.**

"Similar varietal characteristics" means that the beans are of the same color and general type. For example, wax and green beans, or Snap and Pole type beans must not be mixed.

Dated: March 3, 1989.

J. Patrick Boyle,
*Administrator.*

BILLING CODE 3410-02-M

## Federal Crop Insurance Corporation

### 7 CFR Part 401

[Amdt. No. 48 Doc. No. 6577S]

### General Crop Insurance Regulations

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the General Crop Insurance Regulations (7 CFR Part 401), effective for the 1990 and succeeding crop years, by changing several endorsements to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIC reviews the entire good experience discount issue for all policyholders.

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989, to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is established as April 1, 1992.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Potato Crop Insurance Regulations (7 CFR Part 422), an insured may be eligible for a premium reduction in excess of 5

BEST COPY AVAILABLE

VOL 54 ISS 44 MR 8 1989 UMI

percent based on that individual's insuring experience through the 1983 crop year under the terms and conditions contained in their potato crop insurance policy for 1984. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that the present premium reduction be continued, and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Potato Crop Insurance Regulations (7 CFR Part 422) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

Various amendments to the Potato Crop Insurance Regulations (7 CFR Part 422) were published, some of which contained an incorrect amendment number. While this does not affect the purpose or intent of the rule, it is appropriate that these amendment numbers be corrected. Amendment 2, published in the **Federal Register** on June 22, 1987, at 52 FR 23424, should read Amendment 1. Amendment 4, published on January 24, 1989, at 53 FR 3416, should read Amendment 2.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

**List of Subjects in 7 CFR Part 401**

General Crop Insurance Regulations.

**Proposed Rule**

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to amend the General Crop Insurance Regulations (7 CFR Part 401), proposed to be effective for the 1990 and succeeding crop years, in the following instances:

**PART 401—[AMENDED]**

1. The authority citation for 7 CFR Part 401 continues to read as follows:

**Authority:** 7 U.S.C. 1506, 1516.

**§§ 401.101, 401.103, 401.105, 401.106, 401.111, 401.113, 401.116, 401.117, and 401.124 [Amended]**

2. 7 CFR 401.101—Wheat Endorsement; § 401.105—Oat Endorsement; § 401.106—Rye Endorsement; § 401.103—Barley Endorsement; § 401.111—Corn (Grain) Endorsement; § 401.113—Grain Sorghum Endorsement; § 401.116—Flaxseed Endorsement; § 401.117—Soybean Endorsement; and § 401.124—Sunflower Endorsement, are amended by revising subsection 3.b.(1) to read as follows:

3. *Annual Premium.*

BILLING CODE 3410-08-M

**7 CFR Part 402**

**[Amdt. No. 1; Doc. No. 6600S]**

**Raisin Crop Insurance Regulations**

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the Raisin Crop Insurance Regulations (7 CFR Part 402), effective for the 1990 and succeeding crop years, to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIC reviews the entire good experience discount issue for all policyholders.

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989, to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC, 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447-3325.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Department Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is January 1, 1990.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Raisin Crop Insurance Regulations (7 CFR Part 402), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1983 crop year under the terms and conditions contained in their raisin crop insurance policy for 1984. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that present premium reduction be continued, and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Raisin Crop Insurance Regulations (7 CFR Part 402) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register**.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

**List of Subjects in 7 CFR Part 402**

Crop insurance, Raisins.

**Proposed Rule**

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to amend the Raisin Crop Insurance Regulations (7 CFR Part 402), proposed effective for the 1990 and succeeding crop years, in the following instances:

**PART 402—[AMENDED]**

1. The authority citation for 7 CFR Part 402 continues to read as follows:

**Authority:** 7 U.S.C. 1506, 1516.

Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Raisin Crop Insurance Regulations (7 CFR Part 402), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1983 crop year under the terms and conditions contained in their raisin crop insurance policy for 1984. **SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action does not constitute a review as to the neeed, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is established as October 1, 1990.

John Marshall, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact of the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of several crop endorsements to the General Crop Insurance Policy, contained in the General Crop Insurance Regulations (7 CFR Part 401), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1983 or 1984 crop year under the terms and conditions contained in their particular crop insurance endorsement for 1984 or 1985. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 or 1990 crop year.

The FCIC Board of Directors has suggested that the present premium reduction be continued, and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend all listed applicable crop insurance endorsement issued under 7 CFR Part 401 to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment on this proposed rule for 30 days after publication of the rule in the **Federal Register**.

**Peanut Crop Insurance Regulations**

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the Peanut Crop Insurance Regulations (7 CFR Part 425), effective for the 1990 and succeeding crop years, to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIC reviews the entire good experience discount issue for all policyholders.

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989 to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

**SUPPLEMENTARY INFORMATION:** This section has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The Peanut Crop Insurance Regulations (7 CFR Part 425) have been reviewed in their entirety under the procedures established in Departmental Regulation 1512-1 with respect to the need, currency, clarity, and effectiveness of these regulations. The new sunset review date established for these regulations is April 1, 1993.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Peanut Crop Insurance Regulations (7 CFR Part 425), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1988 crop year under the terms and conditions contained in their peanut crop insurance policy for 1988. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that the present premium reduction be continued and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Peanut Crop Insurance Regulations (7 CFR Part 425) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register.**

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the Sugar Beet Crop Insurance Regulations (7CFR Part 430), effective for the 1990 and succeeding crop years, to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIC reviews the entire good experience discount issue for all policyholders.

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989, to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Departmental Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is established as October 1, 1990.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Sugar Beet Crop Insurance Regulations (7 CFR Part 430), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1984 crop year (1985 in Arizona and California) under the terms and conditions contained in their sugar beet crop insurance policy for 1985 (1986 in Arizona and California). The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1990 crop year.

The FCIC Board of Directors has suggested that the present premium reduction be continued, and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Sugar Beet Crop Insurance Regulations (7 CFR Part 430) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register.**

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

**List of Subjects in 7 CFR Part 430**

Crop insurance; Sugar beets.

**Proposed Rule**

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to amend the Sugar Beet Crop Insurance Regulations (7 CFR Part 430), proposed to be effective for the 1990 and succeeding crop years, in the following instances:

**PART 430—[AMENDED]**

1. The authority citation for 7 CFR Part 430 continues to read as follows:

**Authority:** 7 U.S.C. 1508, 1516.

2. Section 430. 7(d) of the Sugar Beet Crop Insurance Regulations (7 CFR 430.7) is amended in subsection 5.c.(1) to read as follows:

**§ 430.7 The application and policy.**

* * * * *

**Dry Bean Crop Insurance Regulations**

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the Dry Bean Crop Insurance Regulations (7 CFR Part 433), effective for the 1990 and succeeding crop years, to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIG reviews the entire good experience discount issue for all policyholders.

VOL 54 ISS 44 MR 8 1989 UMI

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989, to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC, 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447–3325.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is established as April 1, 1992.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Dry Bean Crop Insurance Regulations (7 CFR Part 433), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1984 crop year under the terms and conditions contained in their dry bean crop insurance policy for 1985. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that the present premium reduction for good experience issue as it might be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Dry Bean Crop Insurance Regulations (7 CFR Part 433) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register**.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

**7 CFR Part 435**

**[Amdt. No. 1; Doc. No. 6605S]**

**Tobacco (Quota Plan) Crop Insurance Regulations**

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) proposes to amend the Tobacco (Quota Plan) Crop Insurance Regulations (7 CFR Part 435), effective for the 1990 and succeeding crop years, to provide that the premium reduction gained by insureds through good insuring experience will extend beyond the present 1989 crop year expiration. The intended effect of this rule is to allow a continuation of good experience discount for all present policyholders who are eligible for a premium reduction while FCIC reviews the entire good experience discount issue for all policyholders.

**DATE:** Written comments, data, and opinions on this proposed rule must be submitted not later than April 7, 1989, to be sure of consideration.

**ADDRESS:** Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447–3325.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is August 1, 1989. These regulations are presently under review in accordance with Departmental Regulation 1512–1 and FCIC will issue a determination

under those procedures as to the need, currency, clarity, and effectiveness of these regulations on or before August 1, 1989.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Tobacco (Quota Plan) Crop Insurance Regulations (7 CFR Part 435), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1983 crop year under the terms and conditions contained in their tobacco crop insurance policy for 1984. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that the present premium reduction be continued and directed that a study made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Tobacco (Quota Plan) Crop Insurance Regulations (7 CFR Part 435) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register**.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officals. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Under the provisions of the Hybrid Seed Crop Insurance Regulations (7 CFR Part 443), an insured may be eligible for a premium reduction in excess of 5 percent based on that individual's insuring experience through the 1983 crop year under the terms and conditions contained in their hybrid seed crop insurance policy for 1984. The insured will continue to receive the benefit of such reduction subject to several conditions, one of which being that no premium reduction will be retained after the 1989 crop year.

The FCIC Board of Directors has suggested that the present premium

VOL

1989
UMI

reduction be continued, and directed that a study be made of the entire premium reduction for good experience issue as it might apply to all policyholders.

Accordingly, FCIC herein proposes to amend the Hybrid Seed Crop Insurance Regulations (7 CFR Part 443) to allow a continuation of the good experience discount provision so that no premium reduction will be retained after the 1991 crop year.

FCIC is soliciting public comment for 30 days after publication of the rule in the **Federal Register**.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

Crop insurance, Hybrid seed.

**Proposed Rule**

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to amend the Hybrid Seed Crop Insurance Regulations (7 CFR Part 443), proposed to be effective for the 1990 and succeeding crop years, in the following instances:

**PART 443—[AMENDED]**

1. The authority citation for 7 CFR Part 443 continues to read as follows:

**Authority:** 7 U.S.C. 1506, 1516.

2. Section 443.7(d) of the Hybrid Seed Crop Insurance Regulations (7 CFR 443.7) is amended in subsection 5.c.(1) to read as follows:

**§ 443.7 The application and policy.**

* * * * *

(d) * * *

5. *Annual Premium.*

* * * * *

c. * * *

(1) No premium reduction will be retained after the 1991 crop year;

* * * * *

Done in Washington, DC, on February 28, 1989.

**John Marshall,**

*Manager, Federal Crop Insurance Corporation.*

**9 CFR Part 92**

**[Docket No. 88-015]**

**Protocols for Importation of Swine From China Through the Harry S Truman Animal Import Center**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** We are proposing to amend our regulations on the importation of swine from the People's Republic of China by adding two protocols to allow the Agricultural Research Service of the United States Department of Agriculture to import swine from the People's Republic of China through the Harry S Truman Animal Import Center (HSTAIC) during calendar year 1989. These protocols specify requirements for importations through HSTAIC of swine from China. The swine should improve the germplasm of breeding animals in the United States, eventually improving the productivity and international competitiveness of U.S. swine.

**DATES:** Consideration will be given only to comments postmarked or received on or before March 23, 1989.

**ADDRESSES:** Send an original and two copies of written comments to Helene R. Wright, Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 88-015. Comments received may be inspected at USDA, 14th and Independence Avenue SW., Room 1141, South Building, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** Dr. Samuel S. Richeson, Senior Staff Veterinarian, Import-Export Products Staff, Veterinary Services, APHIS, USDA, Room 759, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8144.

**SUPPLEMENTARY INFORMATION:**

**Background**

On July 25, 1988, was published in the **Federal Register** (53 FR 27846-27847, Docket Number 88-107) an interim rule that amended the regulation in 9 CFR Part 92, § 92.41, by granting the Agricultural Research Service (ARS) of the United States Department of Agriculture the exclusive right to use the Harry S Truman Animal Import Center (HSTAIC) for an importation of swine from the People's Republic of China during calendar year 1989. We have affirmed that interim rule in a document (Docket Number 88-153) published in this issue of the **Federal Register**. We took that action to enable ARS to capitalize on a singular opportunity to proceed with a swine-importation project expected to improve the germplasm of breeding animals in the United States. This improved breeding stock should benefit breeders in the private sector.

The interim rule allows ARS to import swine from the People's Republic of China through HSTAIC in calendar year 1989, in accordance with procedures determined by the Secretary of Agriculture. The interim rule also stated that protocols governing the procedures for this importation would be published for comment prior to the importation.

This proposed rule publishes the protocol determined by the Secretary of Agriculture for overseas quarantine of swine from China prior to their importation. This proposed rule also published a second protocol describing procedures required for the swine from the time they leave China until their release from quarantine at HSTAIC.

The two protocols concern the origin, handling, isolation, examination, testing, and shipment of the swine, as well as other matters related to their importation through HSTAIC. Organizations with responsibilities detailed in the protocols include the official veterinary organization of the People's Republic of China, USDA, APHIS, and the importer.

The protocols would be added to the new paragraph (g) of 9 CFR 92.41 that was established by the interim rule of July 25, 1988, and which provides that ARS may, in calendar year 1989, import swine from the People's Republic of China into the United States through the Harry S Truman Animal Import Center in accordance with procedure determined by the Secretary of Agriculture.

The protocols are designed to allow importation of swine from China without presenting a significant risk of introducing foot-and-mouth disease (FMD) or other foreign animal diseases into the United States. The purpose and operation of the protocols' provisions are discussed below.

**Responsibilities**

The official veterinary organization (OVO) of the People's Republic of China (PRC) would be responsible for implementing a pre-shipment quarantine of the swine in China, and for issuing certificates concerning the diseases that exist in China and certain other matters.

Specifically, the OVO of the PRC would certify that the People's Republic of China is free of rinderpest and African swine fever, and that Teschen's disease has never been diagnosed on the premises of origin and there has been no clinical evidence of that disease on the premises of origin during the isolation period. The OVO of the PRC would also designate laboratories to perform the tests required by the protocol while the swine are in isolation in China. The OVO of the PRC would also certify that the swine were kept in isolation for a minimum of 60 days and that, during that time, the animals remained healthy with no evidence of communicable disease affecting swine and that all tests and conditions as stated in this protocol have been met.

USDA would be responsible for sending veterinarians to the premises of origin of export swine, related isolation premises, testing laboratories, and isolation facilities to cooperate with PRC veterinarians in conducting quarantine procedures. USDA would issue the permits required by 9 CFR Part 92 for importation of the swine, and would conduct certain tests required for the swine while in isolation in China (FMD microtiter virus neutralization tests for types C and Asia FMD and swine vesicular disease (SVD) virus neutralization test) because the test antigen for conducting these tests are not permitted in the PRC, but they are available at the USDA Foreign Animal Disease Diagnostic Laboratory. USDA would provide the PRC with antigens and protocols for the brucellosis card test, a test developed by USDA. USDA would also be responsible for quarantine and testing of the swine at HSTAIC after their arrival in the United States, and for making the final determination on whether the swine may be released into the United States.

The OVO of the PRC and USDA would be jointly responsible for making certain determinations about the disease status of the swine and their premises of origin, and for supervising the movement of the swine from the isolation facility in China to the exporting carrier. The OVO of the PRC would be responsible for the disinfection of the trucks moving the swine to the exporting carrier, using a 4 percent sodium carbonate solution used in accordance with applicable label instructions.

The ARS would be responsible for all costs involved in the isolation, testing, transportation, and embarkation quarantine of the swine in China, their transportation to HSTAIC, and quarantine costs at HSTAIC. The U.S. importer would also be responsible for the cost of all swine that test positive to the tuberculosis intradermal test and are necropsied.

**Premises of Origin**

USDA and PRC veterinarians would work in cooperation to determine that the premises of origin of the swine met certain standards designed to minimize the possibility that the swine were exposed to disease. The three most serious swine diseases that may occur in China and that do not occur in the United States are foot-and-mouth disease (FMD), swine vesicular disease (SYD), and hog cholera. The protocols propose to require that the premises of origin must be at the center of an area of 16-km radius that has been free of these diseases for three years prior to quarantine of the swine, and that no cases of these diseases occurred on the premises of origin or adjacent premises for at least five years previous to quarantine of the swine. The protocols would also require that no animal has been introduced into the herd of origin from farms affected with these diseases for three years previous to the quarantine of the swine.

Other diseases of concern in China include brucellosis, tuberculosis, and pseudorabies, and the protocols propose to require that there has been no evidence of these diseases on the premises of origin or adjacent premises for one year previous to the quarantine of the swine.

To minimize the exposure of swine for export to other animals and other sources of disease, the swine would have to originate on farms which are solely swine breeding operations and must not have left the farm on which they were born and reared, except for movement to the isolation facility.

**Isolation Period in China**

The protocols propose that the swine be isolated in China for 60 days prior to export, in a facility on premises approved by the OVO of the PRC. This period would allow continual observation of the swine for signs of disease and would eliminate possible contact with other animals that may be capable of spreading disease. This period would also be used to conduct tests for diseases, discussed below. The facility would be cleaned, and disinfected using a 4 percent sodium carbonate solution used in accordance with applicable label instructions, prior to the start of the isolation. During the isolation period, personnel handling the animals would not have contact with other domestic farm livestock (this term does not include pets such as dogs and cats). Raw animal food wastes (garbage) would not be allowed to be fed to the animals in isolation, because feeding of garbage is known to spread many animal diseases. Feed and bedding used during the isolation period and during transport would have to come from areas free from epizootic diseases, and would have to meet veterinary hygienic requirements established by the OVO of the PRC concerning freedom of the materials from contamination that could transmit diseases. These provisions would help ensure that the swine are not infected with diseases of concern prior to export.

**Testing for Disease**

During their isolation in China, and again during quarantine at HSTAIC, all swine would be tested for seven diseases that are of concern under animal importation regulations and that may occur in China.[1] No swine would be accepted for export that have been vaccinated for FMD, SVD, or hog cholera, because vaccination for these diseases can cause false positive results in the tests for these diseases.

All the tests used are internationally recognized as standard procedures. They are also recognized by the American Association of Veterinary Laboratory Technicians (AAVLD), the principal organization in the United States to establish the validity of laboratory diagnostic procedures for animals. Most of the tests are based on identification of antibodies in the animals' blood serum against the various diseases. Reaction of the serum with the test materials of various dilutions constitutes a positive reaction, with the dilution varying according to the disease. For example, reaction of a 1:4 serum dilution constitutes a positive reaction to the pseudorabies test, reaction of a 1:16 dilution constitutes a positive reaction to the hog cholera test, and reaction of a 1:40 dilution constitutes a positive reaction to the SVD test. These dilutions are recognized as standard by AAVLD for determining positive reactions to these tests.

The type and number of tests to be conducted, in China and at HSTAIC, are described below:

[1] Technical information on laboratory methods and procedures for these tests may be obtained from the Administrator, APHIS, c/o Director, National Veterinary Services Laboratories, P.O. Box 844, Ames, IA 50010.

VOL 54 ISS 44 MR 8 1989 UMI

| | No. of tests in China | No. of tests at HSTAIC |
|---|---|---|
| FMD microtiter virus neutralization (VN) test for types A, O, C, and Asia | 1 | 2 |
| FMD agar gel immunodiffusion (AGID) test using virus infection associated antigen (VIAA) in serum | 1 | 3 |
| Brucellosis standard tube test (STT) at less than 30 IU/ml | 1 | 2 |
| Brucellosis card test (antigen and protocol to be supplied by USDA) | 1 | 2 |
| Swine vesicular disease virus neutralization (VN) test at 1:40 dilution (serums to be tested at FADDL) | 1 | 2 |
| Hog cholera fluorescent antibody neutralization (FAN) test at 1:16 dilution | 1 | 2 |
| Japanese B encephalitis hemagglutination inhibition (HI) test | 1 | 2 |
| Pseudorabbes virus neutralization (VN) test at 1:4 dilution | 1 | 2 |
| Tuberculosis intradermal test using bovine PPD tuberculin (positive animals will be necropsied and examined for lesions) | 1 | 2 |

During their quarantine at HSTAIC, all swine would undergo each test twice, at an interval of 60 days, except for the FMD AGID–VIAA test. The swine would undergo the FMD AGID–VIAA test three times, at intervals of 21 and 60 days after the first application of this test at HSTAIC. The tests at 60 days would detect any animals that were infected during isolation in China or during shipment and had not developed serological responses in a quantity sufficient to be detected at the time of the first tests at HSTAIC. For all the diseases in question, 60 days after infection is sufficient time for serological responses to develop that can be detected by the tests. The FMD AGID–VIAA test would be administered three times instead of twice to ensure that a distinction is made between animals that have developed antibodies to FMD without being infected and animals that are actually infected with live FMD virus.

The FMD microtiter VN test is a test on animal blood serum to detect antibody to FMD virus. If FMD virus has been introduced into the swine, its immune system will produce antibodies against the disease. When mixed with FMD virus in the laboratory at a 1:10 or greater dilution, serum with FMD antibody will neutralize the effects of the FMD virus on test materials, while serum without FMD antibody (i.e. from animals that have not been in contact with FMD virus) will not neutralize the effects of the FMD virus on test materials. This test may produce positive results when used on animals that have been vaccinated against FMD, but are not necessarily infected with FMD.

The FMD AGID–VIAA test is the ager gel immunodiffusion test with virus infection associated antigen. When an animal becomes infected with the field strain of FMD, the live virus replicates in the animal's body. The animal's immune system produces a specific antibody at this time to help stop the viral replication. The VIAA antigen has been developed to detect the presence of this antibody; thus, if the test is positive, it shows that the animal has experienced active FMD infection, rather than antibody production as a result of vaccination against FMD.

Animals must test negative to both FMD tests, and be free from clinical signs of FMD, or they will be prohibited export.

The brucellosis STT test is the standard tube agglutination test. If the animal is infected with brucellosis organisms, the test demonstrates the presence of antibodies against brucellosis. The *Brucella* cells in the antigen, when mixed with serum, will be agglutinated, or clumped, by the action of the antibody in the animal's serum. If the animal is free of brucellosis, no agglutination will occur in the serum sample.

The brucellosis card test is a rapid field test for brucellosis that may be performed on while blood. A positive reaction will cause agglutination on the special card developed for the test. An obvious advantage is that the test results are immediately available at the test site with no need to be sent to a laboratory. This test has been used with special success in testing swine.

The SVD VN test is a test of serum to detect antibodies against the SVD virus. In a positive test result, serum from an animal that has been infected with SVD neutralizes the effect of the SVD virus in specific laboratory materials.

The hog cholera FAN test is the fluorescent antibody neutralization test. It is based on direct microscopic examination. If hog cholera antibodies are present in serum from swine, it will neutralize the fluorescence caused by the viral antigen in infected tissue. If no antibody is present, the tissue will exhibit fluorescence.

The Japanese B encephalitis HI test is a hemagglutination test of serum. If antibody against Japanese B encephalitis is present it neutralizes the ability of the viral antigen to cause agglutination in the serum sample.

The pseudorabies VN test is a virus neutralization test. It is a plate agglutination test, conducted with antigen particles bonded to latex. In the presence of pseudorabies antibodies, agglutination occurs.

The tuberculosis intradermal test is done by injecting an antigen called tuberculin into the skin of the animal to be tested. If antibodies against tuberculosis are present in the animal, the point of injection will react with swelling and redness within 48 hours. This reaction shows that the animal has been exposed to the tuberculosis organism and is probably infected. Positive animals would be necropsied and examined for TB lesions as conclusive proof of infection. If no lesions are found, the remaining swine would be eligible for export.

In addition, while at HSTAIC the swine would share their pens with contact sentinel animals (pigs and calves that are known to be susceptible to the above diseases and that are known not to possess antibodies to these diseases). The contact sentinel animals would provide an additional test for infection of the imported swine, as they would be regularly examined for clinical signs of disease and their serum would be tested for antibodies that would indicate exposure to diseases carried by the imported swine. Approximately 60 days after the contact sentinel animals are placed with the imported swine, the sentinel pigs would be inoculated with blood from the imported swine to ensure exposure to any pathogens present in the swine. Approximately 90 days after the contact sentinel animals are placed with the imported swine, serum from the sentinel pigs would be tested for signs of exposure to the seven diseases for which the imported swine were tested.

**Transportation**

The protocols contain requirements to ensure that the imported swine would not come in contact during transport with any animals or other materials that could infect the swine with disease, and to ensure that the swine could not infect any other animals with diseases they may carry. All crates and parts of vehicles, ships, or aircraft used to hold livestock for transport or handling of the swine while in China must be cleaned, and disinfected prior to use with a 4 percent sodium carbonate solution used in accordance with applicable label instructions. During movement from the premises of origin to the isolation facility, and from the isolation facility to HSTAIC, the swine may not have contact with, or exposure to, animals not included in the group at the isolation facility. Exposure consists of contact with yards, pens, or other facilities or vehicles that have been in contact with other animals and have not been cleaned and disinfected as described above. In China, the swine would be moved under joint supervision by the OVO of the PRC and USDA directly from the isolation facility to the exporting carrier by trucks or other carriers that have been cleaned, and disinfected using a 4 percent sodium carbonate solution used in accordance with applicable label instructions, under joint OVO/USDA supervision. The swine would be examined clinically within 24 hours prior to loading for export by a USDA veterinarian and must be healthy and free of signs of infectious and contagious diseases. During movement from China to HSTAIC, if the swine transit countries affected with FMD, rinderpest, hog cholera, SVD, or African swine fever, they would be refused entry on arrival at HSTAIC, unless they were accompanied en route by a USDA inspector who certifies that no disease exposure occurred during shipment. As a safeguard against spreading foreign animal diseases into the United States, the swine would not transit through the United States, or any of its territories, en route to U.S. quarantine, except as specifically provided for in an import permit issued by APHIS.

The landing of the swine in the United States would be carried out in accordance with instructions given by a USDA veterinary officer at HSTAIC. All vessels or aircraft from which the imported swine were landed would be immediately cleaned, and disinfected using a 4 percent sodium carbonate and 0.1 percent sodium silicate solution used in accordance with applicable label instructions, in the presence of a USDA veterinary officer.

**Ectoparasites and Precautionary Treatments**

Swine are subject to infestation with ticks, lice, and mange organisms and other ectoparasites, and to leptospirosis, a communicable disease of swine, humans, and many other animals. While infestation with ectoparasities or leptospirosis does not preclude swine from being imported under the regulations, they are a general health hazard for swine, and the protocols therefore require examination and treatments for ectoparasites, and a precautionary treatment for leptospirosis. While in isolation in China, all swine offered for exportation would be clinically examined and treated for ectoparasites with a pesticide approved by the OVO of the PRC used in accordance with applicable label instructions, and given an intramuscular injection of dihydrostreptomycin at a rate of 25 mg/kg dosage twice at an interval of 14 days as a precautionary treatment for leptospirosis. This treatment is an internationally recognized standard procedure for leptospirosis. All imported swine would be examined for ectoparasites on arrival at HSTAIC and, if found free of infestation, would receive a precautionary spray with coumaphos, used in accordance with applicable label instructions, in a wettable powder or 0.06 emulsified concentrate solution spray form. If found to be infested, all affected and exposed swine would be treated until found free of infestation.

**Release or Disposal of the Swine**

USDA would make the final determination on the eligibility of Chinese swine to be exported to the United States, and their eligibility to be released from quarantine at HSTAIC into the United States. The swine would be quarantined at HSTAIC under the supervision of a veterinary officer of USDA for a period of at least 120 days after arrival and until all tests required by the protocols have been successfully completed. To qualify for release, an animal must have negative test results. If any imported or sentinel animals showed clinical symptoms of, or the causative organism was isolated for, FMD, rinderpest, SVD, or hog cholera, USDA would cause all imported and sentinel animals to be slaughtered and the carcasses disposed of as prescribed by USDA to prevent the spread of disease. These diseases constitute major risks to the health of the U.S. animal industries, and if one animal in a consignment tests positive for one of these diseases the level of risk justifies destruction and disposal of all animals in the consignment, even those that tested negative for the diseases. This provision would guard against the slight possibility that animals that tested negative for these diseases were so recently infected that the tests would be unable to detect the infection, or that noninfected animals carried viable disease viruses externally. If any imported or sentinel animals showed clinical symptoms of, or were considered exposed to, any other disease, or were classified as positive to any of the tests conducted during the quarantine period, USDA may cause any or all of the animals to be slaughtered and the carcasses disposed of as prescribed by USDA to prevent the spread of disease.

As part of monitoring the imported swine for clinical signs of disease, HSTAIC personnel would take the temperatures of all imported swine daily for seven days after arrival and thereafter at the discretion of the quarantine officers in charge.

No animals would be allowed to be moved from HSTAIC until duly discharged by APHIS.

**Executive Order 12291 and Regulatory Flexibility Act**

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Our proposal would enable ARS to import 144 swine for research on the possibility of improving the germplasm of breeding swine in the United States. If improved breeding stock is developed, it should eventually benefit breeders in the private sector.

In December 1986, the swine population of the United States was approximately 51,000,000, of which approximately 6,612,000 were intended for breeding purposes. The ARS shipment is very small compared to this population, and is destined for research facilities instead of the normal market channels in the United States.

There are two potential effects resulting from adoption of this proposed rule, one immediate and one long-term. The first impact is the costs involved in importing the shipment of Chinese swine in accordance with the proposed rule, estimated at $497,000. All costs associated with the importation of the swine would be borne by ARS.

The second possible impact is indirect and could occur only after years of research and development involving the import swine. This impact would be development of improved breeds of U.S. swine incorporating desirable traits of the imported Chinese swine. If such development is successful, productivity of U.S. swine could increase, resulting in savings for swine producers and decreases in domestic consumer prices

VOL 54 ISS 44 MR 8 1989 UMI

for pork and pork products. Since over 98 percent of U.S. swine producers qualify as small entities, higher swine productivity would have a beneficial effect on small entities. Higher swine productivity may be achieved only if numerous activities outside the scope of this rule occur, such as successful research results, development of improved breeds that are marketable, and acceptance and distribution of improved breeds by the marketplace.

Under these circumstances, the Administrator of the animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

**Paperwork Reduction Act**

The regulations in this proposal contain on information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

**Executive Order 12372**

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmetnal consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

**Comment Period**

The Administrator of the Animal and Plant Health Inspection Service has determined that this rulemaking proceeding should be expedited by allowing a 15-day comment period on the proposal. The Agricultural Research Service and the People's Republic of China have already selected swine to be imported in accordance with this rule, and delay would jeopardize arrangements to import these swine, which will be used in research to benefit United States swine breds. In addition, delay would lengthen the period during which use of the HSTAIC facility is devoted exclusively to use by the Agricultural Research Service for importation of swine from China.

**List of Subjects in 9 CFR Part 92**

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, we are proposing to amend 9 CFR Part 92 as follows:

## PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for Part 92 would continue to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

2. Paragraph (g) of § 92.41 would be revised to read as follows:

**§ 92.41 Requirements for the importation of animals into the United States through the Harry S Truman Animal Import Center**

* * * * *

(g) The Agricultural Research Service may, in calendar year 1989, import swine from the People's Republic of China into the United States through the Harry S Truman Animal Import Center in accordance with the following protocols.

**Protocol for Quarantine and Health Requirements for Porcine Animals Exported From the People's Republic of China to the United States of America**

1. The official veterinary organization (OVO) of the People's Republic of China (PRC) shall be responsible for the implementation of quarantine procedures in the PRC and the issuance of certificates concerning the disease status of the swine and certain other matters required by the regulations in this Part 92.

2. The U.S. Department of Agriculture (USDA) shall send veterinarians to the premises of origin of export swine, related isolation premises, testing laboratories, and quarantine facilities to cooperate with PRC veterinarians in conducting quarantine procedures.

3. The premises of origin of export swine shall meet the following requirements:

a. For the last 3 years the premises of origin was located in an area with a 16-km radius which was free of foot-and-mouth disease (FMD), swine vesicular disease (SVD), and hog cholera (HC).

b. For the last year, there has been no evidence of brucellosis, tuberculosis, or pseudorabies on the premises of origin or on premises adjacent to the premises of origin.

c. For the last 5 years, there have been no cases of FMD, SVD, or HC.

d. For the last 3 years, no animal has been introduced into the herd of origin from farms affected with FMD, SVD, or HC.

e. Raw animal food wastes (garbage) have not been fed to the animals for export while in isolation.

4. Animals offered for exportation shall originate from farms which are solely swine breeding operations and shall not have left the farm on which they were born and reared, except as necessary for movement to an approved isolation facility.

5. Animals offered for exportation shall not have been vaccinated for FMD, SVD, or HC.

6. Animals offered for exportation shall pass a 60-day isolation period in a facility on premises approved by the OVO of the PRC. The facility shall be cleaned and disinfected, using a 4 percent sodium carbonate solution used in accordance with applicable label instructions, prior to the start of the isolation. During the isolation period, personnel handling the animals shall not have contact with other domestic farm livestock. The term "domestic farm livestock" does not include pets such as dogs and cats.

7. During the 60-day isolation period, the animals offered for exportation shall be found negative to the following tests [1]:

| | |
|---|---|
| a. Food-and-mouth disease. | 1. Microtiter virus neutralization (VN) test for types A, O, C, and Asia. (The PRC will test for types A and ), and the United States will test for types C and Asia at the USDA Foreign Animal Disease Diagnostic Laboratory (FADDL)). |
| | 2. Agar gel immunodiffusion (AGID) test using virus infection associated antigen (VIAA) in serum. (Animals having responses to the AGID test or reacting to the VN test at 1:10 dilution or greater shall be prohibited from export. Other animals shall be retested within 30 days if the whole group does not have the above responses and there is no clinical evidence of FMD, the group shall be eligible for export. Otherwise, the whole group shall be prohibited from export.) |
| b. Brucellosis: | 1 Standard tube test (STT) at less than 30 IU/ml. |
| | 2. Card test (antigen and protocol to be supplied by USDA). |
| c. Swine vesicular disease. | Virus neutralization test at 1:40 dilution (serums to be tested at FADDL). |
| d. Hog cholera | Fluorescent antibody neutralization (FAN) test at 1:16 dilution. |
| e. Japanese B encephalitis. | Hemagglutination inhibition (HI) test, |

[1] Technical information on laboratory methods and procedures for these tests may be obtained from the Administrator, APHIS, c/o Director, National Veterinary Services Laboratories, P.O. Box 844, Ames, IA 50010.

| | |
|---|---|
| | negative according to PRC standards. |
| f. Pseudo- rabies | Virus neutralization at 1:4 dilution. |
| g. Tuberculosis | Intradermal test using bovine PPD tuberculin (Positive animals will be necropsied. If there are lesions of TB in the test positive pigs, the whole group will be ineligible for export. If no lesions are found, the rest of the pigs will be eligible for export. Note: All swine sacrificed for diagnosis of tuberculosis will be at the importer's expense.) |

All samples of the above tests, except as noted in items 7a, 7c, and 7g, will be submitted to laboratories designated by the OVO of the PRC.

8. All animals offered for exportation during the isolation period must be clinically examined and treated for ectoparasites with a pesticide approved by the OVO of the PRC, used in accordance with applicable label instructions, and given an intramuscular injection of dihydrostreptomycin at a rate of 25 mg/kg dosage twice at an interval of 14 days as a precautionary treatment for leptospirosis.

9. All crates and parts of vehicles and ships used to hold livestock for transport or handling of animals shall be cleaned and disinfected prior to use with a 4 percent sodium carbonate solution used in accordance with applicable label instructions. All aircraft used to transport animals shall be cleaned and disinfected prior to use with a 4 percent sodium carbonate and 0.1 percent sodium silicate solution used in accordance with applicable label instructions.

10. Feed and bedding to be used during the 60-day isolation and during transport shall not originate from epizootic disease infected areas and must meet applicable veterinary hygienic requirements established by the OVO of the PRC concerning freedom of the feed and bedding from contamination that could transmit diseases.

11. The OVO of the PRC shall certify that the People's Republic of China is free of rinderpest and African swine fever, that Teschen's disease has never been diagnosed on the presmises of origin and that there has been no clinical evidence of Teschen's disease on the premises of origin during the isolation period.

12. The animals to be exported shall be examined clinically within 24 hours prior to loading for export by a USDA veterinarian and be healthy and free of signs of infectious and contagious diseases.

13. During the isolation period on the premises of origin and all transport from the isolation facility on the premises or origin to the port of embarkation (including loading), export animals shall not have contact with, or exposure to, animals not included in the group at the isolation facility. Exposure consists of contact with yards, pens, or other facilities or vehicles that have been in contact with animals and have not been cleaned and disinfected.

14. USDA, APHIS representatives will make the final determination on the eligibility of Chinese swine not to be exported to the United States.

**Protocol for Quarantine of Swine From China at the Harry S. Truman Animal Import Center**

*Shipment to the United States*

1. On successful completion of the 60-day isolation period on the premises of origin, the swine shall be accepted for shipment to the United States provided that the official veterinary organization (OVO) of the People's Republic of China (PRC) issues or endorses an official health certificate to the effect that the swine have been kept in isolation for a minimum of 60 days and that, during that time, the animals remained healthy with no evidence of communicable disease affecting swine and that all tests and conditions as stated in this protocol have been met.

2. The swine shall be moved under joint supervision by the OVO of the PRC and U.S. Department of Agriculture (USDA) direct from the isolation facility to the exporting carrier by trucks or other carriers that have been cleaned and disinfected using a 4 percent sodium carbonate solution used in accordance with applicable label instructions under joint OVO/USDA supervision.

3. If the swine transit countries affected with foot-and-mouth disease (FMD), rinderpest, hog cholera, swine vesicular disease (SVD), or African swine fever en route to the United States, they will be refused entry on arrival at the Harry S. Truman Animal Import Center (HSTAIC), unless they were accompanied en route by a USDA inspector who certifies that no disease exposure occurred during shipment.

4. The swine may not transit through the United States or any of its territories en route to U.S. quarantine, except as specifically provided for in an import permit issued by APHIS under the authority of 21 U.S.C. 135.

5. The landing of the swine shall be carried out in accordance with instructions given by a USDA veterinary officer at HSTAIC.

6. All vessels or aircraft from which the imported swine are landed shall be immediately cleaned and disinfected using a 4 percent sodium carbonate and 0.1 percent sodium silicate solution used in accordance with applicable label instructions, in the presence of a USDA veterinary officer.

*Quarantine and Testing Procedures at HSTAIC*

1. The swine shall be quarantined in the import center under the supervision of a veterinary officer of USDA for a period of at least 120 days after arrival and until all tests have been successfully completed.

2. The temperature of all imported swine will be taken daily for 7 days after arrival and thereafter at the discretion of the quarantine officers in charge.

3. All imported swine shall be examined for ectoparasites on arrival at HSTAIC and, if found free of infestation, receive a precautionary spray with coumaphos, used in accordance with applicable label instructions, in the form of a wettable powder or 0.06 emulsified concentrate spray solution. If found to be infested, all affected and exposed swine shall be treated until found free of infestation.

4. During the initial portion of quarantine, the imported swine shall be subjected to the tests listed below.[2] The tests will be performed at the Foreign Animal Disease Diagnostic Laboratory (FADDL). To qualify for release, every animal must have negative test results.

| | |
|---|---|
| * a. Foot-and-mouth disease. | 1. Microtiter virus neutralization (VN) test for types A, O, C, and Asia. |
| | 2. AGID test using virus infection associated antigen (VIAA) in serum. |
| b. Brucellosis | 1. Standard tube test (STT) at less than 30 IU/ml. |
| | 2. Card test. |
| *c. Swine vesicular disease. | Virus neutralization test at 1:40 dilution. |
| *d. Hog cholera. | Fluorescent antibody neutralization (FAN) test at 1:16 dilution. |
| e. Japanese B encephalitis. | Hemagglutination inhibition (HI) test at 1:10 dilution. |
| f. Pseudo-rabies. | Virus neutralization at 1:4 dilution. |
| g. Tuberculosis | Intradermal test using bovine PPD tuberculin and read at 48 hours post injection (positive animals will be necropsied. If there are lesions of TB in the test positive pigs, the whole group may be ineligible for release until it is determined they are free of tuberculosis). |

h. Any other tests determined to be necessary by the Administrator. All tests on collected specimens will be conducted at FADDL, unless authorized by USDA to be conducted at HSTAIC. Imported swine with less than negative test results that are not definitely considered to be infected will be retested if retesting is ordered by APHIS.

* If any imported swine are determined to be infected with these diseases based on test results and other data, they will be refused entry and destroyed, and all other imported swine in HSTAIC will be refused entry and destroyed.

5. Twenty-one days after initial collection of samples for FMD testing a second sample will be taken from each imported swine for a FMD virus infection associated antigen (VIAA) test. All tests listed in items 4a through 4h will be repeated on imported swine at approximately 60 days following the initial collection of test samples.

6. Within seven days of arrival of the imported swine, contact sentinel animals shall be placed with the imported animals at the ratio of at least one contact calf and one contact pig to eight imported swine. The sentinel pigs and calves shall have been found negative to the tests listed in items 4a through 4h prior to their entry into the animal import center.

7. Following the 60-day tests required by item 5, 10 ml of heparinized blood shall be drawn from each imported swine and used to inoculate sentinel pigs, in the ratio of one sentinel pig for each eight imported swine. Each sentinel pig shall be inoculated with

[2] Technical information on laboratory methods and procedures for these tests may be obtained from the Administrator, APHIS, c/o Director, National Veterinary Services Laboratories, P.O. Box 844, Ames, IA 50010.

VOL 54 ISS 44 MR 8 1989 UMI

blood from eight different imported swine, in eight separate subcutaneous sites. The identity of each imported swine used to inoculate each sentinel pig shall be recorded in order to trace possible reactions.

8. Approximately 90 days after arrival of the imported swine, serum from the sentinel pigs and calves will be collected and submitted to FADDL to be tested for the same diseases for which the imported swine were tested.

9. If any imported or sentinel animals show clinical symptoms of, or the causative organism is isolated for, FMD, rinderpest, swine vesicular disease, or hog cholera, USDA shall cause all imported and sentinel animals to be slaughtered and the carcasses disposed of as prescribed by USDA. If any imported or sentinel animals show clinical symptoms of, or are considered exposed to, any other disease, or are classified as positive to any of the tests conducted during the quarantine period, USDA may cause any or all of the animals to be slaughtered and the carcasses disposed of as prescribed by USDA.

10. No animals shall be moved from HSTAIC until duly discharged by APHIS.

11. The ARS will be directly responsible for the payment of all costs involved in the isolation, testing, transportation, and embarkation quarantine of the swine in China, their transportation to HSTAIC, and all applicable quarantine costs at HSTAIC.

Done in Washington, DC, this 3rd day of March 1989.

## 9 CFR Parts 145 and 147

**[Docket No. 89-023]**

### National Poultry Improvement Plan and Auxiliary Provisions

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice of reopening and extension of comment period.

**SUMMARY:** We are reopening and extending the comment period for a proposed to (1) expand the National Poultry Improvement Plan (referred to below as the Plan) to include a new "U.S. Sanitation Monitored, Turkeys" program for reducing Salmonella levels in turkey flocks and products and (2) make other amendments in order to increase the effectivenss of the Plan's monitoring and testing procedures, and to keep the Plan current with the latest improvements in poultry disease technology. Extending the comment period will give interested persons additonal time to prepare comments.

**DATE:** Consideration will be given only to written comments that are postmarked or received on or before April 7, 1989.

**ADDRESSES:** Send an original and two copies of written comments to Helene R. Wright, Chief, Regulatory Analysis and Development, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 86-110. Comments received may be inspected at USDA, 14th and Independence Avenue, SW., Room 1141, South Building, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** Dr. I. L. Peterson, Sheep, Goat, Equine, and Poultry Diseases Staff, VS, APHIS, USDA, Room 771, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-7768.

**SUPPLEMENTARY INFORMATION:** On January 6, 1989, we published in the **Federal Register** (54 FR 418-427, Docket 86-110) a proposal to amend 9 CFR Parts 45 and 147 by (1) expanding the National Poultry Improvement Plan (referred to below as the Plan) to include a new "U.S. Sanitation Monitored, Turkeys" program for reducing Salmonella levels in turkey flocks and products, and (2) making other amendments in order to increase the effectiveness of the Plan's monitoring and testing procedures, and to keep the Plan current with the latest improvements in poultry diseases technology. Comments on the proposal were to be postmarked or received on or before February 6, 1989.

Three commenters indicated, generally, that the original comment period would not allow sufficient time to survey the industry, formulate a consensus, and write comments. Also, the turkey industry has been involved in a number of conventions, leaving inadequate time to respond to the proposed rule within the original comment period. In response to these requests for an extension, we are reopening and extending the comment period for an additonal 30 days from the date of publication of this notice. We will consider all written comments that are postmarked or received on or before April 7, 1989. The new deadline will give interested persons additional time to prepare comments.

Done at Washington, DC, this 3rd day of March 1989.

**[Rel. No. IC-16842; File No. S7-5-89]**

### Time Period During Which the Board of Directors of a Registered Management Investment Company Must Select the Company's Independent Public Accountant

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rule and request for comment.

**SUMMARY:** The Commission is publishing for public comment a rule proposal that would expand the time period during which certain registered management investment companies must select an independent public accountant ("accountant"). Currently, each such company must select its accountant at a board of directors' meeting held within 30 days before or after the beginning of the company's fiscal year (the "60 day window") or before the annual meeting of shareholders in that year. The proposed rule would set out the following alternative time periods during which the accountant may be selected: (a) 90 days before or after the beginning of the fiscal year (the "180 day window"), or (b) 30 days before or 90 days after the beginning of the fiscal year (the "120 day window"). The 180 day window would be available only to registered management investment companies that are part of a family of investment companies ("family") whose members have staggered fiscal year ends, are organized in a jurisdiction not requiring them to hold annual meetings of shareholders, and do not in fact hold such meetings. Registered management investment companies that are not part of a family (or are part of a family whose members have identical fiscal year ends) may use the 120 day window if organized in jurisdiction not requiring the company to hold annual meetings of shareholders, and the company does not in fact hold such a meeting. The Commission makes this proposal because of numerous applications that have been filed seeking an exemption from the 60 day window. If adopted, the proposed rule could reduce significantly the need for registered management investment companies to obtain individual exemptions in this area.

**DATE:** Comments must be received on or before May 8, 1989.

**ADDRESS:** Send comments in triplicate to Johanthan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments should refer to File No. S7-5-89. All comments will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** Brian P. Kindelan, Special Counsel, (202) 272-2048, or Christopher Sprague, Staff Attorney, (202) 272-7779, Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

**SUPPLEMENTARY INFORMATION:** The Commission is asking for public comment on proposed rule 32a-3 under section 32(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) (the "Act"). The proposed rule would enlarge the time period during which the boards of directors of certain registered management investment companies must select an independent public accountant.

### Executive Summary

Section 32(a)(1) of the Act (15 U.S.C. 80a-31(a)(1)) requires the independent public accountant ("accountant") who issues a report as to financial statements to be filed with the Commission by a registered management investment company ("company") to be selected at a board of directors' meeting held within 30 days before or after the beginning of the company's fiscal year (the "60 day window") or before the annual meeting of stockholders in that year.[1] The 60 day window is less pertinent to a company that, consistent with prevailing industry practice, holds its annual shareholders' meeting several months after the beginning of its fiscal year, because the board of such a company may select the accountant at any time up to the date of the annual shareholders' meeting. However, where an investment company is not required by state law to hold annual meetings of shareholders and does not in fact hold such meetings, it must comply with the 60 day window. Presently, corporate statutes in several states permit investment companies to forego annual meetings of shareholders. In addition, investment companies organized as business trusts are typically not required to hold annual shareholders' meetings.

In series of applications for exemption from section 32(a)(1), some open-end management investment companies ("mutual funds") organized in states not requiring annual meetings of shareholders have argued that the 60 day window is impractical for mutual funds within a family of investment companies ("family") whose members have staggered fiscal year ends. These mutual funds have sought permission to select their accountants instead during a period running from 90 days before to 90 days after the beginning of their fiscal years (a "180 day window"). The Commission has granted the exemptions, based primarily on the applicants' representations that this relief would allow such mutual funds to avoid duplicative board meetings called to select the accountant. Proposed rule 32a-3 would codify these exemptions for companies within a family whose members have staggered fiscal year ends.

Other applicants have requested and received exemptive orders on the ground that a 120 day window (*i.e.*, a period commencing 30 days before and ending 90 days after the beginning of the company's fiscal year) would allow the board of directors to review the accountant's audit of the previous year's operations, and thereby make a better informed decision as to whether to retain that accountant. As discussed more fully below, auditing and preparing financial reports for a company is more complex and time-consuming today than in 1940, when a 60 day window appeared sufficient. Accordingly, proposed rule 32a-3 would codify these exemptions to give companies not qualifying for the 180 day window an additional 60 days to select their accountants. As is the case with companies that would have a 180 day window available, those companies that would have a 120 day window available to them must be organized in a state that does not require annual shareholders' meetings (and must not, in fact, hold such a meeting in the fiscal year in which the exemption is relied on). Since the 60 day window has little import for companies that hold annual meetings of shareholders, the proposal would not extend to such companies.

Proposed rule 32a-3 would be prospective in effect and is intended to set forth for all open-end and closed-end management investment companies the Commission's standards for exemption from the statutory 60 day window for accountant selection. If adopted, rule 32a-3 would supersede all prior Commission orders that exempted such companies from the 60 day window. Receipients of such prior orders should, therefore, avail themselves of the

[1] This requirement also applies to registered face-amount certificate companies. However, because no such company has sought relief from the 60 day window, registered face-amount certificate companies are not within the scope of the proposed rule.

VOL 54 ISS 44 MR 8 1989 UMI

comment process on proposed rule 32a–3, if they so desire.

The Commission believes that the proposed rule would benefit management investment companies by removing the need to file applications for exemption from section 32(a)(1). At the same time, the proposed rule would not contravene the legislative intent of that section of harm shareholders.

**Background**

Section 32(a)(1) of the Act states that it shall be unlawful for any registered management company or registered face-amount certificate company to file with the Commission any financial statement signed or certified by an independent public accountant, unless such accountant shall have been selected at a meeting held within thirty days before or after the beginning of the fiscal year or before the annual meeting of stockholders in that year by the vote, cast in person, of a majority of those members of the board of directors who are not "interested persons" of such registered company.[5] At issue in proposed rule 32a–3 is the requirement in section 32(a)(1) that an investment company's board of directors select the accountant "at a meeting held within thirty days before or after the beginning of the fiscal year or before the annual meeting of stockholders in that year * * *."

The accountant selection requirement was part of the Act as originally enacted.[6] However, the original legislative history of the Act has no discussion of why Congress chose a 60-day window.[7] The discussion of section 32(a) focuses only on the rationale for the shareholder ratification requirement of section 32(a)(2) (15 U.S.C. 80a–31(a)(2)).[8] Section 32(a)(2) requires that where an investment company holds annual meetings, the board's selection of an accountant must be ratified at the next such meeting following selection.

Today, a large number of investment companies are organized as Maryland corporations or Massachusetts business trusts,[9] and, as such, are not required to convene an annual meeting of shareholders.[10] Unless such a company decided to hold an annual shareholders' meeting as a means of obtaining certain approvals required by the Act[11] or for some other reason, section 32(a)(1) would require its board of directors to select the accountant within the 60-day window. This requirement may be impractical for mutual fund families, which typically employ staggered fiscal year ends for funds within the family to facilitate the economic utilization of resources for the accounting personnel of both the investment manager and the accountant.[12] Overlapping boards of directors also are used by many mutual fund families to reduce the costs associated with board meetings.[13] One apparent effect of the 60-day window on mutual funds with these characteristics is that their boards of directors are required to hold more frequent meetings, sometimes for the sole purpose of selecting the accountant.[14] The fact that directors must cast their votes "in person" at these meetings adds to the expense of time and money.[15]

In both no-action letters and exemptive orders, companies have received relief from the 60 day window of section 32(a)(1). The Division of Investment Management ("Division") has taken no-action positions in several cases where special circumstances made compliance with section 32(a)(1) impractical.[16] Commencing in 1967,[17] there began a series of exemptive orders allowing mutual funds within families whose members had staggered fiscal year ends to select their accountants as much as 90 days before or after the beginning of the fiscal year.[18] These

---

conference call have been held not to satisfy the statutory requirement. *See* Overseas Securities Co. (pub. avail. Mar. 12, 1981). *See also* S. Rep. No. 184, 91st Cong., 1st Sess. 39 (1969) (discussing an earlier version of the section of the Investment Company Amendments Act of 1970 that amended section 32(a) to require that directors be personally present at a meeting held to select the accountant).

[18] In Farm Bureau Growth Fund, Inc., (pub. avail. Feb. 8, 1980) the company's board of directors selected the accountant for the ensuing fiscal year and also made an immediately effective change to its fiscal year. The requisite board approval of the accountant was ultimately obtained for the original and revised fiscal years, although not in compliance with section 32(a)(1). The Division granted a no-action position, noting these "unique circumstances." The Division also took a no-action position in South Bay Corporation, (pub. avail. Apr. 7, 1977) despite the selection of the accountant outside the time period prescribed by section 32(a)(1). That closed-end company requested special treatment because it was in the process of being liquidated. Finally, in League Investment Fund, Inc., (pub. avail. May 10, 1974) all the shares of League Investment Fund, Inc. were owned by ICU Services Corporation. By way of a no-action position, the Division sanctioned the board's selection of the accountant outside the time period prescribed by section 32(a)(1), because written approval of the accountant by the sole shareholder was obtained. *But see* John Nuveen & Co. Inc., (pub. avail. Nov. 18, 1988) in which the Division declined to take a no-action position regarding a mutual fund family's proposal to select the accountant at its regular board meeting rather than within the 60 day window, suggesting that the fund instead seek an exemptive order. In support of its request for a no-action position, the mutual fund family had proffered arguments similar to those made in the series of applications for exemptive orders that ultimately followed (*e.g.*, that given the varying fiscal year ends and overlapping boards of directors for the funds within the family, strict compliance with the 60 day window would entail duplication of effort).

[19] IDS Mutual, Inc., Investment Company Act Rel. Nos. 15812 (June 18, 1987) (52 FR 23504, June 22, 1987) (notice of application) and 15874 (July 16, 1987) (order).

[20] Other exemptive orders that granted a 180 day window include: The Pierpont Money Market Fund, Investment Company Act Rel. Nos. 16575 (Sept. 28, 1988) (53 FR 39010, Oct. 4, 1988) (notice of application) and 16812 (Oct. 26, 1988) (order); PaineWebber America Fund, Investment Company Act Rel. Nos. 16554 (Sept. 8, 1988) (53 FR 35474, Sept. 14, 1988) (notice of application) and 16691 (Oct. 4, 1988) (order); Alex. Brown Cash Reserve Fund, Investment Company Act Rel. Nos. 16624 (Aug. 12, 1988) (53 FR 31795, Aug. 19, 1988) (notice of application) and 16650 (Sept. 7, 1988) (order); Pilgrim Adjustable Rate Fund, Investment Company Act

Banking and Currency, 76th Cong., 3d Sess. 305, 1119 (1940). *See also id.* at 920 (at which William Werntz, Chief Accountant of the Commission, testified that the shareholder approval mechanism "will give the auditor a greater sense of direct responsibility to the stockholders * * *.").

[9] Of the 2,511 funds that were the basis for an unpublished survey conducted in the fall of 1988 by Lipper Analytical Securities Corporation, 1,309 were organized in Massachusetts (the vast majority as business trusts) and 734 were organized in Maryland. Looking to other states that also have no annual shareholders' meeting requirement, 80 funds were organized in Minnesota and 33 were organized in California.

[10] *See* Gould and Lins, *Unit Investment Trusts*, 43 Bus. Law. 1177, 1179 (Aug. 1988); Md. Corps. & Ass'ns Code § 3–801 (Michie Supp. 1988). Of course, some companies in existence in 1940 also were allowed under state law to forego annual shareholders' meetings. Thus, the impetus for the proposed rule has more to do with the increased number and size of fund families and the added difficulty of accounting tasks today, as discussed at notes 10 and 23 *infra*, respectively.

[11] *See infra* note 28 and accompanying text, discussing generally the shareholder approvals required by the Act, which may be obtained at an annual shareholders' meeting.

[12] *See* Letter from Kathy D. Ireland of the Investment Company Institute to Kathryn B. McGrath, Director, Division of Investment Management (June 10, 1988) ("ICI Letter").

[14] ICI Letter.

[15] The Division of Investment Management has interpreted the "in person" requirement of section 32(a)(1) of the Act so that meetings by telephone

---

[5] The term "interested person" is defined in section 2(a)(19) of the Act (15 U.S.C. 80a–2(a)(19)).

[6] Investment Company Act of 1940, Pub. L. No. 76–768, section 32(a)(1), 54 Stat. 789, 838 (1940).

[7] There is also no discussion of the rationale for the 60-day window in the legislative history to the 1970 amendments to the Act. The Investment Company Amendments Act of 1970 amended section 32 to its present form. Pub. L. No. 91–547, 84 Stat. 1413, 1427–39 (1970). The 1970 amendments were generally designed to substitute a new defined term—"interested person"—for the term "affiliated person", and to require that directors vote in person. Investment Company Amendments Act of 1970: Report of the Committee on Interstate and Foreign Commerce, H.R. Rep. No. 1382, 91st Cong., 2d Sess. at 36 (1970).

[8] In their testimony before a Senate subcommittee, both Commissioner Healy and David Schenker (counsel to the Commission's Investment Trust Study) pointed out that the approval mechanism set out in section 32(a) was intended to emphasize that the accountant acts for the security holders rather than for management. Investment Trusts and Investment Companies: Hearings on S. 3580 Before a Subcomm. of the Senate Comm. on

applications involved mutual funds organized in states not requiring them to hold annual shareholders' meetings. The applicants noted that fewer board meetings would have to be called if a 180 day window were in effect, thereby reducing expenses ultimately borne by the shareholders. Applicants also asserted that as a general matter, unlike the mutual funds in existence at the time the Act was drafted, the mutual funds of today typically are part of families [16] characterized by staggered fiscal year ends and overlapping boards of directors, for which a 60 day window is inappropriate.

Another recent class of exemptive applicants consists primarily of mutual funds that were not in a family (or were in a family having identical fiscal year ends) and were organized in a state not requiring annual shareholders' meetings. These companies argued that expanding to 90 days the portion of the window occurring after the beginning of the fiscal year would allow their boards of directors to review the accountant's audit of the previous fiscal year's operations, and thereby make a better-informed decision on whether to retain that accountant.[17] This argument is also germane to companies eligible to rely on the 180 day window.

**Discussion**

Proposed rule 32a–3 would offer an expanded time period in which to select an accountant to any company organized in a state that does not require annual shareholders' meetings, where the company does not in fact hold such a meeting in the fiscal year in which reliance on the rule is sought. A company within a family of investment companies [18] whose members have staggered fiscal year ends would be allowed to select the accountant during the period from 90 days before to 90 days after the beginning of its fiscal year. This 180 day window would help such companies to minimize redundant board of directors' meetings.[19] A company not within a family (or a company within a family whose members have identical fiscal year ends)—a "stand-alone company"—[20] would be allowed to select the accountant during the period from 30 days before to 90 days after the beginning of its fiscal year. This 120 day window would promote an objective shared by all the companies that would be eligible to rely on the proposed rule: The opportunity to review the accountant's audit of the previous fiscal year's financial statements before having to decide whether to retain that accountant. Comment is specifically requested, however, on whether the proposed windows should be expanded or shortened.

Proposed rule 32a–3, if adopted, would be within the Commission's exemptive power under section 6(c) of the Act (15 U.S.C. 80a–6(c)). Section 6(c) provides that the Commission, by rules and regulations upon its own motion, may, among other things, conditionally or unconditionally exempt any person or any class or classes of persons, from any provision of the Act, "if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions" of the Act. Mutual fund structure and accounting in the eligible companies display a degree of complexity that would have been exceptional in 1940. As discussed more fully below, the exemption provided by proposed rule 32a–3, if adopted, would be appropriate in the public interest by responding to these developments and allowing eligible companies additional time to review the accountant's work and by minimizing duplicative board of directors' meetings. Of particular importance is the absence of any legislative history, contemporaneous Commission interpretive releases, or other evidence indicating that the 60 day window, rather than some other time period, reflected a particular judgment by Congress. In light of these considerations, and because the regularity with which directors select the accountant would not be reduced significantly, the Commission believes the rule would be consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Despite the absence of legislative history explaining the need for only a 60 day window, the Commission has considered whether expansion of the window to 180 days for companies in a family with staggered fiscal year ends

---

Rel. 16470 (July 5, 1988) (53 FR 26352, July 12, 1988) (notice of application) and 16505 (July 29, 1988) (order); American Capital California Tax-Exempt Trust, Investment Company Act Rel. Nos. 16398 (May 11, 1988) (53 FR 17526, May 17, 1988) (notice of application) and 16434 (June 6, 1988) (order); The Rodney Square Benchmark U.S. Treasury Fund, Inc., Investment Company Act Rel. Nos. 16361 (Apr. 28, 1988) (53 FR 15942, May 4, 1988) (notice of application) and 16409 (May 23, 1988) (order); AIM Convertible Securities, Inc., Investment Company Act Rel. Nos. 16328 (Mar. 21, 1988) (53 FR 9838, Mar. 25, 1988) (notice of application) and 16369 (Apr. 18, 1988) (order); Command Government Fund, Investment Company Act Rel. Nos. 16270 (Feb. 12, 1988) (53 FR 3089, Feb. 19, 1988) (notice of application) and 16314 (Mar. 14, 1988) (order); Nuveen Tax-Free Bond Fund, Inc., Investment Company Act Rel. Nos. 15899 (July 13, 1987) (52 FR 27099, July 17, 1987) (notice of application) and 15939 (Aug. 6, 1987) (order). *But see* MacKay-Shields Mainstay Series Fund, Investment Company Act Rel. Nos. 16875 (Dec. 2, 1988) (53 FR 49810, Dec. 9, 1988) (notice of application) and 16733 (Dec. 30, 1988) (order), in which a 180 day window was granted to an open-end series investment company and all companies organized in the future without any requirement as to staggered fiscal year ends.

[16] Over the past few decades, an increasing proportion of mutual funds have been created as part of a family. A study of mutual funds submitted to the Congress in 1962 revealed that of the 156 open-end companies surveyed, only 86 companies (or 55%) were part of a multicompany unit. *See* A Study of Mutual Funds, prepared for the Securities and Exchange Commission by the Wharton School of Finance and Commerce, 87th Cong., 2d Sess., Report of the House Committee on Interstate and Foreign Commerce 41–42 (Comm. Print 1962). The study did note, however, that "the number of multifirm groups and members of existing groups would be somewhat enlarged if account were taken of the companies excluded because of small size (and occasionally other reasons)". *Id.* at 42, n.11. In contrast, a 1988 survey revealed that 2,305 of 2,458 mutual funds surveyed (or 94%) were in a complex containing at least two funds. *See* Lipper Directors' Analytical Data, Summary Table by Complex, Lipper Analytical Securities Corporation (Fall 1988).

[17] *See* USAA Mutual Fund, Inc., Investment Company Act Rel. Nos. 16324 (Mar. 18, 1988) (53 FR 9042, Mar. 25, 1988) (notice of application) and 16362 (Apr. 13, 1988) (order); Midwest Income Trust, Investment Company Act Rel. Nos. 16625 (Nov. 7, 1988) (53 FR 45839, Nov. 14, 1988) (notice of application) and 16672 (Dec. 2, 1988) (order) (expanding the window to 90 days after the beginning of each company's fiscal year); MBL Growth Fund, Inc. and MAP Government Fund, Inc., Investment Company Act Rel. Nos. 16649 (Nov. 21, 1988) (53 FR 47898, Nov. 28, 1988) (notice of application) and 16727 (Dec. 20, 1988) (order) (expanding the window to 60 days after the beginning of each fund's fiscal year); Growth Industry Shares, Inc., Investment Company Act Rel. Nos. 16686 (Nov. 30, 1988) (53 FR 49282, Dec. 8, 1988) (notice of application) and 16713 (Dec. 27, 1988) (order) (expanding the window to 90 days after the beginning of each fund's fiscal year). One item of form N–SAR, the semiannual report of registered management investment companies, is based on the audit examination conducted by the accountant. Form N–SAR must be filed with the Commission no later than the sixtieth day after the end of the fiscal period to which the report relates. The audited financial statements for the fiscal year are required to be mailed to shareholders within the same 60 day period. Providing the board 90 days after the beginning of the company's fiscal year to select the accountant would thus allow it to review the accountant's audit examination for the just-ended fiscal year and also the form N–SAR item for which the examination serves as the basis.

[18] Paragraph (b)(1) of the proposed rule defines "family of investment companies" as "any two or more registered management investment companies which share the same investment adviser or principal underwriter and hold themselves out to investors as related companies for purposes of investment and investor services".

[19] The Commission seeks comment on the costs associated with such board of directors' meetings in quantitative terms, and on alternatives other than the proposed rule that would allow such companies to reduce these costs.

[20] Paragraph (b)(2) of the proposed rule defines "stand-alone company" as "any registered management investment company that is not in a family of investment companies, or is in a family, each of whose members has the same fiscal year end."

VOL 54 ISS 44 MR 8 1989 UMI

might cause selection of the accountant to become more perfunctory. Under the proposed rule, it may become common for the accountant for several companies within a family to be selected at a single board of directors's meeting. Arguably, this could result in the individualized accounting needs of each company being overlooked. The Commission believes, however, that the risk of overlooking a particular company's accounting needs is slight, and that, in any event, investment company directors will continue to give thorough consideration to the selection of an appropriate accountant for each company. This belief is supported by the fact that to the Commission's knowledge, no problems of this nature have arisen in the operation of rule 18f-2(e) [17 CFR 270.18f-2(e)] under the Act, which provides that each series of a series investment company is not required to vote separately on the selection of the accountant (because their interests in that regard are consistent).[21]

The Commission also has considered the consequences of expanding to 120 days the current 80 day window for companies that are not in a family whose members have staggered fiscal year ends, but are organized in states not requiring such companies to hold annual shareholders' meetings (and in fact hold no annual meetings). The only apparent risk in that expansion is that should a change of accountants become necessary, it may not be accomplished in as prompt a fashion as might otherwise be the case. The Commission does not believe that this risk is significant, however, and is persuaded by the argument that the accountant's audit of the previous fiscal year's operations is important to the issue of accountant selection, and that such audit is generally incomplete 30 days after the beginning of the fiscal year.[22] Applicants have argued that the auditing and preparation of financial reports for companies may be more complex and time-consuming today than in 1940.[23]

Unlike the applicants that sought a 180 day window,[24] those seeking a 120 day window focused on the need to expand the portion of the window occurring after the beginning of the fiscal year to provide additional time in which to review the accountant's work.[25] Thus, there is no need to expand the portion of the window occurring before the beginning of the fiscal year for such companies, and the proposed rule would not do so.

The Commission has considered whether to allow companies organized in a state requiring annual shareholders' meetings or companies that simply choose to hold annual shareholders' meetings to rely on the propose rule. A company could choose to hold an annual shareholders' meeting to elect its directors even though section 16(a) of the Act (15 U.S.C. 80a-16(a)) requires investment companies to hold an annual or special shareholders' meeting in only two situations: (1) To elect the initial board of directors, and (2) to elect directors to fill existing vacancies on the board in the event that less than a majority of directors were elected by shareholders.[26]

Under section 32(a)(1), the boards of directors of companies holding shareholders' meetings may select the accountant either within 30 days before or after the beginning of the fiscal year, or at any time before the annual shareholders' meeting in that fiscal year. Given the discretion that companies have in when to hold their annual shareholders' meetings, the board's ability under the section to make its accountant selection any time before the shareholders' meeting would generally give a company holding such meetings great flexibility in the time period for selection. For example, a calendar-year company that holds annual shareholders' meetings in June or later in the year would have a time period for accountant selection that equals or exceeds the windows of the proposed rule. Viewed another way, under the section, such a company with a meeting after March 31 (90 days after the beginning of the company's fiscal year) could still make its accountant selection any time before that meeting, while the rule would permit selection to be made only up until March 31.[27] Because there appears to be no public interest to be served by extending the proposed rule to companies that hold annual meetings, the proposal would not be available to them.

The Commission, however, seeks comment on whether there is a substantial need for companies that hold annual shareholders' meetings to use the expanded windows. If there is significant persuasive comment answering this question affirmatively, the Commission may modify the rule to exempt those companies.

Finally, the Commission believes that the proposed rule should apply to both open-end and closed-end management investment companies. Although virtually all of the exemptive orders and no-action letters involved open-end companies, one of the exemptive orders involved closed-end companies.[28]

---

[21] In the release proposing rule 18f-2(e), the Commission stated that "[s]uch a matter [voting on the accountant] is not one in which series would generally have inconsistent interests since their primary concern is obtaining the services of a competent accountant who will give them an accurate picture of the financial condition of their series and company." Investment Company Act Rel. No. 6898 (Feb. 17, 1973) [37 FR 4219, Feb. 28, 1972].

[22] *See supra* note 17.

[23] This increased complexity may be attributable to a variety of innovations appearing since 1940 which must be reviewed by the accountant. In addition, the variety of securities held by investment companies has increased, thereby complicating the task of valuing the portfolio. *See also* application of MFL Growth Fund, Inc. and MAP Government Fund (File No. 813-7170), *supra* note 17, in which the applicants represented that "[g]iven the increased complexities in both the audit and reporting of financial information of the Funds, both in the daily accounting along with the ever changing tax laws, it is not feasible that work can be accomplished and reviewed to everyone's satisfaction and be presented to the Boards of Directors within a thirty day period."

[24] *See supra* note 15.

[25] *See supra* note 17.

[26] *See* John Nuveen & Co., Inc. (pub. avail. Nov. 15, 1988). Other sections of the Act also require approvals, which may be obtained at an annual shareholders' meeting. Section 32(a)(2) requires the directors' selection of the accountant to be submitted for ratification or rejection at the next succeeding annual meeting of stockholders, if such meeting be held. Section 15 (15 U.S.C. 80a-15) requires that the investment advisory contract be approved initially by the vote of a majority of outstanding voting securities of the registered investment company. Section 15 also requires that the contracts governing a company's investment adviser and principal underwriter shall continue in effect for a period more than two years from the date of execution only if specifically approved at least annually by the company's board of directors or by the vote of a majority of the company's outstanding voting securities.

[27] Of course, if a company held its annual shareholders' meeting very early in the fiscal year, it could have a narrower window for accountant selection under section 32(a)(1) than that available under the proposed rule. For example, assume a calendar-year company has its annual meeting on March 1. Under the statute, selection would have to be made by that time. If the proposal was available, however, selection could also be made between March 1 and March 31 (*i.e.*, up to 90 days after the beginning of the fiscal year). In that circumstance, a year or more could pass before ratification of that choice by the shareholders, which need only be at the *next* annual meeting (*i.e.*, accountant selection and shareholder ratification need not occur in the same fiscal year). Under the statute, that type of delay would result only if the shareholders' meeting was held before 30 days after the beginning of the fiscal year.

[28] Cigna Funds Group, Investment Company Act Rel. Nos. 16728 (Dec. 29, 1988) (54 FR 345, Jan. 5, 1989) (notice of application) and 16772 (Jan. 23, 1989) (order) (The closed-end funds included in the order held annual shareholders' meetings to comply with the listing requirements of the New York Stock Exchange. Accordingly, those funds were entitled to relief only in the event that they ceased holding annual shareholders' meetings.) In addition, many of the exemptive orders applied to "future investment companies", and thus were not limited to open-end companies.

**Cost/Benefit of Proposed Action**

Proposed rule 32a-3 would not impose any significant additional burdens on investment companies. On the contrary, investment companies to which the rule would apply would generally file fewer applications for exemption and would be able to hold fewer board of directors' meetings. The proposed rule also would allow the board of directors of eligible companies to make better-informed decisions concerning the selection of an accountant. The Commission would benefit from the proposed rule because its staff would review fewer applications for exemption in this area. Comments are requested on these matters, however, and on the costs or benefits of any other aspect of the proposed action.

**Regulatory Flexibility Act Certification**

Pursuant to section 605(b) of the Regulatory Flexibility Act [5 U.S.C. 605(b)], the Chairman of the Commission has certified that proposed rule 32a-3 will not, if adopted, have a significant impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

**List of Subjects in 17 CFR Part 270**

Investment companies, Reporting and recordkeeping requirements, Securities.

**Text of Proposed Rule**

Part 270 of Chapter II of Title 17 of the Code of Federal Regulations is proposed to be amended as shown.

**PART 270—RULE AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940**

1. The Authority citation for Part 270 is amended by adding the following citation:

**Authority:** Secs. 38, 40, 54 Stat. 841, 842; 15 U.S.C. 80a-37, 80a-39; The Investment Company Act of 1940, as amended, 15 U.S.C. 80a-1 *et seq.*; unless otherwise noted. * * * § 270.32a-3 is also issued under sec. 6(c) (15 U.S.C. 80a-6(c)).

2. By adding 270.32a-3 to read as follows:

**§ 270.32a-3 Exemption from provision of Section 32(a)(1) regarding the time period during which a registered management investment company must select an independent public accountant.**

(a) A registered management investment company ("company") organized in a jurisdiction that does not require it to hold annual meetings of its stockholders, and which does not hold an annual stockholders' meeting in a given fiscal year, shall be exempt in that fiscal year from the requirement of section 32(a)(1) of the Act (15 U.S.C. 80a-31(a)(1)) that the independent public accountant ("accountant") be selected at a board of directors' meeting held within 30 days before or after the beginning of the fiscal year or before the annual meeting of stockholders in that year, *provided*, that such company is either:

(1) In a family of investment companies as defined in paragraph (b)(1), where not all the member companies of such family have an identical fiscal year end and where such company selects an accountant at a board of directors' meeting held within 90 days before or after the beginning of its fiscal year; or

(2) A stand-alone company as defined in paragraph (b)(2) of this section, where such company selects an accountant at a board of directors' meeting held within 30 days before or 90 days after the beginning of its fiscal year.

(b) For purposes of this rule:

(1) "Family of investment companies" means any two or more registered management investment companies which share the same investment adviser or principal underwriter and hold themselves out to investors as related companies for purposes of investment and investor services; and

(2) "Stand-alone company" means any registered management investment company that is not in a family of investment companies, or is in a family, each of whose members has the same fiscal year end.

By the Commission.

**Jonathan G. Katz,**

*Secretary.*

March 1, 1989.

**Regulatory Flexibility Act Certification**

I, David S. Ruder, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that proposed rule 32a-3 under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*), concerning the selection of independent public accountants by certain registered management investment companies, will not, if promulgated, have a significant impact on a substantial number of small entities. The proposed rule in certain cases would allow an investment company that is a small entity to avoid the expense of one additional board of directors meeting each year. The resulting expense saving, however, would not be a significant proportion of the investment company's expenses.

David S. Ruder,

*Chairman.*

Dated: March 1, 1989.

BILLING CODE 8010-01-M

**DEPARTMENT OF THE INTERIOR**

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR Part 761**

**Areas Unsuitable for Mining; Areas Designated by Act of Congress; Reopening of Public Comment Period on Proposed Rule and Draft Environmental Impact Statement Supplement**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Notice of reopening of public comment period.

**SUMMARY:** The Office of Surface Mining Reclamation and Enforcment (OSMRE) of the Department of the Interior is reopening the comment period on a proposed rule and the accompanying draft environmental impact statement (EIS) supplement. The proposed rule would amend those portions of OSMRE's permanent program regulations that address (1) the circumstances which constitute valid existing rights to mine in areas where Congress has otherwise prohibited mining and (2) the applicablility of the mining prohibitions to subsidence resulting from underground mining. This action will afford additional time for public comment on the proposed rule and on the draft EIS supplement.

**DATES:** The comment period is extended until 3:30 p.m. Eastern time April 24, 1989. Comments received after the close of the comment period may be considered in preparation of the final rule or the final EIS supplement.

**ADDRESSES:** *Written comments on the proposed rule:* Hand deliver to the office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street NW., Washington, DC; or mail of OSMRE, Administrative Record, Room 5131L, 1951 Constitution Avenue NW., Washington, DC 20240.

*Written comments on the draft EIS supplement:* Hand deliver to the office of Surface Mining Reclamation and Enforcement, Room 5121, 1100 L Street, NW., Washington, DC; or mail to Catherine Roy, OSMRE, Room 5121L,

VOL 54 ISS 44 MR 8 1989 UMI

1951 Constitution Avenue NW., Washington, DC 20240.

**FOR FURTHER INFORMATION CONTACT:** For information concerning the proposed rule: Patrick W. Boyd, (202 or FTS) 343–1864; for information concerning the draft EIS supplement: Catherine Roy, (202 or FTS) 343–5143.

**SUPPLEMENTARY INFORMATION:** On December 27, 1988, OSMRE published in the **Federal Register** a proposed rule that would amend those portions of its permanent program regulations at 30 CFR Part 761 which address the circumstances which constitute valid existing rights (VER) to mine in areas where Congress has otherwise prohibited mining under section 522(e) of the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act). At the same time, OSMRE also issued for comment a proposal on the applicability of the prohibitions in section 522(e) of the Act to subsidence resulting from underground mining. The proposal stated that comments would be accepted until 5:00 p.m. local time on March 7, 1989 (53 FR 52374). Interested persons should also refer to the Departmental policy statement to prevent coal mining in the national parks and similarly protected areas, which was also published on December 27, 1988.

On January 11, 1989, OSMRE published in the **Federal Register** a notice of the availability of and a request for comments on a draft EIS supplement addressing the proposed revisions to the permanent program rules. The notice stated that comments would be accepted until 3:30 p.m. local time on March 3, 1989. (54 FR 989)

The Secretary of the Interior is very concerned about the complex and difficult problem of valid existing rights to mine in areas otherwise protected from mining by the Act. Therefore, he has decided to Reopen the comment period on the proposed rule and on the draft EIS supplement for a additional 45 days of ensure that everyone has an adequate opportunity to comment. He hopes that interested parties will take this opportunity to suggest additional options that they believe may solve this problem. If other viable options are suggested, the Secretary may decide to repropose the rule and solicit additional comments on those suggestions. Also, the Secretary wants the final EIS to be the best possible technical product. He hopes everyone with relevant information will submit it to OSMRE to assist us in developing an EIS that addresses the public's concerns.

Dated: March 1, 1989.

**Robert H. Gentile,**

*Director, Office of Surface Mining Reclamation and Enforcement.*

BILLING CODE 4310–05–M

## POSTAL RATE COMMISSION

**39 CFR Part 3001**

**[Docket No. R88S–3]**

### Rules of Practice and Procedure Relating to Documentation of Statistical and Volume Evidence

March 1, 1989.

**AGENCY:** Postal Rate Commission.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Commission proposes to amend Rule 31(k)(2) of its rules of practice to require improved documentation of econometric and other statistical studies offered in evidence, to amend Rule 54(j) of its rules of practice to require improved documentation of volume estimates offered in evidence by the Postal Service, and to amend Rule 102(b) to require the Postal Service to report on a current basis revisions to certain data relating to volumes.

**DATES:** Comments must be received on or before April 24, 1989.

**ADDRESS:** Comments and correspondence relating to this Notice should be sent to Charles L. Clapp, Secretary of the Commission, Suite 300, 1333 H Street, NW., Washington, DC 20268. (Telephone: 202/789–6840).

**FOR FURTHER INFORMATION CONTACT:** David F. Stover, General Counsel, Postal Rate Commission, Suite 300, 1333 H Street, NW., Washington DC 20268; (202) 789–6820.

**SUPPLEMENTARY INFORMATION:** We propose to amend rule 31(k)(2) of our rules of practice (39 CFR 3001.31(k)(2)), which governs the statistical presentations of all parties to our proceedings; rule 54(j) of our rules of practice (39 CFR 3001.54(j)), which governs the Postal Service's presentation of projected volumes in our proceedings; and Rule 102(b) of our rules of practice (39 CFR 3001.102(b)), which governs periodic data reporting requirements to the Commission. Our proposed amendments set forth initial documentation standards for these categories of evidence that are clearer and more specific than those contained in the current rules. Our purpose in doing so is to expedite discovery and cross-examination of such evidence and facilitate its analysis in the limited time available in our rate hearings.

**Amendments to Rule 31(k)(2)**

The Commission's rules of practice setting documentation standards for statistical evidence were drafted in the early 1970s. If adequate then, they have proven to be too vague and general to meet the current needs of the Commission and the parties in this area. Certain statistical evidence submitted in recent proceedings has become too complex and sophisticated to be effectively understood and tested in the limited time available in our proceedings, given the current level of initial documentation required by our rules. If the Commission is to conduct adequate discovery and cross-examination of such evidence in the time allotted by statute, clear and thorough documentation must accompany it at the time it is filed.

The improved documentation that we propose to require for statistical evidence focuses on econometric evidence. The econometric evidence submitted in our proceedings, especially that underlying the Postal Service's volume forecasts, has become the most difficult form of statistical evidence to evaluate within the hearing time allotted. This is due to its highly technical nature, its ever increasing quantity, and its documentation, which, at times, has been inadequate. Therefore, econometrics is the statistical area where improved documentation standards are needed most.

The standard econometric approach involves several steps. It begins with a model that summarizes theories about economic relationships in a form convenient for measurement and empirical testing. It specifies the characteristics of the model, develops and refines relevant data, and then applies appropriate econometric techniques to the refined data to estimate model parameters.[1]

Our proposed documentation standards reflect these steps, as they are employed in the standard econometric approach, by requiring explicit documentation of each step. They are also drafted to strengthen specific weaknesses in documentation of econometric models, particularly volume forecasting models, that have hindered our evaluation of such models in recent rate proceedings.

A significant weakness of our current rules that has been made apparent by past rate hearings is the vagueness of current rule 31(k)(2)(ii) governing econometric investigations. With respect

[1] See, e.g., M. Intriligator, *Econometric Models, Techniques, & Applications*, chapter 1 (1978).

to the Postal Service's volume forecasts, for example, the principal obstacle to effective review by the Commission has been the inadequate support offered for the numerous subjective judgments that the Postal Service has employed in developing the econometric models upon which its forecast is based. In the past the Commission often has been put in the position of having to "take or leave" the Postal Service's volume forecast, and some unsupported judgments that underlie it, because there has been no viable alternative to the Postal Service's econometric demand models.

Examples of the technical choices that the Postal Service has sometimes made on the basis of subjective judgment in building its demand models including selecting variables, selecting equation forms, assembling data sets, selecting techniques for estimating parameters, and assigning values to parameters that are not estimated. The reasonableness of these judgmental choices could not be effectively evaluated in past hearings for two reasons: (1) Alternatives that the Postal Service considered and rejected were not preserved, presented and explained and, (2) there was little inquiry into the Postal Service's failure to consider plausible alternatives, because a procedure for such inquiry was not readily available.

In addition, statistical measures needed to evaluate the reliability of the model's results such as coefficient estimates, standard errors and t-values, goodness of fit and other test statistics, variance/covariance matrices of estimates, computed residuals, etc., have not always been made available in past proceedings, even where they have been repeatedly requested. Ideally, the Commission should have all relevant measures of reliability available to it not only for the Postal Service's model but for likely model variations against which the reasonableness of the Postal Service's version could be judged. The same applies to the econometric models submitted by other parties.

It is because the parties have preserved little of the "choice trail" followed in their econometric investigations, and because there has been no practical procedure for testing the result of their investigations with independently selected choices, that the Commission has been placed in the position of having to "take or leave" their models on the strength of subjective assertions of their reasonableness.

To remedy this situation, we propose to amend current rule 31(k)(2)(ii) (which we propose to renumber as 31(k)d(2)(iii)) to clearly require that the part of the "choice trail" that is relevant to sustaining judgments about the reasonableness of the model would be retained, and would be provided during discovery if other parties or the Commission request it.

Proposed rule 31(k)(2)(iii)(*d*) would require researchers to retain and produce those portions of their work product that comprise the empirical basis for judgments that were made in the course of their investigations. Witness Tolley's use of Shiller Smoothness Priors in Docket No. R87–1 provides an example of how this proposed requirement would be applied in a rate proceeding. Witness Tolley's procedure for selecting a value for the Shiller Prior is described at USPS–T–2, pp. A11–A12, and again, in his response to DMA interrogatory 6.

There he makes it clear that the submitted product of his investigations consisted only of a single estimated demand equation for each class of postal service for which the selected Shiller Prior just achieved an "admissible" pattern. Yet it is also celar that other estimates corresponding to other values of the Shiller Priors were computed and studied to reach the judgment that the pattern of price responses has been constrained "just enough to achieve an admissible pattern." This illustrates how our current rules fail to clearly require researchers to preserve sufficient work product to support critical technical judgments. Had it been in effect, the proposed rule would have clearly imposed the burden on witness Tolley of preserving and, on request, producing a selection of his alternative estimates that would be sufficient to allow an independent verification of his judgments.

In addition, proposed rule 31(k)(2)(iii)(*j*) would provide that opposing parties or the Commission could specify plausible variations in the model, data set, or estimation methodology, to investigate the reasonableness of judgments made in the course of the econometric investigation. Alternatives that could serve this purpose include adding, transforming, or redefining a variable, altering a parameter whose value had been assigned for the purpose of compiling the sample or computing coefficient estimates, adding or replacing a set of related observations in the sample, or using an alternative standard estimating technique.

The purpose of proposed subsection (*j*) is to provide a means of validating an offered econometric model by observing the impact of such independently specified alternatives on modelled results. The results obtained would be strictly limited to that purpose. We contemplated that the Presiding Officer would approve requests for such validation only where they are made well in advance of cross-examination, where the requesting party has made a convincing showing of the likely value of its request in validating the specific judgment being probed, and where the impact of the specified alternative can be observed by a reasonably simple substitution of input data and execution of an otherwise unmodified data processing program.

With these proposed rules the Commission hopes to avoid being put again in the position of having to adopt a forecasting model whose support rests in important respects on the researcher's unverified judgment.

The other major objective of our proposed amendments to rule 31(k)(2) is to require that documentation of econometic and other statistical studies, including volume forecasting models, be adequate to enable opposing parties or the Commission to replicate them. An ability to replicate statistical studies is necessary if their reasonableness is to be evaluated.

Subsection (*e*) of proposed rule 31(k)(2)(iii) is intended to exclude the use of ad hoc econometric techniques in our proceedings that have not undergone review in the professional literature, or whose application in the context of postal ratemaking has no counterpart in related fields. This proposed subsection is based upon the belief that it is inappropriate for the Commission to assume the role of a technical reviewer of statistical methods.

Subsection (*g*) of proposed rule 31(k)(2)(iii) lists the statistics that the Commission considers necessary to evaluate econometric studies, and requires the sponsoring party to provide them at the outset.

**Amendments to Rule 54(j)**

Rule 54(j) applies specifically to the Postal Service's volume presentations contained in its formal rate requests. The amendments and additions to rule 54(j) that we propose would improve our ability to apply the Postal Service's volume methodology to scenarios that include our own recommendations concerning rate and other factors that impact on volumes. These proposed rule changes would require the Postal Service to provide: quarterly computations of projected volumes (proposed rule 54(j)(5)); seasonal adjustments of observed and projected volumes; a computer implementation of

VOL 54 ISS 44 MR 8 1989 UMI

the Postal Service's volume- and revenue-forecasting methodology (proposed rule 54(j)(6)); and the input files and programs, in computer-readable form, needed to replicate or verify the econometric demand analysis submitted by the Postal Service (proposed rule 54(j)(7)).

More specifically, our subsections (ii) and (iii) of proposed rule 54(j)(5) would require the Postal Service to provide volume estimates for both prefiled and proposed rates by quarter, from the last reported quarter to one year beyond the end of the test year. The Postal Service's current practice is to compute quarterly volume estimates from the last reported quarter to the end of the test year, but include only aggregated test year volumes in its filing. Subsection (iv) would require the Postal Service to report the observed and estimated quarterly volumes that subsections (ii) and (iii) would require in seasonally adjusted form, at annual rates.

There are substantial benefits to having seasonally adjusted quarterly volume data. It would bring the Postal Service's volume data into conformity with economic data reported throughout the remainder of the Federal government, which is reported on a seasonally adjusted basis. It would bring consistency to the volume data that is used in postal ratemaking, since the adjusted data would come from the same source as other volume data. The primary benefit of adjusted data, of course, would be that the major non-economic source of variation in the volume data would be removed, isolating the economic variations for analysis.

Adjusted volume data provided by quarter would allow participants to make judgments concerning volume trends and the accuracy of volume forecasts without having to wait for a full year of volume data to accumulate. Because our proposed amendments would require quarterly volume projections that extend beyond the test year by four quarters, they would provide a means that is not currently available for checking the reasonableness and consistency of the Postal Service's forecasting method during the course of the rate hearing, as well as for the post test-year life of the new rate structure.

Subsection (v) of proposed rule 54(j)(5) would require the Postal Service to calculate confidence intervals for its volume estimates. While these would not reflect all sources of uncertainty affecting the reliability of its volume forecast, it would indicate the degree of uncertainty that is attributable to statistical factors. Without a confidence interval, the Commission has not been able to determine whether actual revenues have been within the expected error of the applicable revenue forecast that the Postal Service's econometric model had produced.

Proposed rule 54(j)(6) would require the Postal Service to derive its volume projections from an econometric demand analysis that conforms strictly to the one that it must provide to satisfy proposed subsection 54(j)(5)(i). In past rate proceedings there have been some unacknowledged differences between the Postal Service's demand model as presented, and its model as implemented in making the forecasts required by the current rule.

Subsections (iii) and (iv) of proposed rule 54(j)(6) would require the Postal Service to provide a computer implementation of its volume- and revenue-estimating methodology that would allow the Commission to calculate volumes and revenues for alternative postal rates and for alternative non-rate factors that impact upon volumes. Proposed subsection (v) makes it clear that this computer implementation must satisfy the Commission's rules concerning documentation of computer-based evidence.

In past rate proceedings, the Commission has found it necessary to reconstruct the Postal Service's volume and revenue forecasting methodology in order to determine the impact that alternative rates, fees, and other relevant assumptions being considered would have on volumes and revenues. Because examining the impact of alternative rates is a necessary step in our deliberations, it is appropriate that we have the tools necessary to apply the Postal Service's forecasting methodology correctly. Proposed subsections 54(j)(6) (iii) and (iv) are intended to make it clear that a "turn key" computer implementation of the forecasting methodology is required.

Item (*c*) of proposed subsection (iv) contemplates the possibility that projected economic determinants such as those prepared by DRI that are incorporated in the Postal Service's forecast could be rendered obsolete over the course of the hearing by changed economic conditions. Item (*c*) would enable the Commission to substitute a current for an obsolete projection in that circumstance. Where the Postal Service has resorted to unverifiable judgments in selecting parameter values, Item (*d*) of proposed subsection (iv) is intended to allow the Commission to analyze the effect of employing such judgments and to substitute alternative judgments.

Proposed rule 54(j)(7) would be an addition to current rule 54(j). It is intended to make it clear that the Postal Service should include in its initial filing the computer input files and programs needed to generate the estimates that proposed rules 54(j)(5) requires.

**Amendments to Rule 102(b)**

Proposed paragraph (4) of Rule 102(b) would require the Postal Service to report, on a current basis, any extensions and revisions of explanatory variables used in the econometric demand study required by proposed Rule 54(j)(5)(i). Proposed paragraph (5) of Rule 102(b) would require the reporting of current revisions of the actual quarterly volumes required by proposed rule 54(j)(5)(iv).

Typically the Postal Service's omnibus rate filing includes major extensions and revisions to the data employed in its econometric demand study. Our proposed additions to Rule 102(b) would allow prospective participants in our rate hearings to examine such extensions and revisions prior to an omnibus rate hearing. This would ease the considerable burden currently imposed upon participants to evaluate these revisions within the narrow span of our omnibus rate proceedings.

*Impact of proposed changes.* Pursuant to Executive Order 12291, the Commission finds that these proposed rule changes do not, individually or collectively, constitute a "major rule." They affect only rules of practice governing hearing procedures. Their economic impact will be negligible, including their impact on the costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. Additionally, these rule changes will have no measurable effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The above analysis that these rule changes do not constitute a major rule applies, as well, to the Regulatory Flexibility Act.

These proposed rule changes do not contain policies with Federalism implications, and therefore do not warrant preparation of a Federalism assessment under E.O. 12612.

**List of Subjects in 39 CFR Part 3001**

Administrative practice and procedures, Postal Service.

**Proposed Rules**

For the reasons set forth above, the Commission proposes to amend its rules of practice and procedure as follows:

**PART 3001—RULES OF PRACTICE AND PROCEDURE**

1. The authority citation for 39 CFR Part 3001 continues to read as follows:

**Authority:** 39 U.S.C. 404(b), 3603, 3622–3624, 3661, 3662, 84 Stat. 759–762, 764, 90 Stat. 1303; (5 U.S.C. 553), 80 Stat. 383.

2. Sections 3001.31(k)(2) introductory text, and (k)(2)(ii)–(iv) and 3001.54(j) (5)–(7) are revised and 3001.102(b) (4) and (5) are added to read as follows:

**§ 3001.31 Evidence.**

* * * * *

(k) * * *

(2) *Statistical studies.* All statistical studies offered in evidence in hearing proceedings or relied upon as support for other evidence shall include a comprehensive description of the assumptions made, the study plan utilized and the procedures undertaken. Where a computer analysis is employed to obtain the result of a statistical study or might reasonably be employed to replicate the study result, all of the submissions required by § 3001.31(k)(3) shall be furnished, upon request. For example, for each of the following types of statistical studies, the indicated information should be furnished:

* * * * *

(ii) *Experimental analyses. (a)* A complete description of the experimental design, including a specification of the controlled conditions and how the controls were realized;

*(b)* A complete description of the methods of making observations and the adjustments, if any, to observed data.

(iii) *Econometric Studies. (a)* A presentation of the economic theory underlying the study;

*(b)* A complete description of the econometric model(s) and the reasons for each major assumption and specification;

*(c)* The definition of the variables selected and the justification for their selection;

*(d)* A summary description of any alternative models employing different assumptions or specifications that have been tested and rejected;

*(e)* A reference to a detailed description in a text or manual for every econometric technique utilized in the estimation process and the reasons for selecting the technique;

*(f)* Summary descriptions and source citations for all input data. Complete descriptions of any alternations made to the data as received from the original sources and the reasons for making the alterations;

*(g)* A complete report of the econometric results including, where applicable:

*(1)* Coefficient estimates,

*(2)* Standard errors and t-values,

*(3)* Goodness-of-fit statistics,

*(4)* Other appropriate test statistics,

*(5)* The variance/covariance matrix of the estimates,

*(6)* Computed residuals;

*(h)* Descriptions of all statistical tests of hypotheses and the results of such tests;

*(i)* Upon request, the computed econometric results with any alternative models as described in paragraph (k)(2)(iii)(*d*) of this section;

*(j)* Upon request, the computed econometric results that would be obtained if the econometric model, the sample used to fit the model, on the estimation procedure employed by the model, were altered as specified by a participant or the Commission, where such results can be computed without undue burden and may be expected to confirm or refute judgments made in the course of the econometric investigation.

(iv) *All other studies involving statistical methodology. (a)* The formula used for statistical estimates;

*(b)* The standard errors of each component estimated;

*(c)* Test statistics and the description of statistical tests and all related computations, and final results; and

*(d)* Summary descriptions of input data, and upon request the actual input data shall be made available at the offices of the Commission.

**§ 3001.54 Contents of formal requests.**

* * * * *

(j) * * *

(5) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request, for each class and subclass of mail and postal service, the following:

(i) An econometric demand study relating postal volumes to their economic and noneconomic determinants including postal rates, discounts and fees, personal income, business conditions, competitive and complementary postal services, competitive and complementary nonpostal activities, population, trend, seasonal patterns and other factors.

(ii) The actual or estimated volume of mail at the prefiled rates for each postal quarter beginning with the first quarter of the most recent complete fiscal year and ending one year beyond the last quarter of the future fiscal year.

(iii) The estimated volume of mail assuming the effectiveness of the suggested rates for each postal quarter beginning with the quarter in which the rates are assumed to become effective and ending one year beyond the last quarter of the future fiscal year.

(iv) Seasonally adjusted quarterly totals at annual rates for all actual and estimated quarterly volumes referred to in paragraphs (j)(5) (ii) and (iii) of this section.

(v) Confidence intervals or other suitable measures of statistical reliability for all estimated volumes referred to in paragraphs (j)(5) (ii) and (iii) of this section.

(6) The estimated volumes and revenues referred to in paragraphs (j) (2), (3) and (5) of this section shall be derived from the econometric demand study referred to in paragraph (j)(5)(i) of this section. The assumptions and specifications used to estimate volumes and revenues shall conform exactly to the assumptions and specifications used in the econometric demand study.

(i) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a detailed explanation of the methodology employed to forecast volumes for each class and subclass of mail and postal service.

(ii) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a detailed explanation of the methodology employed to forecast changes in revenues for each class and subclass of mail and postal service resulting from changes in rates and fees.

(iii) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a computer implementation of the methodology employed to forecast volumes and revenues for each class and subclass of mail and postal service.

(iv) The computer implementation described in paragraph (j)(6)(iii) of this section shall be able to compute forecasts of volumes and revenues compatible with those referred to in paragraphs (j) (2), (3) and (5) of this section for:

(*a*) Any set of rates and fees within a reasonable range of the prefiled and suggested rates,

(*b*) any date of implementation within the range spanned by the assumed date and the start of the future fiscal year,

(*c*) alternative forecasts of the economic determinants of postal volumes other than postal rates and fees, and

(*d*) alternative values of any parameters with assigned values that are based upon unverifiable judgments.

(v) The computer implementation described in paragraph (j)(6)(iii) of this

VOL 54 ISS 44 MR 8 1989 UMI

section shall comply with § 3001.31(k)(3).

(7) Subject to paragraph (a)(2) of this section, there shall be made available at the offices of the Commission with every formal request, in a form that can be read directly by a standard digital computer, the following:

(i) All of the input files and programs needed to replicate the econometric demand study referred to in paragraph (j)(5)(i) of this section;

(ii) Any input files prepared in the process of testing alternative models for the econometric demand study referred to in paragraph (j)(5)(i) of this section;

(iii) Any input files and programs employed to derive a price index for any class or subclass of mail or postal service from postal rates, discounts and fees;

(iv) Any input files and programs employed to seasonally adjust quarterly postal volumes or to convert quarterly totals to their equivalent annual rates;

(v) Any input files and programs used to prepare data for use in the econometric demand study referred to in paragraphs (j)(5)(i) of this section.

**§ 3001.102 Filing of reports.**

* * * * *

(b) * * *

(4) Current extensions and revisions in the values of all explanatory variables used in the econometric demand studies submitted by the Postal Service in compliance with § 3001.54(j)(5)(i) for the most recent formal request for a change in rates or fees.

(5) Current extensions and revisions of the unadjusted and seasonally adjusted actual quarterly volumes submitted by the Postal Service in compliance with § 3001.54(j)(5)(iv) for the most recent formal request for a change in rates or fees.

By the Commission.

**Charles L. Clapp,**

*Secretary.*

[FR Doc. 89-5283 Filed 3-7-89; 8:45 am]

BILLING CODE 7715-01-M

---

**DEPARTMENT OF THE INTERIOR**

**Office of Hearings and Appeals**

**43 CFR Part 4**

**Special Rules Applicable to Surface Coal Mining Hearings and Appeals**

**AGENCY:** Office of Hearings and Appeals, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** In order to achieve uniformity of procedures and to provide for expedited administrative review of all permit-related decisions, the Office of Hearings and Appeals proposes to amend the procedural rules for review of the Office of Surface Mining Reclamation and Enforcement (OSMRE) decisions on applications for new permits, permit revisions, permit renewals, the transfer, assignment, or sale of rights granted under permit, and coal exploration permits. In addition, the method of notifying an appplicant, operator, or permittee of OSMRE's written decision would be changed from publication in a local newspaper to certified mail.

**DATES:** Comments are due on or before April 7, 1989.

**ADDRESS:** Comments may be mailed or delivered in person to: Director, Office of Hearings and Appeals, U.S. Department of the Interior, Room 1111, 4015 Wilson Boulevard, Arlington, Virginia 22203.

**FOR FURTHER INFORMATION CONTACT:** Will A. Irwin, Administrative Judge, Interior Board of Land Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Phone 703-235-3750.

**SUPPLEMENTARY INFORMATION:** In October 1987 the Office of Hearings and Appeals (OHA) adopted rules providing procedures for administrative review of decisions of the Office of Surface Mining Reclamation and Enforcement (OSMRE) concerning (1) applications for new permits (43 CFR 4.1360–4.1369), (2) applications for permit revisions, permit renewals, the transfer, assignment, or sale of rights granted under permit, and permit revisions ordered by OSMRE (43 CFR 4.1370–4.1379), and (3) applications for coal exploration permits (43 CFR 4.1380–4.1388). 52 FR 39521–39531 (Oct. 22, 1987). OHA proposes to remove the rules in 43 CFR 4.1370–4.1379 and 4.1380–4.1388 and to revise the rules in 43 CFR 4.1360–4.1369 so they will include review of decisions presently provided for by 43 CFR 4.1370–4.1379 and 4.1380–4.1388.

In addition § 4.1351 would be amended by adding a sentence providing that notice of OSMRE's preliminary finding shall be provided by certified mail or by overnight delivery service, if the applicant or operator has agreed to bear the expense for this service, and § 4.1391(b) would be revised by providing for notice of OSMRE's written determination by certified mail or by overnight delivery service, if the applicant or permittee has agreed to bear the cost for this service, rather than by publication in a local newspaper.

**Determination of Effects**

Because these rules only set forth the details of procedures for conducting hearings and appeals of decisions of OSMRE under the Surface Mining Control and Reclamation Act of 1977, the Department has determined that they are not major, as defined by Executive Order 12291, and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act [5 U.S.C. 601 *et seq.*].

**National Environmental Policy Act**

The Department has determined that these rules will not significantly affect the quality of the human environment on the basis of the categorical exclusion of regulations of a procedural nature set forth in 516 DM 2, Appendix 1, section 1.10.

**Paperwork Reduction Act**

These rules contain no information collection requirements requiring Office of Management and Budget approval under 44 U.S.C. 3501 *et seq.*

The author of these regulations is Will A. Irwin, Administrative Judge, Interior Board of Land Appeals, Office of Hearings and Appeals.

**List of Subjects in 43 CFR Part 4**

Administrative practice and procedure, Mines, Public Lands, Surface mining.

For the reasons set forth in the preamble, Subpart L of Part 4 of Title 43 of the Code of Federal Regulations is proposed to be amended as set forth below.

Dated: March 3, 1989.

**James L. Byrnes,**

*Director.*

43 CFR Part 4 is amended as follows:

**PART 4—[AMENDED]**

1. The authority citation for Part 4, Subpart L, continues to read as follows:

**Authority:** 30 U.S.C. 1256, 1260, 1261, 1264, 1268, 1271, 1272, 1275, 1293; 5 U.S.C. 301.

2. Section 4.1351 is revised to read as follows:

**§ 4.1351 Preliminary finding by OSMRE.**

If OSMRE determines during review of the permit application that the applicant or operator specified in the application controls or has controlled mining operations with a demonstrated pattern of willful violations of such nature and duration with such resulting irreparable damage to the environment as to indicate an intent not to comply, OSMRE shall issue the applicant or operator a notice of such preliminary finding. Notice by OSMRE shall be provided by certified mail, or by overnight delivery service if the applicant or operator has agreed to bear the expense for this service. The notice shall state with specificity the violations upon which the preliminary finding is based.

3. Sections 4.1360–4.1369 and the table of contents for those sections are revised to read as follows:

Sec.

4.1360 Scope.
4.1361 Who may file.
4.1362 Where to file; when to file.
4.1363 Contents of request; amendment of request; responses.
4.1364 Time for hearing; notice of herring; extension of time for hearing.
4.1365 Status of decision pending administrative review.
4.1366 Burdens of proof.
4.1367 Requests for temporary relief.
4.1368 Determination by the administrative law judge.
4.1369 Petition for discretionary review; judicial review.

**Request for Review of Approval or Disapproval of Applications for New Permits, Permit Revisions, Permit Renewals, the Transfer, Assignment or Sale of Rights Granted Under Permit (Federal Program; Federal Lands Program; Federal Program for Indian Lands) and for Coal Exploration Permits (Federal Program)**

**§ 4.1360 Scope.**

These rules set forth the procedures for review of decisions by OSMRE concerning—

(a) Applications for new permits, including applications under 30 CFR Part 785, and the terms and conditions imposed or not imposed in permits by those decisions. They do not apply to decisions on applications to mine on Federal lands in States where the terms of a cooperative agreement provide for the applicability of alternative administrative procedures (see 30 CFR 775.11(c)), but they do apply to OSMRE decisions on applications for Federal lands in states with cooperative agreements where OSMRE as well as the state issue Federal lands permits;

(b) Applications for permit revisions, permit renewals, and the transfer, assignment, or sale of rights granted under permit;

(c) Permit revisions ordered by OSMRE; and

(d) Applications for coal exploration permits.

**§ 4.1361 Who may file.**

The applicant, permittee, or any person having an interest which is or may be adversely affected by a decision of OSMRE set forth in § 4.1360 may file a request for review of that decision.

**§ 4.1362 Where to file; when to file.**

(a) The request for review shall be filed with the Hearings Division, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203 (phone 703-235-3800), within 30 days after the applicant or permittee is notifed by OSMRE of the written decision by certified mail or by overnight delivery service if the applicant or permittee has agreed to bear the expense for this service.

(b) Failure to file a request for review within the time specified in paragraph (a) of this section shall constitute a waiver of a hearing and the request shall be dismissed.

**§ 4.1363 Contents of request; amendment of request; responses.**

(a) The request for review shall include—

(1) A clear statement of the facts entitling the one requesting review to administrative relief;

(2) An explanation of each specific alleged error in OSMRE's decision, including reference to the statutory and regulatory provisions allegedly violated;

(3) A request for specific relief;

(4) A statement whether the person requests or waives the opportunity for an evidentiary hearing; and

(5) Any other relevant information.

(b) All interested parties shall file an answer or motion in response to a request for review, or a statement that no answer or motion will be filed, within 15 days of receipt of the request specifically admitting or denying facts or alleged errors stated in the request and setting forth any other matters to be considered on review.

(c) A request for review may be amended once as a matter of right prior to filing of an answer or motion or statement filed in accordance with paragraph (b) of this section. Thereafter, a motion for leave to amend the request shall be filed with the administrative law judge. An administrative law judge may not grant a motion for leave to amend unless all parties agree to an extension of the date of commencement of the hearing under § 4.1364. A request for review may not be amended after a hearing commences.

(d) An interested party shall have 10 days from filing of a request for review that is amended as a matter of right or the time remaining for response to the original request, whichever is longer, to file an answer, motion, or statement in accordance with paragraph (b) of this section. If the administrative law judge grants a motion to amend a request for review, the time for an interested party to file an answer, motion, or statement shall be set forth in the order granting it.

(e) Failure of any party to comply with the requirements of paragraphs (a) or (b) of this section may be regarded by an administrative law judge as a waiver by that party of the right to commencement of a hearing within 30 days of the filing of a request for review if the administrative law judge concludes that the failure was substantial and that another party was prejudiced as a result.

**§ 4.1364 Time for hearing; notice of hearing; extension of time for hearing.**

Unless all parties agree in writing to an extension or waiver, the administrative law judge shall commence a hearing within 30 days of the date of the filing of the request for review or amended request for review and shall simultaneously notify the applicant or permittee and all interested parties of the time and place of such hearing before the hearing commences. The hearing shall be of record and governed by 5 U.S.C. 554. An agreement to waive the time limit for comencement of a hearing may specify the length of the extension agreed to.

**§ 4.1365 Status of decision pending administrative review.**

The filing of a request for review shall not stay the effectiveness of the OSMRE decision pending completion of administrative review.

**§ 4.1366 Burdens of proof.**

(a) In a proceeding to review a decision on an application for a new permit—

(1) If the permit applicant is seeking review, OSMRE shall have the burden of going forward to establish a prima facie case as to failure to comply with the applicable requirements of the Act or the regulations or as to the appropriateness of the permit terms and conditions, and the permit applicant shall have the ultimate burden of persuasion as to entitlement to the permit or as to the inappropriateness of the permit terms and conditions.

(2) If any other person is seeking review, that person shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion that the permit application fails in some manner to comply with the applicable requirements of th Act or the

VOL 54 ISS 44 MR 8 1989 UMI

regulations, or that OSMRE should have imposed certain terms and conditions that were not imposed.

(b) In a proceeding to review a permit revision ordered by OSMRE, OSMRE shall have the burden of going forward to establish a prima facie case that the permit should be revised and the permittee shall have the ultimate burden of persuasion.

(c) In a proceeding to review the approval or disapproval of an application for a permit renewal, those parties opposing renewal shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion that the renewal application should be disapproved.

(d) In a proceeding to review the approval or disapproval of an application for a permit revision or an application for the transfer, assignment, or sale of rights granted under a permit—

(1) If the applicant is seeking review, OSMRE shall have the burden of going forward to establish a prima facie case as to failure to comply with applicable requirements of the Act or the regulations, and the application requesting review shall have the ultimate burden of persuasion as to entitlement to approval of the application; and

(2) If any other person is seeking review, that person shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion that the application fails in some manner to comply with the applicable requirements of the Act and the regulations.

(e) In a proceeding to review a decision on an application for a coal exploration permit—

(1) If the coal exploration permit applicant is seeking review, OSMRE shall have the burden of going forward to establish a prima facie case as to failure to comply with the applicable requirements of the Act or the regulations, and the permit applicant shall have the ultimate burden of persuasion as to entitlement to the approval.

(2) If any other person is seeking review, that person shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion that the application fails in some manner to comply with the applicable requirements of the Act or the regulations.

**§ 4.1367 Request for temporary relief.**

(a) Where review is requested pursuant to § 4.1362, any party may file a request for temporary relief at any time prior to a decision by an administrative law judge, so long as the relief sought is not the issuance of a permit where a permit application has been disapproved in whole or in part.

(b) The request shall be filed with the administrative law judge to whom the case has been assigned. If no assignment has been made, the application shall be filed in the Hearings Division, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203 (phone 703–235–3800).

(c) The application shall include—

(1) A detailed written statement setting forth the reasons why relief should be granted;

(2) A statement of the specific relief requested;

(3) A showing that there is a substantial likelihood that the person seeking relief will prevail on the merits of the final determination of the proceeding; and

(4) A showing that the relief sought will not adversely affect the public health or safety or cause significant, imminent environmental harm to land, air, or water resources.

(d) The administrative law judge may hold a hearing on any issue raised by the application.

(e) The administrative law judge shall issue expeditiously an order or decision granting or denying such temporary relief. Temporary relief may be granted only if—

(1) All parties to the proceeding have been notified and given an opportunity to be heard on a request for temporary relief;

(2) The person requesting such relief shows a substantial likelihood of prevailing on the merits of the final determination of the proceeding; and

(3) Such relief will not adversely affect the public health or safety or cause significant, imminent environmental harm to land, air, or water resources.

(f) Appeals of temporary relief decisions.

(1) Any party desiring to appeal the decision of the administrative law judge granting or denying temporary relief may appeal to the Board, or, in the alternative, may seek judicial review pursuant to section 526(a), 30 U.S.C. 1276(a), of the Act.

(2) The Board shall issue an expedited briefing schedule and shall issue a decision on the appeal expeditiously.

**§ 4.1368 Determination by the administrative law judge.**

Unless all parties agree in writing to an extension or waiver, the administrative law judge shall issue a written decision in accordance with § 4.1127 within 30 days of the date the hearing record is closed by the administrative law judge. An agreement to waive the time limit for issuing a decision may specify the length of the extension agreed to.

**§ 4.1369 Petition for discretionary review; judicial review.**

(a) Any party aggrieved by a decision of an administrative law judge may file a petition for discretionary review with the Board within 30 days of receipt of the decision or, in the alternative, may seek judicial review in accordance with 30 U.S.C. 1276(a)(2) (1982). A copy of the petition shall be served simultaneously on the administrative law judge who issued the decision, who shall forthwith forward the record to the Board, and on all other parties to the proceeding.

(b) The petition shall set forth specifically the alleged errors in the decision, with supporting argument, and shall attach a copy of the decision.

(c) Any party may file a response to a petition for discretionary review within 20 days of receipt of the petition.

(d) The Board shall issue a decision denying the petition or granting the petition and deciding the merits within 60 days of the deadline for filing responses.

**§§ 4.1370 through 4.1379 and 4.1380 through 4.1386 [Removed]**

4. 43 CFR 4.1370–4.1379 and 43 CFR 4.1380–1386 are removed.

5. Section 4.1391 is revised to read as follows:

**§ 4.1391 Who may file; where to file; when to file; filing of administrative record.**

(a) The permit applicant or any person with an interest which is or may be adversely affected by a determination of OSMRE that a person holds or does not hold a valid existing right, or that surface coal mining operations did or did not exist on the date of enactment of the Act, or that surface coal mining operations may be permitted within the boundaries of a national forest, may file a request for review of that determination with the office of the OSMRE official whose determination is being appealed and at the same time shall send a copy of the request to the Board of Land Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203 (phone 703–235–3750). The OSMRE official shall file with the Board the complete administrative record of the decision under review as soon as practicable.

(b) The request for review shall be filed within 30 days after the applicant or permittee is notified by OSMRE of the written determination. Notice by OSMRE shall be provided by certified mail or by overnight delivery service if the applicant has agreed to bear the expense for this service.

(c) Failure to file a request for review within the time specified in paragraph (b) of this section shall constitute a waiver of the right to review and the request shall be dismissed.

## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

### 49 CFR Part 571

[Docket No. 73-20; Notice 13]

RIN 2127-AC58

### Federal Motor Vehicle Safety Standards; Fuel System Integrity

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Advance notice of proposed rulemaking (ANPRM).

**SUMMARY:** Mr. Thomas Feaheny submitted a petition for rulemaking to amend Federal Motor Vehicle Safety Standard No. 301, *Fuel System Integrity*, to set performance requirements that would ensure that the fuel system as a whole, or an appropriate part thereof (e.g., the tank), is capable of performing in a manner equivalent to fuel systems incorporating high density polyethylene plastic fuel tanks with reguard to: (1) Resisting hydrostatic rupture, which the petitioner states is a phenomenon likely to result in massive fuel leakage in a crash; (2) avoiding a "flame-throwing characteristic" when the system is heated externally; and, (3) resisting puncture. NHTSA granted the petition in a letter dated September 8, 1988, stating that the granting of the petition signified that the agency believes that a further review of the issues raised in the petition appears to have merit. This notice requests comments to assist the agency in analyzing the safety and practicability issues of possible proposals relating to the performance capabilities of non-metallic (e.g., high density polyethylene plastic) fuel tanks and of fuel systems having such fuel tanks.

**DATE:** Comments must be received on or before May 8, 1989.

**ADDRESSES:** Comments should refer to the docket and notice numbers set forth above and be submitted (preferably in 10 copies) to the Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC 20590 (Docket hours are from 8 a.m. to 4 p.m., Monday through Friday.)

**FOR FURTHER INFORMATION CONTACT:** Ms. Margaret Gill, NRM–12, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC, 20590. Telephone: (202) 366–6651.

**SUPPLEMENTARY INFORMATION:** Federal Motor Vehicle Safety Standard No. 301, *Fuel System Integrity*, limits the amount of fuel spillage that can occur from fuel systems during and for a 30-minute period following front, rear, and lateral barrier impact tests. Briefly, these limits are: (1) From impact until the vehicle has ceased motion, spillage must not exceed one ounce; (2) for a five-minute period following cessation of motion, fuel spillage must not exceed five ounces; and, (3) for the following 25-minute period, fuel spillage during any one-minute interval must not exceed one ounce. The standard is intended to reduce deaths and injuries occurring from firs that result from fuel spillage during and after motor vehicle crashes. The standard applies to new passenger cars, and to multipurpose passenger vehicles, trucks, and buses (including school buses) with a gross vehicle weight rating (GVWR) of 10,000 pounds or less, and to school buses with a GVWR greater than 10,000 pounds. Specific performance requirements for individual components of the fuel system, such as the fuel tank, are not currently included in the standard.

Mr. Thomas Feaheny submitted a petition for rulemaking to amend Standard No. 301 to set performance requirements that would ensure that the fuel system as a whole, or an appropriate part thereof (e.g., the tank), is capable of performing in a manner equivalent to a fuel system having a high density polyethlene (HDPE) plastic fuel tank with regard to: (1) Resisting a phenomenon called hydrostatic rupture, which the petitioner states is a likely cause of massive fuel leakage in a crash; (2) avoiding a "flame-throwing characteristic" when the system is heated externally; and, (3) resisting puncture. A result of adopting the petitioner's suggested amendment could be to require the incorporation of HDPE fuel systems on all vehicles affected by the rule.

According to the petitioner, HDPE fuel tanks are inherently safer than steel fuel tanks because HDPE tanks are "substantially immune" to hydrostatic rupture. As to the cause and consequences of "hydrostatic rupture," Mr. Feaheny states:

> • • •[L]iquid is basically incompressible. If a steel tank holding ten gallons of gasoline is distorted so the resulting shape can only hold nine gallons, enormous "hydro-static" internal pressures are developed that will typically burst the steel tank. In a similar situation, the HDPE plastic simply stretches itself into a new configuration to still contain ten gallons.

Mr. Feaheny refers to "drop tests" in his petition in which both steel and HDPE fuel tanks were dropped from a height of 20 feet onto a concrete surface. Petitioner states that in these tests, "[t]he steel tanks *always* burst hydrostatically and spilled their contents. The HDPE tanks bounced like a lopsided football and *never* spilled a drop of liquid." (Emphases in text.) According to the petitioner, the superior performance of HDPE tanks over steel tanks have been demonstrated in dynamic testing of passenger cars as well. The petitioner says that in some tests, HDPE tanks have been shown to withstand crashes which steel tanks had failed either by puncture or by hydrostatic rupture.

In his petition, Mr. Feaheny also described a phenomenon which he called a "flame-throwing characteristic" that is allegedly potentially associated only with steel, and not HDPE, fuel tanks. According to the petition, a fuel system using a steel tank can behave similarly to a flame-thrower when exposed to a raging under-car fire. When exposed to such extreme heat, the steel tank quickly (due to its ability to conduct heat rapidly) boils the gasoline contained therein, but cannot expand enough to accommodate the accompanying pressure build-up. Plastic or synthetic rubber components in the fuel system (e.g., hose, gaskets, connectors, etc.) quickly melts or burn away in the extreme heat, leaving openings, or vents, through which burning gasoline can be sprayed. Petitioner states that, in tests of HDPE material tanks this "flame-thrower" effect was not exhibited. With HDPE fuel tanks, "the temperature rise was slower than that with steel and the HDPE material expanded to reach an equilibrium pressure substantially lower than that reached in the steel tank, and not sufficient to expunge fuel from openings." As opposed to the flame-throwing characteristic, the petitioner states that in the face of a raging under-car fire, an HDPE tank would slowly melt and discharge its fuel by dropping it into the fire, presumably in a safer manner relative to the flame-throwing

VOL 54 ISS 44 MR 8 1989 UMI

characteristic of metallic tanks. The petitioner believes that at least one hundred deaths or injuries could have been prevented since 1979 by use of fuel tanks with the performance capabilities of HDPE tanks.

Additionally, petitioner states that HDPE fuel tanks are less likely to be punctured directly by impact since they can be fabricated from thick (three-sixteenths of an inch) plastic. Mr. Feaheny also states that HDPE fuel tanks have an added benefit of "totally eliminat[ing] rust and corrosion failures."

NHTSA granted the petition in a letter dated September 8, 1988, stating that the granting of the petition signified that the agency believes that a further review of the issues raised in the petition appears to have merit. This ANPRM requests comments to assist the agency in analyzing the safety and practicability issues relating to possible proposals to amend Standard No. 301 with regard to new performance requirements directly evaluating the ability of fuel systems to withstand hydrostatic rupture and puncture. NHTSA emphasizes that it has issued this ANPRM to obtain information on issues raised by the petition for rulemaking. If the agency were ultimately to issue a final rule, it would do so only after a notice of proposed rulemaking and an opportunity for interested parties to comment thereon.

In 1979, NHTSA issued an ANPRM (June 11, 1979; 44 FR 33441) concerning a petition for rulemaking from Ford Motor Company to amend Standard No. 301 to incorporate performance requirements from the Economic Commission for Europe regulations for plastic fuel tanks. In that notice, NHTSA announced that it wished to explore whether the performance requirements for motor vehicle fuel systems established by Standard No. 301 were sufficient to ensure the integrity of the fuel system, given what appeared to be the advent of plastic fuel tanks in the near future. NHTSA was concerned whether a minimum level of safety should be established for non-metallic fuel tanks exposed to fires from external sources. In particular, the agency wished to explore whether there was a safety problem associated with the softening or burning of non-metallic fuel tanks exposed to heat or flame.

In July 1981, after considering the comments on the ANPRM, NHTSA terminated the rulemaking proceeding on the Ford petition. (July 27, 1981; 46 FR 38392.) The agency determined from the comments and other information that there was no evidence to indicate vehicle fuel-fed fire incidents could be associated with non-metallic tanks. Also, data available at the time of the termination notice indicated that non-metallic tanks were used by only about two percent of the vehicle population. In light of these factors, NHTSA determined that there was insufficient need to regulate non-metallic fuel tanks.

The issues presented by Mr. Feaheny's petition contrast with those raised by the Ford petition in two respects. First, as opposed to Ford, which was concerned about whether non-metallic fuel tanks achieve an acceptable level of safety, Mr. Feaheny believes that HDPE plastic fuel tanks exhibit superior performance over steel tanks with regard to resistance to hydrostatic rupture and puncture and the safe venting of fuel vapor pressure (which allows HDPE tanks to avoid the flame-throwing effect when heated externally). Second, at the time of the Ford petition, there apparently was very little known about plastic fuel tanks because those tanks were only used on a limited number of vehicles. Current indications now show that many foreign and domestic manufacturers have been or will be installing plastic fuel tanks in a substantial portion of their vehicle fleet. For example, by 1995, indications are that Ford will use HDPE plastic fuel tanks on virtually all of its cars and trucks. (Automotive News, June 6, 1988, at 4.)

In view of the increasing presence of non-metallic fuel tanks in the vehicle market, the agency is interested in obtaining more information about these fuel tanks, especially information that would be helpful in determining whether to amend Standard No. 301 along the lines suggested by the petitioner. In particular, NHTSA is interested in obtaining information on the safety need for, and practicability of, performance requirements in Standard No. 301 for resistance to hydrostatic rupture, resistance to puncture, and avoidance of a flame-throwing reaction when the fuel system is heated externally, and on whether those requirements can be stated in objective terms.

**Issues**

*Safety.* The agency notes that an effectiveness evaluation of Standard No. 301 for passenger cars, which NHTSA conducted in 1983, fund that the standard appears to have substantially reduced crash fires and the fatalities and injuries resulting therefrom. ("Evaluation of Federal Motor Vehicle Safety Standard 301–75, Fuel System Integrity: Passenger Cars," DOT HS–806–338, January 1983.) Notwithstanding the demonstrated effectiveness of the present fuel system integrity standard, the agency believes it should fully consider whether the likelihood of crash fires or the risk or death or serious injury in a crash can be further reduced through reasonable and practicable means, such as by use of HDPE or other non-metallic fuel tanks. The agency also wishes to explore whether there are negative safety effects that are associated with non-metallic fuel tanks, but *not* with metallic tanks. NHTSA requests comments and data on the following questions relating to safety:

1. The agency desires to analyze data from NHTSA's Fatal Accident Reporting System (FARS) to compare the fire involvement rate of vehicles equipped with non-metallic fuel tanks against the fire involvement rate of vehicles with metallic fuel tanks, and the death and injury rates associated with fire in these vehicles, for the 1980–1988 model year period. However, in order to conduct such a comparative analysis, detailed information is needed by NHTSA to identify the vehicles in the FARS file which were equipped with non-metallic fuel tanks, and those with metallic fuel tanks. NHTSA requests information from manufacturers on the makes, models, and identification numbers (VIN's) of vehicles having non-metallic fuel tanks and those having metallic fuel tanks for the 1980–1988 model years.

It would be helpful if commenters provided lists of VIN's in a computer compatible format (i.e., magnetic tape or disk) in addition to hard copy. NHTSA asks that commenters planning to provide the VIN's in the suggested format contact the agency to discuss further the format for the VIN's and the manner in which the data should be submitted.

2. The petitioner believes that HDPE fuel tanks are "substantially immune" to hydrostatic rupture and are more puncture-resistant than metal tanks, and are therefore much safer in a crash than the latter. Is the petitioner correct in believing that the performance of HDPE tanks is superior to that of steel tanks in crashes with regard to hydrostatic rupture, resistance to puncture, and avoidance of a "flame-throwing effect"? If yes, do non-metallic fuel tanks made from material other than HDPE plastic perform similarly to HDPE tanks with regard to the three aspects of performance mentioned above? Are non-metallic (e.g., HDPE) fuel tanks superior to steel tanks in other aspects? If so, which aspect(s)? Please provide all available technical research data on the performance of non-metallic fuel tanks and comparable data on metallic tanks.

3. Are there general aspects of performance for which non-metallic fuel tanks are inferior to steel tanks? Please identify these and explain how the tanks are inferior. Do non-metallic fuel tanks negatively affect safety in any manner, and if so, how? Please provide all available real-world, fire-related accident data involving vehicles with non-metallic fuel tanks.

4. How should the standard be amended to reasonably improve the crash performance of the fuel tank on light weight vehicles?

*Current and future use.* As mentioned above, it appears that many foreign and domestic manufacturers have been or will be installing plastic fuel tanks in a substantial portion of their vehicle fleet. For example, by 1995, indications are that Ford will use HDPE plastic fuel tanks on just about all of its cars and trucks. NHTSA requests comments from motor vehicle manufacturers, and other interested persons, on the following questions relating to the current and future use of non-metallic fuel tanks:

5. What is the current population of light-weight vehicles (10,000 pounds or under GVWR) having non-metallic fuel tanks? What is the projected population of such vehicles in 1995?

6. If you are currently using non-metallic fuel tanks in your motor vehicle fleet, do you plan to continue using them? Why or why not?

7. If you are not currently using non-metallic fuel tanks in your motor vehicle fleet, do you contemplate using them in the near future? Why or why not?

8. What plant changes would you have to make (or have made) in order to install non-metallic fuel tanks on your motor vehicle fleet?

9. If you are or will be installing non-metallic fuel tanks in your vehicle fleet, why did you decide to use them? For example, is it more cost effective to use non-metallic fuel tanks instead of steel tanks?

10. What problems, if any, have you encountered with the availability of HDPE materials? Are there non-metallic fuel tanks made from materials other than high density polyethylene? If yes, what are these materials, and how readily available (and costly) are they?

11. In deciding whether to issue a proposal on non-metallic fuel tanks, NHTSA will consider the extent to which non-metallic fuel tanks are or will be incorporated by manufacturers in the absence of the suggested amendment, and how that voluntary use of the tanks would affect the safety need for possible rulemaking. Should NHTSA proceed with a rulemaking that could have the effect of forcing the conversion to non-metallic fuel tanks if needed there are indications that manufacturers are voluntarily incorporating such tanks on their new vehicles? Why or why not? Would the superior performance characteristics attributed to non-metallic fuel tanks be exhibited by any non-metallic tank, regardless of design, or only those non-metallic tanks built to ensure the presence of those characteristics?

*Feasibility of an objective standard.* The petitioner requests NHTSA to consider amending Standard No. 301 to set minimum performance requirements for certain aspects of safety that can be achieved by fuel systems having HDPE fuel tanks. Presumably, currently manufactured fuel systems using metallic tanks cannot achieve the performance desired by the petitioner. The agency would like to obtain more information on possible performance requirements for the aspects of performance identified by the petitioner as being capable of improvement through the use of HDPE fuel tanks. This desire is based on the assumptions that there is a safety need for improving the rupture, puncture and venting characteristics of the metallic fuel tanks typically found on most automobiles today, that the petitioner is correct with regard to the alleged superior safety performance of HDPE fuel tanks over metallic tanks, and that the costs associated with the contemplated requirements are not unreasonable.

12. Compliance with Standard No. 301, a "vehicle" standard, is currently determined in a crash test of the entire vehicle. Should Standard No. 301 incorporate an entirely different dynamic test to assess the integrity of the fuel system with regard to the aspects of performance identified by the petitioner, assuming such a test can be developed and can satisfy the requirements of the Vehicle Safety Act? Alternatively, should the standard incorporate additional tests of component parts of the fuel system? For example, would it be appropriate to incorporate a "drop test" such as the one established by the Federal Highway Administration (FHWA) for side-mounted liquid fuel tanks? (*See*, 49 CFR § 393.67(e)(1). Briefly, under the FHWA "drop test," a fuel tank may not leak more than a total of one ounce by weight of water per minute after being dropped 30 feet on its corner onto an unyielding surface.) What tests should be considered and how do they relate to the safety of the fuel tank?

13. In the event NHTSA tentatively determines there is a safety need to proceed with a proposed rule on the aspects of performance targeted by Mr. Feaheny as candidates for rulemaking, would it be possible to state the desired performance requirements using objective criteria, as is required by the National Traffic and Motor Vehicle Safety Act? If yes, what should those requirements be?

**Impacts**

NHTSA has considered the impacts of this action in accordance with the Department of Transportation's regulatory policies and procedures and has concluded that it is nonsignificant within the meaning of those procedures. The expected impacts are too indeterminate at this time to conclude whether a regulatory evaluation would be appropriate. Should the agency decide to proceed with a notice of proposed rulemaking, the decision whether to prepare a regulatory evaluation would be made at that time.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that it does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Before issuing a notice of proposed rulemaking, the agency would evaluate the action for the purposes of E.O. 12291, the Regulatory Flexibility Act, and the National Environmental Policy Act.

**Comments**

Interested persons are invited to submit comments. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR Part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible,

VOL 54 ISS 44 MR 8 1989 UMI

comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

## Odometer Disclosure Requirements

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petitions for reconsideration; notice of proposed rulemaking.

**SUMMARY:** This is in response to four petitions for reconsideration of the National Highway Traffic Safety Administration's final rule concerning odometer disclosure requirements. Numerous letters were also submitted on this subject. These petitions requested that NHTSA reconsider the provisions of the final rule which: (1) Define "transferor" and "transferee" and (2) require dealers and distributors to retain, for five years, a copy of every odometer statement, including the transferee's signature, that they issue and receive.

This notice proposes to clarify the definitions of transferor and transferee with regard to the person who acts as an agent for the transferor or transferee. In addition, this notice proposes to require a transferee to return to his transferor, a signed copy of the odometer disclosure statement that he received from his transferor. Finally, this notice also proposes to require that title reassignment documents be issued by the States.

**DATE:** Comments on this NPRM are due no later than April 7, 1989.

**ADDRESS:** Written comments should refer to the docket number of this notice and should be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. (Docket hours are 8:00 a.m. to 4:00 p.m.)

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

To implement the Truth in Mileage Act of 1986 and to make some needed changes in the Federal odometer regulations, the National Highway Traffic Safety Administration (NHTSA) published a notice of proposed rulemaking (NPRM) on July 17, 1987. 52 FR 27022 (1987). The agency received numerous comments on the NPRM, representing the opinions of new and used car dealers, auto auctions, leasing companies, State motor vehicle administrators, and enforcement and consumer protection agencies. Each of the comments was considered and a final rule was published on August 5, 1988. 53 FR 29464 (1988).

As required by the Truth in Mileage Act, the final rule requires the transferor of a motor vehicle to provide a mileage disclosure on the title document or, if the title document does not include a space for the mileage disclosure (during the phase-in period), or if the vehicle has not been previously titled, it requires the transferor to make a written disclosure of mileage on a separate document. Also as required by that statute, the final rule requires that title documents be manufactured or otherwise set forth by a secure process to deter counterfeiting and alteration; requires that at the time of issue, the titles include the mileage disclosure; adds disclosure requirements for lessors and lessees; and adds retention requirements for lessors and auction companies. In addition, consistent with the statute, the rule amends the form and content of the odometer disclosure statement. The rule also prohibits a person from signing the disclosure as both the transferor and transferee in the same transaction in order to guard against a situation where only one party to the transaction would be aware of the disclosure. Finally, the final rule clarifies the definition of transferor and transferee and extends the record retention requirement for dealers and distributors.

The Agency received seven petitions for reconsideration of the final rule. In addition, we received numerous letters concerning the final rule and supporting the petitions. These petitions requested that NHTSA reconsider the provisions of the final rule that: (1) Prohibit a person from signing the odometer disclosure statement as both the transferor and transferee in the same transaction; (2) define "transferor" and "transferee"; (3) define "secure printing process"; (4) concern the language included on the odometer disclosure statement; and (5) require dealers and distributors to retain, for five years, a copy of every odometer disclosure statement, including the transferee's signature, that they issue and receive. These petitions and letters have been placed in the docket. Before the Agency could fully consider the petitions, Congress enacted the Pipeline Safety Reauthorization Act of 1988, Pub. L. 100-561.

Section 401 of the Pipeline Safety Reauthorization Act, which amends section 408(d)(1) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1988(d)(1), concerns the use of certain powers of attorney in connection with the required mileage disclosure. The new law directs the agency to prescribe the form and content of the power of attorney/disclosure document and reasonable conditions for its use by the transferor, "consistent with this Act and the need to facilitate enforcement thereof." It also requires NHTSA's rule to provide for the retention of a copy of the power of attorney and to ensure that the person granted the power of attorney completes the disclosure on the title consistent with the disclosure on the power of attorney form.

### Scope

Consistent with the statutory mandate, this notice grants, in whole or in part, four of the petitions for reconsideration. Generally, two of these petitions concern the definition of transferor and transferee with regard to the person who acts as an agent for the transferor or transferee. The other two petitions concern the relationship between the retention requirement applicable to dealers and distributors and the requirement that the transferee's signature appear on the odometer disclosure statements. The most significant points of the four petitions are addressed below.

In an interim final rule also published in today's **Federal Register**, NHTSA grants, in whole or in part, three petitions for reconsideration of the portion of the final rule that provides that a person shall not sign a disclosure statement as the transferor and transferee in the same transaction and implements the portion of the Pipeline Safety Reauthorization Act of 1988 that concerns the use of powers of attorney to disclose mileage.

NHTSA has denied, in whole or in part, three petitions for reconsideration of the final rule published on August 5, 1988, because they are inconsistent with the new statute. For reasons discussed in the document denying the petitions, two other petitions were also denied. The denial notice is published in today's **Federal Register**.

### Definitions

To clarify that the liability for issuing a false odometer disclosure statement could be placed on a person acting as an agent for the owner of a vehicle, in a notice issued on July 17, 1987, we proposed to amend the definition of "transferor" and the definition of "transferee", contained in § 580.3, to include the agent of the transferor and transferee. 52 FR 27023 (1987). Although one commenter feared that the definitions could be misconstrued to require that every agent who participates in the transfer must issue an odometer disclosure statement, we felt that the preamble to the final rule permitted us to clarify the meaning of the definition without changing the regulatory language, and the definitions were adopted as proposed.

The National Independent Automobile Dealers Association (NIADA) and the National Auto Auction Association (NAAA) have requested that NHTSA reconsider the definitions of transferor and transferee adopted in the final rule.

NIADA asserts that the definitions should be expressly limited to a principal or an agent who signs the required disclosure on behalf of the owner. Without this limitation, NIADA believes that that the definitions in the final rule may subject agents of the transferor to liability for failure to comply with the odometer disclosure requirements, whether or not they have any responsibility for issuing an odometer disclosure statement. Likewise, NAAA claimed that the definitions were ambiguous. NAAA's argument was based upon an apparent inconsistency in the preamble to the final rule. NAAA noted that while NHTSA defined "transferor" to include "any person, who as agent, transfers the ownership of another", 53 FR 29476 (1988), NHTSA also stated that "transfer of ownership under State laws may not occur at one point in time, but is a process." 53 FR 29466 (1988). Therefore, NAAA suggested that NHTSA define "transferor" to include any agent who actually makes the required disclosure on behalf of the owner. NAAA also suggested that the definition of "transferee" be amended in a similar manner.

Even though NHTSA attempted to clarify the definitions in the preamble, it is apparent that some confusion still remains. The suggestions proposed by NIADA and NAAA are consistent with NHTSA's intention expressed in the preamble to the NPRM and to the final rule. It has not been NHTSA's intention to require that the transferee receive multiple odometer disclosure statements. Therefore, we are proposing to amend the portions of the definitions of transferor and transferee concerning the transferor's and transferee's agents. "Transferor" would be defined to include the transferor's agent who signs any odometer disclosure statement on behalf of the transferor. Similarly, "Transferee" would be defined to include the transferee's agent who signs any odometer disclosure statement. NHTSA requests comments on these proposed amendments to the definitions.

NAAA included with its petition, eight scenarios of vehicle transfers and asked who would be the transferor. To assist those involved in the transfer of vehicles to more fully understand the requirements of the law and our proposed definitions, we have addressed each of these scenarios and the duties of the parties as they would be interpreted under those proposals:

1. A, a retail customer with a trade-in, purchases a vehicle from B, a dealer. The secured lender holds the title to A's trade-in. A gives B a power of attorney. B pays off the loan, obtains the title, and transfers ownership pursuant to the power of attorney. A would be a transferor. B, A's agent, would also be a transferor. A would make a disclosure to B on the secure power of attorney and B would make and sign a disclosure on the title on A's behalf.

Note: The use of the power of attorney in this instance would allow B to sign as both the transferor and transferee in the same transaction. Therefore, the power of attorney form must meet the requirements of section 401 of the Pipeline Safety Reauthorization Act of 1988, Pub. L. 100-561, and the interim final rule issued by NHTSA pursuant to the Act, which has been published in today's **Federal Register**.

2. A, a wholesale dealer, sells a vehicle to B, a wholesale dealer. A gives B a power of attorney. B uses the power of attorney to transfer the ownership to C after receiving the title documents from A. A is B's transferor and B is C's transferor. However, if A sells the car to B and gives B the title, it is unclear why A gave B a power of attorney. If B used A's power of attorney to transfer the car to C and B's name did not appear on the title as a buyer, B would be in violation of State laws which prohibit "skipping title". "Skipping title" means omitting an owner from the chain of ownership.

3. A, a dealer, employs B as a salesperson. B sells A's car and signs the transfer of ownership document. If the car is owned by A as a dealer and not personally, both A and B would be transferors, and either A must issue and sign an odometer disclosure statement or B may issue and sign an odometer disclosure statement on A's behalf.

4. A is an independent contractor who buys and sells cars for B, a dealer. A sells B's cars and signs the transfer of ownership documents on behalf of B. A and B would be transferors, and A should issue and sign an odometer disclosure statement on B's behalf.

5. A and B are wholesale dealers. A sells a car to B through C, a wholesale auction. C has not purchased the car and signs no transfer of ownership documents. C obtains the title from A, pays A on B's behalf, and then delivers the title to B. A would be the transferor and must issue and sign an odometer disclosure statement to B.

6. A and B are wholesale dealers. A sells a car to B through C, a wholesale auction. C has not purchased the car, but signs transfer of ownership documents, pursuant to a power of attorney from A. C obtains the title from A, pays A on B's behalf, and then delivers title to B. A and C would be transferors and C should issue an odometer disclosure statement to B, on behalf of A.

7. A is an attorney who is the personal representative of an estate. A signs the transfer of ownership documents, transferring a vehicle that is part of the estate to B, the beneficiary. The estate and A would be the transferors, and A is required to issue and sign an odometer disclosure statement on behalf of the estate.

VOL 54 ISS 44 MR 8 1989 UMI

8. A is an attorney who is the personal representative of an estate. A signs the transfer of ownership documents, transferring a vehicle that is part of the estate to B, the beneficiary. C, A's secretary, carries the transfer of ownership documents to the state titling office to be processed. A new title will be issued in B's name. The estate and A would be transferors, and A is required to issue and sign an odometer disclosure statement on behalf of the estate.

**Record Retention and Long-Distance Sales Transactions**

The NPRM of July 1987 proposed a new section 580.8 concerning the retention of odometer disclosure statements by motor vehicle dealers, distributors, and lessors. This section proposed to increase, from four to five years, the length of time the dealers and distributors, required by this part to issue an odometer disclosure statement, shall retain odometer disclosure statements. Since the Truth in Mileage Act requires that the disclosure be on the title, transferors involved in long-distance transactions were concerned that their transferees would not return a signed copy of the disclosure made on the title. (Currently, the disclosure is on a separate document and these transferors refuse to release the title until they receive the signed disclosure statement.) PHH Group, Inc. (now PHH Corporation) (PHH) asserted that is not reasonable to place a legal requirement on the transferor to retain records over which he does not have control and that any transferee, with intent to commit fraud by tampering with the title, will simply alter the title after the transferor's copy has been made. PHH argued that since the States will be receiving and retaining fully executed title documents, there seems to be little benefit to require transferors to also retain these records. Therefore, PHH requested that the final rule require the transferor to retain only a copy of the disclosure statement prior to release of the document to the transferee. The American Automotive Leasing Association (AALA) suggested that the regulation allow a transferor who is also a lessor, and therefore, involved in long-distance transactions, to fulfill the retention requirements by retaining a copy of the disclosure statement, which is forwarded for the buyer's signature, and requesting the buyer to sign the statement and return a copy.

We did not grant the requests of PHH and AALA; the final rule was adopted as proposed. In the preamble to the final rule of August 1988, we explained that requiring the transferor to retain a copy of the disclosure signed by the transferee is essential to enforcement. It prevents a buyers from altering the mileage and later alleging that the altered mileage is the mileage he received from the transferor, since the transferor would have a copy of the disclosure with the higher mileage and the transferee's signature. This unaltered copy would not be on file in the State titling office. 53 FR 29474 (1988).

Because they are concerned that they will be found in violation of the retention requirements if their transferees do not return a copy of the title, including the signed disclosure, PHH and the National Association of Fleet Administrators, Inc. (NAFA) have petitioned NHTSA to reconsider the retention requirements of the final rule. They feel that they have no way to compel their transferees to return a signed copy of the disclosure and that section 580.8 of the rule, which requires a transferor to retain a copy of the disclosure that includes the transferee's signature, places an unreasonable administrative and financial burden on them.

NAFA and PHH proposed the following three alternatives: (1) An amendment to the regulation to require the transferor to retain only a copy of his disclosure, not a disclosure signed by the transferee; (2) an amendment to the regulation to specify what constitutes a good faith effort by a transferor to obtain a copy of a completed odometer disclosure statement from his transferee; and (3) an amendment to the regulation to require a transferee to return a completed odometer disclosure statement to his transferor.

In support of the first alternative, PHH and NAFA noted that since the disclosure is on the title, a completed disclosure will be on file in the State Department of Motor Vehicles. They also noted that because titles will be securely printed, transferees will be unable to alter the mileage disclosed by the transferor on the titles. Finally, they claimed that the cost of obtaining a completed odometer disclosure statement, involving mailing fees and administrative expenses, would outweigh the benefits of this requirement.

NHTSA has not adopted this first alternative. As we stated in the preamble to the final rule, requiring the transferor to retain only a copy of his disclosure presents a problem for investigative and enforcement actions. This would permit a buyer to alter the mileage disclosure on the title and later allege that the altered mileage is the mileage received from his transferor, since his transferor would not have a copy of disclosure on the title with the higher mileage and the transferee's signature. We recognize that even with securely printed titles and reassignment documents, some alterations have been, and may continue to be, undetected upon initial review by State Departments of Motor Vehicles. We have found that copies of titles, made before the titles were altered, are an effective investigative aid in determining whether the title has been altered and whether additional analysis of the title is needed.

NAFA argues that NHTSA underestimated the costs of the retention requirement and that the benefits to be derived from the requirement of obtaining a photocopy of the title do not outweigh the costs. In NHTSA's regulatory evaluation of the final rule, NHTSA estimated the cost of this requirement to be $900,000. Regulatory Evaluation—Final Rule Implementing Truth in Mileage Act of 1986. (April 1988; pages 43–44). (NAFA mistakenly claims that NHTSA estimated the costs of this provision to be $254,000, 2,540,000 fleet vehicles × .10). NAFA argues that while NHTSA has estimated the cost of photocopying the title, NHTSA did not consider the cost of this service provided by auto auctions and wholesalers. Because the service of providing a copy of the title will replace the current practice of providing a copy of the separate odometer statement, NHTSA sees no reason to consider this cost; it is not a new cost imposed by the final rule.

In addition to saving personnel time and lab/analysis costs, the record retention requirement in the final rule is a vital part of the investigative process, especially since a significant part of odometer fraud involves vehicles that have been sold through long-distance transactions, those used by lease companies or in business fleets. A study by the Illinois Office of the Attorney General found that 40.8 percent of all one-time lease vehicles surveyed in twenty-three States during a one-year period had their odometers rolled back. A Washington State study estimate that sixty percent of leased vehicles have their odometers reset. NHTSA estimates the cost of odometer fraud resulting from lease vehicles to be between $1,272,500,000 and $2,156,580,000. Regulatory Evaluation—Final Rule Implementing Truth in Mileage Act of 1986. (April 1988; page 79). If requiring long-distance transferors to keep a copy of the disclosure on the title, including the transferee's signature, would reduce

odometer fraud by less than one-tenth of one percent, it would be cost effective.

The purpose of this requirement is to aid investigative action. It is not now, nor has it ever been, NHTSA's intention to require transferors involved in long-distance transfers to compare the copy of the returned odometer disclosure statement with the mileage statement that these transferors have in their files.

We have adopted the second alternative proposed by NAFA and PHH, the suggestion to amend the regulation to specify what constitutes a good faith effort by a transferor to obtain a copy of a completed odometer disclosure statement from his transferee. As we noted in the preamble to the final rule of August 1988, 15 U.S.C. 1990b provides that NHTSA must take into account the nature, circumstances, extent, and gravity of the violation. Similarly, "a good faith effort" is dependent upon the circumstances in a particular instance, and we cannot provide a complete listing of these matters. Therefore, it would be inappropriate to include, in the regulation, a provision as to what actions constitute good faith.

We are proposing to adopt the third alternative suggested by NAFA and PHH, an amendment to the regulation to require transferees to return a completed odometer disclosure statement to their transferors. Specifically, we are proposing to amend § 580.5(f). Under that provision of the final rule, the transferee is required to sign the disclosure statement and print his name. This proposal would require that the transferee, in addition to signing the disclosure and printing his name, return a copy of the signed disclosure statement to his transferor. A transferee who fails to return this statement would be subject to civil and criminal penalties. We expect that this provision will ensure that transferees who obtain the title from their long-distance transferors will return a copy of the completed odometer disclosure statement to their transferors, and that these long-distance transferors will be able to retain a copy of the signed odometer disclosure statement, as required by § 580.8(a).

**Security of Title Documents**

The Truth in Mileage Act requires that each State motor vehicle title be set forth by a secure printing process or other secure process, beginning on April 29, 1989. Consistent with this statutory requirements, in a notice published in the **Federal Register** on July 17, 1987, 52 FR 27028 (1980), we proposed to add a new section concerning the security of title documents. In addition to proposing that the title be set forth by a secure process, we proposed to require that each reassignment document be set forth by the same secure process as the title. To assist the States in their efforts to issue motor vehicle titles that comply with the Truth in Mileage Act and this regulation, we prepared a list of technologies that we proposed to deem a "secure process." This list was included in Appendix A.

We received several divergent comments concerning the security of the title document and Appendix A. To allow for maximum administrative discretion on the part of the States, we did not adopt a suggestion from 3M to list and rank all secure processes. Furthermore, we did not delete Appendix A as suggested by the American Association of Motor Vehicle Administrators (AAMVA) and several of its member jurisdictions. Rather we expanded and corrected it. We noted in the preamble to the August 1988 final rule that Appendix A was included to aid the States in their selection of a secure process and in no way limits the States or adds new requirements or restrictions beyond those listed in the rule itself.

With regard to the document used to reassign the motor vehicle title, AAMVA and several of its member jurisdictions urged the agency to amend the requirement to read, rather than by the "same" secure process as the title, by "a" secure process. Arkansas asserted that it would be a financial burden for the State to use a reassignment document that incorporates the same secure process as the title. Other commenters, including Texas, Vermont, and the Arkansas Independent Automobile Dealers Associated, were opposed to the requirement in its entirety, and cited costs burdens. The Wisconsin Department of Transportation (Wisconsin), on the other hand, asked that NHTSA eliminate separate reassignments. In the alternative, Wisconsin suggested that if reassignments are allowed, NHTSA should require the reassignment documents to bear control numbers and that the number be included on the title. Wisconsin also requested that NHTSA require the States to record the control numbers of the reassignment documents they give to each dealer and that each dealer be required to keep a record of the reassignment document issued for each vehicle.

NHTSA reconsidered it proposed requirement in response to these comments. In the preamble to the August 1988 final rule, we noted that while separate reassignment documents are not mentioned in the Truth in Mileage Act, they are often an integral part of the transfer process. Since reassignment documents are logical extension of the title, requiring secure reassignment documents is a logical extension of the statutory requirements. Therefore, the final rule required secure reassignment documents. However, rather than requiring that reassignment documents be printed by the same secure process as the title, we required that the reassignment documents be set forth by "a secure process."

We are proposing to amend § 580.4 concerning the security of reassignment documents. Specifically, we are proposing to require that, in addition to being set forth by a secure printing process, reassignment documents must be issued by the States. The proposal is consistent with the new law and our interim rule, published elsewhere in today's **Federal Register**, that requires that secure powers of attorney be issued by the States. If the States were to only offer guidelines to transferors as to what would constitute a secure reassignment and transferors could have these reassignment documents printed, unscrupulous transferors could easily roll back the odometer on a vehicle, discard a reassignment document, and forge a new one with a lower mileage disclosure. Currently, only eleven States allow a vehicle to be transferred on a reassignment document that is not issued by the State. Comments are requested from the States concerning the issuance and printing of secure reassignments documents by the State and/or State contractors.

**Exemptions**

In the July 1987 NPRM, we proposed a new § 580.6 to exempt certain transferors from issuing odometer disclosure statements. This new section proposed to exempt the same transferors exempted by the current § 580.5. NHTSA created these exemptions for transferors of vehicles for which the odometer reading is not relied upon as an indicator of vehicle mileage or condition. 47 FR 51885. With one exception, § 580.6 was adopted as proposed. (Transferors of vehicles ten years old or older, rather than transferors of vehicles twenty-five years or older, as proposed, are exempt from the odometer disclosure requirements of § 580.5.)

Since the August 1988 final rule was issued, NHTSA has been asked whether a lessee of a vehicle having a gross vehicle weight rating (GVWR) of more than 16,000 pounds or of a vehicle that is ten years old or older must furnish to his

VOL 54 ISS 44 MR 8 1989 UMI

lessor a written statement regarding the vehicle's mileage. Because the lessor, when transferring a vehicle with a GVWR of more than 16,000 pounds or a vehicle ten years old or older, is not required to give his transferee an odometer disclosure statement, we see no reason to require a lessee of any of these types of vehicles, or of any vehicles that are not self-propelled, to give their lessor a written statement concerning to vehicle's mileage. Therefore, in this notice, we are proposing to amend § 580.6 to exempt the lessees of certain vehicles from the odometer disclosure requirements of § 580.7. Likewise, we are proposing to exempt the lessors of certain vehicles from the notification requirements of § 580.7.

**Federalism Assessment**

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. While it is estimated that this proposed rule would result in additional costs to the States for printing secure title reassignment documents, the cost to each State is minimal.

**Regulatory Impacts**

*A. Costs and Benefits to Dealers, States, and Consumers*

NHTSA has analyzed this rule and determined that it is neither "major" within the meaning of Executive Order 12291, nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures because of the substantial public interest in this matter. This NPRM does not result in any costs to the States, dealers, and distributors in addition to those imposed by the August 1988 final rule. (*See*, Regulatory Evaluation—Final Rule Implementing the Truth in Mileage Act, Docket No. 87–09, No. 4). Any interested person may obtain a copy of this regulatory evaluation by writing to NHTSA Docket Section, 400 Seventh Street, SW., Washington, DC 20590, or by calling the Docket Section at (202) 366–4949.

*B. Small Business Impacts*

The agency has also considered the impacts of this rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. The final rule of August 1988 requires that reassignments be securely printed or otherwise set forth by a secure process. This proposal merely requires that the States issue these documents. At the time the final rule was issued, NHTSA estimated the cost of producing secure reassignments to be $1,730,000 to States, dealers, and distributors. NHTSA estimated the costs of controlling reassignment forms to be $1,500,000 to the States. In addition, NHTSA estimated the costs of copying and mailing titles containing the odometer disclosure to be $900,000. (*See*, Regulatory Evaluation—Final Rule Implementing the Truth in Mileage Act, Docket No. 87–09, No. 4). This proposal would not result in any requirements in addition to those imposed by the August 1988 final rule. Accordingly, no regulatory flexibility analysis has been prepared at this time. However, the agency invites comments from small businesses on this issue.

*C. Environmental Impacts*

NHTSA has considered the environmental implications of this rule, in accordance with the National Environmental Policy Act, and determined that it will not significantly affect the human environment.

*D. Paperwork Reduction Act*

The Office of Management and Budget (OMB) has already approved NHTSA's information collection requirements that require consumers, dealers, distributors, lessors, and auction companies to disclose and/or retain odometer disclosure information. (OMB 2127–0047). This NPRM does not propose any new information collection requirements as that term is defined by OMB in 5 CFR Part 1320.

**Public Comments**

Interested persons are invited to submit comments on the proposal. It is requested, but not required, that ten copies be submitted.

All comments must not exceed fifteen pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the fifteen page limit. This limitation is intended to encourage commenters to detail their preliminary arguments in a concise fashion.

All comments received before the close of business on the comment closing date listed above will be considered and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration will be considered as suggestions for future rulemaking action. The agency will continue to file relevant information as it becomes available. It is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments by the docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

In consideration of the foregoing, 49 CFR Part 580 would be amended as follows:

**PART 580—[AMENDED]**

1. The authority citation for Part 580 continues to read as follows:

**Authority:** 15 U.S.C. 1988; delegation of authority at 49 CFR 1.50(f) and 501.8 (e)(1).

2. In § 580.3, the definitions of transferor and transferee would be revised to read as follows:

**§ 580.3 Definitions.**

* * * * *

"Transferee" means any person to whom ownership of a motor vehicle is transferred, by purchase, gift, or any means other than by the creation of a security interest, and any person who, as agent, signs an odometer disclosure statement for the transferee.

"Transferor" means any person who transfers his ownership in a motor vehicle by sale, gift, or any means other than by creation of a security interest, and any person who, as agent, signs an odometer disclosure statement for the transferor.

3. Section 580.4 would be revised to read as follows:

**§ 580.4 Security of title documents and power of attorney forms.**

Each title shall be set forth by means of a secure printing process or other secure process. In addition, power of attorney forms issued pursuant to § 580.13 and § 580.14 and documents which are used to reassign the title shall be issued by the State and shall be set forth by a secure process.

4. Section 580.5 would be amended by revising paragraph (f) to read as follows:

**§ 580.5 Disclosure of odometer information.**

* * * * *

(f) The transferee shall sign the disclosure statement, print his name, and return a copy to his transferor.

5. Section 580.6 would be amended by revising the introductory text and (a) introductory text, and by adding paragraph (c) to read as follows:

**§ 580.6 Exemptions.**

Notwithstanding the requirements of § 580.5 and § 580.7:

(a) A transferor or a lessee of any of the following motor vehicles need not disclose the vehicle's odometer mileage:

(c) A lessor of any of the vehicles listed in paragraph (a) of this section need not notify the lessee of any of these vehicles of the disclosure requirements of § 580.7.

Issued on March 3, 1989.

**Erika Z. Jones,**

*Chief Counsel, National Highway Traffic Safety Administration.*

BILLING CODE 4910-59-M

## INTERSTATE COMMERCE COMMISSION

**49 CFR Parts 1312 and 1314**

**[Ex Parte No. 290 (Sub-No. 6)] [1]**

**Amendments to Rail Carrier Cost Recovery Tariffs**

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Advance notice of proposed rulemaking; held in abeyance.

**SUMMARY:** The Commission announces its decision to hold in abeyance further action in this proceeding for 180 days from the date of publication of this notice in the **Federal Register**. The Commission indicates that it wishes to allow opportunity for the publishers of the Rail Carrier Cost Recovery (RCCR) tariff to demonstrate their willingness, as expressed in their comments in this proceeding, to give more consideration to the user public in the preparation and publication of the RCCR tariffs. The Commission offers some suggestions (drawn from the views of other commenters) to the RCCR tariff publishers for improvement of the way information is conveyed in the tariff. Voluntary adoption of these suggestions or other tariff improvements or practices by the RCCR publishers should alleviate the most pressing concerns of the tariff users. At the end of the 180-day period, the Commission will decide what further actions it will take in this proceeding, after review of tariff users' experience with the RCCR tariffs during this period.

**DATE:** Further formal action in this proceeding is held in abeyance until September 5, 1989.

**FOR FURTHER INFORMATION CONTACT:** Lawrence C. Herzig, (202) 275–7358, or Charles E. Langyher, (202) 275–7739, [TDD for hearing impaired, (202) 275–1721.]

**ADDRESS:** Bureau of Traffic, Room 4310, Washington, DC 20423.

**SUPPLEMENTARY INFORMATION:** 49 U.S.C. 10762(d)(2) indicates that we may permit the filing of the Rail Carrier Cost Recovery (RCCR) tariffs reflecting railroad cost adjustment factors in a master tariff format as an alternative to amendments to each affected rate tariff. However, the statute stipulates that such filing is to be permitted only when it is consistent with the public interest.

During the period of time tariff ICC RCCR X088A was in effect, the Commission's staff received a number of informal criticisms from users of the tariff asserting that due to the number and form of amendments to the tariff, it had become extremely cumbersome to follow and apply. In view of these complaints and our concern that the public interest might not be well served by the existing RCCR tariff format, we sought the views of the shipping public and tariff publishers regarding the RCCR tariffs.

Our advance notice of proposed rulemaking of August 19, 1988, (53 FR 31720), posed for consideration a number of specific questions which dealt with the form of publication for the RCCR tariffs and the forms of amendments to them. Additionally, we sought comments and recommendations on other matters relating to the manner in which information is conveyed in the RCCR tariffs.

In response to our notice we received comments from 16 parties. The comments offered by the users of the RCCR tariff contain many positive suggestions for improvements of the tariff. Further, and most significantly, the comments of the publishers of the RCCR tariff indicate their intention to make the tariff more "user friendly."

In view of the comments of the RCCR tariff publishers, we will withhold further action in this proceeding for 180 days. This will allow the publishers time to demonstrate their expressed willingness to give more consideration to the user public when compiling the RCCR tariffs. In fact, the publishers have already taken some steps toward improving the presentation of amendments to the RCCR tariff.

In addition to the steps the publishers have taken, they should also consider implementing suggestions offered in the comments received in response to our ANPR. An entire set of comments will be sent to the rail publishers. Further, the Commission's staff has also formulated some suggestions for improved publication which are outlined below.

1. The partial amendments to items or other units should clearly state what matter is being changed or canceled. For example, the tariff matter that is to be affected by a partial amendment could be highlighted in the heading of the partial amendment notice; such as:

**Special Notice Item 135**

Amend Item 135 to include "BN" as a participant to the provisions of Item 135.

This suggestion would facilitate a tariff user's awareness of amendments to tariff matter of particular interest to the tariff user.

2. The publishers should limit the number of partial amendments to items or other units to no more than two in effect at the same time. Each third partial amendment to an item or other unit could contain all changes for that particular item or unit and cancel all prior amendments. The RCCR tariff could contain an item explaining this partial amendment procedure to the tariff users.

3. The publishers should attempt to avoid having more than five supplements in effect at any one time. Also, the total number of effective supplemental pages should not exceed 70 percent of the total pages in the original tariff. Complaints concerning the volume of supplemental matter to the RCCR tariffs have been the most common complaint our staff has received.

4. The cumulative index of new or changed items should include reference to the number of the supplement containing any effective "special notices" providing partial amendments to tariff items.

We are encouraged by the efforts that the RCCR tariff publishers have recently made to improve the presentation of information in the RCCR tariff. After the implementation of the suggestions discussed above or other improvements, we will be in a better position to determine whether or not regulatory adjustments are needed. During the 180-day observation period, the Commission's staff will monitor and analyze the content and level of complaints regarding the RCCR tariff format. Should tariff users encounter problems with the tariff during this

[1] As a result of the Commission's action in Ex Parte No. 444, *Electronic Filing of Tariffs*, 54 FR 6403, the regulations contained in 49 CFR Part 1312 will be replaced by new regulations in 49 CFR Part 1314, effective March 13, 1989. The Commission has carried forward its regulation dealing with rail carrier cost recovery tariffs to 49 CFR 1314.17. That regulation would be the subject of future Commission revision in this proceeding, should the Commission determine that revision is appropriate.

VOL
54

UMI

period, their complaints should be directed to the individuals named above under the heading "For Further Information Contact." At the end of the observation period, the Commission will decide what actions it will take.

**List of Subjects in 49 CFR Parts 1312 and 1314**

Railroads.

This action will not significantly affect the quality of the human environment or energy conservation and it will not have a significant economic impact on a substantial number of small entities.

This notice is issued under authority of 49 U.S.C. 10321 and 10762 and 5 U.S.C. 553.

*It is ordered:*

1. Further action in this proceeding will be held in abeyance until September 5, 1989.

2. This decision is effective March 8, 1989.

Decided: March 1, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

# Notices

Federal Register
Vol. 54, No. 44
Wednesday, March 8, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Forms Under Review by Office of Management and Budget

March 3, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Department Clearance Office, USDA, OIRM, Room 404-W Admin. Bldg., Washington, DC 20250, (202) 447-2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 3410-01-M

## Commodity Credit Corporation

### Final Determination; 1989 Extra Long Staple Cotton Program

**AGENCY:** Commodity Credit Corporation, USDA.

**ACTION:** Notice of final determination of 1989 extra long staple cotton program.

**SUMMARY:** The purpose of this notice is to affirm the determinations made by the Secretary of Agriculture which are required to be made in order to implement the 1989 extra long staple (ELS) cotton price support and production adjustment program. These determinations are made in accordance with the Agricultural Act of 1949, as amended, (the "1949 Act").

**EFFECTIVE DATE:** March 8, 1989.

**ADDRESS:** Bruce R. Weber, Director, Commodity Analysis Division, USDA-ASCS, Rm. 3741 South Building, P.O. Box 2415, Washington, DC 20013.

**FOR FURTHER INFORMATION CONTACT:** Charles V. Cunningham, Leader, Fibers Group, Commodity Analysis Division, USDA-ASCS, Room 3758 South Building, P.O. Box 2415, Washington, DC 20013 or call (202) 447-7954.

**SUPPLEMENTARY INFORMATION:** This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512-1 and has been designated as "non-major" since these program provisions are not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. The Final Regulatory Impact Analysis describing the options considered in developing this notice of determination is available on request from the aforementioned individual.

The titles and numbers of the Federal assistance programs to which this notice applies are: Title—Cotton Production Stabilization, Number 10.052 and Title—Commodity Loans and Purchases, Number 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Commodity Credit Corporation ("CCC") is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations.

It has been determined by environmental evaluation that this action will have no significant impact on the quality of the human environment.

Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

On August 19, 1988 (53 FR 31732), a notice of proposed determination was published requesting public comment on the 1989 ELS Cotton Program. A total of three respondents submitted comments. Respondents included two producer associations and one ELS cotton producer. One respondent submitted comments relating to issues for which comments were not requested. One respondent recommended that the ARP be established at 5 percent and another supported an ARP of 10 percent. The third respondent favored an ARP but did not specify the level, recommending only that the program be operated to minimize costs and avoid burdensome surpluses. Under the two options analyzed, the supply-utilization outlook

BEST COPY AVAILABLE

VOL 54 ISS 44 MR 8 1989 UMI

was nearly identical. The 5 percent ARP option was selected instead of the 10 percent option in order that U.S. ELS cotton producers maintain ELS cotton production at a level which will support the growing demands of the export market while minimizing the possibility of overproduction.

**Determinations**

In accordance with section 103(h)(2) of the 1949 Act, it has been determined that the loan level for 1989-crop ELS cotton will be 81.77 cents per pound.

In accordance with section 103(h)(3)(B) of the 1949 Act, it has been determined that the "established" target price for 1989-crop ELS cotton will be 90.7 cents per pound.

In accordance with section 103(h)(8)(A) of the 1949 Act, it has been determined that the acreage reduction requirement for the 1989 crop of ELS cotton will be 5 percent. Accordingly, producers will be required to reduce their 1989 ELS cotton plantings for harvest by at least 5 percent from the ELS cotton acreage base established for a farm in order to be eligible for ELS cotton price support loans and deficiency payments.

In accordance with section 103(h)(17) of the 1949 Act, it has been determined that recourse loans will be made available for 1989 ELS seed cotton.

**Authority:** Sec. 103(h) of the Agriculture Act of 1949, as amended, 97 Stat. 494 (7 U.S.C. 1444(h)).

Signed at Washington, DC on March 2, 1989.

**Milton J. Hertz,**

*Executive Vice President, Commodity Credit Corporation.*

## COMMISSION ON CIVIL RIGHTS

### Arizona Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Arizona Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 4:00 p.m. on March 24, 1989, at the Ramada Hotel Airport East, 1600 South 52nd Street, Tempe, Arizona 85201. The Committee will discuss the status and disposition of the immigration report.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, John White or Philip Montez, Director of the Regional Division (213) 894-3437, (TDD 213/894-0508). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, February 28, 1989.

## DEPARTMENT OF COMMERCE

### Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).

*Title:* Final Regulations for Deep Seabed Mining Commercial Recovery.

*Form Number:* Agency—None; OMB—0648-0170.

*Type of Request:* Request for extension of a currently approved collection.

*Burden:* 0 respondents; 1 reporting hour; Average hours per response—No hours have been estimated because applications are unlikely to be received before 1994.

*Needs and Uses:* U.S. citizens who wish to conduct operations to commercially recover deep seabed minerals must obtain a license from NOAA. The information provided in the application, and the information from reporting requirements in effect after licensing, are used by NOAA and other Federal agencies to ensure the application meets the requirements established by legislation.

*Affected Public:* Businesses or other for-profit institutions.

*Frequency:* On occasion, annual.

*Respondent's obligation:* Mandatory

*OMB Desk Officer:* Francine Picoult, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: March 2, 1989.

**Edward Michals,**

*Departmental Clearance Officer, Office of Management and Organization.*

BILLING CODE 3510-CW-M

### Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* Patent and Trademark Office (PTO).

*Title:* Patent Term Extension.

*Form Number:* Agency—N/A; OMB—0651-0020.

*Type of Request:* Revision of a currently approved collection.

*Burden:* 30 respondents; 1,800 reporting hours—Average hours per response—60 hours.

*Needs and Uses:* The normal term of a patent is 17 years. However, certain categories of patents (drugs, medical devices, etc.) are eligible to be renewed. To be eligible for renewal, certain information is required so that PTO can determine if the extension would meet the requirements of the Drug Price Competition and Patent Term Restoration Act and the Generic Animal Drug and Patent Restoration Act.

*Affected Public:* Businesses or other for-profit institutions; Federal agencies or employees; Non-profit institutions; Small businesses or organizations

*Frequency:* On occasion.

*Respondent's obligation:* Required for a benefit.

*OMB Desk Officer:* Robert Veeder, 395-3785.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Robert Veeder, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

Dated: March 2, 1989.

**Edward Michals,**

*Departmental Clearance Officer, Office of Management and Organization.*

BILLING CODE 3510-CW-M

## Bureau of Export Administration

**[Docket No. 90253-9053]**

### Domestic Crude Oil Export Study

**AGENCY:** Office of Industrial Resource Administration, Bureau of Export Administration, Commerce.

**ACTION:** Request for comments, Domestic Crude Oil Export Study.

**SUMMARY:** Section 2424 of the Omnibus Trade and Competitiveness Act of 1988 requires that the Secretary of Commerce, in consultation with the Secretary of Energy, undertake a comprehensive review to assess whether existing statutory restrictions on the export of crude oil produced in the lower 48 States are adequate to protect the energy and national security interests of the United States and American consumers. The Department of Commerce has been designated by the Congress to coordinate and prepare this review. This notice invites comments from interested parties and announces that public hearings are planned in California and Texas to assist the Department in preparing this study.

**DATE:** Comments must be submitted on or before April 7, 1989.

**ADDRESS:** Send written comments to Brad I. Botwin, Director, Strategic Analysis Division, Office of Industrial Resource Administration, Room 3878, Bureau of Export Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Brad I. Botwin, Director, Strategic Analysis Division, (202) 377-4060, or Bernard Kritzer, Senior Energy Adviser, (202) 377-3984.

**SUPPLEMENTARY INFORMATION:** On August 23, 1988, the President signed the Omnibus Trade and Competitiveness Act of 1988 (Act). Section 2424 of the Act (to be codified as a note to section 7 of the Export Administration Act, 50 U.S.C., app. 2406) requires the Secretary of Commerce, in consultation with the Secretary of Energy, to undertake a comprehensive review to determine whether the existing statutory restrictions on the export of crude oil produced in the contiguous United States (i.e., lower 48 States) are adequate to protect the energy and national security interests of the United States and American consumers.

The Act further states that such review shall assess the effect of increased exports of crude oil produced in the contiguous United States on:

(a) The adequacy of domestic supplies of crude oil and refined petroleum products in meeting United States energy and national security needs;

(b) The quantity, quality, and retail price of petroleum products available to consumers in the United States generally and on the West Coast in particular;

(c) The overall trade deficit of the United States;

(d) The acquisition costs of crude oil by domestic refiners;

(e) The financial viability of sectors of the domestic petroleum industry (including independent refiners, distributors, marketers, and pipeline carriers); and

(f) The United States tanker fleet (and the industries that support it), with particular emphasis on the availability of militarily useful tankers to meet anticipated national defense requirements.

The Act further directs the Secretary of Commerce to develop—after consulting with appropriate State, Federal, and Congressional officials and other persons—findings, options, and recommendations regarding the adequacy of existing statutory restrictions on the export of crude oil produced in the contiguous United States in protecting the energy and national security interests of the United States and American consumers.

The Department of Commerce has initiated this study. This notice is intended to provide all interested parties, especially those in the oil industry, consumer groups, environmental groups, the maritime industry, and all other industries, groups or individuals likely to be affected by any change in existing law governing the export of crude oil produced in the contiguous United States, with an opportunity to submit written comments and participate in hearings planned on these issues.

Interested parties are invited to submit written comments, opinions, data, information or advice with respect to the study to the Strategic Analysis Division, Office of Industrial Resource Administration, U.S. Department of Commerce at the address stated above.

The period for submission of comments will close on April 7, 1989. All comments received before the close of the comment period will be considered by the Department in completing the study. While comments received after the end of the comment period will be considered if possible, their consideration cannot be assured.

All public comments, whenever received, will be a matter of public record and will be available for public inspection and copying.

In the interest of accuracy and completeness, written comments are preferred. Written comments (3 copies requested) should be sent to the address indicated above. If oral comments are received during a telephone conversation or meeting, a written summary will be prepared by the person receiving the oral comments. That written summary will also be a matter of public record and will be available for public review and copying.

Anyone submitting business confidential information should clearly identify the business confidential portion of the submission and also provide a nonconfidential submission which can be placed in the file. If this procedure is not followed, the comments and materials will be returned to the submitter and will not be considered in completing this study.

Cummunications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning this study will be maintained in the Bureau of Export Administration's Freedom of Information Records Inspection Facility, Bureau of Export Administration, U.S. Department of Commerce, Room H-4886, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Records in this facility, including written public comments, memoranda summarizing the substance of oral communications and the transcript of hearings may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information pertaining to the inspection and copying of records may be obtained from Ms. Margaret Cornejo, Bureau of Export Administration's Freedom of Information Officer, at the above address or by calling (202) 377-2593.

Notice of public hearings in California and Texas will be published in the **Federal Register** giving the time, place, and matters to be considered, so that interested parties will have an opportunity to participate. The hearings will be recorded and transcripts will be placed on the record.

## International Trade Administration

### Initiation of Antidumping and Countervailing Duty Administrative Reviews

**AGENCY:** International Trade Administration/Import Administration, Commerce.

**ACTION:** Notice of initiation of antidumping and countervailing duty administrative reviews.

**SUMMARY:** The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

**EFFECTIVE DATE:** March 8, 1989.

**FOR FURTHER INFORMATION CONTACT:** Bernard T. Carreau or Richard W. Moreland, Office of Countervailing Compliance or Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786/2104.

**SUPPLEMENTARY INFORMATION:**

### Background

On August 13, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 32556) a notice outlining the procedures for requesting administrative reviews. The Department has received timely requests, in accordance with §§ 353.53a (a)(1), (a)(2), (a)(3), and 355.10(a)(1) of the Commerce Regulations, for administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements.

### Initiation of Reviews

In accordance with §§ 353.53a(c) and 355.10(c) of the Commerce Regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings, and suspension agreements. We intend to issue the final results of these reviews no later than February 28, 1990.

| Antidumping Duty Proceedings and Firms | Periods to be Reviewed |
|---|---|
| Canada: | |
| Brass Sheet and Strip (A-122-601) | 01/01/88—12/31/88 |
| Ratcliffs | |
| France: | |
| Anhydrous Sodium Metasilicate (A-427-098) | 01/01/88—12/31/88 |
| Rhone Poulenc | |
| Hungary: | |
| Truck Trailer Axle-and-Brake Assemblies (A-437-001) | 01/01/88—12/31/88 |
| RABA | |
| Japan: | |
| Tapered Roller Bearings and Parts Thereof, Finished and Unfinished (A-588-604) | 3/27/87—8/30/88 |
| NTN | |
| Koyo Seiko | |
| Japan: | |
| Titanium Sponge (A-588-020) | 11/01/87—10/31/88 |
| Toho Titanium | |
| Showa Denko | |
| Japan: | |
| Color Picture Tubes (A-588-609) | 06/30/87—12/31/88 |
| Toshiba Corp. | |
| Japan: | |
| Cell-Site Transceivers (A-588-021) | 01/01/88—07/28/88 |
| Kokusai Electric | |
| New Zealand: | |
| Low-Fuming Brazing Copper, Wire and Rod (A-614-502) | 01/01/88—12/31/88 |
| McKechnie Brothers | |
| Sweden: | |
| Certain Stainless Steel Hollow Products (A-401-602) | 05/22/87—11/30/88 |
| Sandvik AB | |
| West Germany: | |
| Dry Cleaning Machinery (A-428-037) | 11/01/87—10/31/88 |
| Boewe | |
| Seco | |

| Countervailing Duty Proceedings | Periods to be Reviewed |
|---|---|
| Colombia: Miniature Carnations (C-301-601) | 01/01/88—12/31/88 |

| Countervailing Duty Proceedings | Periods to be Reviewed |
|---|---|
| Colombia: Roses and Other Cut Flowers (C-301-003) | 01/01/88—12/31/88 |
| Costa Rica: Fresh Cut Flowers (C-223-601) | 01/01/88—12/31/88 |
| Ecuador: Fresh Cut Flowers (C-331-601) | 01/01/88—12/31/88 |
| Mexico: Fabricated Automotive Glass (C-201-406) | 01/01/88—12/31/88 |
| Spain: Stainless Steel Wire Rod (C-469-004) | 01/01/88—12/31/88 |

Interested parties are encouraged to submit applications for administrative protective orders as early as possible in the review process.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.53a(c) and 355.10(c).

Dated: February 15, 1989.

### Short-Supply Review on Certain Flat-Rolled Steel; Request for Comments

**AGENCY:** Import Administration/International Trade Administration, Commerce.

**ACTION:** Notice and request for comments.

**SUMMARY:** The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products, with respect to certain alloy hot-rolled sheet and strip used to manufacture bi-metal band saws.

**DATE:** Comments must be submitted no later than March 20, 1989.

**ADDRESS:** Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377-0159.

**SUPPLEMENTARY INFORMATION:** Article 8 of the U.S.-EC Arrangement on Certain Steel Products provides that if the U.S. "* * * determines that because of abnormal supply or demand factors, the US steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products * * *"

We have received a short-supply request for certain D6A hot-rolled alloy steel sheet and strip, in thicknesses ranging from 0.060 to 0.125 inch and in widths ranging from 10 to 16 inches. This material is used to produce cold-rolled steel strip for bi-metal band saws.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than March 20, 1989. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce, at the above address.

**Jan W. Mares,**

*Assistant Secretary, for Import Administration.*

### UMDNJ-RWJ Medical School et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

*Docket Numbers:* 88-169 and 88-170.
*Applicant:* UMDNJ-RWJ Medical School, Piscataway, NJ 08854.
*Instrument:* Rotating Anode X-ray Generator, Model RU-200.
*Manufacturer:* Rigaku Corp., Japan.
*Intended Use:* See notice at 53 FR 18329, May 23, 1988.
*Instruments Ordered:* June 23, 1987 and October 27, 1987 respectively.
*Reasons for this Decision:* The foreign instrument provides a power density of at least 6.0 kilowatts per square millimeter and a focal spot of 0.3 x 3.0 millimeter or less.
*Advice Submitted by:* The National Institutes of Health, September 6, 1988.

*Docket Number:* 88-201. *Applicant:* University of Kentucky, Lexington, KY 40506-0099. *Instrument:* Scanning Electron Microscope with Accessories, Model S-800-1. *Manufacturer:* Hitachi Scientific, Japan. *Intended Use:* See notice at 53 FR 22684.
*Instrument Ordered:* December 23, 1987. *Reasons for this Decision:* The foreign instrument provides a field emission electron source and a guaranteed resolution (lattice) of 20 angstroms. *Advice Submitted By:* The National Institutes of Health, September 21, 1988.

*Docket Number:* 88-123. *Applicant:* Cold Spring Harbor Laboratory, Cold Spring Harbor, NY 11724. *Instrument:* Mass Spectrometer, Model BIOION 20. *Manufacturer:* Bio-Ion, Sweden. *Intended Use:* See notice at 53 FR 15103, April 27, 1988. *Instrument Ordered:* December 15, 1987. *Reasons for this Decision:* The foreign instrument provides measurements of mass fragments in excess of 20 000 amu and accuracy of 0.01% in the 0 to 6000 amu range. *Advice Submitted By:* The National Institutes of Health, September 6, 1988.

*Docket Number:* 88-231. *Applicant:* University of Kentucky, Lexington, KY 40536-0084. *Instrument:* Scanning Electron Microscope, Model S-900. *Manufacturer:* Hatachi Scientific, Japan.

VOL 54 ISS 44 MR 8 1989 UMI

*Intended Use:* See notice at 53 FR 31077, August 17, 1988.

*Instrument Ordered:* December 23, 1987. *Reasons for this Decision:* The foreign instrument provides a field emission electron source and a guaranteed resolution of 8.0 angstroms *Advice Submitted By:* The National Institutes of Health, September 27, 1988.

*Comments:* None received. *Decision.* Approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, was being manufactured in the United States at the time the foreign instruments were ordered.

The capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and we know of no instrument or apparatus of equivalent scientific value to either of the foreign instruments for the applicant's intended use which was being manufactured in the United States at the time the foreign instruments were ordered

## National Oceanic and Atmospheric Administration

**[Docket No. 80119-9019]**

## Financial Assistance for Research and Development Projects To Provide Information for the Full and Wise Use and Enhancement of Fishery Resources in the Gulf of Mexico

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of availability of financial assistance.

**SUMMARY:** For fiscal year 1989, Marine Fisheries Initiative (MARFIN) funds are available to assist persons in carrying out research and development projects which optimize the use of a U.S. Gulf of Mexico fishery involving the U.S. fishing industry (recreational or commercial) including, but not limited to, harvesting methods, economic analyses, processing, fish stock assessment, and fish stock enhancement. NMFS issues this notice describing the conditions under which applications will be accepted and how NMFS will determine which applications will be funded.

**DATE:** Applications must be received by April 24, 1989. Applications received after that date will not be considered for funding.

**ADDRESS:** Send applications to Southeast Regional Office, 9450 Koger Boulevard, National Marine Fisheries Service, St. Petersburg, Florida 33702.

**FOR FURTHER INFORMATION CONTACT:** Dr. Donald R. Ekberg, 813-893-3720.

**SUPPLEMENTARY INFORMATION:**

### Classification

NMFS reviewed this solicitation in accordance with Executive Order 12291 and the Department of Commerce guidelines implementing that Order. This solicitation is not "major" because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This notice does not contain policies with sufficient Federalism implications to warrant preparation of a Federalism assessment under E.O. 12612. Prior notice and an opportunity for public comments are not required by the Administrative Procedure Act or any other law for this notice concerning grants, benefits, and contracts. Therefore, a regulatory flexibility analysis is not required for purposes of the Regulatory Flexibility Act. Information collection requirements contained in this notice have been approved by the Office of Management and Budget (OMB clearance No. 0648-0175) under the provisions of the Paperwork Reduction Act. This program is subject to the provisions of Executive Order 12372.

### I. Introduction

Section 3049(e) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1854(e)) authorizes the Secretary to conduct research to enhance U.S. fisheries. The Departments of Commerce, Justice, and State, the Judiciary, and related Agencies Appropriation Act of 1989 makes funds available to the Secretary of Commerce for fiscal year 1989. This solicitation makes available approximately $2.0 million (including $315 thousand for continuing projects) for financial assistance under the MARFIN program to manage and enhance the use of fishery resources in the Gulf of Mexico. There is no guarantee that sufficient funds will be available to make awards for all approved projects. U.S. fisheries [1] include any fishery that is or may be engaged in by U.S. citizens. The phrase "fishing industry" includes both the commercial and recreational sectors of U.S. fisheries.

### II. Funding Priorities

Fishery research and development proposals should be related to one or more of the priority areas listed below (in no rank order):

1. *Shrimp.* (a) Development of improved gear efficiency, on-board handling, grading, sorting and preservation methods, and methods to reduce catch of non-target species, (b) determination of social and economic impacts of turtle excluder devices (TEDs), (c) evaluation of alternative harvesting (other than otter trawls), handling and processing systems, (d) identification of numbers and types of fishing vessels and gear now in use, trends in capital inputs into the fleet, and assessment of multiple uses of shrimp trawlers in other fisheries, (e) characterization (catch, effort, size, etc.) and determination of impacts of the bait shrimping industry, (f) characterization (catch, effort, size, etc.) and determination of impacts of recreational shrimping, (g) assessment of impact of imported shrimp on domestic price structure, economics of the domestic industry and relationship to fishery management actions which influence the sizes of shrimp being landed, (h) methods to reduce conflicts between shrimp trawlers and other marine resource user groups, and (i) assessment and management strategies for white shrimp.

2. *Menhaden.* (a) Economic enhancement of products (surimi, oil, and food additives) for human consumption, and (b) prey-predator relationships.

3. *Coastal Pelagics.* (a) Determination of recruitment indices for king and Spanish mackerel, cobia, and dolphin (fish), (b) identification of king and Spanish mackerel management units, (c) development of methods to solve problems of competition between recreational and commercial fishermen, and (d) stock assessment for and economic analysis of fishing strategies for harvest of blue runners, little tunny, and related species.

[1] For purposes of this notice, a fishery is defined as one or more stocks of fish, including tuna, and shellfish which are identified as a unit based on geographic, scientific, technical, recreational and economic characteristics, and any and all phases of fishing for such stocks. Examples of a fishery are Gulf of Mexico shrimp, groundfish, menhaden, etc.

4. *Reef Fish.* (a) Determination of socioeconomic impacts of recreational and commercial fishing, (b) determination of recruitment processes for shallow and deep-water reef fish, (c) identification of reef fish management units, (d) development of methods to solve problems of competition between recreational and commercial fishermen, (e) determination of trends in fishing effort for inshore and offshore fisheries, (f) determination of size composition by species for inshore and offshore fisheries, (g) determination of the role of artificial reefs and reef site location in productivity, (h) stock assessment information on secondary target species such as triggerfish, amberjack, etc., (i) analysis of biological and economic impacts of bottom longline depth-specific management strategies, (j) compilation of existing data on location and areal extent of reef fish habitats, and (k) development of rearing techniques for early life history stages of red snapper.

5. *Coastal Herrings.* (a) Handling and processing, shoreside methods, and product development, (b) resource surveys and gear development, (c) economic analysis of harvesting, handling, and processing systems, (d) assessment of predator-prey relationships, particularly with respect to recreational and commercial impacts, and (e) analysis of impacts of localized stock harvest and/or environmental perturbations on predator populations.

6. *Ocean Pelagics.* (a) Development of species-selective fishing gear, including longline methods, (b) determination of social and economic impacts of alternative fishing methods, (c) development of methods to determine recreational fishing participation, and (d) characterization of the Gulf longline fishery (including fish caught, participants, and landings).

7. *Marine Mollusks.* (a) Development of methods for onshore and offshore oyster depuration systems, (b) development of guidelines for oyster reef expansion, rehabilitation, and management, (c) development of improved oyster varieties, culture methods, and technology transfer, and (d) determination of baseline information for a quahog fishery.

8. *Crabs and Lobsters.* (a) Determination of safe harvest potential for deepwater crabs, (b) development of methods to quantify the recreational blue crab fishery, (c) determination of conflicts and methods of resolution among blue crab user groups, (d) development of information for population assessment of blue crab stocks, and (e) life history studies and habitat requirements of early juvenile blue crabs.

9. *Bottomfish.* (a) Assessment of impact of shrimp trawling on bottomfish stocks, (b) determination of life history of Gulf butterfish, (c) development of methods to reduce incidental trawl catch of bottomfish, (d) assessment of biological, social, and economic impact of incidental catch reduction, and (e) evaluation of product development options fof Gulf butterfish and harvest fish.

10. *Marine Mammals and Endangered Species.* Assessment of nonshrimping mortality of sea turtles, using available data.

11. *Estuarine Fish.* (a) Improving estimates of age structures and catches of red and black drums, (b) measurement of escapement rate of inshore red drum juveniles to offshore stock, (c) determination of potential to develop an eel fishery, and (d) enhancing knowledge of recruitment of early juvenile stages of economically important sciaenids, including habitat requirements.

12. *General.* (a) Conduct social and economic research applicable to each Gulf of Mexico fishery including costs and returns plus production function analysis, demand analyses on recreational and commercial fisheries, economics of recreational or commercial multi-species fisheries, and analysis of foreign trade barriers affecting Gulf of Mexico fisheries; (b) description of procedures to implement limited entry for existing or developing fisheries such as reef fish, shark, stone crab, or butterfish, and (c) development of alternative methods to handle or use by-products generated from seafood processing common to the Gulf of Mexico.

MARFIN financial assistance for projects started in fiscal year 1988. For fiscal years 1986, 1987, and 1988 awards totaled ($5.288 million). Funding by fisheries was as follows:

| | Thousands of dollars | Percent of total |
|---|---|---|
| 1. Shrimp (includes TED technology transfer) | 1,044.1 | 19.7 |
| 2. Menhaden | 10.0 | 0.2 |
| 3. Coastal pelagics | 666.9 | 12.6 |
| 4. Reef fish | 259.9 | 4.9 |
| 5. Coastal herrings | 284.3 | 5.4 |
| 6. Ocean pelagics | 182.1 | 3.4 |
| 7. Marine mollusks | 230.0 | 4.3 |
| 8. Crabs and lobsters | 479.4 | 9.1 |
| 9. Bottomfish | 89.1 | 1.7 |
| 10. Marine mammals and endangered species | 127.0 | 2.4 |
| 11. Estuarien fish | 1,798.9 | 34.0 |
| 12. General | 116.7 | 2.2 |

Priority in program emphasis will be placed upon funding projects which have the greatest probability of maintaining and improving existing fisheries, improving our understanding of factors affecting recruitment success, generating increased yields from fisheries, and generating increased recreational opportunity and harvest potential. Projects will be evaluated as to the likelihood of achieving these benefits through both short-term and long-term research projects with consideration of the magnitude of the eventual benefit that may be realized. Both short-term projects that may yield more immediate benefits and long-term projects yielding greater benefits will receive equal emphasis. Planning emphasis will be placed upon attaining each discrete target benefit either through a single project or series of projects necessary to attain that goal.

Further information on current programs that address the above listed priorities may be obtained from the NOAA National Marine Fisheries Service's Southeast Regional Office.

### III. How to Apply

*1. Eligibility Applicants*

Applications for grants or cooperative agreements for MARFIN projects may be made, in accordance with the procedures set forth in this notice, by:

(a) Any individual who is a citizen or national of the United States;

(b) Any corporation, partnership, or other entity, non-profit or otherwise, if such entity is a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916 as amended (46 U.S.C. 802).[2]

[2] To qualify as a citizen of the United States within the meaning of this statute, citizens or nationals of the United States or citizens of the Northern Mariana Islands (NMI) must own less than 75 percent of the interest in the entity or, in the case of a non-profit entity, exercise control of the entity that is determined by the Secretary to be equivalent to such ownership; and in the case of a corporation, the president or other chief executive officer and the chairman of the board of directors must be citizens of the United States. No more of its board of directors than a minority of the number necessary to constitute a quorum may be non-citizens; and the corporation itself must be organized under the laws of the United States, or of a State, including the District of Columbia, Commonwealth of Puerto Rico, American Samoa, the Virgin Islands of the United States, Guam, the NMI or any other Commonwealth, territory, or possession of the United States. Seventy-five percent of the interest in a corporation shall not be deemed to be owned by citizens of the

UMI

NOAA will consider not awarding a grant or cooperative agreement to any individual or organization who is delinquent on a debt to the Federal government until payment is made or satisfactory arrangements are made with the agency to whom the debt is owed. Any first time applicant for Federal grant funds is subject to a preaward accounting survey prior to execution of the award. Women and minority individuals and groups are encouraged to submit applications. NOAA employees including full, part-time, and intermittent personnel, (or their immediate families) and NOAA offices or centers are not eligible to submit an application under this solicitation, or aid in the preparation of an application, except to provide information about the MARFIN program and the priorities and procedures included in this solicitation.

*2. Amount and Duration of Funds*

Under this solicitation for fiscal year 1989 an estimated $2.0 million will be available to fund fishery research and development projects ($1.69 million for new projects and $315 thousand for continuing projects). Although grants or cooperative agreements will generally be awarded for a period of one year, two- or three-year projects may be approved for funding in subsequent years. Once approved, multi-year projects will not compete for funding in subsequent years. For multi-year projects, funding beyond the first year is contingent on the availability of program funds in subsequent fiscal years and the extent to which project objectives and reporting requirements are met during the prior year. Publication of this announcement does not obligate NMFS to award any specific grant or to obligate all or any part of the available funds. Selection of successful applications generally will be provided by June 8, 1989. Awards generally will be made no later than 60 days after the funding selection is determined and negotiations completed.

---

NMI, if: (1) The title to 75 percent of its stock is not vested in such citizens or nationals of the United States or citizens of the NMI free from any trust or fiduciary obligation in favor of any person not a citizen or national of the United States or citizens of the NMI (2) 75 percent of the voting power in such corporation is not vested in citizens or nationals of the United States or citizens of the NMI (3) through any contract or understanding it is arranged that more than 25 percent of the voting power in such corporation may be exercised, directly or indirectly in behalf of any person who is not a citizen or national of the United States or a citizen of the NMI; or (4) by any means whatsoever, control of any interest in the corporation is conferred upon or permitted to be exercised by any person who is not a citizen or national of the United States.

*3. Cost-Sharing Requirements*

Applications must reflect the total amount of money necessary to accomplish the project including contributions and/or donations. Cost sharing is not required for the MARFIN program. However, cost sharing is encouraged, and in case of a tie in considering proposals for funding, cost-sharing may affect the final decision. The appropriateness of all cost-sharing will be determined on the basis of guidance provided in Office of Management and Budget (OMB) circulars. Appropriate documentation must exist to support in-kind services or property used to fulfill cost-sharing requirements.

*4. Format*

Applications for project funding must be complete. They must identify the principal participants and include copies of any agreements between the applicant and the participants describing the specific tasks to be performed. Project applications should give a clear presentation of the proposed work, the methods for carrying out the project, its relevance to managing and enhancing the use of Gulf of Mexico fishery resources and cost estimates as they relate to specific aspects of the project. Budgets will include a detailed breakdown by category of expenditure with appropriate justification. Applicants may submit two or more related projects under one proposal but must identify project costs including administrative costs, separately for each individual project. Applicants should not assume prior knowledge on the part of the NMFS as to the relative merits of the project described in the application. Applications must be submitted in the following format:

(a) *Cover Sheet.* An applicant must use OMB Standard Form 424 (revised 4/88) as the cover sheet for each project or group of consolidated projects. Applicants may obtain copies of the form from the NMFS Regional Office, or Department of Commerce's Central Administrative Support Center (CASC); addresses are set forth at Section E., Application Submission.

(b) *Project Summary.* Each project must contain a summary of not more than one page which provides the following information:

(i) Project title;

(ii) Project status: (new or continuing);

(iii) Project duration: (beginning and ending dates);

(iv) Name, address, and telephone number of applicant;

(v) Principal Investigator(s);

(vi) Project objective; and

(vii) Summary of work to be performed.

For continuing projects the applicant is to briefly describe progress to date in addition to any changes to the statement of work previously submitted.

(viii) Total Federal funds requested (for multi-year projects, identify each year's requested funding).

(ix) Project costs (matching funds) to be provided from non-NOAA sources (for multi-year projects, identify each year's requested funding). Specify whether cash or in-kind contributions.

(x) Total project cost.

(c) *Project Description.* Each project must be completely and accurately described. Each project description may be up to 15 pages in length. The NMFS will make all portions of the project description available to the public and members of the fishing industry for review and comment; therefore, NMFS cannot guarantee the confidentiality of any information submitted as part of any project nor will NMFS accept for consideration any project requesting confidentiality of any part of the project. Each project must be described as follows:

(i) Identification of Problem(s). Describe how existing conditions prevent the full use of Gulf of Mexico fishery resources. In this description, identify (1) the fisheries involved, (2) the specific problem(s) that the fishing industry has encountered, (3) the sectors of the fishing industry that are affected, and (4) how the problem(s) prevent the fishing industry from using the fishery resources.

(ii) Project Goals and Objectives. State what the proposed project will accomplish and describe how this will eliminate or reduce the problem(s) described above. For multi-year projects, describe the ultimate objective of the project and how the individual tasks contribute to reaching the objective. Describe the time frame in which tasks would be conducted.

(iii) Need for Government Financial Assistance. Explain why other fund sources cannot fund all the proposed work. List all other sources of funding which are or have been sought for the project.

(iv) Participation by Persons or Groups Other Than the Applicant. Describe the level of participation required in the project(s) by NOAA or other government and non-government entities. Specific NOAA employees should not be named in the proposal, even though the applicant may wish to acknowledge government expertise in an allied area.

(v) Federal, State, and Local Government Activities. List any programs (federal, state, or local government or activities, including State Coastal Zone Management Programs, Sea Grant, Southeast Area Monitoring and Assessment Program, Pub. L. 99-659 and Cooperative Statistics), this project would affect and describe the relationship between the project and those plans or activities.

(vi) Project Outline. Describe the work to be performed during the project, starting with the first month's work and continuing to the last month. Identify specific milestones that can be used to track project progress. For multi-year projects, major project tasks and milestones for future years must also be identified. If the work described in this section does not contain sufficient detail to allow for proper technical evaluation, the NMFS will not consider the application for funding and will return it to the applicant.

(vii) Project Management. Describe how the project will be organized and managed. Include resumes of principal investigators. List all persons directly employed by the applicant who will be involved in the project, their qualifications, and their level of involvement in the project.

(viii) Monitoring of Project Performance. Identify who will participate in monitoring of the project.

(ix) Project Impacts. Describe the impact of the project in terms of anticipated increased landings, production, sales, exports, product quality, safety, or any other measurable factors. Describe the specific products or services that will be produced by this project. Describe how these products or services will be made available to the fishing industry.

(x) Evaluation of Project. The applicant is required to provide an evaluation of project accomplishments in the final report. The application must describe the methodology or procedures to be followed to determine technical or economic feasibility, to evaluate consumer acceptability, or to quantify the results of the project in promoting increased landings, production, sales, exports, product quality, safety, or other measurable factors.

(xi) Total Project Costs. Total project costs is the amount of funds required to accomplish the proposed statement of work (SOW), and includes contributions and donations. All costs must be shown in a detailed budget. No cost-sharing can come from another Federal source. Costs must be allocated to the Federal share and non-NOAA share provided by the applicant or other sources. Non-NOAA costs are to be divided into cash and in-kind contributions. A standard budget form (ED-357 NG; Rev. 3-80) is available from the offices listed in section E. A separate budget must be submitted for each project. An applicant submitting a multi-year project must submit two budgets: one covering total project costs (including individual costs per year) and one covering the initial funding request for the project. The initial funding request should cover funds required during the first 12-month period. NMFS will not consider fees or profits as allowable costs for grantees. To support its budget, the applicant must describe briefly the basis for estimating the value of the non-NOAA funds derived from in-kind contributions. Costs for the following categories must be detailed in the budget as follows:

(A) *Personnel.* (*1*) Identify salaries by position and percentage of time of each individual dedicated to the project.

(*2*) Fringe Benefits. Indicate benefits associated with personnel working on the project. This entry should be the proportionate cost of fringe benefits paid for the amount of time spent in the project. For example, if an employee spends 20 percent of his/her time on the project, 20 percent of his/her fringe benefits should be charged to the project.

(B) *Consultants and contract services.* Identify all consultant and/or contractual service costs by specific task in relation to the project. If a commitment has been made prior to application for funding to contract with a particular vendor, explain how the vendor was selected, type of contract, deliverable expected, time frame, and cost. All contracts must meet the standards established in OMB circulars.

(C) *Travel and transportation.* Identify number of trips to be taken, purpose, and number of people to travel. Itemize estimated costs to include approximate cost of transportation, per diem, and miscellaneous expenses. Registration fees should be included.

(D) *Equipment, space or rental costs.* (*1*) Identify equipment purchases or rental costs, along with the intended use. Equipment purchases greater than $500.00 will not be allowed, since experienced investigators are expected to have sufficient capital equipment on hand. Use of lease to purchase (LTOP) or similar leases are prohibited.

(*2*) Identify space rental costs with specific uses.

(E) *Other costs.* (*1*) Supplies: Identify specific supplies necessary for the accomplishment of the project. Consumable office supplies may be included under Indirect Costs unless purchased in a large quantity to be used specifically for the project.

(*2*) Postage and shipping. Include postage for correspondence and other material produced under grant, as well as air freight, truck or rail shipping of bulk materials to be used in conferences and workshops.

(*3*) Printing costs. Include costs associated with producing materials in conjunction with the project.

(*4*) Telephone and telegraph. Identify estimated calls and monthly bills.

(*5*) Utilities may be included under Indirect Costs unless purchased in a large quantity to be used specifically for the project. Identify costs of utilities and percentage of use in conjunction with performance of project.

(*6*) Indirect Costs. This entry should be based on the applicant's established indirect cost agreement rate with the Federal Government. A copy of the current approved negotiated Indirect Cost Agreement should be included.

(*7*) Additional costs. Indicate any additional costs associated with the project which are allowable under OMB Circulars A-21, A-87, and A-122.

(d) *Supporting Documentation.* This section should include any required documents and any additional information necessary or useful to the description of the project. The amount of information given in this section will depend on the type of project proposed. The applicant should present any information which would emphasize the value of the project in terms of the significance of the problems addressed. Without such information, the merits of the project may not be fully understood, or the value of the project to fisheries use may be underestimated. The absence of adequate supporting documentation may cause reviewers to question assertions made in describing the project and may result in a lower ranking of the project. Reviewers will not necessarily examine all material provided as supporting documentation except where sufficient detail is lacking in the project description to properly evaluate the project. Therefore, information presented in this section should be clearly referenced in the project description.

*5. Application Submission and Deadline*

(a) *Deadline.* NMFS will accept applications for funding under this program between March 8, 1989 and April 24, 1989. An application will be accepted if the application is received by the office listed below on or before April 24, 1989 (6 p.m. e.s.t.).

(b) *Submission of applications to NMFS.* Applications are not to be bound

VOL 54 ISS 44 MR 8 1989 UMI

in any manner and should be one-sided. Any application not fully including all information called for herein, will be returned to the applicant. Applicants must submit one signed original and two (2) copies of the complete application to the address set forth below:

Regional Director, Attn: D. Ekberg, National Marine Fisheries Service, Duval Bldg., 9450 Koger Blvd., St. Petersburg, Florida 33702, Telephone No. (813) 893–3720.

Questions of an administrative nature should be referred to:

NOAA RAS/CC31, Attn: Jean West, Central Administrative Support Center, Federal Bldg., Room 1758, 601 East 12th Street, Kansas City, Missouri 64106, Telephone No. (816) 426–7287.

**IV. Review Process and Criteria**

*1. Evaluation and Ranking of Proposed Projects*

For applications meeting the requirements of this solicitation, NMFS will conduct a technical evaluation of each project prior to any other review. If an application contains two or more projects, NMFS will evaluate the projects separately. All comments submitted to NMFS will be taken into consideration in the technical evaluation of projects. NMFS will provide point scores on proposals based on the following evaluation criteria:

(a) Adequacy of research/development/demonstration for managing or enhancing Gulf of Mexico marine fishery resources, addressing especially the possibilities of securing productive results (30 points).

(b) Soundness of design/technical approach for enhancing or managing the use of Gulf of Mexico marine fishery resources (25 points).

(c) Organization and management of the project, including qualifications and previous related experience of the applicant's management team and other project personnel involved (20 points).

(d) Effectiveness of proposed methods for monitoring and evaluating the project (15 points).

(e) Justification and allocation of the budget in terms of the work to be performed (10 points).

The average technical scores will be ranked by NMFS into three groups: (1) highly recommended, (2) recommended, and (3) not recommended, for presentation to MARFIN Board members. The Board members will consider the significance of the problem addressed in the project, along with the technical evaluation and need for funding. This evaluation and ranking will enable NMFS to determine the appropriate level of funding for each project.

*2. Consultation with Others*

NMFS will make project descriptions available for review as follows:

(a) Public review and comment.

Applications may be inspected at the National Marine Fisheries Service Regional Office in St. Petersburg, Florida from April 24, 1989, to May 1, 1989.

(b) Consultation with members of the fishing industry. The NMFS shall, at its discretion, request comments from members of the fishing and associated industries who have knowledge in the subject matter of a project or who would be affected by a project.

(c) Consultation with government agencies. Applications will be reviewed in consultation with the NMFS Southeast Science and Research Director and appropriate laboratory personnel, CASC Grants Officer and, as appropriate, Department of Commerce bureaus and other federal agencies for elimination of duplicate funding. The Regional Fishery Management Councils may be asked to review projects and advise of any real or potential conflicts with council activities.

*3. Funding Decision*

After projects have been evaluated, MARFIN Board members will develop and submit funding recommendations to the Director of the NMFS Southeast Regional Office. The Director of the NMFS Southeast Regional Office will ascertain that the projects do not substantially duplicate other projects that are currently funded by or are approved for funding by the U.S. Government, determine the projects to be funded, and determine the amount of funds available for the program. The exact amount of funds awarded to each project will be determined in preaward negotiations between the applicant, NMFS, and the Grants Office. The Department of Commerce will review all recommended projects and funding before an award is executed by the Grants Officer. The funding instrument will be determined by the Grants Officer. Projects may not be initiated by a recipient until a notice of award is received from the Grants Officer. For multi-year projects, funds will be provided when specified tasks are satisfactorily completed and after NMFS has received MARFIN funds for subsequent fiscal years.

**V. Administrative Requirements**

*1. Obligations of the Applicant*

An Applicant must:

(a) Meet all application requirements and provide all information necessary for the evaluation of the project.

(b) Be available, upon request, in person or by designated representative, to respond to questions during the review and evaluation of the project(s).

(c) If a project is awarded, manage the day-to-day operations of the project, be responsible for the performance of all activities for which funds are awarded, and be responsible for the satisfactory completion of all administrative and managerial conditions imposed by the award. This includes adherence to procurement standards set forth in the award and referenced OMB circulars.

(d) If a project is awarded, keep records sufficient to document any costs incurred under the award, and allow access to records for audit and examination by the Secretary, the Comptroller of the United States, or their authorized representatives.

(e) Fishery data collected during the course of a project that could be pertinent to fishery management needs must be available to NMFS on request, subject to pertinent confidentiality requirements.

(f) If a project is awarded, submit quarterly project status reports on the use of funds and progress of the project to NMFS within 30 days after the end of each calendar quarter to the individual specified as the program officer in the funding agreement. The content of these reports will include, at a minimum:

(i) A summary of work conducted, which includes a description of specific accomplishments and milestones achieved;

(ii) The degree to which goals or objectives were achieved as originally projected;

(iii) Where necessary, the reasons why goals or objectives are not being met; and

(iv) Any proposed changes in plans or redirection of resources or activities and the reason therefore.

(g) If a project is funded, submit an original and two copies of a final report within 90 days after completion of each project. The report must describe the accomplishments of the project and include an evaluation of the work performed and the results and benefits of the work in sufficient detail to enable NMFS to assess the success of the completed project. Results must be described in relation to the project objectives of resolving specific impediments to managing or enhancing fisheries, and be qualified to the extent possible. Potential uses of project results by private industry or fishery managment agencies should be specified. Any conditions or requirements necessary to make productive use of the project results should be identified.

(h) Present current project results at the annual MARFIN conference and submit an abstract 15 days prior to the conference. Travel funds for this meeting will be provided by NMFS.

(i) Each recipient of MARFIN funding must comply with applicable OMB circulars, and Department of Commerce and NOAA policies. Each award contains standard terms and conditions and any special conditions which must be met by the recipient.

(j) For each project funded three copies of all publications or reports printed with grant funds must be submitted to the Program Officer. Any publication printed with grant funds must identify the MARFIN program of NOAA as the funding source along with the grant award number.

*2. Obligations of the National Marine Fisheries Service*

The NMFS Southeast Region will:

(a) Provide programmatic information necessary for the proper submission of applications.

(b) Provide advice to inform applicants of NMFS fishery management and development policies and goals.

(c) Monitor all projects after award to ascertain their effectiveness in achieving project objectives and in producing measurable results. Actual accomplishments of a project will be compared with stated objectives.

(d) Refer questions of an administrative nature from applicants/recipients to the Grants Office.

*3. CASC Grants Officer Responsibility*

The CASC Grants Officer is responsible for the administrative processing of NOAA Federal Assistance Awards and will provide all forms needed by an applicant. Processing includes review of applications to determine that they are in conformance with Federal requirements, negotiation, determination of the funding instrument, clearance through administrative review once program funding has been determined, execution of awards, reports and administrative monitoring, and close out of awards. The official grant file will be maintained by the Grants Officer.

*4. Legal Requirements*

The applicant will be required to satisfy the requirements of applicable local, State, and Federal laws.

This program is not included in the Catalog of Federal Domestic Assistance.

**Authority:** 16 U.S.C. 1854(e).

Dated: March 3, 1989.

**James E. Douglas, Jr.,**

*Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.*

[FR Doc. 89–5371 Filed 3–7–89; 8:45 am]

BILLING CODE 3510-22-M

## Pacific Fishery Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council's Groundfish Management Team (GMT) will meet on March 21, 1989, at the National Marine Fisheries Service, Northwest and Alaska Fisheries Center, Building 4, Room 2079, 7600 Sand Point Way, NE., Seattle, WA. The GMT will meet at 12:30 p.m., to discuss 1989 commercial groundfish catch projections, research needs, technical revisions to the fishery management plan, and management of the commercial sablefish fishery. Other issues related to management of the west coast groundfish fishery may also be discussed.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Adjustment of Import Limits for Certain Cotton and Wool Textile Products Produced or Manufactured in Brazil

March 3, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs adjusting limits.

**EFFECTIVE DATE:** March 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377–3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854)

The current limit for Categories 347/348 and sublimit for Category 410 are being increased for swing and carryforward. Category 410 is being increased further by special shift from Categories 410/624.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 46644, published on November 18, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

**Ronald I. Levin,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

**Committee For The Implementation Of Textile Agreements**

March 3, 1989.

Commissioner of Customs, Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on November 15, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1988 and extends through March 31, 1989.

Effective on March 6, 1989, the directive of November 15, 1988 is amended to adjust the current limit and sublimit for cotton and wool textile products in the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the Federative Republic of Brazil:

| Category | Adjusted twelve-month limit [1] |
|---|---|
| 347/348 | 728,000 dozen |
| 410 | 3,697,355 square meters |

[1] The limits have not been adjusted to account for any imports exported after March 31, 1988.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs

VOL 54 ISS 44 MR 8 1989 UMI

exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510-DR-M

## Announcement of a Negotiated Settlement on Import Limits for Certain Cotton Textile Products and Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Costa Rica

March 3, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs establishing a limit.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority.** Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); President's February 20, 1988 announcement of a Special Access Program.

During negotiations held between the Governments of the United States and Costa Rica, agreement was reached, effected by a Memorandum of Understanding dated February 14, 1989, to establish a new bilateral textile agreement for cotton textile products in Categories 347/348 beginning on January 1, 1989 and extending through May 31, 1992. The United States Government will control imports in Categories 347/348 at the agreed level for the first agreement period January 1, 1989 through May 31, 1989.

The agreement also establishes Guaranteed Access Levels for Categories 340/640 and 347/348 for the three-year periods beginning June 1, 1989 and extending through May 31, 1992.

Beginning on March 10, 1989, for goods to be exported from Costa Rica to the United States on and after June 1, 1989, U.S. Customs will start signing the first section of the form ITA-370P for shipments of U.S. formed and cut parts in Categories 340/640 and 347/348 that are destined for Costa Rica and subject to the Guaranteed Access Levels established for Categories 340/640 and 347/348. These products, which are assembled in Costa Rica from parts cut in the United States from fabric formed in the United States, are governed by Harmonized Tariff item number 9802.00.8010. Interested parties should be aware that shipments of cut parts in Categoreis 340/640 and 347/348 must be accompanied by a form ITA-370P, signed by a U.S. Customs officer, prior to export from the United States for assembly in Costa Rica in order to qualify for entry under the Guaranteed Access Levels.

A formal exchange of notes between the Governments of the United States and Costa Rica will follow.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 49343, published on December 7, 1988.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

Committee for the Implementation of Textile Agreements

March 3, 1989.

*Commissioner of Customs, Department of the Treasury, Washington, DC 20229*

Dear Mr. Commissioner: This directive cancels and supersedes the directive issued to you on December 2, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of cotton textile products in Categories 347/348, produced or manufactured in Costa Rica and exported during the period which began on July 28, 1988 and extends through July 27, 1989.

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and pursuant to the Memorandum of Understanding dated February 14, 1989 between the Governments of the United States and Costa Rica; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 10, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 347/348, produced or manufactured in Costa Rica and exported during the five-month period which began on January 1, 1989 and extends through May 31, 1989, in excess of 730,000 dozen.

Textile products in Categories 347/348 which have been exported to the United States prior to January 1, 1989, shall not be subject to the directive.

Missing charges for Categories 347/348 will be provided at a later date.

Beginning on March 10, 1989, U.S. Customs is directed to start signing the first section of the form ITA-370P for shipments of U.S. formed and cut parts in Categories 347/348 and 340/640 that are destined for Costa Rica and re-exported to the United States on and after June 1, 1989.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Adjustment of Import Limits for Certain Wool Textile Products Produced or Manufactured in Czechoslovakia

March 3, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs adjusting limits.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 443 is being increased for swing and carryover. The limit for Category 435 is being reduced to account for the swing being applied.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 19965, published on June 1, 1988.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

Committee for the Implementation of Textile Agreements

March 3, 1989.

*Commissioner of Customs Department of the Treasury Washington, DC 20229*

Dear Mr. Commissioner: This directive amends, but does no cancel, the directive issued to you on May 25, 1988. That directive concerns imports into the United States of certain wool textile products, produced or manufactured in Czechoslovakia and exported during the twelve-month period which began on June 1, 1988 and extends through May 31, 1989.

Effective on March 10, 1989, the directive of May 25, 1988 is amended to adjust the previously established limits for wool textile products in the following categories, as provided under the provisions of the current bilateral agreement between the Governments of the United States and the Czechoslovak Socialist Republic.

| Category | Adjusted 12-month limit [1] |
|---|---|
| 435 | 6,835 dozen |
| 443 | 85,205 numbers |

[1] The limits have not been adjusted to account for any imports exported after May 31, 1988.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Establishment of an Import Limit for Certain Cotton Textile Products Produced or Manufactured in Costa Rica

March 3, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs establishing a limit.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Article 3 of the Arrangement Regarding International Trade in Textiles.

Inasmuch as consultations held November 2-4, 1988 and December 12-13, 1988 between the Governments of the United States and Costa Rica have not resulted in a mutually satisfactory limit for Category 331, the United States Government has decided to control imports in this category for the period November 30, 1988 through November 29, 1989.

The United States remains committed to finding a solution concerning Category 331. Should such a solution be reached in further consultations with the Government of Costa Rica, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 52765, published on December 29, 1988.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

Committee for the Implementation of Textile Agreements

March 3, 1989.

Commissioner of Customs
Department of the Treasury
Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 10, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 331, produced or manufactured in Costa Rica and exported during the twelve-month period which began on November 30, 1988 and extends through November 29, 1989, in excess of 698,289 dozen pairs.

Textile products in Category 331 which have been exported to the United States prior to November 30, 1988 shall not be subject to this directive.

Textile products in Category 331 which have been released from the custody of the U.S. Customs Service under the provisons of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

### Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee will meet on March 23-25, 1989. The meeting will be held at the Naval Air Station, Jacksonville, Florida. The meeting will commence at 9:00 a.m. on March 23 and terminate at 12:00 Noon on March 25, 1989. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide briefings and demonstrations for the committee members on naval aviation. The agenda will include briefings on the naval aviation mission and operations, shipboard safety, as well as demonstrations related to aircraft, simulators and flight operations. These briefings, discussions and demonstrations will contain classified information that is specifically authorized under criteria established by Executive Order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive Order. The classified and non-classified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander L. W. Snyder, U. S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000, Telephone Number: (202) 696-4870.

Date: February 22, 1989.

## DEPARTMENT OF EDUCATION

**[CFDA No. 84.142]**

### College Facilities Loan Program; New Awards Under the College Facilities Loan Program for Fiscal Year 1989

*Purpose:* The College Facilities Loan Program provides low interest loans to eligible undergraduate postsecondary educational institutions for the construction, reconstruction, or renovation of housing facilities, undergraduate academic facilities, and other educational facilities for students and faculties.

*Deadline for Transmittal of Applications:* April 24, 1989

*Applications Available:* March 15, 1989

*Available Funds:* $29,640,000

*Estimated Range of Awards:* $250,000 to $3,000,000

*Estimated Average Size of Awards:* $1,500,000

*Estimated Number of Awards:* 20

*Project Period:* Until completion

*Priorities:* In accordance with the requirements of section 763 of the Higher Education Act, 20 U.S.C. 1132g-2, and 34 CFR 614.3(c), the Secretary gives priority to loans for renovation or reconstruction of older undergraduate academic facilities, and undergraduate academic facilities that have gone without major renovation or reconstruction for an extended period of time. In order to accomplish this objective, $15,000,000 will be reserved for loans for the renovation or reconstruction of older undergraduate academic facilities, and undergraduate academic facilities that have gone without major renovation or reconstruction for an extended period of time, and $14,640,000 will be reserved for loans for housing facilities. Under 34 CFR 75.105(c)(3), the Secretary funds under this competition only applications that meet either of these two absolute priorities.

*Deadline for Intergovernmental Review Comments:* June 23, 1989.

*Applicable Regulations:* Education Department General Administrative Regulations (EDGAR) 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals and Nonprofit Organizations), Subpart D of 34 CFR Part 75 (Direct Grant Programs) 75.105, 75.600-75.616; 34 CFR Part 77 (Definitions that Apply to Department Regulations); 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities), and 34 CFR Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)). Final regulations governing the College Facilities Loan Program, as codified in 34 CFR Part 614, were published in the Federal Register, 52 FR 30560, on August 14, 1987.

*Technical Assistance Workshop:* Applicants are invited to participate in a technical assistance workshop to assist applicants in application preparation. The workshop will take place in Washington, DC on March 13, 1989. For specific information on the workshop, please contact the Division of Higher Education Incentive Programs on (202) 732-4384.

*For Applications or Information Contact:* Sumner S. Bravman, U.S. Department of Education, 400 Maryland Ave., SW., Room 3022, ROB-3, Washington, DC 20202-5251. Telephone: (202) 732-4394.

**[Docket No. TM89-6-20-000]**

### Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 3, 1989.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on February 21, 1989, tendered for filing proposed changes in its FERC Gas Tariff, Second Revised Volume No. 1 as set forth in the revised tariff sheets:

*Rate Schedule F-2, proposed to be effective March 1, 1989* Thirty-second Revised Sheet No. 203

*Rate Schedule F-3, proposed to be effective March 1, 1989* Twenty-fourth Revised Sheet No. 204

Algonquin states that in a filing dated January 27, 1989 in Docket No. TQ89-3-22-000, Algonquin's pipeline supplier, CNG Transmission Corporation ("CNGT") made a Quarterly Purchased Gas Adjustment filing to flow though increases in its cost of purchased gas and to reflect certain tariff changes. Pursuant to Section 7 of Rate Schedule F-2, Algonquin is filing Thirty-second Revised Sheet No. 203 to concurrently track the rate changes made by CNGT in the service underlying Algonquin's Rate Schedule F-2. Thirty-second Revised Sheet 203 represent increases of $1.115 per MMBtu in the Demand component and 36.21 cents per MMBtu in the Commodity component.

Algonquin states that in a filing dated January 30, 1989 in Docket No. TF89-2-16-000 and amended on February 1, 1989, Algonquin's pipeline supplier, National Fuel Gas Supply Corporation ("National") made an Interim Purchased Gas Adjustment which decreased its commodity rate by 17.14 cents per MMBtu from the rate filed in its Interim PGA dated December 30, 1988 in Docket No. TF89-1-16-00. Pursuant to Section 7 of Rate Schedule F-3, Algonquin is filing Twenty-fourth Revised Sheet No. 204 to concurrently track the rate change filed for by National in the service underlying Algonquin's Rate Schedule F-3.

Algonquin notes that copies of this filing were served upon the affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to inervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

**[Docket No. TM89-2-20-002, TM89-5-20-001, TM89-6-20-002 and TF89-1-20-000]**

### Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 3, 1989.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on February 22, 1989, tendered for filing proposed changes in its FERC Gas Tariff, Second Revised Volume No. 1 as set forth in the revised tariff sheets:

*Proposed to be effective November 1, 1988,* Substitute Twenty-third Revised Sheet No. 205, Substitute Revised Thirteenth Revised Sheet No. 214

*Proposed to be effective January 1, 1989,* Substitute Twentieth Revised

VOL 54 ISS 44 MR 8 1989 UMI

Sheet No. 211, Substitute Fourteenth Revised Sheet No. 214

*Proposed to be effective February 1, 1988:* Substitute Alternate Substitute Twenty-fourth Revised Sheet No. 205, Second Substitute Alternate Fifteenth Revised Sheet No. 214

*Proposed to be effective March 1, 1989:* Substitute Alternate Substitute Thirtieth Revised Sheet No. 201

Algonquin states that pursuant to Section 7, Section 10 and Section 9 of Rate Schedules F-4, STB and SS-III, respectively, it is filing Substitute Twenty-third Revised Sheet No. 205, Substitute Revised Thirteenth Revised Sheet No. 211, Substitute Twentieth Revised Sheet No. 211 and Substitute Fourteenth Revised Sheet No. 214 to track the change in rates for the services underlying Algonquin's Rate Schedules F-4, STB and SS-III as made by its pipeline supplier Texas Eastern Transmission Corporation ("Texas Eastern") in its filings of January 25, 1989 in Docket Nos. TM89-1-17 *et al.* and CP87-28 *et al.*

Additionally, Algonquin states that it is filing Substitute Alternate Substitute Twenty-fourth Revised Sheet No. 205 (Rate Schedule F-4) and Second Substitute Alternate Fifteenth Revised Sheet No. 214 (Rate Schedule SS-III) to concurrently track the Interim PGA filed by Texas Eastern, dated January 31, 1989 in Docket No. TF89-1-17-000.

Furthermore, Algonquin states that it is filing Substitute Alternate Substitute Thirtieth Revised Sheet No. 201 to revise its current adjustment contained in its annual PGA of January 3, 1989, as first revised on January 30, 1989, (Docket Nos. TA89-1-20-000 & 001). This revision to the current adjustment is made to reflect the lowered purchased gas cost in Texas Eastern's Interim PGA as it affects Rate Schedules F-1, WS-1, I-1, and E-1.

Algonquin alleges that the rate effects are as follows:

Rate Schedules F-1, WS-1, I-1 and E-1: The rate changes reflected in the instant filing represent a projected decrease in Algonquin's purchased gas costs and revenues of approximately $2.9 million from the $7.3 million increase filed for March 1, 1989 rates (Docket No. TA89-1-20-001, Alternate sheet) for the three month period beginning March 1, 1989.

Rate Schedule F-4: The change on November 1, 1988 represents decreases of 41.4 cents per MMBtu in the Demand component and 0.16 cents in the commodity component below the previously filed for November 1, 1988 rates (Docket No. TM89-2-20-000). The change effective on February 1, 1989 represents a decrease in the commodity component of 9.72 cents per MMBtu below the previously filed for February 1, 1989 rate. (Docket No. TM89-6-20-001, Alternate sheet).

Rate Schedule STB: The effective January 1, 1989 is to reduce the demand by 2.0 cents per MMBtu and the Space charge by 0.06 cents per MMBtu below previously filed for January 1, 1989 rates (Docket No. TM89-5-20-000).

Rate Schedule SS-III: The effect of the change in rates effective on November 1, 1989 is to increase the Non-FDDQ Withdrawal Charge 0.09 cents per MMBtu over the previously filed for November 1, 1989 rate (Docket No. TM89-2-20-001). The effect of the January 1, 1989 rate change is to reduce the demand by 2.0 cents per MMBtu and the Space charge by 0.06 cents per MMBtu below previously filed for January 1, 1989 rates (Docket No. TM89-5-20-000). The effect of the February 1, 1989 rates is to bring forward the January 1, 1989 changes and to further decrease the FDDQ and Non-FDDQ Withdrawal charges by 0.03 cents per MMBtu, each (Docket No. TM89-6-20-001).

Algonquin notes that copies of this filing were served upon the affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

**[Project No. 2538 New York]**

**Beebee Island Corp.; Intention to File an Application For a New License**

March 3, 1989.

Take notice that on December 29, 1988, Beebee Island Corporation, the existing licensee for the Beebee Island Hydroelectric Project No. 2538, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2538 was issued effective April 1, 1962, and expires December 31, 1993.

The project is located on the Black River in Jefferson County, New York. The principal works of the Beebee Island Project include a 265-foot-long concrete overflow dam; a reservoir of 10 acres at elevation 431 feet m.s.l.; an open flume leading directly to the powerhouse; a powerhouse with an installed capacity of 8,000 kW; a transmission line connection; and appurtenant electrical and mechanical facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at HYDRA-CO Enterprises, Inc., 100 Clinton Square, Suite 400, Syracuse, NY 13202-1049, Attn: Mr. John M. Cordes.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

**[Docket No. TM89-3-4-001]**

**Granite State Gas Transmission, Inc.; Filing**

March 3, 1989.

Take notice that on February 27, 1989, Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021, tendered for filing with the Commission the following tariff sheet in its FERC Gas Tariff, First Revised Volume No. 1, for effectiveness on February 1, 1989:

Substitute First Revised Sheet No. 7-C

According to Granite State, the purpose of the instant filing is to comply with the Commission's letter order issued February 10, 1989 in this docket relating to the procedures pursuant to which Granite State will recover from its customers the fixed take-or-pay charges billed by Tennessee Gas Pipeline Company under the provisions of Order No. 500. Granite State requests an effective date of February 1, 1989.

Granite State further states that copies of its filing were served upon its customers, Bay State Gas Company and Northern Utilities, Inc., and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulation Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**James River—New Hampshire Electric, Inc., Intention To File an Application for a New License**

March 3, 1989.

Take notice that on December 28, 1988, James River—New Hampshire Electric, Inc., the existing licensee for the Shelburne Hydroelectric Project No. 2300, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2300 was issued effective July 1, 1958, and expires December 31, 1993.

The project is located on the Androscoggin River in Coos County, New Hampshire. The principal works of the Shelburne Project include a concrete and rock-filled, timber-crib dam with gated spillway; a reservoir of 192 acres at elevation 733.55 feet m.s.l.; a powerhouse with an installed capacity of 3,720 kW; a tailrace; step-up transformers and transmission lines; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 650 Main Street, Berlin, NH 03570-2489, Attn: Mr. David L. Dunham, telephone (603) 752-4600.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

BILLING CODE 6717-01-M

[Docket No. RP88-226-000]

**Tennessee Gas Pipeline Co.; Filing of Changes in Rates**

March 3, 1989.

Take notice that on February 23, 1989, Tennessee Gas Pipeline Company (Tennessee) tendered for filing changes to certain tariff sheets in its FERC Gas Tariff pursuant to the Commission's August 31, 1988, October 31, 1988, and January 31, 1989 orders in the referenced proceeding. Additionally, Tennessee states that the tariff sheets reflect the Commission's October 6, 1988 and December 20, 1988 orders in Docket Nos. RP82-121-000, *et al.*

Tennessee states that the revised tariff sheets reflect the following changes:

1. A reduction in Tennessee's claimed cost of service to account for the elimination of the costs of facilities not placed in service by February 1, 1989.
2. The elimination of standby sales service.
3. A 100 percent load factor rate for interruptible sales under Rate Schedule R.
4. The Opinion No. 352, single centroid Mcf-mile method of allocation of mileage-related transmission costs.
5. A one-part rate based on an imputed load factor of 60 percent for full requirements customers under Rate Schedule GS.
6. The use of peak-day deliveries to allocate downstream commodity transmission costs to storage service.

Tennessee further states that the revised tariff sheets also reflect the Annual Average Cost of Purchased Gas and the Surcharge for Amortizing the Unrecovered Gas Cost Account as well as the latest GRI and Annual Charge Adjustments, as shown in Tennessee's October 31, 1988 filing in Docket No. TA89-1-0 to be effective on January 1, 1989.

Although Tennessee does not believe any waivers are necessary for the Commission to accept the revised tariff sheets to be effective February 1, 1989, Tennessee requests that the Commission grant any waivers it deems necessary.

Tennessee states that copies of the filing have been mailed to all parties in this proceeding, affected customers, and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should mile a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1989)). All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CI83-166-001 *et al.*]

**TOC-Rocky Mountains Inc.; Application**

March 3, 1989.

Take notice that on February 17, 1989, TOC-Rocky Mountains Inc. (Applicant), c/o Amoco Production Company, P.O. Box 800, Denver, Colorado 80201, filed an application pursuant to section 7 of the Natural Gas Act and Parts 154 and 157 of the Federal Energy Regulatory Commission's (Commission) regulations thereunder for certificates of public convenience and necessity to continue sales of natural gas previously made by Tenneco Oil Company (Tenneco) under the certificates listed in the Appendix hereto. Applicant also requests that Tenneco's rate schedules listed in the Appendix hereto be redesignated as those of Applicant, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Applicant states that by Conveyance dated November 22, 1988, and effective June 30, 1988, Tenneco assigned all of its interests in all of the properties subject to Tenneco's FERC Gas Rate Schedules listed in the Appendix hereto Applicant.

Any person desiring to be heard or to make any protest with reference to application should on or before March 22, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

*Secretary.*

[Project No. 2402 Michigan]

**Upper Peninsula Power Co.; Intent to File An Application For a New License**

March 3, 1989.

Take notice that on December 29, 1988, Upper Peninsula Power Company, the existing licensee for the Prickett Hydroelectric Project No. 2402, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2402 was issued effective April 1, 1962, and expires December 31, 1993.

The project is located on the Sturgeon River in Baraga and Houghton Counties, Michigan. The principal works of the Prickett Project include a concrete diversion dam, with three gated 24-foot spillway bays, flanked by earth embankments; a reservoir of 807 acres at elevation 770.32 feet m.s.l.; an intake canal and two penstocks; a powerhouse with an installed capacity of 2,200 kW; an outdoor substation and transmission line connection; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 616 Shelden Avenue, Houghton, MI 49931, Attn: Mr. Charles W. Streicher, telephone (906) 482-0220.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

**Great Lakes Gas Transmission Co.; Proposed Changes in FERC Gas Tariff Purchased Gas Adjustment Clause Provisions**

March 3, 1989.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on February 24, 1989, tendered for filing Second Substitute Eighteenth Revised Sheet Nos. 57(i) and 57(ii), Second Substitute Nineteenth Revised Sheet Nos. 57(i) and 57(ii) and Substitute Sixth Revised Sheet No. 57(v) to Great Lakes

VOL 54 ISS 44 MR 8 1989 UMI

Gas Transmission Company's FERC Gas Tariff, First Revised Volume No. 1.

Great Lakes states that Second Substitute Eighteenth Revised Sheet Nos. 57(i) and 57(ii) and Substitute Sixth Revised Sheet No. 57(v) reflect revised current PGA rates for the months of February, March and April, 1989. The tariff sheets were filed as an Out of Cycle PGA to reflect the latest estimated gas cost as provided to Great Lakes by its sole supplier of natural gas, TransCanada PipeLines Limited ("TransCanada"). These pricing arrangements were the result of contract renegotiation between each of Great Lakes' resale customers and the supplier.

Great Lakes states that Second Substitute Eighteenth Revised Sheet Nos. 57(i) and 57(ii), proposed to be effective February 1, 1989, reflect a surcharge rate which expires on February 28, 1989. Second Substitute Nineteenth Revised Sheet Nos. 57(i) and 57(ii) were filed in order to reflect the termination of the surcharge rate and were proposed to be effective on March 1, 1989.

Great Lakes requested waiver of the notice requirements of the provisions of Section 154.309 of the Commission's Regulations and any other necessary waivers so as to permit the above tariff sheets to become effective as requested in order to implement the gas pricing agreements between Great Lakes' resale customers and TransCanada on a timely basis.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

**Lois D. Cashell,**

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. TM89-5-17-000]

**Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff**

March 3, 1989.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on February 24, 1989 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheets:

Fifth Revised Sheet No. 64
Fifth Revised Sheet No. 65
Fifth Revised Sheet No. 66
Fifth Revised Sheet No. 67

Texas Eastern states that this filing is being made in compliance with the Commission's order on September 16, 1988 in Docket No. RP88-80-007 requiring Texas Eastern to track any modifications of Southern Natural gas Company's (Southern) flowthrough charges in Southern's Docket No. RP88-229 of take-or-pay charges from United Gas Pipe Line Company.

Texas Eastern states that on Feb. 2, 1989, the Commission approved tariff sheets filed by Southern on January 4, 1989 in Docket No. TM89-2-7-000. Southern originally tendered the filing on December 16, 1988 in Docket No. RP88-229 reflecting the flowthrough to Southern's customers of additional take-or-pay costs allocated to Southern by United Gas Pipe Line Company (United) in United's Docket No. RP88-264. These additional costs were allocated to Southern by United in United's November 30, 1988 filing in Docket Nos. RP88-27-000 and RP88-264-000. Pursuant to the allocation methodology proposed by Southern, Southern will now bill and recover from Texas Eastern an aggregate principal amount of $2,042,789, excluding amortization interest, by means of a monthly charge, including amortization interest, of $47,466 over a period of fifty-six months beginning Janaury 1, 1989. The aggregate principal amount of $2,042,789 represents $1,994,848 flowed through to Texas Eastern by Southern from United's Docket No. RP88-27-006 as described in Texas Eastern's filing on October 24, 1988 in Docket No. RP88-80-011 and approved by the Commission on January 13, 1989, and the additional amount of $47,941 flowed through to Texas Eastern by Southern from United's Docket No. RP88-264.

Texas Eastern states that the tariff sheets proposed are filed solely to track modifications filed by Southern on January 4, 1989. Fifth Revised Sheet Nos. 64 through 67 set forth the principal amount plus the allocation factor for carrying costs that each Texas Eastern customer will be required to pay in order to recover Southern's flowthrough of United take-or-pay charges in Docket No. RP88-229 billed to Texas Eastern by Southern. Workpapers setting forth Texas Eastern's determinaiton of the allocation factor for the total principal amount (which excludes a predetermined carrying charge) and a breakdown of the monthly principal amounts (which include a predetermined carrying charge) each Texas Eastern customer will be required to pay are set forth on Appendix A, attached to the filing.

The proposed effective date of the above tariff sheets is January 1, 1989 to coincide with the date Southern will commence billing Texas Eastern.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions. In addition, Texas Eastern is mailing a copy of this filing to all parties of record in Docket No. RP88-80.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Lois D. Cashell,**

*Secretary.*

[FR Doc. 89-5347 Filed 3-7-89 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM89-4-17-000]

**Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff**

March 3, 1989.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on February 24, 1989 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheets:

Sixth Revised Sheet No. 68
Sixth Revised Sheet No. 69
Sixth Revised Sheet No. 70
Sixth Revised Sheet No. 71

Texas Eastern states that this filing is made in compliance with the

Commission's order on October 7, 1988 in Docket No. RP88-251-000 requiring Texas Eastern to track any modifications to Texas Gas Transmission Corporation's (Texas Gas) take-or-pay charges in Texas Gas's Docket No. RP88-230.

Texas Eastern states that on Feb. 10, 1989 in Docket No. TM89-2-18-000, the Commission accepted tariff sheets filed by Texas Gas on January 13, 1989. The January 13 filing revised fixed take-or-pay costs pursuant to Texas Gas's Docket No. RP88-230 to recover take-or-pay costs to be billed through a demand surcharge by Tennessee Gas Pipeline Company (Tennessee). Tennessee's take-or-pay surcharge is effective for a six month period from January 1, 1989 through June 30, 1989 to recover costs incurred from June 1, 1988 through November 30, 1988. Texas Gas stated in its original filing in Docket No. RP88-230 on August 8, 1988 that it would file tariff sheets to be effective February 1 and August 1, corresponding with Tennessee's tariff sheets to be effective January 1 and July 1. Texas Eastern's portion of the total principal amount of Tennessee's take-or-pay charges billed by Texas Gas is $14,632 to be amortized over the six month period beginning February 1, 1989. This is a decrease in the total principal amount of $62,323 for the prior six month period.

Texas Eastern states that these proposed tariff sheets are being filed solely to track modifications made by Texas Gas on January 13, 1989. Sixth Revised Sheet Nos. 68 through 71 set forth the monthly principal amount plus the allocation factor for carrying costs that each Texas Eastern customer will be required to pay in order to recover Texas Gas's take-or-pay charges billed to Texas Eastern pursuant to Texas Gas's filing on January 13, 1989. Workpapers setting forth Texas Eastern's determination of the allocation factor for the principal amount (which include a predetermined carrying charge) and a breakdown of the total and monthly principal amounts (which include a predetermined carrying charge) each Texas Eastern customer will be required to pay are set forth under Appendix A, attached to the filing.

The proposed effective date of the above tariff sheets is April 1, 1989, corresponding with the six month amortization period used by Tennessee and Texas Gas.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions. In addition, Texas Eastern is mailing a copy of this filing to all parties of record in Docket No. RP88-251.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-3533-8]

**Agency Information Collection Activities Under OMB Review**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA, (202 382-2740).

**SUPPLEMENTARY INFORMATION:**

**Office of Water Regulations and Standards**

*Title:* Pharmaceutical Industry Survey (Phase I: Screener Questionnaire (EPA ICR # 1460). This is a new collection.

*Abstract:* The Pharmaceutical Screener Questionnaire for 1988 will collect information on subcategory activity and wastewater discharge practices from all known pharmaceutical manufacturers in the United States and its territories. The information provided in response to this questionnaire will enable the Agency to determine which facilities could be subject to new and/or revised regulations.

*Burden Statement:* The estimated average public reporting and recordkeeping burden for this collection of information is 1 hour per respondent. This estimate includes the time required to fill out the questionnaire and the little, if any, time required to consult existing records.

*Respondents:* All manufacturers or producers of pharmaceutical products in the United States and its territories.

*Estimated No. of Respondents:* 1100.

*Estimated Total Burden on Respondents:* 1100 hours.

*Frequency of Collection:* 1 response.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street, SW., Washington, DC 20460

and

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20503, (Telephone (202) 395-3084).

**OMB Responses to Agency PRA Clearance Requests**

EPA ICR #1485; Quality Control Recordkeeping for Hazardous Waste Testing; was approved 02/09/89; OMB # 2050-0097; expires 12/31/91.

EPA ICR #0143; Recordkeeping Requirements for Producers of Pesticides; was approved 02/29/89; OMB #2070-0028; expires 02/29/89.

EPA ICR #0783.07; Motor Vehicle Emission Certification and Fuel Economy Labeling Program (Emission Standards for Methanol-Fueled Vehicles); was approved 02/09/89; OMB #2060-0104; expires 08/31/89.

EPA ICR #0559; Application for Reference or Equivalent Method Determination; was approved 02/09/89; OMB #2060-0005; expires 02/29/92.

EPA ICR #0226.04; Application for Permit to Discharge Wastewater and Associated Regulations; was disapproved 02/09/89.

Date: March 1, 1989.

## Addenda on Data Reporting to Pesticide Assessment Guidelines

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Request for comments.

**SUMMARY:** EPA is making available, for public comment, proposed addenda to the following studies in the Pesticide Assessment Guidelines: acute oral toxicity, acute dermal toxicity, repeated dose (21-day) and subchronic (90-day) dermal toxicity, reproductive and fertility effects, and mutagenicity studies. The addenda would supersede paragraphs in the Guidelines on data reporting and would provide a format for the preparation of study reports by those submitting data to EPA. This will increase the efficiency of pesticide registration and other regulatory activities. Copies of the proposed addenda are available at the address listed below for the Public Docket and Freedom of Information Section.

**DATE:** Comments, identified by the docket control number OPP-36169 must be received on or before April 7, 1989.

**ADDRESS:** Submit three copies of written comments, identified with the docket control number "OPP-36169" by mail to: Public Docket and Freedom of Information Section, Field Operations Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. In person, deliver comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Copies of the draft guidelines are also available at this above address.

**FOR FURTHER INFORMATION CONTACT:** Robert P. Zendzian, Health Effects Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Office location and telephone number: Rm. 816D, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-5495).

**SUPPLEMENTARY INFORMATION:** The Pesticide Assessment Guidelines describe protocols for performing tests to support the registration of pesticides under the Federal Food, Drug, and Cosmetic Act and the Federal Insecticide, Fungicide, and Rodenticide Act. A description of the organization of these Guidelines and their relationship to data requirements, along with the necessary information for ordering them from the National Technical Information Service, appears in 40 CFR 158.115, published in the **Federal Register** of October 24, 1984 (49 FR 42856). The Data Reporting addenda will clarify sections in the Guidelines on data reporting and provide formats which guide pesticide registrants in report preparation. With consistent and complete reports, the Agency will spend less time in reorganizing data, retrieving information, and resolving misunderstandings.

This is the sixth set of Data Reporting addenda which has been made available for public comment. Public comment for the other sets were requested in the **Federal Register** of July 31, 1985 (50 FR 31010); May 21, 1986 (51 FR 18660); October 15, 1986 (51 FR 36753); March 25, 1987 (52 FR 9536); and May 25, 1988 (53 FR 18886). Most of these guidelines have been published by the National Technical Information Service as announced in the **Federal Register** of November 26, 1986 (51 FR 42931); September 23, 1987 (52 FR 35766); January 28, 1988 (53 FR 2535); April 13, 1988 (53 FR 12186); June 1, 1988 (53 FR 20011) and January 23, 1989 (54 FR 3136). The unpublished documents are being revised for publication in the near future. The specific subdivisions and series now being considered are: Subdivision F, Series 81-1, Acute Oral Toxicity Study; Subdivision F, Series 81-2, Acute Dermal Toxicity Study; Subdivision F, Series 82-2, Repeated Dose Dermal Toxicity Study (21-days); Subdivision F, Series 82-3, Subchronic Dermal Toxicity Study (90-days); Subdivision F, Series 83-4, Reproductive and Fertility Effects; and Subdivision F, Series 84-2, Mutagenicity Studies. This is expected to be the last set of Data Reporting Guidelines developed for this effort.

Drafts have been reviewed by the Agency. Comments on this set of reporting formats will be considered by the Agency in preparing a final draft for publication by the National Technical Information Service.

Dated: February 23, 1989.

## American Cyanamid Co.; Withdrawal of Pesticide Tolerance Petitions

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces the withdrawal without prejudice of pesticide petitions (PP) 1F2433 by the American Cyanamid Co. and PP 6F1851 by the E.I. Du Pont de Nemours & Co.

**ADDRESS:** By mail, submit written comments, identified by the document control number [PF-514], to: Public Docket and Freedom of Information Section, Field Operations Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Room. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: William Miller, Product Manager (PM) 16, Office of Pesticide Programs, Registration Division, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

In person, bring comments to: Room. 211, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2600.

**SUPPLEMENTARY INFORMATION:** EPA gives notice that it has received two requests to withdraw without prejudice, as specified under 40 CFR 180.8, pesticide petitions as described below.

### Withdrawn Filings of Pesticide Petitions

1. *PP 1F2433.* The American Cyanamid Co., Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540, has requested the withdrawal without prejudice of PP 1F2433 proposing to amend 40 CFR 180.352 by establishing tolerances for the combined residues of the insecticide terbufos (S-[(1,1-dimethyl)thio]methyl]-*O,O*-diethyl phosphorodithioate) and its cholinesterase-inhibiting metabolites in or on the harvestable portions of the following raw agricultural commodities: cabbage, broccoli, and cauliflower at 0.05 part per million. Notice of the initial filing appeared in the **Federal Register** of December 23, 1980 (45 FR 84849). PP 1F2433 was amended in the **Federal Register** of January 13, 1982 (47 FR 1405), proposing to increase the tolerance levels for cabbage, broccoli, and cauliflower from 0.05 ppm to 0.20 ppm.

2. *PP 6F1851.* E.I. Du Pont de Nemours & Co., Walker's Mill, Barley Mill Plaza, Wilmington, DE 19898, has requested the withdrawal without prejudice of PP 6F1851 proposing to amend 40 CFR 180.298 by establishing tolerances for residues of the insecticide dimethyl phosphate of 3-hydroxy-N-methyl-ciscrotonamide in or on the raw agricultural commodities sweet corn kernels at 0.3 ppm, field corn grain at 0.2 ppm, and field corn fodder and field corn forage (including silage) at 2.0 ppm. Notice of the petition was published in the **Federal Register** of November 26, 1976 (41 FR 52102). The petition was originally filed by the Shell Chemical Co., but was transferred to the E.I. Du Pont de Nemours & Co.

**Authority:** 7 U.S.C. 136a.

**Dated:** February 24, 1989.

**Anne E. Lindsay,**

*Director, Registration Division, Office of Pesticide Programs.*

[FR Doc. 89-5213 Filed 3-7-89; 8:45 am]

BILLING CODE 6560-50-M

[OPP-30282A; FRL-3533-8]

## ICI Americas, Inc.; Approval of Pesticide Product Registrations

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces Agency approval of an application submitted by ICI Americas, Inc., to conditionally register the pesticide product Force® 1.5G Insecticide containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(7) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

**FOR FURTHER INFORMATION CONTACT:** *By mail:* George LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Office of Pesticide Programs, 401 M Street, SW., Washington, DC 20460.

*Office location and telephone number:* Rm. 204, TS-767C, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703-557-2400).

**SUPPLEMENTARY INFORMATION:** EPA issued a notice, published in the **Federal Register** of August 5, 1987 (52 FR 29063), which announced that ICI Americas, Inc., Agricultural Chemicals Div., Wilmington, DE 19897, had submitted an application to conditionally register the pesticide product Force® 1.5G an insecticide containing the active ingredient 2,3,5,6-tetrafluoro-4-methylbenzyl-cis-3-[(Z)2-chloro-3,3,3-trifluoroprop-1-enyl]-2,2-dimethylcyclopropanecarboxylate at 1.5 percent; an active ingredient not included in any previously registered product.

The application was approved on January 13, 1989, as Force® 1.5G Insecticide for restricted use on field corn and popcorn.

The active ingredient identified in the above application of August 5, 1987 (52 FR 29063), was amended to read "tefluthrin (2,3,5,6-tetrafluoro-4-methylphenyl)methyl-(1 *alpha*, 3 *alpha*)-(*Z*)-(+)-3-(2-chloro-3,3,3-trifluoro-1-propenyl)2,2-dimethylcyclopropanecarboxylate." The product was assigned EPA Registration No. 10182-130.

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of tefluthrin, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of tefluthrin during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

In January 1989, the Agency issued a conditional registration for tefluthrin with a final expiration date of July 31, 1993. The registration was made conditional since certain data were lacking. In order to: (1) Evaluate the effects of tefluthrin on fish and aquatic organisms, (2) establish a permanent acceptable daily intake (ADI) and, (3) establish a crop rotation interval, several data requirements must be fulfilled during the period of conditional registration. Such requirements include an aquatic invertebrate life-cycle test (72-4) which is due by August 1989; a fish life-cycle study (72-5) which must be submitted to the Agency by August 1990; an aquatic residue monitoring study (70-1) which must be submitted by March 1991; and a field rotational crop study, (165-2) which must be submitted by March 1993. In addition, unfulfilled data requirements in the area of toxicology comprise a 21-day feeding study and a 21-day dermal study, both in the rat and both designed to investigate serum electrolytes, including magnesium. These studies must be submitted to the Agency by April 1989.

Consistent with section 3(c)(7)(C), the Agency has determined that this conditional registration is in the public interest. Use of this pesticide is of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticide will not result in unreasonable adverse effects to man and the environment.

More detailed information on this conditional registration is contained in a Chemical Fact Sheet on tefluthrin.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from Registration Division (TS-767C), Environmental Protection Agency, Registration Support and Emergency Response Branch, 401 M St., SW., Washington, DC 20460.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental

VOL 54 ISS 44 MR 8 1989 UMI

Protection Agency, Rm. 236, CM#2, Arlington, VA 22202 (703–557–4460). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A–101), 401 M St., SW., Washington, DC 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

## Emergency Planning and Community Right-to-Know; Availability of Guidance Materials, Brochures, and Electronic Files

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of availability.

**SUMMARY:** The EPA has prepared a variety of guidance documents and electronic files to assist facilities in understanding and complying with section 313 of the Emergency Planning and Community Right-to-Know Act. A number of documents produced by EPA are available in "camera ready" form or on disc. All of these documents are currently available at no charge either through the address given under **ADDRESS** or the address or telephone number given under **FOR FURTHER INFORMATION CONTACT.**

**ADDRESS:** The "Reporting Package" may now be obtained from the following address: Section 313 Document Distribution Center, P.O. Box 12505, Cincinnati, OH 45212.

**FOR FURTHER INFORMATION CONTACT:** Eileen Gibson, Emergency Planning and Community Right-to-Know Information Hotline, U.S. Environmental Protection Agency, 0S–120, 401 M St., SW., Washington, DC 20460, Toll Free: 1–800–535–0202, Washington, DC and Alaska (202) 479–2449.

**SUPPLEMENTARY INFORMATION:**

### A. Reporting Package for 1988 Reporting Year

EPA has prepared a document titled the "Toxic Release Inventory Reporting Package" which carries document number EPA 560/4–89–001. EPA will be mailing this document to facilities that reported under section 313 for the 1987 reporting year.

The "Reporting Package" contains the following documents:

1. 1988 Revised Form R and Instructions—step by step instructions for completing the toxic chemical release inventory reporting Form R, sample of completed Form R, list of the State section 313 contacts, and a copy of Form R.

2. Revised Question and Answer Document—contains answers to frequently asked questions about the section 313 rule. It is organized by subject area and supplements the instructions for completing Form R.

3. Title III List of Lists—consolidated list of chemicals subject to reporting under Title III of SARA. This document contains the chemical name, CAS Registry, number, and specific information on reporting requirements(s) to which the chemical is subject.

4. Section 313 Final Rule (53 FR 4500, February 16, 1988).

5. Magnetic Media Submission Instructions—reports under section 313 may be submitted by computer tape or floppy disc. This document provides record format specifications and certification requirements for the use of magnetic media. These specifications must be followed exactly for EPA to accept the magnetic media submission.

The "Reporting Package" also contains information about other available support documents. When requesting the "Reporting Package" be sure to specify document number EPA 560/4–89–001.

### B. Materials Available to Persons Developing Training or Other Compliance Aids

Persons developing training courses or software to assist in compliance with section 313 requirements may obtain "camera ready" copy of certain printed documents as follows:

1. TRI Trainer's Guide—provides the basic course content, presentation material, and reference sources that may be used to develop a complete course on section 313 reporting. This guide is supplemented by an accompanying packet of background materials that may be reproduced for course participants.

2. Section 313 Brochure—this 24 page brochure alerts businesses to their reporting obligations under section 313 and helps them determine whether their facility is required to report. The brochure contains the section 313 EPA Regional contacts, the section 313 toxic chemical list, and a description of the Standard Industrial Classification (SIC) Groups subject to section 313 reporting.

3. Section 313 Brochure (Spanish language version).

4. 1988 Revised Form R and Instructions.

5. Revised Question and Answer Document.

6. Title III List of Lists (print copy).

7. Magnetic Media Submission Instructions.

In addition there are electronic files available for the following two documents: Text of the Revised 1988 Instructions for Completion of Form R and text of the Question and Answer document. These text files were developed using Wordperfect 4.2 software. Please send a separate disc for each file. When requesting these files you must send a blank 5¼ inch diskette, double sided, double density formatted for IBM or compatible DOS 3.0 or higher. Send the diskette(s) in a stamped, self-addressed mailer to the address provided under **FOR FURTHER INFORMATION CONTACT.**

Another set of electronic files is also available. EPA has developed a PC based interpretive guidance system that allows for quick searching of a large number of questions, the rule, and other policy documents. Most of the questions and answers are the same as appear in the Question and Answer document. To use these files it is necessary to obtain data base searching software. The Agency is currently using a software package titled "Ask Sam" by Seaside Software, Inc. Other data base searching software may be used, however. The interpretive guidance system data files (without the operating software) may be obtained by submitting a 10 megabyte Bernoulli cartridge formatted for IBM or compatible DOS version 3.0 or higher with an appropriate stamped, self-addressed mailer to the address given under **FOR FURTHER INFORMATION CONTACT.**

### C. List of Lists Files Available on Diskette

A diskette version of the List of Lists is available from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161, (703) 487–4650. This diskette is 5¼ inch IBM compatible. The request accession no. is PB88–193255. ($50.00).

Dated: February 27, 1989.

## FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 87–339, DA 89–102]

### Establishment of a Program to Monitor the Impact of Joint Board Decisions

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice.

**SUMMARY:** This Order extends the filing date for reports identifying the impact of the new Part 36 Separations Manual from March 1, 1989, to May 1, 1989. See Report and Order published September 28, 1987 (52 FR 36299). These reports are part of the Docket 86–297 Joint Board's monitoring program designed to assess the jurisdictional impact of the new Part 36 Separations Manual. The extension will allow the carriers more time to compile actual 1988 data and file complete reports.

**DATES:** *Effective* January 30, 1989; reports may be filed until May 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Diane Shaw-Gill at (202) 632–7500.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Chief, Common Carrier Bureau's Memorandum Opinion and Order, CC Docket 87–339, DA 89–102, adopted January 30, 1989 and released February 8, 1989.

The full text of this Order is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The full text of this Order may also be purchased from the Commission's copy contractors, International Transcription Services, Inc., 2100 M Street, NW., Suite 140, Washington, DC 20037 (202) 857–3800.

Federal Communications Commission.

BILLING CODE 6712–01–M

## FEDERAL EMERGENCY MANAGEMENT AGENCY

### Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Type:* New Collection

*Title:* Great Lakes Planning Assistance

*Abstract:* This legislation allows for each Great Lake State to apply for a one-time grant of up to $250,000. They must apply for the grant within one year of enactment. Since funds have not been appropriated, we have determined that a Technical Proposal will serve as this initial application. States will then remain eligible for the grant until such time as funds are appropriated.

*Type of Respondents:* State or local governments

*Estimate of Total Annual Reporting and Recordkeeping Burden:* 240

*Number of Respondents:* 8

*Estimated Average Burden Hours Per Response:* 30

*Frequency of Response:* On Occasion

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646–2624, 500 C Street, SW., Washington, DC 20472.

Direct comments regarding the burden estimate or any aspect of this information collection, including suggestions for reducing this burden, to the FEMA Clearance Officer at the above address; and to Francine Picoult, (202) 395–7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503 within two weeks of this notice.

Date: March 1, 1989.

**Wesley C. Moore,**

*Director, Office of Administrative Support.*

## FEDERAL MARITIME COMMISSION

**Notice of Agreement(s) Filed**

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments and protests are found in §§ 560.7 and/or 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

*Agreement No.:* 224-200222.

*Title:* Part of Houston Authority Terminal Agreement.

*Parties:* Port of Houston Authority of Harris County, Texas (Port); Southside Services Incorporated (SSC).

*Synopsis:* The Agreement provides that SSC will perform or have performed freight handling services at the Port's Wharves and Transit Sheds Number 27 (facility). The services include the loading and unloading of cargo to or from rail cars and motor vehicles at the terminal facility, and allocating space within the facility to accommodate the cargo of ships berthing at the facility. The Agreement also provides that SSC will guarantee the Port an income of $0.3125 per square foot of shedded space and cargo movement for the Agreement's term of 22.5% of a ton per square foot of shedded space. The Agreement's term expires April 30, 1989.

*Filing Party:* Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252-2562.

By Order of the Federal Maritime Commission.

**Joseph C. Polking,**

*Secretary.*

Dated: March 3, 1989.

Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200224.

*Title:* Georgia Ports Authority Terminal Agreement.

*Parties:* Georgia Ports Authority (GPA) Chiquite Brands, Inc. (CB)).

*Synopsis:* The Agreement provides for preferential berthing of CB's vessels at GPA's Containerport facility. It also provides that CB will guarantee GPA a minimum of 100,000 tons of cargo per year for certain wharfage incentive rates on CB's cargo moving through the facility. In addition, CB will pay GPA for dockage, container crane rental and other services at GPA's published tariff rates.

Agreement No.: 224-200223.

*Title:* Philadelphia Port Corporation Terminal Agreement.

*Parties:* Philadelphia Port Corporation (PPC); American Transport Lines, Linc. (ATL).

*Synopsis:* The Agreement provides for ATL to operate PPC's Tioga I Container Terminal under a non-exclusive preferential license guaranteed by ATL's parent, Crowley Marine Corporation. The License is subject to the right of PPC or its designee to also use the terminal for berthing of vessels and loading/unloading cargo.

By Order of the Federal Maritime Commission.

## FEDERAL RESERVE SYSTEM

### Golden Isles Financial Holdings, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than March 24, 1989.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Golden Isles Financial Holdings, Inc.*, Brunswick, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of The First Bank of Brunswick, Brunswick, Georgia, a de novo bank.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Hastings Financial Corporation*, Hastings, Michigan; to become a bank holding company by acquiring 100 percent of the voting shares of National Bank of Hastings, Hastings, Michigan.

2. *Lawrence L. Osborn Scholarship Trust*, Veedersburg, Indiana, to become a bank holding company by acquiring 13.5 percent of the voting shares of The Veedersburg State Bank, Veedersburg, Indiana.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First McKinley Corporation*, Denver, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank in Evanston, Evanston, Wyoming.

2. *MidAmerican Corporation*, Shawnee Mission, Kansas; to merge with Merchants Bancorporation, Inc., Topeka, Kansas, and thereby directly acquire First National Bank of Lawrence, Lawrence, Kansas, and Merchants National Bank of Topeka, Topeka, Kansas. MidAmerican seeks to retain its permanently grandfathered general insurance agency which sells insurance in a community of more than 5,000 persons.

D. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *City Bancorp, Inc.*, Wellington, Texas; to become a bank holding company by acquiring 88.67 percent of the voting shares of Security Bancshares, Inc., Wellington, Texas, and thereby indirectly acquire Security State Bank, Hedley, Texas, and City State Bank in Wellington, Wellington, Texas.

2. *Harvey Bancorporation, Inc.*, Dallas, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Preston Forum National Bank of Dallas, Dallas, Texas.

Board of Governors of the Federal Reserve System, March 2, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

BILLING CODE 6210-01-M

### Philip J. Lunsford; Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than March 22, 1989.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Philip J. Lunsford*, St. Simons Island, Georgia, to acquire an additional 2.12 percent thereby increasing his share to 28.87 percent; and Tom R. Lundsford, Cleveland, Oklahoma, to acquire an additional 2.07 percent thereby increasing his share to 28.17 percent of the voting shares of Heritage Bancorp Company, Cleveland, Oklahoma, and thereby indirectly acquire First National Bank of Cleveland, Cleveland, Oklahoma.

Board of Governors of the Federal Reserve System, March 2, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

BILLING CODE 6210-01-M

### NCNB Corp., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage de novo, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 24, 1989.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *NCNB Corporation*, Charlotte, North Carolina; to engage de novo through its subsidiary, Superior Life Insurance Company, Charlotte, North Carolina, in underwriting insurance, including home mortgage redemption insurance, that is directly related to extensions of credit by subsidiaries of NCNB Corporation and its subsidiaries and which is limited to ensuring the repayment of the outstanding balances due on such extensions of credit in the event of death, disability, or involuntary unemployment of the debtor pursuant to section 225.25(b)(8) of the Board's Regulation Y.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Northern Trust Corporation*, Chicago, Illinois; to engage de novo through its subsidiary, Northern Trust Company of New York, New York, New York, in trust company activities pursuant to § 225.25(b)(3) of the Board's Regulation Y. Comments on this application must be received by March 22, 1989.

2. *Star Financial Group, Inc.*, Marion, Indiana; to engage de novo through its subsidiary, Star Trust Company, Marion, Indiana, in trust company functions pursuant to § 225.25(b)(3) of the Board's Regulation Y.

C. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Grenada Sunburst System Corporation*, Grenada, Mississippi; to engage de novo through its subsidiary, Sunburst Financial Services, Inc., Jackson, Mississippi, in insurance sales, acting as insurance agent or broker in offices in which it is already otherwise engaged in business with respect to any insurance that is directly related to an extension of credit pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y. These activities will be conducted in the State of Mississippi.

2. *Heritage Bancorp Company*, Cleveland, Oklahoma; to engage de novo in insurance sales pursuant to § 225.25(b)(8)(iii); and making and servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y. The insurance activities will be conducted in Cleveland, Oklahoma, and the loan activities will be conducted on a nationwide basis.

Board of Governors of the Federal Reserve System, March 2, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

### Southeast Banking Corporation, et al; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than March 29, 1989.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Southeast Banking Corporation*, Miami, Florida; to acquire Cobb Partners Financial, Inc., Boca Raton, Florida, and thereby engage in general mortgage banking activities, including the origination, purchase, sale and servicing of mortgage loans pursuant to § 225.25(b)(1) of the Board's Regulation Y.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230

VOL 54 ISS 44 MR 8 1989 UMI

South LaSalle Street, Chicago, Illinois 60690:

1. *Kerndt Bank Services, Inc.*, Lansing, Iowa; to acquire Kerndt Brothers Agency, Inc., Lansing, Iowa, and thereby engage in insurance sales in small towns pursuant to § 225.25(b)(8)(iii); and operation of an insurance agency office in Waukon, Iowa, pursuant to § 225.25(b)(8)(vi) of the Board's Regulation Y.

C. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Corporation*, Minneapolis, Minnesota, and two of its subsidiaries, Norwest Financial Services, Inc., Des Moines, Iowa, and Norwest Financial, Inc., Des Moines, Iowa; to acquire substantially all of the assets and liabilities of ACTION Data Services, St. Louis, Missouri, a division of Control Data Corporation, and thereby engage in providing to others data processing and data transmission services, facilities (including data processing and data transmission hardware, software, documentation or operating personnel), data bases, or access to such services, facilities or data bases pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 2, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control

### Change in Method of Reporting Results of Sanitation Inspections of International Cruise Ships

**AGENCY:** Centers for Disease Control (CDC), Public Health Service, HHS.

**ACTION:** Change in the method of reporting the results of sanitation inspection of international cruise vessels.

**SUMMARY:** The method of reporting the results of sanitation inspection of international cruise vessels in the biweekly Summary of Sanitation Inspections of International Cruise Ships will be changed to include the numerical score achieved by vessels during the most recent sanitation inspection.

**EFFECTIVE DATE:** On or about March 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Linda Anderson, Chief, Special Programs Group, Center for Environmental Health and Injury Control, CDC, Atlanta, Georgia, 30333. Telephone: FTS: 236-4595, Commercial: (404) 488-4595.

**SUPPLEMENTARY INFORMATION:**

#### Purpose and Background

A request for public comment on a proposal to change the method of reporting the results of sanitation inspections of international cruise vessels in the biweekly Summary of Sanitation Inspections of International Cruise Ships was published in the **Federal Register** on Thursday, November 10, 1988 (53 FR 45584).

#### Discussion of Comments

The public notice of the intent to change the method of reporting the results of the sanitation inspections provided for a 60-day comment period. During the comment period, comments were received from 9 sources; one of which was the International Committee of Passenger Lines (ICPL) representing 19 separate cruise lines and their subsidiaries. Of the 9 comments received, 4 supported the Department's position and are not addressed in this notice. Discussion of the other substantive comments and the Department's response follows:

*Comment:* One commentor suggested that it is in the obvious self-interest of the cruise ship industry to be vitally interested in good health on cruise ships and to have a major commitment to providing a healthful cruise experience. The commentor stated that their company is totally committed to this goal of good health but believes the publication of numerical scores "is self-defeating in that it will lead to confusion as to the true state of health conditions existing onboard cruise ships."

*Response:* The Department agrees that it is in the best interest of the cruise ship industry to provide a healthful cruise experience. The Department does not agree that publication of the numerical scores achieved during sanitation inspections will lead to confusion. The Department believes that problems with the current reporting scheme will be resolved by the proposed change. For example, under the current reporting method, ships which just barely achieve a satisfactory rating (e.g., a score of 86) receive the same rating as ships which score 100. Conversely, ships which score 40 receive the same "unsatisfactory" rating as ships which score 85. Since the sanitation inspection is intended to reflect the level of sanitation on board the vessel at the time of inspection, reporting actual numerical scores would be more indicative of the level of sanitation on board the vessel at the time of the inspection than the current reporting of a Satisfactory/Unsatisfactory rating. This information would be most helpful to travel agents and the traveling public and would be an incentive for the vessel to achieve and maintain a high level of sanitation on board.

*Comment:* One commentor states there are a significant number of vessels which have maintained demonstratively high health standards with no incidents, which have historically received low scores because of the many problems which have existed in the past with the inspection and scoring system. Despite their excellent health records, these vessels will be in a position of having negative median scores reported for 5 years after the date when an equitable scoring and inspection system is implemented.

*Response:* The Department is not aware of any ships that meet the description outlined by the commentor. The Department believes that its scoring and inspection system is equitable.

*Comment:* Another commentor suggested the Department has often failed to undertake followup inspections resulting in numerous incidents of ships remaining in a "fail status for many months even years after conditions on board had been corrected." It would not be right for ships with good health records to be penalized for this past failure to inspect promptly after correction. In addition, another commentor states, to be meaningful, past median scores should reflect the fact that the Vessel Sanitation Program (VSP) provides for semiannual inspections. Recent inspection summaries ("green sheets") show that up to 20% or more of all ships have not been inspected for 10 months or more, with others not inspected since before September 1987.

*Response:* The Department acknowledges that during most of 1988 the Vessel Sanitation Program was not at full staff. The shortage of personnel and scheduling difficulties prevented performing the number of sanitation inspections that otherwise would have been performed. Additional staff has been recruited for the Program to enable the Department to provide at least two inspections per year for every ship that regularly sails from a U.S. port. Ships unable to achieve a score of at least 86 on a routine periodic inspection will receive a reinspection within a reasonable time frame depending upon ship schedules and receipt of the "Statement of Corrective Action" from the ship's management. In the scheduling of inspections, priority will be given to the first reinspection of those vessels which were unable to achieve a score of at least 86 during the routine periodic inspection. Since there is a fee for inspections, vessels unable to achieve a satisfactory score of at least 86 during a periodic sanitation inspection will receive only one reinspection unless specifically requested in writing by the owner/operator.

*Comment:* One commentor stated the notice in the **Federal Register** states, while there is no evidence that a single inspection score accurately predicts the probability of outbreak on a particular cruise, "CDC believes there is evidence to indicate that an outbreak is less likely to occur on vessels achieving higher scores over a period of time." The commentor suggested that if statistics are calculated ignoring the result of those inspections made immediately after a disease outbreak in a ship (which public health inspectors have tended to score extremely low), then the government's own data proves that the inspection score has no predictive value in determining whether outbreak is likely to occur or not.

*Response:* The Department believes this comment is not germane to the issue of the publication of a numerical score. The Department has previously stated that there is no evidence that a single inspection, indicating a low level of sanitation, predicts an outbreak of diarrheal disease on a cruise ship. Data published by the Department indicate that vessels that consistently achieve and maintain high levels of sanitation have fewer outbreaks of diarrheal disease than vessels with lower scores. The data used by the Department in the analysis included only routine periodic sanitation inspections. Reinspections and inspections conducted in association with an epidemiological investigation of a disease outbreak were specifically excluded from the data analysis.

*Comment:* One commentor was of the opinion that "this proposed change is less fair to all concerned whether a ship has been consistently passed and then failed or conversely, consistently failed and then passed." The commentor suggested that the change be discussed in "committee forum" and receive input from the cruise lines. Another commentor suggested that the subject should be reviewed by the group of experts when they meet on January 30, 1989, to review the *Operations Manual*, adopted in March 1987, in the context of all other aspects of the VSP. The summary of inspection results as proposed reflects the outcome of individual vessel inspections in accordance with the *Operations Manual* and the scoring system contained therein which will also be reviewed by the group.

*Response:* The Department believes the publication of numerical scores is an issue which should be considered separately from a review of the *Vessel Sanitation Program Operations Manual*. Publication of the numerical scores is not contingent upon revision of the *Manual* and the scores would be published regardless of the system of scoring used. The Department has received and considered input from cruise lines and does not agree that additional review of the matter is required.

*Comment:* One commentor supported the proposed change and suggested that reinspection scores be included in the calculation of the median score.

*Response:* Since the sanitation inspection is intended to reflect the level of sanitation on board the vessel at the time of inspection, including the scores achieved during reinspection would be misleading. Comparison of median scores of vessels which had not received a reinspection, for whatever reason, with the median scores of vessels which had been reinspected would not be equitable. The Department believes the comparison of median scores achieved during routine periodic sanitation inspections provides the most equitable method of providing information relative to the current level of sanitation on board at the time of the inspection.

*Comment:* One commentor suggested that, besides being discriminatory, publication of the "green sheets" is misleading. The information on the sheets may be outdated. Since partial—or no—credit is allowed for corrections made during inspections, the information may be inaccurate because it may not reflect current conditions on board a ship. More importantly, the information on the sheet may conflict with the inspection report that is released to the public, calling into question the credibility of the sheet.

*Response:* The Summary of Sanitation Inspections of International Cruise Ship ("green sheet") is updated and published every other week. The Department agrees that levels of sanitation could potentially vary considerably between sanitation inspections. However, the Department believes that a vessel which demonstrates a high level of sanitation at the time of the inspection will generally maintain that level of sanitation between inspections. The results of the sanitation inspection are a reflection of the current status on board the ship and a reflection of the routine procedures on board the ship which effect ongoing levels of sanitation. The Department believes that the biweekly publication of the results of sanitation inspections and the Department's policy of providing copies of the actual sanitation inspection reports are the most timely and cost effective methods of providing information to interested parties.

*Comment:* One commentor suggested the text at the bottom of the "green sheet" should also be reviewed by the group of experts at the January 30 meeting. As has been pointed out on earlier occasions, the regulatory tone of the text seems out of step with the voluntary cooperative nature of the program and exaggerates the seriousness, and frequency, of diarrhea outbreaks. In comments submitted to CDC by the ICPL on February 3, 1987, the recommendation was that the whole text be revised by deleting all but the first and last sentences as follows:

> All passenger cruise ships arriving at United States ports are inspected under the voluntary cooperative inspection program. Ships are rated on the following items to determine if they meet CDC inspection standards: (1) Water, (2) food preparation and holding, (3) potential contamination of food, and (4) general cleanliness, storage and repair.

*Response:* The meeting referred to by this commentor is intended as an opportunity for individual experts in a variety of disciplines to provide recommendations to the Department regarding the *Vessel Sanitation Program Operations Manual*. The Department believes the issue of the publication of numerical scores or the wording on the "Summary of Sanitation Inspections of International Cruise Ships" is a separate issue. Information included in the legend of the Summary provides recipients with useful information which would not be apparent otherwise. The Department agrees with the suggestion to reword the first sentence to emphasize the voluntary nature of the program.

*Comment:* One commentor suggested the Department place "an observer aboard ship to see what sanitation is like during an actual cruise. A travel agent with a checklist could easily attest to the procedures being followed; this could be done without the knowledge of the ship's personnel or crew."

*Response:* The Department believes that it would be inappropriate to use untrained observers to measure levels of sanitation on board ships. Sanitation

VOL 54 ISS 44 MR 8 1989 UMI

inspections are carried out by highly qualified sanitarians and require knowledge and skills beyond the capability of a casual observer.

*Comment:* One commenter suggested that the reporting of intestinal illness be mandatory.

*Response:* Current regulations (42 CFR 71.21(c)) require the reporting of diarrheal illness by the master of a ship carrying 13 or more passengers prior to entering a port under the control of the United States.

*Comment:* One commenter stated his organization does not believe that the publication of a 5-year median score is either constructive or accurate. For example, a ship which has maintained consistently high scores for many years but which may have had one low score as a result of a health incident or on account of a virus or an unusual operating condition will find itself some 30 months later being shown with a very low median score to no purpose. The use of the median in this instance would merely confuse the public's perception as to the health standard which has been historically maintained in the vessel. This confusion will last during the period of 6 months in which the particular low score will be reported. Another commenter expressed the belief that reporting of median scores from the "old" system and current scores from the "modified" system is not productive. Another commenter stated the proposed publication of the "5-year median" score would present problems. The commenter stated, first of all, as proposed it would include the median results of inspections for the years 1984–1989 during which two entirely different scoring systems were used. Vessels scored under the two different systems would lead to different final scores which in turn would affect the percentage of ships that met standards or not. While the publication of the latest inspection score is a statement of fact, which can be documented by the individual vessel inspection report, the 5-year median raises more questions than answers and could lead to false conclusions.

Another commenter suggested that even further confusion would be caused in the minds of the traveling public by the publication of median scores in addition to the most recent score achieved by a ship and suggested that no statistics should be included other than that score received by the vessel in its most recent examination. Another commenter believed the change would be confusing to the public if a company were to acquire a ship (through purchase of the individual asset or of a whole company) which had historically had problems in achieving acceptable scores and should the buyer immediately turn the operation around, it will find itself haunted for the next 2½ years by a historical record which is both negative and irrelevant.

Another commenter suggested during such a long period of time vessels change ownership and management which can affect the operation of the vessel. Also, the past record of median scores, whether good, moderate, or low does not have any bearing on the sanitation conditions of the vessel during time of inspection or in the future, nor to the incidence of illness as documented by CDC and industry studies. And, finally, one commenter recommended, if regular summary reports are to be continued, they include only (a) the name of the vessel, (b) the most recent inspection score, and (c) the date of the inspection. Alternatively, if a median score of past inspections is to be included, these should include past scores going back to March 1987 only, at which time the new *Operations Manual* and the inspection scoring system currently in use were adopted. Vessels that change hands should have only the inspection score of the last inspection listed, with past median scores added for subsequent inspections. This approach would be similar to that proposed for new vessels.

*Response:* After careful consideration of the issues raised by several commenters, the Department agrees there exists the potential for confusion that would be counter productive to the Department's intentions if a 5-year median score were published as proposed. The Department agrees that a 5-year median score may not be indicative of the cruise lines current operations. Changes of ownership of vessels, changes in management of vessels, and subsequent changes in on board practices may make a 5-year median a misleading indicator of current levels of sanitation. The Department does not wish to penalize a vessel which has a history of unsatisfactory ratings but, under new management, is now making a concentrated effort to improve the level of sanitation on board. Publication of a 5-year median score which included previous unsatisfactory ratings could potentially reduce the incentive for a vessel to maintain a high level of sanitation as the results of their efforts would take them years to show. Upon further review of the scores during the past 5 years, the Department agrees that only those sanitation inspections conducted since March 1987, at which time the inspection scoring system currently in use was adopted, will be used in calculating a median of scores. The Department will not routinely publish the 5-year median but will maintain a 5-year median of scores achieved by a vessel during routine periodic sanitation inspections which will be available upon written request. Therefore, regular summary reports will continue to be published and will include only the name of the vessel, the numerical score of the most recent inspection, and the date of inspection.

Dated: March 1, 1989.

BILLING CODE 4160-18-M

## Food and Drug Administration

**[Docket No. 88N-0396]**

### Ray Batchelor Livestock; Withdrawal of Approval of Applications for Animal Feeds Bearing or Containing a New Animal Drug

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Center for Veterinary Medicine (CVM), Food and Drug Administration (FDA), is withdrawing approval of all applications held by Ray Batchelor Livestock for animal feeds bearing or containing new animal drugs. This action is being taken because the firm failed to respond to a notice of opportunity for hearing proposing to withdraw approval of the applications.

**EFFECTIVE DATE:** March 20, 1989.

**FOR FURTHER INFORMATION CONTACT:** Philip J. Frappaolo, Center for Veterinary Medicine (HFV-240), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4940.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of September 29, 1988 (53 FR 38074), CVM provided a notice of opportunity for a hearing on a proposal to withdraw approval of all the applications held by Ray Batchelor Livestock, P.O. Box 306, Enfield, NC 27823, for the manufacture of animal feeds bearing or containing new animal drugs (medicated feed applications).

Ray Batchelor Livestock holds the following medicated feed applications:

1. F110–725 for medicated feeds containing lincomycin for swine use; approved July 12, 1977.

2. F110–785 for medicated feeds containing melengestrol acetate for cattle use; approved July 15, 1977.

3. F111–150 for medicated feeds containing carbadox for swine use; approved September 2, 1977.

4. F111–176 for medicated feeds containing carbadox and pyrantel tartrate for swine use; approved September 9, 1977.

5. G128–373 for medicated feeds containing lincomycin for swine use; approved June 2, 1981.

The notice of opportunity for hearing stated that CVM was proposing to issue an order under section 512(m)(4)(B)(i) and (ii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(m)(4)(B)(i) and (ii) withdrawing approval of the listed applications, and all amendments and supplements thereto, on the grounds that the applicant had refused to permit access to required records, and that new information, evaluated together with the evidence available when the applications were approved, showed that the methods used in, or the facilities and controls used for, the manufacturing, processing, and packing of such animal feeds were inadequate to assure and preserve the identity, strength, quality, and purity of the new animal drug therein, and were not made adequate within a reasonable time after receipt of written notice from FDA specifying the matters complained of. The firm was provided until October 31, 1988, to file a written appearance requesting a hearing (53 FR 36074 and 38075). Ray Batchelor Livestock failed to file such an appearance.

Under 21 CFR 514.200 *Contents of notice of opportunity for hearing*, the failure of the sponsor to file a written appearance in answer to a notice of opportunity for hearing constitutes a waiver of the right to a hearing and is grounds for CVM to summarily enter a final order withdrawing approval of the applications.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval applications* (21 CFR 514.115), notice is given that approval of F110–725, F110–785, F111–150, F111–176, and G128–373 and all amendments and supplements thereto is hereby withdrawn, effective March 20, 1989.

Dated: February 28, 1989.

### Stork Friesland B.V.; Filing of Food Additive Petition

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Stork Friesland B.V. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of a polymeric reaction product of poly(*N*-vinyl-*N*-methylamine), *N,N'*-bis-(3-aminopropyl)-ethylenediamine, 1,3-benzenedicarbonyl chloride and 1,3,5-benzenetricarbonyl chloride as a reverse osmosis membrane intended for use in contact with food.

**FOR FURTHER INFORMATION CONTACT:** Rudolph Harris, Center for Food Safety and Appied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

**SUPPLEMENTARY INFORMATION:** Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 9B4128) has been filed by Stork Friesland B.V., c/o Suite 200, 1029 Vermont Avenue NW., Washington, DC 20005–3517, proposing that § 177.2550 Reverse osmosis membranes (21 CFR 177.2550) be amended to provide for the safe use of a polymeric reaction product of poly(*N*-vinyl-*N*-methylamine), *N,N'*-bis-(3-aminopropyl)-ethylenediamine, 1,3-benzenedicarbonyl chloride and 1,3,5-benzenetricarbonyl chloride as a reverse osmosis membrane intended for use in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: February 27, 1989.

### Diamond Crystal Salt Co.; Withdrawal of GRAS Affirmation Petition

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the withdrawal without prejudice of a petition requesting that the agency affirm that the use of *d*-α- and *dl*-α-tocopherols as inhibitors of nitrosamine formation in dry-cured bacon is generally recognized as safe (GRAS).

**FOR FURTHER INFORMATION CONTACT:** Carl L. Giannetta, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–426–5487.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of April 10, 1986 (51 FR 12395), FDA published a notice that a petition (GRASP 6G0313) had been filed by Diamond Crystal Salt Co., St. Clair, MI 48079–1999. This petition asked that the agency affirm that the use of *d*-α- and *dl*-α- tocopherols as inhibitors of nitrosamine formation in dry-cured bacon is GRAS.

On August 19, 1986, FDA asked the firm for additional data to support the petition. This data has never been submitted to the agency.

On September 9, 1988, the agency contacted the firm by telephone to determine the firm's plans for the petition. The firm advised the agency that it intended to withdraw the petition and would send a letter requesting the withdrawal. However, 30 days later the agency had not received a letter from the firm asking that its petition be withdrawn.

Consequently, on October 18, 1988, FDA wrote the firm and advised it that because of the firm's lack of action in response to the communications between the agency and the firm, FDA was going to publish a notice in the **Federal Register** advising that it considered the petition to be withdrawn. More than 60 days have passed since that letter was sent, and the company has not voiced any objection to the projected course of action. Therefore, the agency is announcing that it considers this petition to be withdrawn by the firm in accordance with 21 CFR 171.7(b).

Dated: February 23, 1989.

**Richard J. Ronk,**

*Acting Director, Center for Food Safety and Applied Nutrition.*

[FR Doc. 89-5276 Filed 3-7-89; 8:45 am]

BILLING CODE 4160-01-M

VOL 54 ISS 44 MR 8 1989 UMI

[Docket No. 89M-0002]

**Sola/Barnes-Hind; Premarket Approval of Polycon® HDK (Silafocon B) Gas Permeable Contact Lens for Extended Wear (Clear and Tinted)**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing its approval of the supplemental application by Sola/Barnes-Hind, Sunnyvale, CA, for premarket approval, under the Medical Device Amendments of 1976, of the spherical POLYCON® HDK (silafocon B) Gas Permeable Contact Lens for Extended Wear (clear and tinted). After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of December 21, 1988, of the approval of the application.

**DATE:** Petitions for administrative review by April 7, 1989.

**ADDRESS:** Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** David M. Whipple, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7940.

**SUPPLEMENTARY INFORMATION:** On May 27, 1988, Sola/Barnes-Hind, Sunnyvale, CA 94086-5200, submitted to CDRH a supplemental application for premarket approval of the POLYCON® HDK (silafocon B) Gas Preamble Contact Lens for Extended Wear (clear and tinted). The spherical lens is indicated for extended wear from 1 to 7 days between removals for cleaning and disinfection as recommended by the eye care practitioner. The lens is indicated for the correction of visual acuity in not-aphakic persons with nondiseased eyes that are myopic or hyperopic. The lens may be worn by persons who exhibit astigmatism of 4.00 diopters (D) or less that does not interfere with visual acuity. The spherical lens ranges in powers from −10.00 D to +10.00 D and is to be disinfected using the chemical lens care system recommended in the approved labeling. The blue tinted lens contains the color additive D & C Green No. 6 in accordance with the color additive listing provisions of 21 CFR 74.3206.

On October 20, 1988, the Ophthalmic Devices Panel, and FDA advisory committee, reviewed and recommended approval of the supplemental application. On December 21, 1988, CDRH approved the supplemental application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ-460), address above. The labeling of the POLYCON® HDK (silafocon B) Gas Permeable Contact Lens for Extended Wear (clear and tinted) states that the lens is to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses only.

**Opportunity for Administrative Review**

Section 515(d)(3) of the Act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the Act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before April 7, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: March 1, 1989.

**Walter E. Gundaker,**

*Acting Deputy Director, Center for Devices and Radiological Health.*

[FR Doc. 89-5275 Filed 3-7-89; 8:45 am]

BILLING CODE 4160-01-M

**Public Health Service**

**Human Immunodeficiency Virus Services Planning Program Grants**

**AGENCY:** Health Resources and Services Administration, PHS, DHHS.

**ACTION:** Notice of availability of funds.

**SUMMARY:** The Bureau of Maternal and Child Health and Resources Development (BMCHRD), Health Resources and Services Administration (HRSA), announces that Fiscal Year (FY) 1989 funds are available for Human Immunodeficiency Virus (HIV) Services Planning Program Grants to cities and States not affected by the Acquired Immune Deficiency Syndrome (AIDS) epidemic to the same extent as high incidence cities. All public and private entities are eligible to apply, including State and local Governments and nonprofit and for profit organizations capable of developing coordinated plans for services for persons with AIDS within designated cities and States. These entities must be able to consolidate the information received from governments, service providers, community coalitions, and community-based organizations into a comprehensive plan for a system-of-care. For statewide planning, entities must be able to document how they will utilize the information received from major cities within the State to reflect a cooperative statewide plan for services.

Eligible jurisdictions are determined based on the number of AIDS cases reported by the Centers for Disease Control as of September 12, 1988. Grant funds will be used to support planning activities for AIDS Services as outlined under *Program Objectives*. At the end of the one-year grant period, the grantee will provide the HRSA with a copy of a plan that describes the planning processes performed and identifies the actions, with time frames, to be taken in implementing the plan. Funds were appropriated by Public Law 100-436 for this purpose.

**DATE:** To receive consideration, grant applications must be received by the Grants Management Officer by June 5, 1989. Applications shall be considered as meeting the deadline if they are either (1) received on or before the deadline date; or (2) postmarked on or before the deadline date and received in time for submission to the review committee. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be accepted as proof of timely mailing. Applications which do not meet the deadline will be considered late applications and will be returned to the applicant.

**FOR FURTHER INFORMATION CONTACT:** Requests for technical or programmatic information should be directed to Ms. June Horner, Acting Chief, HIV Services Operations Branch, Room 9A-05, 5600 Fishers Lane, Rockville, Mayland 20857, (301 443-0652). Grant applications (Form PHS 5161-1 with revised face sheet HHS Form 424 approved under OMB Number 0348-0006) and additional information regarding business administration or fiscal issues related to the awarding of grants under this notice may be requested from Ms. Glenna Wilcom, Grants Management Specialist, BMCHRD, Parklawn Building, Room 11A-18, 5600 Fishers Lane, Rockville, Maryland 20857 (301 443-1440). The original and two copies of the application must be submitted to Ms. Wilcom.

**SUPPLEMENTARY INFORMATION:**

**Program Objectives**

The HIV Services Planning Program (HSPP) is intended to help States and cities with low prevalance and incidence of HIV infection to plan for community-based systems of care that provide the spectrum of services needed for people with HIV infection and its complications, and to provide appropriate alternatives to inpatient hospital care. The purpose of the planning grant will be to enable each approved grantee to:

(1) Prepare a plan that describes the planning process and participants in the development and implementation of an HIV system of care;

(2) Conduct a needs/demand assessment for HIV prevalance and care;

(3) Identify required health and social service needs based on the needs/demand assessment;

(4) Estimate the resources required to implement the system of care and the cost of provision of identified services and systems;

(5) Develop a plan for the optimal integration and coordination of resources, emhasizing a continuum of care including use of out-of-hospital services and case management of patients; and

(6) Identify problems and proposed actions, including timeframes for the resolution of the problems and for the provision of services to HIV infected individuals in the service area.

**Availability of Funds**

Approximately $3.9 million is available in FY 1989 for the HSPP grants. Grants will be awarded competitively. The application must include a budget indicating how grant funds would be used over the 1-year budget and project period.

**Eligible Jurisdictions**

Eligible jurisdictions are: (1) Standard Metropolitan Statistical Areas (SMSAs) having between 100 and 400 cases of AIDS (See Appendix A) as reported by the centers for Disease Control (CDC) as of September 12, 1988 or (2) States which have more than 125 AIDS cases statewide (See Appendix B) as reported by the CDC as of September 12, 1988. An application submitted on behalf of a State which contains one or more SMSAs having 400 or more cases of AIDS must emphasize statewide planning for other than these high AIDS prevalence areas. When both a State and one or more SMSA's within that State are eligible jurisdictions, priority will be given to applications that demonstrate a coordinated approach among all eligible jurisdictions.

**Collaboration/Coordination with other HIV Programs**

Where appropriate, the HIV Services Planning Program grantees will be expected to document the participation of other HIV program managers within their regions, such as the directors of the HRSA AIDS Service Demonstration Programs; the HRSA Pediatric AIDS Health Care Demonstration Projects; the HRSA AIDS Regional Education and Training Centers Program; the National Institute on Drug Abuse AIDS Community Outreach Demonstration Projects; information, public education/prevention and testing programs supported by the Centers for Disease Control; the AIDS drug clinical trial studies and other research programs conducted by the National Institutes of Health; the Community Health Centers and Migrant Health Centers supported by HRSA; the Robert Wood Johnson Foundation AIDS Health Services Programs; the Ford Foundation National Community AIDS Partnership and other major foundation-supported programs; State Health Departments or other appropriate State-level representatives; activities of the Office of Minority Health of the Office of the Assistant Secretary for Health; community based AIDS service organizations; and State Medicaid Programs.

**Review and Evaluation Criteria**

Applications for HSPP grants will be reviewed and rated by an objective review committee and evaluated on the basis of the following:

—Applicant's experience and qualifications to function as the lead agency in planning for HIV services;

—Applicant's financial support from, and linkages with, units of State and/or local Government, and/or support from the private sector;

—Applicant's description of the process for inclusion of service providers and coalitions of service providers to be involved in HIV services planning;

—The appropriateness of methodologies the project will use in the following areas: (1) Conducting the needs/demand assessment, including approaches for developing inventories of existing services and case projection rates; (2) assessing knowledge and attitudes about the HIV epidemic among community members and health workers; and (3) identifying the health care services and planning resources currently in place, including resources of minority and special interest groups and of other non-Federal organizations and providers, and consideration of the process by which these may be integrated into a model for care;

—Evidence of support by, and the extent to which the planning process will incorporate the needs of, HIV-infected individuals, minorities, providers and other groups affected by the epidemic; and

—Time frames for implementation of the planning process.

Where appropriate, contiguous cities/States should undertake cooperative regional systems of care in order that duplication of services may be avoided. More detailed information on the review

VOL 54 ISS 44 MR 8 1989 UMI

and evaluation criteria may be found in the grant application kit.

**Technical Assistance Workshops**

The Division of AIDS Programs will conduct two Technical Assistance (T.A.) workshops to respond to questions from potential applicants. The dates and locations of the T.A. workshops are as follows:

1. Wednesday, April 12, 1989 at 5600 Fishers Lane, Rockville, Maryland.

2. Tuesday, April 25, 1989 at the PHS Regional Office in Denver, Colorado, 1961 Stout Street, Denver, Colorado.

Applicants who plan to attend one of the T.A. workshops must confirm their participation, the location of the workshop they will be attending, and the number of individuals in their party. Confirmation should be made at least 2 weeks prior to the workshop date to: Ms. Janice Edmonds, Parklawn Building, Room 9A-05, 5600 Fishers Lane, Rockville, Maryland 20857, 301 443-0652 or 443-8745. If there are changes to the above schedule, applicants will be notified at the time of confirmation.

**Allowable Costs**

The basis for determining the allowability and allocability of costs charged to PHS grants is set forth in 45 CFR Part 74, Subpart Q, and 45 CFR 92.22 for State and local governments. These regulations implement the five separate sets of cost principles prescribed for grant recipients, which are: OMB Circular A-87 for State and local governments; OMB Circular A-21 for institutions of higher education; 45 CFR Part 74, Appendix E for hospitals; OMB Circular A-122 for nonprofit organizations; and 48 CFR Chapter 1, Subpart 31.2 for for-profit (commercial) organizations.

**Other Award Information**

A successful applicant under this notice will submit reports in accordance with the provisions of the general regulations which apply under 45 CFR Part 74, Subpart J, and 45 CFR 92.40 for State and local governments.

**Executive Order 12372**

The HIV Services Planning Program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intragovernmental review of Federal programs, as implemented by 45 CFR Part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application package under this notice will contain a listing of States which have chosen to set up such a review process and will provide a point of contact in the States for the review. Applicants should promptly contact their State single point of contact (SPOC) and follow their instruction prior to the submission of an application. The SPOC has 60 days after the application deadline date to submit its review comments.

(The OMB Catalog of Federal Domestic Assistance number of the HIV Services Planning Program is 13.168.)

Date: March 2, 1989.

**John H. Kelso,**

*Acting Administrator.*

APPENDIX A—STANDARD METROPOLITAN STATISTICAL AREAS (SMSAs) ELIGIBLE FOR GRANTS UNDER THE HIV SERVICES PLANNING PROGRAM

[100 to 400 AIDS Cases]

### Notice of Grazing Advisory Board Meeting

**AGENCY:** Bureau of Land Management.

**ACTION:** District Grazing Advisory Board Meeting.

**SUMMARY:** The Richfield District Grazing Board will hold a meeting on April 4, 1989. The meeting will start at 9:00 a.m. in the District Office, 150 East 900 North, Richfield, Utah. The agenda will be:

1. Election of officers
2. Discussion on Weed Day
3. Project funding and District fencing program
4. Henry Mountain CRM update
5. Wild Horse program
6. Riparian management
7. Wilderness program update
8. Change of livestock class and new and revised AMP's
9. Electronic Combat Test Capacity

Interested person may make oral statements to the Board between 1:15 p.m. and 2:15 p.m. or file written comments for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 150 East 900 North, Richfield, Utah 84701 (801-896-8221). For further information contact: Bert Hart, District Public Affairs Specialist at the above address.

February 28, 1989.

Containing 2,734.80 acres, more or less

In exchange the United States will acquire all or a portion of private lands owned by the City of Los Angeles in Los Angeles County, CA, for inclusion in the Santa Monica Mountains National Recreation Area. The specific parcels to be acquired will be determined following final determination of values and will be adjusted to equalize the value of the public and private land.

**SUPPLEMENTARY INFORMATION:** The purpose of this exchange is to convey public land which surrounds Haiwee Reservoir in Inyo county to the City of Los Angeles. The city operates Haiwee Reservoir as a part of its Los Angeles aqueduct system, and its acquisition of the public land involved will consolidate ownership of the reservoir and will facilitate the city's management of that facility.

In exchange, the United States will acquire interest in lands owned by the city within the Santa Monica Mountains National Recreation area in the County of Los Angeles. These lands consist of parcels in the vicinity of Upper Franklin Reservoir. Acquisition of these lands by the United States will facilitate management of the recreation area by the National Park Service.

Approximately 16 acres of private land has been offered by the city. The value of the interest offered in these lands approximately equals the value of the selected lands. Determination of the exact parcels of offered lands to be conveyed to the United States will be made after acceptance of final appraisals, with the amount of offered land to be adjusted to equal the value of the selected lands.

Lands transferred out of Federal ownership will be subject to the following reservations:

1. A reservation of right of way to the United States for ditches and canals, pursuant to the Act of August 30, 1890 (43 U.S.C. 945).

2. All valid existing rights existing at the time of publication of this notice, including but not limited to valid rights of way, entries, grants, leases and

locations, including valid mining claim locations.

Numerous mining claims of record may encumber the public lands, and are not enumerated herein for the sake of publication convenience. Further information regarding these possibly valid claims may be obtained by contacting the office noted below. The patent would be issued subject to those claims identified in the patent document, together with the right of the claimants to the following:

1. The right to continue to prospect for, mine, and remove locatable minerals subject to applicable laws.

2. The right of claimants to obtain patent, pursuant to applicable law, to both the surface and mineral estates within the mining claims if valid discovery was made prior to issuance of the subject exchange patent, or to obtain patent to the mineral estate only if valid discovery is made subsequent to the subject exchange patent.

Publication of this notice in the Federal Register segregates the public lands from the operation of the public land laws and the general mining laws, but not the mineral leasing laws. The segregative effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

**FOR FURTHER INFORMATION CONTACT:** Wesley T. Chambers, California Desert District, (714) 351-6402. Information relating to this action is readily available for review.

**DATES:** For a period on or before April 24, 1989 interested parties may submit comments to the Bureau of Land Management, District Manager, California Desert District, 1695 Spruce Street, Riverside, CA 92507. Objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of objections, this action will become the final determination of the Department of the Interior. No transfer of public lands will occur sooner than 60 days from first publication of this notice in the Federal Register.

H. W. Riecken,
*Acting District Manager.*

Date: February 28, 1989.

### National Park Service

### Concession Contract Negotiations; Barren Island Marina, Inc.

**AGENCY:** National Park Service, Interior.

**ACTION:** Public notice.

**SUMMARY:** Public notice is hereby given that the National Park Service proposes to extend a concession contract with Barren Island Marina, Inc., authorizing it to continue to provide marina facilities and services for the public at the Jamaica Bay/Breezy Point Unit of Gateway National Recreation Area, New York, for a period of one (1) year from 1 January, 1989, through December 31, 1989.

**EFFECTIVE DATE:** April 7, 1989.

**ADDRESS:** Interested parties should contact the Regional Director, North Atlantic Region, Boston, Massachusetts 02109 (telephone: 617-565-8864), for information as to the requirements of the proposed contract.

**SUPPLEMENTARY INFORMATION:** This contract extension has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act, and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1988, and therefore, pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the thirtieth (30th) day following the release date of this Public Notice to be considered and evaluated.

Dated: February 10, 1989.

Herbert S. Cables, Jr.,
*Regional Director, North Atlantic Region.*

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-292]

### Certain Methods of Making Carbonated Candy Products; Investigation

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337.

**SUMMARY:** Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on January 31, 1989, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of General Foods Corporation, 250 North Street, White Plans, New York 10625, Carbonated Candy Ventures, 1195 Niagara Street, Buffalo, New York, 14240, and Pop Rocks, Inc., 986 Bedford Street, Stamford, Connecticut 06905. The complaint was amended and supplemented on February 21, 1989. The complaint, as amended and supplemented, alleges violation of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain carbonated candy products which infringe or are made by a process covered by: (1) Claims 1-9 of U.S. Letters Patent 3,985,910 and (2) claims 1-9 of U.S. Letters Patent 4,001,457; and that there exists an industry in the United States as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a permanent general exclusion order and permanent cease and desist orders.

**ADDRESSES:** The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade

VOL 54 ISS 44 MR 8 1989 UMI

Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–252–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

**FOR FURTHER INFORMATION CONTACT:** David A. Guth, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–252–1574.

**Authority**

The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and § 210.12 of the Commission's Interim Rules of Practice and Procedure, 52 FR 33034, 33057 (Aug. 29, 1988).

**Scope of Investigation**

Having considered the complaint, the U.S. International Trade Commission, on March 1, 1989, ORDERED THAT—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B)(ii) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain carbonated candy products allegedly made by a process covered by claims 1–9 of U.S. Letters Patent 3,965,910 or claims 1–9 of U.S. Letters Patent 4,001,457; and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are—

General Foods Corporation, 250 North Street, White Plains, New York 10625

Carbonated Candy Ventures, 1195 Niagara Street, Buffalo, New York 14240

Pop Rocks, Inc., 986 Bedford Street, Stamford, Connecticut 06905

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint shall be served:

Zeta Espacial, S.A., Apartado 140, Sant Boi (Barcelona), Spain

Confex, Inc., 187 Avenue at the Common, Shrewsbury, New Jersey 07702

(c) David A. Guth, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Suite 401 Washington, DC 20436, shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with § 210.21 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988). Pursuant to §§ 201.16(d) and 210.21(a) of the Commission's rules (19 CFR 201.16(d) and 53 FR 33034, 33057 (Aug. 29, 1988)), such responses shall be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

By order of the Commission.

**Kenneth R. Mason,**

*Secretary.*

**[Investigation No. 337–TA–291]**

**Certain Insulated Security Chests; Investigation**

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337.

**SUMMARY:** Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on January 25, 1989, under section 337 of the Tariff Act of 1930, as amended, (19 U.S.C. 1337), on behalf of John D. Brush & Co., Inc., 900 Linden Avenue, Rochester, New York 14625. The complaint was supplemented on February 8, 1989. The complaint, as supplemented, alleges violations of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain insulated security chests by reason of (1) direct infringement of claims 1 through 7 of U.S. Letters Patent 4,048,926; and (2) direct infringement of U.S. Letters Patent Des. 289,562; and that there exists an industry in the United States as required by subsection (a)(2) of the section 337.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

**ADDRESSES:** The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E. Street S.W., Room 112, Washington, DC 20436, telephone 202–252–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

**FOR FURTHER INFORMATION CONTACT:** Juan Cockburn, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–252–1572.

**Authority**

The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in 210.12 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988).

**Scope of Investigation**

Having considered the complaint, the U.S. International Trade Commission, on February 22, 1989, ORDERED THAT—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine (a) whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain insulated security chests by reason of alleged (1) infringement of claims 1, 2, 3, 4, 5, 6 or 7 of U.S. Letters Patent 4,048,926, or (2) infringement of the claim of U.S. Letters Patent Des. 289,582, and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served;

(a) The complainant is—

John. D Bush & Co., Inc., 900 Linden Avenue, Rochester, New York 14625.

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Scotty's, 5300 North Recker Highway, P.O. Box 939, Winter Haven, Florida 33882.

Home Quarters Warehouse, 2866 Virginia Beach Boulevard, Virginia Beach, Virginia 23450.

Center Manufacturing Co., 540 Goodrich, Bellevue, Ohio 44811.

(c) Juan Cockburn, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E. Street SW., Room 401Q, Washington, DC 20436, shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with § 210.21 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988). Pursuant to §§ 201.16(d) and 210.21(a) of the Commission's Rules (19 CFR 201.16(d) and 53 FR 33034, 33057 (Aug. 29, 1988)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

By order of the Commission.

**[Investigation No. 731–TA–429 (Preliminary)]**

**Mechanical Transfer Presses From Japan**

**Determination**

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Japan of mechanical transfer presses [2] provided for in subheadings 8462.29.00, 8462.39.00, 8462.49.00, 8462.99.00, and 8466.94.50 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

**Background**

On January 12, 1989, a petition was filed with the Commission and the Department of Commerce by Verson Division of Allied Products Corp., the United Auto Workers, and the United Steelworkers of America (AFL–CIO–CLC) alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of mechanical transfer presses from Japan. Accordingly, effective January 12, 1989, the Commission instituted preliminary antidumping investigation No. 731–TA–429 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of January 25, 1989 (54 FR 3693). The conference was held in Washington, DC, on February 3, 1989, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on February 27, 1989. The views of the Commission are contained in USITC Publication 2160 (February 1989), entitled "Mechanical Transfer Presses from Japan: Determination of the Commission in Investigation No. 731–TA–429 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By Order of the Commisison.

**Kenneth R. Mason,**

*Secretary.*

Issued: March 2, 1989.

[FR Doc. 89–5392 Filed 3–7–89; 8:45 am]

BILLING CODE 7020–02–M

[1] The record is defined in § 207.2(h) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(h)), as amended by 53 FR 33041 (August 29, 1988).

[2] For purposes of this investigation, the term "mechanical transfer presses" refers to automatic metal-forming machine tools with multiple die stations in which the workpiece is moved from station to station by a transfer mechanism synchronized with the press action, whether imported as machines or parts suitable for use solely or principally with these machines. These presses may be assembled or unassembled.

UMI

**SUMMARY:** Notice is hereby given that the U.S. International Trade Commission has determined to review in its entirety the initial determination (ID) issued by the administrative law judge (ALJ) finding no violation of section 337 of the Tariff Act of 1930, as amended, in the above-captioned investigation. The Commission does not request any further briefing from the parties at this time. Written submissions on the issues of remedy, the public interest and bonding may be requested by the Commission later in the proceedings.

**ADDRESS:** Copies of the presiding ALJ's ID and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–252–1000.

**FOR FURTHER INFORMATION CONTACT:** Jean Jackson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–252–1104. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

**SUPPLEMENTARY INFORMATION:** On February 10, 1988, the Commission instituted an investigation to determine whether there is a violation of section 337 in the importation or sale of recombinant erythropoietin by reason of alleged unfair acts in the importation into and sale in the United States of certain recombinant erythropoietin manufactured abroad by a process which, if practiced in the United States, would infringe claims 2, 4–7, 23–25, and 27–29 of U.S. Letters Patent 4,703,008. The Commission named Chugai Pharmaceutical Co., Ltd. of Japan and Chugai, USA, Inc. of New York City as respondents. During the investigation, the Commission granted a motion filed by The Upjohn Company of Kalamazoo, Michigan, to intervene as a respondent.

Notice of this investigation was published in the **Federal Register** of February 10, 1988 (53 FR 3947–3948).

This action is taken under authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and sections 210.55 and 210.56 of the Commission's interim rules (53 FR 33071 (Aug. 29, 1988)).

By order of the Commission.

**Certain Wire Electrical Discharge Machining Apparatus and Components Thereof; Investigation**

**AGENCY:** International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337.

**SUMMARY:** Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on January 23, 1989, under section 337 of the Tariff Act of 1930, as amended, (19 U.S.C. 1337), on behalf of Elox Corporation, Griffith Street, P.O. Box 220, Davidson, North Carolina 28036 and A.G. fur Industrielle Elektronik AGIE, Losone bei Locarno, CH–6616 Losone, Switzerland. A supplement was filed on February 8, 1989. The complaint, as supplemented, alleges violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain wire electrical discharge machining apparatus and components by reason of alleged direct, induced, and contributory infringement of claims 1 and 7–24 of U.S. Letters Patent 3,928,163; and that there exists an industry in the United States as required by subsection (a)(2) of section 337.

The complainants request that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

**ADDRESSES:** The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–252–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

**FOR FURTHER INFORMATION CONTACT:** Gary M. Hnath, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–252–1571.

**Authority**

The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.12 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988).

**Scope of Investigation**

Having considered the complaint, the U.S. International Trade Commission, on February 22, 1989, *Ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain wire electrical discharge machining apparatus and components by reason of alleged direct, induced, or contributory infringement of any of claims 1 or 7–24 of U.S. Letters Patent 3,928,163, and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are—

Elox Corporation, Griffith Street, P.O. Box 220, Davidson, North Carolina 28036

A.G. fur Industrielle Elektronik AGIE, Losone bei Locarno, CH–6616 Losone, Switzerland

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Sodick Co., Ltd., 1–5–1 Shin-Yokohama, Kouhoku-Ku, Yokohama, Kanagawa 222, Japan

Sodick Inc., 2100 Golf Road, Suite 350, Rolling Meadows, Illinois 60008

KGK Corporation, 1–6, Sakuradai 1-chome, Nerima-ku, Tokyo 176, Japan

KGK International Corporation, 543 W. Algonquin Road, Arlington Heights, Illinois 60005

Maruka Machinery Co., Ltd., 2–28 Itsukaichi Midori-cho, Ibaraki-shi, Osaka 567, Japan

Maruka Machinery Corporation of America, 60 Chapin Road, Pine Brook, New Jersey 07058

Yamazen Co., Ltd., 3–16, Itachibori 2-chome, Nishi-ku, Osaka-shi, Osaka 550, Japan

Yamazen USA, Inc., 1130 E. Dominguez Street, Carson, California 90746

Bridgeport Machines, Inc., 500 Lindley Street, Bridgeport, Connecticut 06606

(c) Gary M. Hnath, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Room 401I, Washington, DC 20436, shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with § 210.21 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988). Pursuant to sections 201.16(d) and 210.21(a) of the Commission's Rules (19 CFR 201.16(d) and 53 FR 33034, 33057 (Aug. 29, 1988)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

By order of the Commission.

Issued: February 27, 1989.

**Kenneth R. Mason,**

*Secretary.*

## DEPARTMENT OF LABOR

### Bureau of International Labor Affairs

**Partial Revision of the Indigenous and Tribal Populations Convention, 1957 (No. 107), International Labor Organization**

**AGENCY:** Department of Labor.

**ACTION:** Request for comment from tribal governments.

**SUMMARY:** The Department of Labor (DOL) invites comments from tribal governments on the appended proposed revision of the International Labor Organization's (ILO) Indigenous and Tribal Populations Convention, 1957 (No. 107). In preparation for the second discussion of this revised convention at the upcoming 1989 International Labor Conference, the Bureau of International Labor Affairs of the Department of Labor, with the assistance of the relevant Federal agencies, will prepare a position paper on the proposed text.

**DATE:** Comments will be accepted through April 7, 1989.

**ADDRESS:** Written comments should be directed to Marion F. Houstoun, Office of International Organizations, Bureau of International Labor Affairs, S–5311, U.S. Department of Labor, Washington, DC 20210.

**FOR FURTHER INFORMATION CONTACT:** Marion F. Houstoun, Office of International Organizations, Bureau of International Labor Affairs, S–5311, U.S. Department of Labor, Washington, DC 20210, telephone number (202) 523–6241.

**SUPPLEMENTARY INFORMATION:** In June 1988, the annual Conference of the ILO held the first of two annual discussions on the Partial Revision of the Indigenous and Tribal Populations Convention (No. 107), which the Conference adopted in 1957. The existing Convention deals with a wide range of issues such as native land rights, consultation between governments and native peoples in social and economic development, and issues of employment, vocational training, health and education affecting tribal peoples. The Convention is being revised because its assimilationist or integrationist approach to fundamental issues is widely seen as inapproprate and outdated. The ILO issued the report of the June 1988 session of the Conference Committee on Convention No. 107 and a proposed Convention text based on the results of that meeting. The ILO requested that Member States submit amendments or comments on the proposed text. The U.S. Government prepared and submitted comments to the ILO after consulting with U.S. employers' and workers' organizations, as well as U.S. indigenous groups (see DOL request for comments from tribal governments in the October 28, 1988, **Federal Register**). The attached new ILO draft of the proposed revised convention, which will be considered at the June 1989 session of the Conference, incorporates the comments of Member States. The Bureau of International Labor Affairs of the Department of Labor, with the assistance of the Departments of Interior and State, will prepare the U.S. position paper on this draft text for the upcoming Conference. The Department of Labor invites comments from tribal governments on the proposed revised Convention. The revised Convention is intended to be a broad statement of principles that can be adopted by many countries whose indigenous and tribal peoples face a wide range of circumstances.

Signed on the 2d day of March, 1989.

**Eugene K. Lawson,**

*Deputy Under Secretary for International Affairs, U.S. Department of Labor.*

**Proposed Text**

The following is the English version of the proposed Convention concerning indigenous and tribal peoples in independent countries which is submitted as a basis for discussion of the fourth item on the agenda of the 76th Session of the Conference.

*Proposed Convention Concerning Indigenous and Tribal Peoples in Independent Countries*

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its 76th Session on 7 June 1989, and

Noting the international standards contained in the Indigenous and Tribal Populations Convention and Recommendation, 1957, and

Recalling the terms of the Universal Declaration of Human Rights, the International Covenant on Economic, Social and Cultural Rights, the International Covenant on Civil and Political Rights, and the many international instruments on the prevention of discrimination, and

Considering that the developments which have taken place in

VOL 54 ISS 44 MR 8 1989 UMI

international law since 1957, as well as developments in the situation of indigenous and tribal peoples in all regions of the world, have made it appropriate to adopt new international standards on the subject with a view to removing the assimilationist orientation of the earlier standards, and

Recognising the aspirations of these peoples to exercise control over their own institutions, ways of life and economic development and to maintain and develop their identities, languages and religions, within the framework of the States in which they live, and

Noting that in many parts of the world these peoples are unable to enjoy their fundamental human rights to the same degree as the rest of the population of the State within which they live, and that their laws, values, customs and perspectives have often been eroded, and

Calling attention to the distinctive contributions of indigenous and tribal peoples to the cultural diversity and social and ecological harmony of humankind and to international co-operation and understanding, and

Noting that the following provisions have been framed with the co-operation of the United Nations, the Food and Agriculture Organisation of the United Nations, the United Nations Educational, Scientific and Cultural Organisation and the World Health Organization, as well as of the Inter-American Indian Institute, at appropriate levels and in their respective fields, and that it is proposed to continue this co-operation in promoting and securing the application of these provisions, and

Having decided upon the adoption of certain proposals with regard to the partial revision of the Indigenous and Tribal Populations Convention, 1957 (No. 107), which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of an international Convention revising the Indigenous and Tribal Populations Convention, 1957;

adopts this —— day of June of the year one thousand nine hundred and eighty-nine the following Convention, which may be cited as the Indigenous and Tribal Peoples Convention, 1989:

Part I. General Policy

*Article 1*

1. This Convention applies to:

*(a)* tribal peoples in independent countries whose social, cultural and economic conditions distinguish them from other sections of the national community, and whose status is regulated wholly or partially by their own customs or traditions or by special laws or regulations;

*(b)* peoples in independent countries who are regarded as indigenous on account of their descent from the populations which inhabited the country, or a geographical region to which the country belongs, at the time of conquest or colonisation or the establishment of present state boundaries and who, irrespective of their legal status, retain some or all of their own social, economic, cultural and political institutions.

2. Self-identification as indigenous or tribal shall be regarded as a fundamental criterion for determining the groups to which the provisions of this Convention apply.

3. The use of the term "peoples" in this Convention shall not be construed as having any implications as regards the rights which may attach to the term under other international instruments.

*Article 2*

1. Governments shall have the responsibility for developing, with the participation of the peoples concerned, co-ordinated and systematic action to protect the rights of these peoples and to guarantee respect for their integrity.

2. Such action shall include measures for:

*(a)* Enabling members of these peoples to benefit on an equal footing from the rights and opportunities which national laws and regulations grant to other members of the population;

*(b)* Promoting the full realisation of the social, economic and cultural rights of these peoples with respect for their social and cultural identity, their customs and traditions and their institutions;

*(c)* Assisting the members of the peoples concerned to raise their standard of living to that enjoyed by other members of the national community, in a manner compatible with their aspirations and ways of life.

*Article 3*

1. Indigenous and tribal peoples shall enjoy the full measure of human rights and fundamental freedoms without hindrance or discrimination.

2. No form of force or coercion shall be used in violation of the human rights and fundamental freedoms of the peoples concerned, including the rights contained in this Convention.

*Article 4*

1. Special measures shall be adopted as appropriate for safeguarding the persons, institutions, property, labour and environment of the peoples concerned.

2. Such special measures shall not be contrary to the wishes of the peoples concerned.

3. Enjoyment of the general rights of citizenship, without discrimination, shall not be prejudiced in any way by such special measures.

*Article 5*

In applying the provisions of this Convention:

*(a)* The social, cultural and religious values and practices of these peoples shall be recognised and protected, and due account shall be taken of the nature of the problems which face them both as groups and as individuals;

*(b)* The integrity of the values, practices and institutions of these peoples shall be respected;

*(c)* Policies aimed at mitigating the difficulties experienced by these peoples in adjusting to new conditions of life and work shall be adopted, with the participation and co-operation of the peoples affected.

*Article 6*

1. In applying the provisions of this Convention, governments shall:

*(a)* Consult the peoples concerned, through appropriate procedures and in particular through their representative institutions, whenever consideration is being given to legislative or administrative measures which may affect them directly;

*(b)* Establish means by which these peoples may freely participate, to at least the same extent as other sectors of the population, at all levels of decision-making in elective institutions and administrative and other bodies responsible for policies and programmes which may affect them directly;

*(c)* Make available to these peoples opportunities for the full development of their own institutions and initiatives, and in appropriate cases provide the resources necessary for this purpose.

2. The consultations carried out in application of this Convention shall be undertaken, in good faith and in a form appropriate to the circumstances, with the objective of achieving agreement or consent to the proposed measures.

*Article 7*

1. The improvement of the conditions of life and work and levels of health and education of the peoples concerned, with their participation and co-operation, shall be a matter of priority in plans for the overall economic development of areas inhabited by them. Special projects for development of the areas in question shall also be so designed as to promote such improvement.

2. The peoples concerned shall have the right to decide their own priorities for the process of development as it affects their lives, beliefs, territories, institutions and spiritual well-being and to exercise control, to the extent possible, over their own economic, social and cultural development. In addition, they shall be involved in the formulation, implementation and evaluation of plans and programmes for national and regional development which may affect them directly.

3. Governments shall ensure that, whenever appropriate, studies are carried out, in co-operation with the peoples concerned, to assess the social, spiritual, cultural and environmental impact on them of planned development activities.

4. Governments shall take measures, in co-operation with the peoples concerned, to protect and preserve the environment of the territories they inhabit.

*Article 8*

1. In the application of national laws and regulations to the peoples concerned, due regard shall be had to their customs or customary laws.

2. These peoples shall have the right to retain their own customs and institutions, where these are not incompatible with fundamental rights defined by the national legal system or with internationally recognised human rights. Procedures shall be established, whenever necessary, to resolve conflicts which may arise in the application of this principle.

3. The application of paragraphs 1 and 2 of this Article shall not prevent members of these peoples from exercising the rights granted to all citizens and from assuming the corresponding duties.

*Article 9*

1. To the extent compatible with the national legal system and internationally recognised human rights, the use of methods customarily practised by the peoples concerned for dealing with offences committed by their members shall be respected.

2. The customs of these peoples in regard to penal matters shall be taken into consideration by the authorities and courts dealing with such cases.

*Article 10*

1. In imposing penalties laid down by general law on members of these peoples account shall be taken of their economic, social and cultural characteristics.

2. Preference shall be given to methods of punishment other than confinement in prison.

*Article 11*

The exaction from members of the peoples concerned of compulsory personal services in any form, whether paid or unpaid, shall be prohibited and punishable by law, except in cases prescribed by law for all citizens.

*Article 12*

The peoples concerned shall be safeguarded against the abuse of their rights and shall be able to take legal proceedings, either individually or through their representative bodies, for the effective protection of these rights. Measures shall be taken to ensure that members of these peoples can understand and be understood in legal proceedings, where necessary through the provision of interpretation or by other effective means.

Part II. Land

*Article 13*

In applying the provisions of this Part of the Convention governments shall have due regard to the special importance for the cultures of the peoples concerned of their relationship with the lands and territories they occupy, and in particular the collective aspects of this relationship.

*Article 14*

1. The rights of ownership and possession of the peoples concerned over the lands which they traditionally occupy shall be recognised.

2. Governments shall take steps as necessary to identify the lands which the people concerned traditionally occupy, and to guarantee effective protection of their rights of ownership and possession.

3. Where appropriate, measures shall be taken to safeguard the right of the peoples concerned to use lands not exclusively occupied by them, but to which they have traditionally had access for their subsistence activities. Particular attention shall be paid to the situation of nomadic peoples and shifting cultivators in this respect.

4. Adequate procedures shall be established within the national legal system to resolve land claims by the peoples concerned, including claims arising under treaties.

*Article 15*

1. The rights of the peoples concerned to the surface resources pertaining to their lands and territories, including flora and fauna, waters and sea-ice, shall be specially safeguarded. These rights include the right of these peoples to participate in the management and conservation of these resources.

2. Governments shall establish or maintain procedures, in accordance with Article 6 of this Convention, through which they shall seek to obtain the agreement of these peoples before undertaking or permitting any programmes for the exploration or exploitation of mineral and other sub-surface resources pertaining to their lands and territories. The peoples concerned shall wherever possible participate in the benefits of such activities, and shall receive fair compensation for any such activities undertaken within their territories.

*Article 16*

1. Subject to the following paragraphs of this Article, the peoples concerned shall not be removed from the lands and territories which they occupy.

2. Where the removal of these peoples is considered necessary as an exceptional measure, such removals shall take place only with their free and informed consent. Where their consent cannot be obtained, such removal shall take place only following appropriate procedures established by national laws and regulations, including public inquiries where appropriate, which provide the opportunity for effective representation of the peoples concerned.

3. In such exceptional cases of removal, these peoples shall be provided with lands of quality and legal status at least equal to that of the lands previously occupied by them, suitable to provide for their present needs and future development. Where the peoples concerned express a preference for compensation in money or in kind, they shall be so compensated under appropriate guarantees.

4. Whenever possible, these peoples shall have the right to return to their traditional lands and territories, as soon as the grounds for removal cease to exist.

5. Persons thus removed shall be fully compensated for any resulting loss or injury.

*Article 17*

1. Procedures established by the peoples concerned for the transmission of land rights among members of these peoples shall be respected.

2. The peoples concerned shall be consulted whenever consideration is being given to their capacity to alienate their lands or otherwise transmit their rights outside their own community.

VOL 54 ISS 44 MR 8 1989 UMI

3. Persons who are not members of these peoples shall be prevented from taking advantage of their customs or of lack of understanding of the laws on the part of their members to secure the ownership, possession or use of land belonging to them.

*Article 18*

Adequate penalties shall be established by law for unauthorised intrusion upon, or use of, the lands of the peoples concerned, and governments shall take measures to prevent such offences.

*Article 19*

National agrarian programmes shall secure to the peoples concerned treatment equivalent to that accorded to other sectors of the population with regard to:

*(a)* The provision of more land for these peoples when they have not the area necessary for providing the essentials of a normal existence, or for any possible increase in their numbers;

*(b)* The provision of the means required to promote the development of the lands which these peoples already possess.

Part III. Recruitment and Conditions of Employment

*Article 20*

1. Governments shall, within the framework of national laws and regulations, and in co-operation with the peoples concerned, adopt special measures to ensure the effective protection with regard to recruitment and conditions of employment of workers belonging to these peoples, to the extent that they are not effectively protected by laws applicable to workers in general.

2. Governments shall do everything possible to prevent any discrimination between workers belonging to the peoples concerned and other workers, in particular as regards:

*(a)* Admission to employment, including skilled employment, as well as measures for promotion and advancement;

*(b)* Equal remuneration for work of equal value;

*(c)* Medical and social assistance, occupational safety and health, all social security benefits and any other occupationally related benefits, and housing;

*(d)* The right of association and freedom for all lawful trade union activities, and the right to conclude collective agreements with employers or employers' organisations.

3. The measures taken shall include measures to ensure:

*(a)* That workers belonging to the peoples concerned, including seasonal, casual and migrant workers in agricultural and other employment, as well as those employed by labour contractors, enjoy the protection afforded by national law and practice to other such workers in the same sectors, and that are fully informed of their rights under labour legislation and of the means of redress available to them;

*(b)* That workers belonging to these peoples are not subjected to working conditions hazardous to their health, in particular through exposure to pesticides or other toxic substances;

*(c)* That workers belonging to these peoples are not subjected to coercive recruitment systems, including bonded labour and other forms of debt servitude;

*(d)* That workers belonging to these peoples enjoy equal opportunities and equal treatment in employment for men and women, and protection from sexual harassment.

4. Particular attention shall be paid to the establishment of adquate labour inspection services in areas where workers belonging to the peoples concerned undertake wage employment, in order to ensure compliance with the provisions of this Part of this Convention.

Part IV. Vocational Training, Handicrafts and Rural Industries

*Article 21*

Members of the peoples concerned shall enjoy opportunities at least equal to those of other citizens in respect of vocational training measures.

*Article 22*

1. Measures shall be taken to promote the voluntary participation of members of the peoples concerned in vocational training programmes of general application.

2. Whenever existing programmes of vocational training of general application do not meet the special needs of the peoples concerned, governments shall, with the participation of these peoples, ensure the provision of special training programmes and facilities.

3. Any special training programmes shall be based on the economic environment, social and cultural conditions and practical needs of the peoples concerned. Any studies made in this connection shall be carried out in co-operation with these peoples, who shall be consulted on the organisation and operation of such programmes. Where feasible, these peoples shall progressively assume responsibility for the organisation and operation of such special training programmes, if they so decide.

*Article 23*

1. Handicrafts, rural and community-based industries, and subsistence economy and traditional activities of the peoples concerned, such as hunting, fishing, trapping and gathering, shall be recognised as important factors in the maintenance of their cultures and in their economic self-reliance and development. Governments shall, with the participation of these peoples and whenever appropriate, ensure that these activities are strengthened and promoted.

2. Upon the request of the peoples concerned, appropriate technical and financial assistance shall be provided wherever possible, taking into account the traditional technologies and cultural characteristics of these peoples, as well as the importance of sustainable and equitable development.

Part V. Social Security and Health

*Article 24*

Social security schemes shall be extended progressively to cover the peoples concerned, and applied without discrimination against them.

*Article 25*

1. Governments shall ensure that adequate health services are made available to the peoples concerned, or shall provide them with resources to allow them to design and deliver such services under their own responsibility and control, so that they may enjoy the highest attainable standard of physical and mental health.

2. Health services shall, to the extent possible, be community-based. These services shall be planned and administered in co-operation with the peoples concerned and take into account their economic, geographic, social and cultural conditions as well as their traditional preventive care, healing practices and medicines.

3. The health care system shall give preference to the training and employment of local community health workers, and focus on primary health care while maintining strong links with other levels of health care services.

4. The provision of such health services shall be co-ordinated with other social, economic and cultural measures in the country.

Part VI. Education and Means of Communication

*Article 26*

Measures shall be taken to ensure that members of the peoples concerned have the opportunity to acquire education at all levels on at least an equal footing with the rest of the national community.

*Article 27*

1. Education programmes and services for the peoples concerned shall be developed and implemented in co-operation with them to address their special needs, and shall incorporate their histories, their knowledge and technologies, their value systems and their further social, economic and cultural aspirations.

2. The competent authority shall ensure the training of members of these peoples and their involvement in the formulation and implementation of education programmes, with a view to the progressive transfer of responsibility for the conduct of these programmes to these peoples as appropriate.

3. In addition, governments shall recognise the right of these peoples to establish their own educational institutions and facilities, provided that such institutions meet minimum standards established by the competent authority in consultation with these peoples. Appropriate resources shall be provided for this purpose.

*Article 28*

1. Children belonging to the peoples concerned shall, wherever practicable, be taught to read and write in their own indigenous language or in the language most commonly used by the group to which they belong. When this is not practicable, the competent authorities shall undertake consultations with these peoples with a view to the adoption of measures to achieve this objective.

2. Adequate measures shall be taken to ensure that these peoples have the opportunity to attain fluency in the national language or in one of the official languages of the country.

3. Measures shall be taken to preserve and promote the development and practice of the indigenous languages of the peoples concerned.

*Article 29*

The imparting of general knowledge and skills that will help children belonging to the peoples concerned to participate fully and on an equal footing in their own community and in the national community shall be an aim of education for these peoples.

*Article 30*

1. Governments shall adopt measures appropriate to the traditions and cultures of the peoples concerned, to make known to them their rights and duties, especially in regard to labour, economic opportunities, education and health matters, social welfare and their rights deriving from this Convention.

2. If necessary, this shall be done by means of written translations and through the use of mass communications in the languages of these peoples.

*Article 31*

Educational measures shall be taken among all sections of the national community, and particularly among those that are in most direct contact with the peoples concerned, with the object of eliminating prejudices that they may harbour in respect to these peoples. To this end, efforts shall be made to ensure that history textbooks and other educational materials provide a fair, accurate and informative portrayal of the societies and cultures of these peoples.

Part VII. Migration Across Borders

*Article 32*

Governments shall take appropriate measures, including by means of international agreements, to facilitate contacts and co-operation between indigenous and tribal peoples across borders, including activities in the economic, social, cultural, spiritual and environmental fields.

Part VIII. Administration

*Article 33*

1. The governmental authority responsible for the matters covered in this Convention shall ensure that agencies or other appropriate mechanisms exist to administer the programmes affecting the peoples concerned, and shall ensure that they have the means necessary for the proper fulfilment of the functions assigned to them.

2. These programmes shall include:

*(a)* the planning, co-ordination, execution and evaluation, in co-operation with the peoples concerned, of the measures provided for in this Convention;

*(b)* the proposing of legislative and other measures to the competent authorities and supervision of the application of the measures taken, in co-operation with the peoples concerned.

Part IX. General Provisions

*Article 34*

The nature and scope of the measures to be taken to give effect to this Convention shall be determined in a flexible manner, having regard to the conditions characteristic of each country.

*Article 35*

The application of the provisions of this Convention shall not adversely affect rights and benefits to the peoples concerned pursuant to other Conventions and Recommendations, international instruments, treaties, or national laws, awards, custom or agreements.

Part X. Final Provisions

*Article 36*

This Convention revises the Indigenous and Tribal Populations Convention, 1957.

**Employment and Training Administration**

**Federal-State Unemployment Compensation Program; New Extended Benefit Period in the State of Alaska**

This notice announces the beginning of a new Extended Benefit Period in Alaska, effective on February 19, 1989, and remaining in effect for at least 13 weeks after that date.

**Background**

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. Under the Extended Benefit Program, individuals who have exhausted their rights to regular unemployment benefits (UI) under permanent State (and Federal) unemployment compensation laws may be eligible, during an extended benefit period, to receive up to 13 weeks of extended unemployment benefits, at the same weekly rate of benefits as previously received under the State law. The Federal-State Extended Unemployment Compensation Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Each State unemployment compensation law provides that there is

VOL 54 ISS 44 MR 8 1989 UMI

a State "on" indicator (triggering on an Extended Benefit Period) for a week if the head of the State employment security agency determines that, for the period consisting of that week and the immediately preceding 12 weeks, the rate of insured unemployment in the State equaled or exceeded the State trigger rate. The Extended Benefit Period actually begins with the third week following the week for which there is an "on" indicator in the State. A benefit period will be in effect for a minimum of 13 weeks, and will end the third week after there is an "off" indicator.

**Determination of an "on" Indicator**

The head of the employment security agency of the State named above has determined that the rate of insured unemployment in the State, for the 13-week period ending on February 4, 1989, equals or exceeds 6 percent, so that for that week there was an "on" indicator in the State.

Therefore, a new Extended Benefit Period commenced in the State with the week beginning on February 19, 1989. This period will continue for no less than 13 weeks, and until three weeks after a week in which there is an "off" indicator in the State.

**Information for Claimants**

The duration of extended benefits payable in the Extended Benefit Period, and the terms and conditions on which they are payable, are governed by the Act and the State unemployment compensation law. The State employment security agency will furnish a written notice of potential entitlement to extended benefits to each individual who has established a benefit year in the State that will expire after the new Extended Benefit Period begins. 20 CFR 615.13(d)(1). The State employment security agency also will provide such notice promptly to each individual who exhausts all rights under the State unemployment compensation law to regular benefits during the Extended Benefit Period. 20 CFR 615.13(d)(2).

Persons who believe they may be entitled to extended benefits in the State named above, or who wish to inquire about their rights under the Extended Benefit Program, should contact the nearest State employment service office or unemployment compensation claims office in their locality.

Signed at Washington, DC, on February 24, 1989.

**Roberts T. Jones,**

*Assistant Secretary of Labor.*

## NATIONAL SCIENCE FOUNDATION

### Interagency Arctic Research Policy Committee; Meeting

In accordance with the Arctic Research and Policy Act, Pub. L. 98-373, the National Science Foundation announces the following meeting:

*Name:* Interagency Arctic Research Policy Committee.

*Date & Time:* March 27, 9:00 a.m.

*Place:* National Science Foundation, Room 540 1800 G Street, NW., Washington, DC.

*Type of Meeting:* Open, but part of the meeting will be closed for a discussion of agency budget initiatives.

*Contact Person:* Jerry Brown, Division of Polar Programs, Room 627, National Science Foundation, Washington, DC 20550. Telephone: (202) 357-7817.

*Purpose of Meeting:* The Interagency Arctic Research Policy Committee was established by Pub. L. 98-373, the Arctic Research and Policy Act, to survey arctic research, help determine priorities for future arctic research, develop a natonal arctic research policy, prepare a single, integrated multi-agency budget request for arctic reasearch, develop a plan to implement national arctic research policy, and facilitate cooperation in and coordination of arctic research.

*Agenda: Open Session* 9:00 a.m.

1. Welcome and Introductions
2. Discussion of Biennial Revision to U.S. Arctic Research Plan
3. Comments from Arctic Research Commission
4. Status of International Arctic Scientific Activities
5. Other Business

*Closed Session.* Disussion of Ageny Arctic Budget Initiatives.

*Public Participation:* Committee meetings are not designed as public hearings and will not normally receive verbal comments from observers unless specifically invited by the Committee. Observers invited to address the Committee will be limited to five minutes each. An invitation to address the Committee is contingent upon advance submission of the proposed statement and a determination by the Committee that such statement is relevant and appropriate to the agenda at the particular meeting. The texts of such statements shall not exceed five double-spaced typed pages each.

## NUCLEAR REGULATORY COMMISSION

### Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

**I. Background**

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from February 10, 1989 through February 24, 1989. The last biweekly notice was published on February 22, 1989 (54 FR 7822).

### NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 7, 1989 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

**Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529 and STN 50-530, Palo Verde Nuclear Generating Station (PVNGS), Unit 1, 2 and 3, Maricopa County, Arizona**

*Date of amendment request:* November 9, 1988

*Description of amendment request:* The proposed amendment would revise the PVNGS Technical Specifications (TS), Section 3.4.5.1, "RCS Leak Detection System" by revising the operability requirements of the monitoring systems which comprise the RCS Leak Detection System, and the

VOL 54 ISS 44 MR 8 1989 UMI

associated Action Statements. More specifically, the proposed amendments to TS Section 3.4.5.1 would clarify that primary system leakage is monitored by two independent techniques, not three. Airborne radioactivity is monitored using the particulate and/or gaseous monitor and the liquid volumes are monitored using the sump level and/or flow monitoring system.

Currently, the TS list three independent detection systems: containment atmosphere particulate radioactivity monitoring system, containment sump level and flow monitoring system, and the containment atmosphere gaseous radioactivity monitoring system. However, the containment atmosphere particulate system and the gaseous system are a common system utilizing the same power source, sample point and various other common components.

The proposed Action Statement for inoperable containment atmosphere gaseous radioactivity and containment atmosphere particulate radioactivity would also be revised to allow continued operation for up to 30 days provided that gaseous and/or particulate grab samples of the containment atmosphere are obtained at least once per 12 hours and analyzed within the subsequent 3 hours, and that the containment sump level and flow monitoring system is available.

In addition, the proposed Action Statement for inoperable containment sump level and flow monitoring system would allow continued operation for up to 30 days provided the containment atmosphere gaseous radioactivity monitoring and the containment atmosphere particulate radioactivity monitoring system are operable.

*Basis for Proposed No Significant Hazards Consideration Determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensees have evaluated the proposed amendment against these standards and have provided the following discussion:

Standard 1 - Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed change does not alter the current design or operation of the facility. The revised operability requirements will not provide significant degradation to the Reactor Coolant System leakage detection capability. These changes do not adversely affect the consequences of the design basis accidents. Therefore, the proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

Standard 2 - Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated. Since there are no changes in the way the plant is being operated, the potential for an unanalyzed accident is not created. No new failure modes are introduced. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Standard 3 - Involve a significant reduction in a margin of safety.

The proposed change does not involve a significant reduction in a margin of safety. The proposed changes do not have any adverse impact on the containment integrity. Since the proposed changes do not affect the consequences of any accident previously analyzed, there is no reduction in the margin of safety.

The proposed change matches two of the examples given in 51 FR 7751 of amendments that do not include a significant hazards consideration. The proposed changes are enveloped by example (ii), a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications, e.g., a more stringent action statement. The proposed changes require that grab samples of the containment atmosphere be obtained at least once per twelve hours and analyzed within the next three hours. This requirement is more restrictive than the current Technical Specification which requires that grab samples of the containment atmosphere be obtained and analyzed at least once per twenty-four hours....

The staff has reviewed the licensees' no significant hazards analysis and concurs with their conclusions. As such, the staff proposes to determine that the requested changes do not involve a significant hazards consideration.

*Local Public Document Room location:* Phoenix Public Library, Business and Science Division, 12 East McDowell Road, Phoenix, Arizona 85004

*Attorney for licensees:* Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

*NRC Project Director:* George W. Knighton

**Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina**

*Date of application for amendments:* February 29, 1988

*Description of amendment request:* The proposed change for the Brunswick Steam Electric Plant (BSEP) would delete Surveillance Requirement 4.8.1.1.1.b which requires that the on-site Class 1E distribution system be demonstrated operable at least once per 18 months during shutdown by manually transferring the unit power supply from the normal circuit to the alternate circuit.

*Basis for proposed no significant hazard consideration determination:* The Commission has provided standards for determining whether a no significant hazard consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The Carolina Power & Light Company (CP&L) has reviewed the proposed deletion to TS and has determined that the requested amendment does not involve a significant hazards consideration for the following reasons:

1. The proposed change deletes a Surveillance Requirement that does not apply to the BSEP design. The intent of the surveillance requirement; to demonstrate power source operability, is met on a continuous basis by continually providing four normal offsite power sources for each unit as opposed to a single normal and a single alternate offsite power source. Deletion of this requirement has no impact on the consequences of any accident because the intent of the surveillance requirement is met and verified continuously. The current Technical Specification only requires verification on an 18 month basis. The probability of an accident is likewise unchanged, simply because current practice is more conservative than the existing surveillance requirement.

2. The present electrical distribution system does not physically change as a result of the proposed change; nor does its operation. Manual transfer from a normal to an alternate power source is not possible at BSEP, simply because there is no differentiation between "normal" and "alternate" power sources. Each of the four transmission lines on each unit are

continuously energized. Only two are required to be operable to meet the intent of Technical Specification 3.8.1.1. These four supply lines will continue to provide the offsite power necessary to provide sufficient capacity and capability to automatically start and operate all required safety loads. Based on this reasoning, CP&L has determined that the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change deletes a surveillance requirement which is not consistent with the BSEP design basis. The surveillance requirement requires that each of the two independent circuits be demonstrated operable at least once per 18 months by manually transferring unit power supply from the normal circuit to the alternate circuit. At BSEP, there are four independent circuits for each unit (transmission lines) and there is no difference between the alternate and normal power supplies. Manual transfer of the power supply is not necessary because each of the four lines for each unit is normally energized, and therefore verified operable, continuously. Thus, the intent of Technical Specification 3.8.1.1 is met, and the offsite power sources are verified operable more frequently than the current surveillance requires. Thus, there is no decrease in the margin of safety.

The staff has reviewed the CP&L determinations and agrees that CP&L has met the three standards involved for determination of no significant hazards consideration. Accordingly, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

*Local Public Document Room location:* University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

*Attorney for licensee:* R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

*NRC Project Director:* Elinor G. Adensam

**Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina**

*Date of application for amendments:* September 19, 1988

*Description of amendment request:* The proposed change revises the actions associated with Technical Specification 3/4.6.4 (Drywell-Suppression Chamber - Vacuum Breakers) to clarify the alternative actions to be taken if the existing actions cannot be taken. To do this, existing Action 3.6.4.1.d will be incorporated into Actions 3.6.4.1.a, 3.6.4.1.b, and 3.6.4.1c and present action 3.6.4.1.d will be deleted. Action a addresses no more than two drywell - suppression chamber vacuum breakers inoperable for opening, but closed, whereas action b addresses one open vacuum breaker. Action c deals with vacuum breakers position indication inoperability whereas action d defines unit shutdown requirements.

*Basis for proposed no significant hazard consideration determination:* The Commission has provided standards for determining whether a no significant hazard consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The Carolina Power & Light Company (CP&L) has reviewed the proposed changes and has determined that the requested amendment does not involve a significant hazards consideration for the following reasons:

1. The proposed change clarifies the existing requirement of Technical Specification 3.6.4.1. It does not impact plant equipment or design; it only provides a clearer statement of the actions to be taken if Technical Specification 3.6.4.1 cannot be met, thereby providing assurance that the proper actions are taken when necessary. The probability of an accident is not increased because the requirement of Technical Specification 3.6.4.1 and its actions have not changed; the actions have only been clarified. The same is true for the consequences of an accident; they have not changed because the requirements of Technical Specification 3.6.4.1 and its actions have not changed.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated because the requirements of Technical Specification 3.6.4.1 and its actions have not changed. The proposed change requires that if Actions 3.6.4.1.a, 3.6.4.1.b, or 3.6.4.1.c cannot be met, the unit must be in hot shutdown within 12 hours and in cold shutdown within the next 24 hours, just as Technical Specification 3.6.4.1. and its actions currently require.

3. The proposed amendment only clarifies the existing requirement of Technical Specification 3.6.4.1 and its actions. It does not change the design or operation of plant equipment, nor does it change the intent of any requirements provided in the Technical Specifications. Therefore, it does not involve a significant reduction in the margin of safety.

The staff has reviewed the CP&L determination and is in agreement with them. Accordingly, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

*Local Public Document Room location:* University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

*Attorney for licensee:* R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

*NRC Project Director:* Edward A. Reeves

**Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York**

*Date of amendment request:* August 18, 1986, as modified January 25, 1989.

*Description of amendment request:* The proposed amendment would modify the licensee's August 18, 1988 application for amendment which was noticed on October 8, 1986 (51 FR 36067). The August 18, 1986 application proposed to add requirements to Technical Specification Tables 3.5-2 and 4.1-1 requiring the operability and surveillance of the reactor trip breakers shunt trip attachment in accordance with the requirements of item 4.3 of Generic Letter 83-28. The August 18, 1986 application proposed that with one reactor trip logic train inoperable, reactor operation at power be permitted to continue (allowable-out-of-service time) for up to 48 hours. The proposed amendment would reduce this allowable-out-of-service time to six hours. The six hour allowable-out-of-service time is consistent with the requirements of Generic Letter 85-09. The proposed amendment would also add a restriction of eight hours for the time during which reactor operation at power may continue with a reactor trip breaker and/or associated logic channel bypassed for maintenance or surveillance testing. The proposed amendment would also correct two minor typographical errors.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). Example (ii) of those involving no significant hazards consideration discusses a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example, a more stringent surveillance requirement. The proposed changes to Technical Specification Tables 3.5-2 and 4.1-1 with respect to the reactor trip breakers provide new explicit Limiting Conditions

VOL 54 ISS 44 MR 8 1989 UMI

for Operation and testing requirements consistent with the modified shunt trip design, not previously included in Technical Specifications.

The licensee provided the following analysis of the proposed changes:

The proposed change does not involve a significant hazards consideration because operation of Indian Point Unit No. 2 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The Technical Specification changes submitted reflect plant modifications already implemented and reviewed pursuant to 10 CFR 50.59, and as such are expected to enhance the reliability of the reactor trip breakers to trip on demand. The proposed Technical Specification changes are consistent with guidance contained in Generic Letter 85-09. In addition, the proposed changes constitute additional controls not presently included in the Technical Specifications. Therefore, this change will not increase the probability or consequences of an accident.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed Technical Specification changes resulted from extensive review and analysis of the Salem ATWS event and are a result of modifications made as recommended by those analyses. The proposed change would not alter the configuration of any of the plant's safety equipment. Therefore, it has been determined that this change will not create the possibility of a new or different kind of accident from that previously evaluated.

(3) Involve a significant reduction in a margin of safety. The modifications made to the plant increase the margin of safety and the proposed Technical Specifications changes reflect additional conservative administrative controls based on those modifications. Therefore, it has been determined that this change does not involve a significant reduction in a margin of safety.

Based on the above consideration, and inasmuch as this proposed change is similar to an example for which the Commission has determined no significant hazards considerations exist (i.e., a new limitation or surveillance requirement), the licensee concluded this proposed change does not constitute a significant hazards consideration.

The staff agrees with the licensee's analysis. Therefore, based on the above, the staff proposes that the proposed amendment will not involve a significant hazards consideration.

*Local Public Document Room location:* White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

*Attorney for licensee:* Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003

*NRC Project Director:* Robert A. Capra, Director

**Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina**

*Date of amendment request:* March 16, 1987, as supplemented April 24, 1987

*Description of amendment request:* The proposed amendment request would delete the requirements in the Technical Specifications (TS) for resistance testing of certain fuses whose function is to provide containment penetration conductor overcurrent protection, and would substitute a requirement that a fuse inspection and maintenance program be maintained to ensure that the proper size and type of fuse is installed, that the fuses show no signs of deterioration, and that the fuse connections are tight and clean. The list of containment penetration conductor overcurrent protective devices (circuit breakers and fuses) would be deleted from the TS and the associated testing technique for these circuit breakers would be relocated to the TS Bases.

*Basis for proposed no significant hazards consideration determination:* The TS currently require that among other things, all containment penetration conductor overcurrent protection fuses shall periodically be demonstrated operable by selecting and functionally testing a representative sample (10%) of each type of fuse on a rotating basis. The proposed license amendment application addresses the fact that resistance checking of fuses does not provide a meaningful assurance of the fault interrupting capability of the fuse, and that periodic removal of fuses for testing can compromise the integrity of the fuse holder and contact points. In lieu of resistance testing, the change would require a fuse inspection and maintenance program in conformance with IEEE Standard 242-1975, which calls for "inspection to ensure that the proper size fuse is installed, that it shows no signs of deterioration, and that the enclosure is clean and the connections are tight." Based on these considerations, and the fact that resistance verification is performed by the vendor during the manufacturing process, the deletion of the requirements for resistance checking of these fuses would not involve a significant increase in the probability of fuse failure. Since the proposed deletion of field testing by resistance would not impact fuse integrity, would not affect the method of plant operation, and would not affect equipment important to safe operation, the proposed amendment would not create the possibility of a new and different accident from any previously evaluated. Since the resistance checking of fuses only generates data that are not indicative of performance, and resistance checking would be replaced by an inspection and maintenance program, the deletion of the requirements for resistance checking of these fuses would not significantly reduce any margins of safety.

TS Tables 3.1-1a for Unit 1 and 3.1-1b for Unit 2 presently list the containment penetration conductor overcurrent protective devices (circuit breakers and fuses), their trip setpoints or continuous ratings, and their response times. The license amendment application addresses the fact that the deletion of this list from the TS shall in no way degrade compliance with the operability of the containment penetration conductor overcurrent protective devices since it is proposed that the list of these devices, including their trip setpoints or continuous ratings and their response times, would be maintained in an appropriately controlled (QA Condition 1) document entitled "Electrical Controls System Description - Electrical Penetration Circuits," which would be referenced in the associated TS Bases 3/4.8.4. Test procedures for fuses and breakers used at the plant would reference this system description document. The Commission has determined that removal of these circuit breakers and fuses from the TS is consistent with its TS Improvement Program. Maintaining the list in the system description document instead of in the TS will allow the licensee to have the flexibility in the future to change the list as needed without first obtaining a TS change. Examples of such changes are the addition or deletion of circuits (and breakers) or the changing of a circuit to require a larger or smaller breaker, as a result of a design change in the plant. The licensee states that its reviews regarding any modification to containment penetration circuits, including additions or deletions thereof, will be in accordance with 10 CFR 50.59, and will assure completeness and accuracy of the tables. The Commission has provided guidance (51 FR 7744) concerning examples of amendments that are not likely to involve a significant hazards consideration. This part of the amendment request matches the example of a purely administrative change to the technical specifications. The list of containment electrical penetration protective devices will be administratively maintained in the licensee-controlled document rather than in the TS, and this will in no way degrade the operability or surveillance requirements of these devices.

Accordingly, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

*Local Public Document Room location:* Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

*Attorney for licensee:* Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

*NRC Project Director:* David B. Matthews

**Duquesne Light Company, Docket No. 50-412, Beaver Valley Power Station, Unit No. 2, Shippingport, Pennsylvania**

*Date of amendment request:* January 30, 1989

*Description of amendment request:* The proposed amendment would revise three license conditions to extend the completion dates for three issues from the first to the second refueling outage. These issues concern the plant safety monitoring system (PSMS), detailed control room design review (DCRDR) and safety parameter display system (SPDS).

With regard to the change to the PSMS license condition, the licensee has not yet received any document evaluating its verification and validation plan. NRC approval may come too late for the licensee to effect changes. Therefore, the change is submitted for such an eventuality.

Concerning the change to the DCRDR license condition, the licensee stated that this program identified a large number of human engineering deficiencies (HEDs). Despite past and current efforts, a few HEDs are unlikely to be all resolved before startup from the first refueling outage. The majority, however, have been resolved.

Finally, regarding the change to the SPDS license condition, the licensee stated that the majority of issues will be resolved/completed on schedule. However, some faults identified through site acceptance and final response time testing would not be completed in time.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists in accordance with 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazard consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The proposed amendment would relax the implementation schedules for the PSMS, DCRDR and SPDS. The extensions themselves do not create additional changes in plant design or hardware, or operating procedures of the plant. These programs and their associated hardware cannot adversely affect safety equipment or cause accidents. Even though their full implementation is expected to help reduce the consequences and probabilities of accidents, their incomplete implementation does not increase consequences and probabilities of accidents. Hence the answers to questions (1) and (2) are negative. Finally, these programs and associated hardware were not factored into any analysis, and hence their delayed implementation does not reduce any margin of safety. The answer to question (3) is similarly negative.

The staff therefore proposes to determine that the requested amendment involve no significant hazards.

*Local Public Document Room location:* B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

**GPU Nuclear Corporation, et al., Docket No. 50-289, Three Mile Island Nuclear Station, Unit No. 1, Dauphin County, Pennsylvania**

*Date of amendment request:* January 31, 1989

*Description of amendment request:* Makes numerous administrative changes to the Technical Specifications and their bases to improve their clarity and consistency and to correct an error in a previous amendment (142).

*Basis for proposed no significant hazards consideration determination:* GPU Nuclear Corporation has determined that this Technical Specification change request poses no significant hazards as defined by the NRC in 10 CFR 50.92.

1. The proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated. The probability of occurrence or the consequences of previously evaluated accidents are not affected by these changes because the majority of the changes are administrative in nature, or serves to conform to existing regulations which do not affect the plant configuration or operation.

2. Operation of the facility in accordance with the proposed Technical Specification changes would not create the possibility of a new or different kind of accident from any previously evaluated. As stated above, these changes are administrative in nature, conform to existing regulations.

3. Operation of the facility in accordance with the proposed changes would not involve a significant reduction in the margin of safety. The administrative changes do not reduce the margin of safety because of the nature of such changes which serve to provide additional clarity or enhanced understanding of existing Technical Specifications and bases statements.

The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

*Local Public Document Room location:* Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

**Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-366, Edwin I. Hatch Nuclear Plant, Unit 2, Appling County, Georgia**

*Date of amendment request:* January 23, 1989

*Description of amendment request:* The amendment would change the Technical Specifications (TS) to require a local leak rate test (LLRT) on each main steam isolation valve (MSIV) to be conducted during each refueling outage, but at intervals not to exceed two years, rather than at 18-month intervals as required by the existing TS. The amendment also would revise TS 4.6.1.2.d.2 to specify the test pressure.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of

VOL 54 ISS 44 MR 8 1989 UMI

a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensee's January 23, 1989 submittal provided the following evaluation of the proposed change with respect to these standards:

This change does not involve a significant increase in the probability or consequences of an accident, because the leakage rate testing on the MSIVs will still be performed within the time interval set forth [in] by the NRC in 10 CFR Part 50, Appendix J. In addition, the addition of the required test pressure under the specification addressing the Type C tests is merely a clarification of an exemption to 10 CFR Part 50, Appendix J previously granted by the NRC as evidenced in Specification 3.6.1.2.c. Thus, the addition of the test pressure value is merely an administrative change.

The possibility of a different kind of accident from any analyzed previously is not created by this change, since the proposed change of extending the potential time duration between MSIV LLRTs is consistent with the 10 CFR Part 50, Appendix J regulations. The administrative change of indicating the test pressure of the MSIV LLRTs under the specification section covering Type C tests has already been approved by the NRC as an exemption to the 10 CFR Part 50, Appendix J requirements.

Margins of safety are not significantly reduced by this change, since the valves will continue to be tested at regular intervals consistent with other primary containment isolation valves and at the required test pressure as required by the GPC Plant Hatch 10 CFR Part 50, Appendix J program.

The staff has considered the proposed changes and agrees with the licensee's evaluation with respect to the three standards.

On this basis, the Commission has determined that the requested amendment meets the three standards and, therefore, has made a proposed determination that the amendment application does not involve a significant hazards consideration.

*Local Public Document Room location:* Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

*Attorney for licensee:* Bruce W. Churchill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

*NRC Project Director:* David B. Matthews

**Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois**

*Date of amendment request:* December 21, 1988

*Description of amendment request:* This proposed amendment would revise Technical Specification 4.6.6.1.c.1 to provide appropriate values for the secondary containment drawdown test. The limit provided would replace the current value of 168 seconds with a graph which specifies the drawdown time as a function of the standby gas treatment system flow rate observed during the drawdown when the required differential pressure of 0.25 inches (water gauge) is attained. The acceptance criteria specified for the drawdown test is based on a computer model, verified by the actual performance of drawdown tests, in which the drawdown time determined for accident conditions is adjusted to account for performance of the test during normal plant conditions.

This amendment was provided to comply with a commitment by the licensee to analyze the drawdown time under actual or normal test conditions and to provide an appropriate value for the drawdown test criteria at least 60 days prior to the initiation of the second fuel cycle.

*Basis for proposed no significant hazards consideration determination:* The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed change to the testing acceptance criteria is intended only to revise the criteria to more accurately demonstrate the capability of the system to perform under accident conditions. The new test criteria is revised to reflect that the system would be able to perform its intended function less time under normal conditions that under accident conditions.

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change introduces no changes to plant design or operation of the facility. The requirement for testing the containment drawdown has not been changed, only the criteria for acceptability.

The proposed changes do not involve a significant reduction in a margin of safety because the criteria for acceptability has been revised in a more stringent direction from that which currently exists.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

*Local Public Document Room location:* Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

*Attorney for licensee:* Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

*NRC Project Director:* Daniel R. Muller

**Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois**

*Date of amendment request:* January 26, 1989

*Description of amendment request:* This proposed amendment would revise Technical Specification 4.4.1.1.3.d to provide consistency with ACTION "d" of the associated Limiting Condition for Operation, Technical Specification 3.4.1.1. The current surveillance requirement directs that while in single loop operation, a minimum core flow must be verified when thermal power is within the unrestricted zone of Figure 3.4.1.1-1. However, the associated LCO action statement requires that when core flow is less than the required minimum and thermal power is within the restricted zone that either the thermal power must be reduced to the unrestricted zone or core flow must be increased above the required minimum. These two statements are in clear conflict. Based on an analysis of the intent of this section of the technical specifications, the amendment proposes to revise the surveillance requirement to require verification of the minimum core flow when thermal power is within the restricted rather than the unrestricted zone.

*Basis for proposed no significant hazards consideration determination:* The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because providing consistency between the surveillance and LCO will help to ensure that the plant is operated within the bounds and assumptions of the analyses performed and approved for single-loop operation (SLO). The SLO analysis included an evaluation of the impact of SLO on the applicable accident analyses. The proposed change does not involve any changes to the accident or single-loop analyses themselves.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated since it does not affect plant design. The scope of the proposed change is limited only to an editorial correction to ensure that the affected surveillance is consistent with the applicable SLO analyses.

The proposed change does not involve a significant reduction in a margin of safety because it will make the surveillance consistent with the purpose of monitoring core flow during core-flow/reactor power conditions corresponding to the restricted zone of Figure 3.4.1.1. Maintaining core flow above the specified value when in the restricted zone maintains sufficient margin from low-flow conditions where power/flow ratios may be high enough for destabilizing effects to occur.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

**Philadelphia Electric Company, Docket No. 50-352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania**

*Date of amendment request:* November 4, 1988

*Description of amendment request:* The application requests changes to the Technical Specifications (TSs) to permit operation of the reactor with one of two reactor recirculation loops in service under certain specified conditions. Section 3.4.1.1 of the TSs currently has an "ACTION" requirement which states: "With one reactor coolant system recirculation loop not in operation, immediately initiate action to reduce THERMAL POWER...within two hours and initiate measures to place the unit in at least HOT SHUTDOWN within 12 hours...." The proposed changes would allow reactor operation with only one recirculation loop, at reduced power and for significant periods of time, without the need to remove the reactor from service.

Single Loop Operation (SLO) is the operation of a reactor with only one recirculation loop in service. The use of SLO provides a great deal of operational flexibility and serves as a mechanism to avoid the unnecessary removal of a reactor from service with the attendant cycling of reactor components in the event a recirculation pump or other component malfunction renders one recirculation loop inoperable. During SLO, the core pressure drop is reduced and the total discharge flow from the active bank of jet pumps increases at rated drive flow. Flow through the inactive jet pumps reverses direction and the flow pattern in the reactor lower plenum becomes asymmetric relative to rated conditions with balanced two-loop inlet flow. SLO is a recognized practice for boiling water reactors that has been previously accepted and licensed by the Nuclear Regulatory Commission at various facilities including Peach Bottom Atomic Power Station, Hope Creek Generating Station, Susquehanna Steam Electric Station, Browns Ferry Nuclear Station, Duane Arnold, et al. The NRC has determined that SLO of BWR's is generically acceptable as set forth in Generic Letter No. 86-09, "Technical Resolution of Generic Issue No. B-59-(N-1) loop operation in BWRs and PWRs," dated March 31, 1986.

The design basis accidents and abnormal operational transients associated with power operation, as presented in the Limerick Final Safety Analysis Report (FSAR), Sections 6.2 and 6.3, and the main text of Chapter 15.0 have been reviewed for unit operation with only one recirculation loop in service. The transient safety analysis was performed on an initial cycle basis consistent with that for the FSAR. The analysis shows that the transient consequences for SLO are bounded by the full power two loop operation analysis results given in the FSAR. The conclusion drawn from the transient analysis results is applicable to reload cycle operation as well as initial cycle operation for the Limerick Generating Station (LGS).

Operating with one recirculation loop results in a maximum power output approximately 30% below that which is attainable for two-loop operation. Therefore, the consequences of abnormal operational transients from one-loop operation will be considerably less severe than those analyzed for two-loop operation. For pressurization, flow increase, flow decrease, and cold water injection transients, the results presented in Chapter 15 of the LGS FSAR for two-loop operation bound both the thermal and overpressure consequences of SLO.

The Loss of Coolant Accident (LOCA) analysis presented in LGS FSAR Section 15.6 has been evaluated for SLO. The evaluation utilized the GE methodology outlined in NEDO-20566-2, Revision 1, "General Electric Company Analytical Model for Loss-of-Coolant Analysis in Accordance with 10 CFR 50 Appendix K Amendment No. 2 - One Recirculation Loop Out-of-Service," dated July 1978.

The licensee also presented the results of certain other analyses, the consequences of which are bounded by previously submitted full power two loop operation analyses. These include MCPR operating limit, containment analysis, ATWS and fuel mechanical performance. Consequently, no changes to the Technical Specifications addressing these areas are proposed based on the results of these analyses.

As noted previously, the licensee has proposed certain operating restrictions that would go into effect if the plant were to enter SLO. The proposed changes to the TSs are listed below:

The proposed changes on Page 2-1 raise the Safety Limit Minimum Critical Power Ratio (MCPR) by 0.01 to account for increased uncertainties in the core total flow and Traversing Incore Probe (TIP) readings during SLO.

The proposed changes on Pages 2-4, 3/4 2-7, 3/4 3-60, and 3/4 3-60a provide individual Average Power Range Monitor (APRM) scram and rod block equations and Rod Block Monitor (RBM) rod block equations for two loop operation and SLO to account for the discrepancy between actual core flow and indicated flow in the active loop during SLO.

The proposed change on Page 3/4 2-1 incorporates a Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) reduction factor of 0.89 for SLO. The MAPLHGR reduction factor accounts for core flow decreasing more rapidly during a LOCA in SLO than two-loop operation which could result in more severe heatup of fuel cladding.

VOL 54 ISS 44 MR 8 1989 UMI

The proposed changes on Pages 3/4 4-1 through 3/4 4-2 incorporate action statements and associated surveillance requirements to ensure SLO is conducted within the analyzed bases. In addition to the previously mentioned MCPR, MAPLHGR, APRM and RBM changes, this specification restricts SLO to manual flow control, limits thermal power to less than or equal to 70% of rated, limits operating recirculation pump speed to less than or equal to 90% of rated, and establishes thermal hydraulic stability and differential temperature requirements.

The proposed changes to Figure 3.4.1.1-1 Thermal Power Versus Core Flow on Page 3/4 4-3 define the unrestricted and restricted operating regions of the percentage rated core thermal power versus percentage rated core flow curves.

The proposed changes on Pages 3/4 4-4 and 3/4 4-4a establish jet pump operability Surveillance Requirements for SLO.

In addition, changes are proposed on Page 3/4 2-7 to delete an ambiguous phrase in the note; on Pages 3/4 2-10 and 3/4 2-10a to provide notes to clarify the applicability of MCPR operating limits; on Page 3/4 4-5 to clarify the recirculation loop flow mismatch Action requirements; and on Pages B2-1, B3/4 1-2, B 3/4 2-1, B 3/4 2-2, B 3/4 2-4 and B 3/4 4-1 to incorporate the results of SLO analyses in the Bases.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three criteria, both generally and for each TS change, in the amendment application and made a no significant hazards consideration determination. The licensee's analysis of the proposed amendment is reproduced below:

The proposed Technical Specification changes for SLO will not increase the probability or consequences of any accident previously evaluated. The design basis accidents and abnormal operational transients associated with power operation, as presented in the LGS FSAR, Sections 6.2 and 6.3, and Chapter 15.0 have been reviewed for unit operation with only one recirculation loop in service. The appropriate setpoints and operating limits are adjusted for SLO and are bounded by the LGS FSAR analysis performed for two-loop operation.

The proposed Technical Specification changes will not create the possibility of a new or different accident from any previously evaluated. Although the proposed changes introduce a new mode of operation, the possible accidents during SLO are the same as those analyzed in the FSAR for two-loop operation and are within the bounds of the LGS FSAR analysis.

The proposed Technical Specification changes will not involve a significant reduction in a margin of safety. The proposed changes adjust the appropriate setpoints and operating limits for SLO to maintain or improve the current margin of safety.

A no significant hazards consideration determination for each proposed change follows:

A. MCPR Safety and Operating Limit for SLO

(1) The proposed increase in the MCPR fuel cladding integrity safety limit during SLO does not increase the probability or consequences of any accident previously evaluated.

The MCPR fuel cladding integrity safety limit is set such that no fuel damage is calculated to occur if the limit is not violated. It is determined using the NRC approved General Electric Thermal Analysis Basis (GETAB), which is a statistical model that combines uncertainties in the methods used to calculate critical power. For SLO, the uncertainties in total core flow and TIP readings used in the determination of the safety limit MCPR are larger than for two-loop operation. The total core flow and TIP reading uncertainties for SLO have been analyzed. The net effect of these two revised uncertainties is a 0.01 incremental increase in the required MCPR fuel cladding integrity safety limit to a higher safety limit MCPR of 1.08 for SLO.

The current MCPR operating limit and flow-dependent MCPR limit provide adequate protection for transients initiated during SLO. The results of the analyses of these events show sufficient margin to the proposed increased MCPR fuel cladding integrity safety limit. The consequences of abnormal operational transients during single loop operation will be less severe than those analyzed for two-loop operation due to reduced maximum power output. For pressurization, flow increase, flow decrease, and cold water injection transients, the results presented in Chapter 15 of the LGS FSAR bound both the thermal and overpressure consequences of SLO. The two most limiting pressurization transients analyzed for SLO are Feedwater Controller Failure - Maximum Demand (FWCF) and Generator Load Rejection with Bypass Failure (LRBPF).

The FWCF event is postulated on the basis of a single failure of a master feedwater control device, specifically one which can directly cause an increase in coolant inventory by increasing the total feedwater flow. The most severe applicable event is a feedwater controller failure during maximum flow demand. The calculated transient MCPR of 1.20 for SLO is much greater than the current safety limit of 1.07 and the proposed limit of 1.08. The resulting peak vessel pressure of 1113 psig is much less than the ASME limit of 1375 psig. The LRBPF event which is the loss of generator electrical load from high power conditions with failure of the main turbine bypass valves is discussed in FSAR Section 15.2.2. The calculated transient MCPR of 1.10 for SLO is much greater than the current safety limit 1.07 and the proposed limit of 1.08. The resulting peak vessel pressure of 1182 psig is much less than the ASME limit of 1375 psig.

The safety limit MCPR for SLO is set such that no fuel damage is calculated to occur and thereby accomplishes the same purpose as the two-loop operation limit. Because the revised higher safety limit of 1.08 maintains the current margin of safety and the current operating limit maintains sufficient margin to the revised safety limit, the change to the MCPR safety limit during SLO does not increase the probability or consequences of any accident previously evaluated.

(2) The proposed increase in the MCPR fuel cladding integrity safety limit during SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The MCPR safety limit cannot initiate an accident and imposing the MCPR limit does not involve a change in the current mode of operation; therefore, this change does not create the possibility of a new or different kind of accident than previously evaluated.

(3) The proposed increase in the MCPR fuel cladding integrity safety limit during SLO does not involve a significant reduction in a margin of safety.

The MCPR safety limit is determined using NRC approved methodology. The proposed 0.01 increase accounts for the increased uncertainties in total core flow and TIP readings due to SLO. This increase in the MCPR safety limit maintains the margin of safety established for two-loop operation. Therefore, this change does not involve a significant reduction in the margin of safety.

B. Correction of RBM and APRM Flow-Biased Setpoint Equations

(1) The proposed changes to the RBM and APRM flow-biased setpoint equations do not increase the probability or consequences of any accident previously evaluated.

SLO results in backflow through 10 of the 20 jet pumps such that the direct active-loop flow measurement may not indicate actual flow above about 40% core flow without correction. The proposed changes to the RBM and APRM flow-biased setpoint equations conservatively modify the recirculation flow rate dependent rod block and scram setpoint equations to correct for one pump operation. The proposed changes adjust the setpoint equations to preserve the original relationship between the setpoints and the effective drive flow when operating in SLO such that the consequences of a rod withdrawal error during SLO are bounded by the analysis presented in FSAR Section 15.4.2. Further, lower power during SLO assures that the MCPR operating limit is not violated. Therefore, the changes to the RBM and APRM flow-biased setpoint equations do not increase the probability or consequences of an accident previously evaluated.

(2) The proposed changes to the RBM and APRM flow-biased setpoint equations do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes correct the RBM and APRM flow-biased setpoint equations to preserve the original relationship between the setpoints and the actual effective drive flow when operating in SLO and therefore do not create the possibility of a new or different kind of accident than previously evaluated.

(3) The proposed changes to the RBM and APRM flow-biased setpoint equations do not involve a significant reduction in a margin of safety.

The proposed corrections to the RBM and APRM flow-biased setpoint equations preserve the original relationship between rod blocks and scram and actual effective drive flow during SLO; therefore, it follows that these changes do not involve a significant reduction in the margin of safety.

C. MAPLHGR Reduction Factor

(1) Application of the proposed MAPLHGR reduction factor during SLO does not increase the probability or consequences of any accident previously evaluated.

MAPLHGR Limits are established to ensure that the acceptance criteria for fuel and Emergency Core Cooling Systems (ECCS) established in 10 CFR 50.46 are met. For SLO, in the event of a LOCA, the core flow decreases more rapidly than in the two-loop operating case, resulting in more severe cladding heatup. SLO would also result in small changes in the high-power node uncovery times and times of rated spray. The effect of the reflooding times for various break sizes is also generally small. A SLO LOCA analysis was performed for LGS using the models and assumptions documented in General Electric Document NEDO-20566-2 Revision 1, previously referenced. Using this method, SAFE/REFLOOD computer code runs were made for a full spectrum of large break sizes for only the recirculation suction line breaks (most limiting for LGS). The total hot node uncovered time for two-loop operation is 133.8 seconds for the 100% DBA suction break. For SLO the uncovered time is 134.3 seconds for the 100% DBA suction break. A small break LOCA would cause a slight increase approximately 50 degrees F) in the PCT. This increase would be offset by the reduced MAPLHGR used during SLO, resulting in PCT values for small breaks less than the 1550 degree F small break PCT value previously reported for LGS, and significantly less than the 10 CFR 50.46 cladding temperature limit of 2200 degrees F. Since the reflood minus uncovery time for the SLO analysis is similar to the two-loop analysis, the MAPLGHR curves can be modified by derived reduction factors for use during SLO. The results of an analysis performed to determine the MAPLHGR reduction factor for Cycle 2 fuel is set forth in General Electric Company Document No. 23A5801, "Supplemental Reload Licensing Submittal for Limerick Generating Station Unit 1, Reload 1," dated February, 1987. The proposed MAPLHGR reduction factor is applied to ensure the consequences of a LOCA are not increased in SLO. Therefore, this change does not increase the probability or consequences of an accident previously analyzed (LOCA).

(2) Application of the proposed MAPLHGR reduction factor during SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

MAPLHGR limits are established to ensure fuel integrity in the event of an accident. Modification of the MAPLHGR limit during SLO does not create the possibility of a new or different kind of accident than previously evaluated.

(3) Application of the proposed MAPLHGR reduction factor during SLO does not involve a significant reduction in a margin of safety.

The acceptance criteria of 10 CFR 50.46 establish the margins of safety for fuel and ECCS. The analysis calculated the total hot node uncovered time for the most limiting 100% DBA suction break to be 133.8 seconds for two loop operation and 134.3 seconds for single loop operation. The calculated small break peak cladding temperature (PCT) for SLO would be less than the 1550 degrees F small break PCT reported for the two loop analysis. Since application of the conservatively calculated MAPLHGR reduction factor acts only to preserve the original relationship between two-loop MAPLHGRs and the acceptance criteria, this change does not involve a significant reduction in the margin of safety.

D. Thermal Power Limitation

(1) Restricting operation in SLO to less than or equal to 70% rated thermal power does not increase the probability or consequences of any accident previously evaluated.

The analyses performed for SLO assume 75% rated thermal power and 80% rated core flow, which represents single recirculation loop operation at 100% pump speed on the 105% rod line. All abnormal operational transients analyzed in the FSAR have been examined for effects caused by SLO. The limiting abnormal operational transients have been reevaluated in detail: generator load rejection with bypass failure and feedwater controller failure to maximum demand.

The impact of SLO on containment response, ATWS, and fuel thermal and mechanical performance was also evaluated. Consequences of all these were found to be bounded by previously submitted full power analyses. Therefore, restricting operation in SLO to less than or equal to 70% rated thermal power does not increase the probability or consequences of an accident previously analyzed.

(2) Restricting operation in SLO to less than or equal to 70% rated thermal power does not create the possibility of a new or different kind of accident from any accident previously evaluated. The range of power/flow conditions in the SLO operating domain has been evaluated and found to be within the previously evaluated range of operating conditions. SLO only changes the assumptions utilized in the appropriate previous analyses and therefore, does not create the possibility of a new or different kind of accident than previously evaluated.

(3) Restricting operation in SLO to less than or equal to 70% rated thermal power does not involve a significant reduction in a margin of safety.

Results of the aforementioned analyses show that SLO at 75% rated thermal power is bounded by previously submitted full power analyses. Therefore, limiting SLO to less than or equal to 70% rated thermal power (which corresponds to 90% rated pump speed) does not involve a significant reduction in the margin of safety.

E. Recirculation Pump Speed Limitation

(1) Operation in SLO with recirculation pump speed limited to less than or equal to 90% of rated pump speed does not increase the probability or consequences of any accident previously evaluated.

The recirculation pump speed will be limited to 90% of rated during SLO. The safety analysis assumed 100% pump speed in SLO. Vibration tests have been conducted on BWRs in SLO which demonstrate that all instrumented vessel internal component vibrations are within the allowable criteria. Results of these analyses and tests show that under all SLO operating conditions the vibration level is acceptable and bounded by previously submitted full power analyses; therefore, operation in SLO with recirculation pump speed limited to less than or equal to 90% of rated pump speed will not increase the probability or consequences of an accident previously analyzed.

(2) Operation in SLO with recirculation pump speed limited to less than or equal to 90% of rated pump speed does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Recirculation pump speed is not the initiating event of any accident so this change does not create the possibility of a new or different kind of accident than previously evaluated.

(3) Operation in SLO with recirculation pump speed limited to less than or equal to 90% of rated pump speed does not involve a significant reduction in a margin of safety.

Results of the aforementioned analyses and tests show that SLO at 100% rated pump speed is bounded by previously submitted full power analyses. Therefore, conservatively limiting pump speed to less than or equal to 90% of rated pump speed does not involve a significant reduction in the margin of safety.

F. Stability Requirements

(1) Revision of the stability monitoring requirements for operation in SLO does not increase the probability or consequences of any accident previously evaluated.

These revisions regarding stability monitoring requirements are an addition to the current stability provisions to implement the NRC approved stability criteria (GE Co. SIL-380, Revision 1) for SLO as set forth by Generic Letter 86-02, dated January 23, 1986 and Generic Letter 86-09 dated March 31, 1986. Thermal-hydraulic stability during SLO was generically evaluated in the General Electric report NEDE-24011, Rev. 6, Amendment 8, "Thermal Hydraulic Stability Amendment to GESTAR II," dated April 24, 1985 and found to satisfy the requirements of

VOL 54 ISS 44 MR 8 1989 UMI

10CFR50, Appendix A, General Design Criterion 12. Stability monitoring provisions decrease the probability of fuel damage by avoiding limit cycle neutron flux oscillations. Consequently, these changes will not increase the probability or consequences of an accident previously analyzed.

(2) Revision of the stability monitoring requirements for operation in SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Since these changes only add additional stability monitoring requirements and operating restrictions, they do not create the possibility of a new or different kind of accident than previously evaluated.

(3) Revision of the stability monitoring requirements for operation in SLO does not involve a significant reduction in a margin of safety.

Since these changes only add additional stability monitoring requirements and operating restrictions to ensure that limit cycle neutron flux oscillations are avoided, they do not involve a significant reduction in the margin of safety.

G. Differential Temperature Requirements

(1) The addition of recirculation loop differential temperature limits for operation in SLO does not increase the probability or consequences of any accident previously evaluated.

These revisions for surveillance of recirculation loop differential temperature are an addition to the current differential temperature requirements of Technical Specification 3.4.1.4 for idle recirculation loop startup. The purpose of the additional surveillance on differential temperatures below 30% thermal power or 50% rated recirculation loop flow is to mitigate undue thermal stress on vessel nozzles, recirculation pump and vessel bottom head during extended SLO. With thermal power and recirculation loop flow greater than the action levels, cold water will be adequately swept from the vessel bottom head, thus preventing stratification. Since these revisions act to decrease the possibility of undue thermal stress, the changes will not increase the probability or consequences of an accident previously analyzed.

(2) The addition of recirculation loop differential temperature limits for operation in SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Since the changes only add additional differential temperature monitoring requirements and operating restrictions, they do not create the possibility of a new or different kind of accident than previously evaluated.

(3) The addition of recirculation loop differential temperature limits for operation in SLO does not involve a significant reduction in a margin of safety.

Since these changes simply apply the differential temperature requirements presently existent for idle recirculation loop startup to extended SLO, they do not involve a significant reduction in the margin of safety.

H. Manual Flow Control

(1) Restriction of the recirculation flow control system to the manual mode during SLO does not increase the probability or consequences of any accident previously evaluated.

To prevent potential control oscillation from occurring in the recirculation flow control system, the operation mode of the recirculation flow control system will be restricted to operation in the manual control mode for SLO. Recirculation drive flow can be significantly noisier during SLO than during normal operation, resulting in a noisier signal to the scoop tube positioner. In the manual mode, the positioner flow demand signal will be constant between operator induced demand changes. Restricting operation of the recirculation flow control system to the manual mode during SLO will not increase the probability or consequences of an accident previously analyzed since this is a normal mode of operation.

(2) Restriction of the recirculation flow control system to the manual mode during SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Operation of the recirculation flow control system in the manual mode is not the initiating event of any accident and requires no changes in the current mode of operation; therefore, this requirement does not create the possibility of a new or different kind of accident than previously evaluated.

(3) Restriction of the recirculation flow control system to the manual mode during SLO does not involve a significant reduction in a margin of safety.

Since operation of the recirculation flow control system in the manual mode will prevent potential control oscillations from occurring in the system, this change does not involve a significant reduction in the margin of safety.

I. Jet Pump Surveillance

(1) Revision of the jet pumps surveillance requirements to account for SLO does not increase the probability or consequences of any accident previously evaluated.

The changes to the jet pump surveillance requirements merely provide clarification to specifically address SLO and two-loop operation. Therefore, the changes will not increase the probability or consequences of an accident previously analyzed.

(2) Revision of the jet pump surveillance requirements to account for SLO does not create the possibility of a new or different kind of accident from any accident previously evaluated.

These changes to the jet pump surveillance requirements are not the initiating event of any accident and require no changes in the current mode of operation; therefore, they do not create the possibility of a new or different kind of accident than previously evaluated.

(3) Revision of the jet pump surveillance requirements to account for SLO does not involve a significant reduction in a margin of safety.

Since these changes result in surveillance requirements of the operating jet pumps in SLO identical to those existent for two-loop operation, they do not involve a significant reduction in the margin of safety.

J. Administrative Changes

(1) The proposed administrative changes do not increase the probability or consequences of any accident previously evaluated.

The proposed change to the note on page 3/4 2-7 deletes the reference to "power ascension" when adjusting APRM setpoints by adjusting the APRM gain when the MFLPD is greater than the FRTP. The proposed change to pages 3/4 2-10 and 3/4 2-10a simply provides clarification that the current MCPR operating limits are applicable to both two recirculation loop and single recirculation loop operation. The proposed change to the ACTION of Technical Specification 3.4.1.3 on page 3/4 4-5 will require the shutdown of one of the two recirculation loops when recirculation flow mismatch exceeds the limit rather than declaring the loop of slower speed not in operation. These two proposed changes merely provide clarification of the existent specifications; therefore, these changes will not increase the probability or consequences of an accident previously analyzed.

(2) The proposed administrative changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

These changes are not the initiating event of any accident and require no changes in the current mode of operation; therefore, they do not create the possibility of a new or different kind of accident than previously evaluated.

(3) The proposed administrative changes do not involve a significant reduction in a margin of safety.

Since these changes only serve to better define the requirements of the appropriate LCOs, they do not involve a significant reduction in the margin of safety.

The staff has reviewed the licensee's submittal and significant hazards analysis and concurs with the licensee's determination as to whether the proposed amendment involves a significant hazards consideration. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

*Local Public Document Room location:* Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

*Attorney for licensee:* Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

*NRC Project Director:* Walter R. Butler

**Philadelphia Electric Company, Docket No. 50-352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania**

*Date of amendment request:* January 27, 1989

*Description of amendment request:* The request would change the Technical Specifications (TSs) to revise the effluent dose limits to a per site rather than a per unit bases. The Limerick Generating Station is a two-unit site. At present, only Unit 1 has an operating license. Unit 2 is expected to be ready for operation within the next four months. The station has several liquid and gaseous waste processing systems that are common to both units. The liquid waste collection tanks and processing equipment serve both units. The arrangement precludes quantification of liquid waste sources from each unit. The station has four gaseous effluent release points, two of which are common to both units. The North Stack Exhaust Duct is the release point for the offgas systems (each unit), the mechanical vacuum pump and gland seal condenser exhaust system (each unit), the containment purge system (common for both units), the standby gas treatment system (common for both units), and the Turbine Enclosure ventilation systems (each unit) and other common and separated systems.

There is one "hot" maintenance shop for both units. Ventilation exhaust is released from a separate exhaust duct. There is a Unit 1 South Stack Exhaust Duct and a Unit 2 South Stack Exhaust Duct. The Unit 1 duct is the release point for the Unit 1 refuel floor ventilation exhaust and the Unit 1 Reactor Enclosure ventilation exhaust. Likewise, the Unit 2 duct is the release point for the Unit 2 refuel floor ventilation exhaust and the Unit 2 Reactor Enclosure ventilation exhaust. As is true for most BWRs, the refuel floor is one long open area above the reactors. This arrangement precludes quantification of the gaseous waste sources to a particular unit.

The activity released through all these gaseous effluent release points is monitored in accordance with the Technical Specifications and released under controlled conditions to ensure that the airborne concentrations meet the dose limiting objectives and requirements specified in 10 CFR Part 50, Appendix I and requirements specified in 10 CFR 20.106 and 10 CFR 50.34a. The offsite dose consequences from gaseous effluent releases are calculated in accordance with the equations and methodologies described in the Limerick Generating Station Offsite Dose Calculation Manual (ODCM).

The proposed changes to the Technical Specifications would revise the effluent offsite dose limits to reflect a per site rather than a per unit limit. The current dose limits have been established as criteria for reporting the offsite dose consequences for operation at "each reactor unit" to the NRC. The current Technical Specifications are based on the assumption that a multi-unit site, like the Limerick Generating Station, (LGS) can distinguish as to which unit specific radioactive effluent releases originate. There are no provisions, however, to distinguish the offsite dose attributable from a unit specific radioactive release origin at the Limerick Generating Station because of the common systems and common release points.

In accordance with NRC guidance provided in NUREG-0133, "Preparation of Radiological Effluent Technical Specifications for Nuclear Power Plants," the LGS offsite dose assessment may be derived by estimating the contribution from each unit and allocating the doses accordingly. However, the sophistication of the Limerick offsite dose assessment system allows for a more realistic and conservative evaluation of the offsite dose consequences of the radioactive effluent releases without having to "estimate" the contribution from each unit. Doses are assigned (calculated for each hour) to receptors during a release based upon hourly meteorological data and corresponding hourly average effluent release rates. By accumulating the doses to each receptor over the entire year, and summing these for all of the release points for the entire site, the maximum potential offsite exposure is assured. Attempting to separate the releases and reporting the offsite dose consequences on a per-unit basis could potentially underestimate the dose to the maximum exposed individual. This underestimation could occur when each units' maximum exposed individuals are in different sectors than the maximum exposed individual resulting from the site's total releases.

The proposed changes to the Technical Specifications do not change the magnitude of the offsite dose limits allowed for a two-unit site.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

In the letter of January 27, 1989, PECo addressed each of these standards and concluded that the proposed amendment does not constitute a significant hazards consideration based on the following:

(1) The proposed changes to revise the effluent offsite dose limits to a per site rather than a per unit limit do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The changes only revise the normal operating dose limits to reflect a two unit site. These limits are established to reflect a criteria for reporting offsite dose consequences to the NRC. The offsite consequences of routine operation are based on the projected radioactive material released from an operating two unit site as described in Sections 11.2 and 11.4 of the Final Safety Analysis Report. The proposed changes will not affect any plant hardware, plant design, plant system operation or procedure, and therefore do not modify or add any initiating parameters that would significantly increase the probability or consequences of any previously analyzed accident.

(2) The proposed changes to revise the effluent offsite dose limits to a per site rather than a per unit limit do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The design bases of LGS will remain the same. Therefore, the current station Final Safety Analysis Report will remain complete and accurate in its discussion of the licensing basis events and in analyzing plant response and consequences. Further, the proposed changes would only revise the NRC reporting limits based upon a per site limit rather than a per unit limit. As discussed in Item (1) above, the proposed changes do not affect any equipment nor do they involve any potential initiating events that would create any new or different kind of accident. As such, the plant initial conditions utilized for the design basis accident analyses are still valid.

(3) The proposed changes to review the effluent offsite dose limits to be per site rather than a per unit limit do not involve a significant reduction in a margin of safety.

While these proposed changes affect the reporting of the offsite consequences of radioactive material releases, the total offsite dose limit for the site has not changed. The proposed changes continue to meet the dose-limiting objectives specified in 10 CFR 50, Appendix I. In addition, the dose limits specified in 10 CFR 20 remain unchanged. As discussed in Item (1) above, the proposed changes do not affect any equipment involved in potential initiating events, nor increase the consequences of an event.

The staff has reviewed the licensee's submittal and significant hazards analysis and concurs with the licensee's determination as to whether the proposed amendment involves a significant hazards consideration. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

VOL 54 ISS 44 MR 8 1989 UMI

*Local Public Document Room location:* Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

*Attorney for licensee:* Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

*NRC Project Director:* Walter R. Butler

**Philadelphia Electric Company, Docket No. 50-352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania**

*Date of amendment request:* January 27, 1989

*Description of amendment request:* This submittal requests changes to the Technical Specifications (TSs) to reflect the completion and tie-in of the Unit 2 Standby Gas Treatment System (SGTS) and the Unit 2 Refueling Area Heating, Ventilating and Air Conditioning (HVAC) system. The proposed changes reflect the original two-unit design as described in the Final Safety Analysis Report which was previously reviewed and approved by the Nuclear Regulatory Commission in NUREG-0991, "Safety Evaluation Report related to the operation of the Limerick Generating Station, Unit 1 and Unit 2" dated August 1983 and supplements thereto. These changes are being requested to allow the inclusion of Unit 2 equipment that will be relied upon or required to be operable to support the operation of Unit 1 when Unit 2 is issued an Operating License.

The SGTS is a redundant safety-related system that is designed to reduce the radioactive halogen and particulate concentrations in (1) gases that may be present in the secondary containment after a Loss-of-Coolant Accident (LOCA), and (2) gases present after a postulated Fuel Handling Accident in the refueling floor area before the gases are discharged to the environment. The SGTS is a common system that serves both the Unit 1 and Unit 2 Reactor Enclosure and the Common Refueling Area. The SGTS is designed to drawdown and maintain a negative pressure in these areas during a secondary containment isolation. The SGTS also functions to reduce halogen and particulate concentrations purged from the primary containment through the drywell or suppression pool purge exhaust lines. A detailed description of the SGTS is provided in Section 6.5.1.1 of the Final Safety Analysis Report.

The SGTS is presently operable for the Unit 1 Reactor Enclosure, and can be made available for the refueling area if needed while construction is being completed on Unit 2. The SGTS is designed as a shared system for filtration and treatment of both the Unit 1 and Unit 2 Reactor Enclosure atmospheres and the refueling area. When the tie-in of the Unit 2 Reactor Enclosure to the SGTS is complete, that portion of the Unit 2 ductwork will form a part of the secondary containment isolation boundary for the Unit 1 Reactor Enclosure. Included in this ductwork are the Unit 2 drywell purge exhaust valves (HV-57-214 and HV-57-215), the suppression pool purge exhaust valves (HV-57-204 and HV-57-212), and the slide gate dampers which are normally open but can be used to isolate the drywell and suppression pool purge exhaust lines in the event that the exhaust valves are inoperable.

The Unit 2 Refueling Area HVAC system, as well as the existing Unit 1 Refueling Area HVAC system, have exhaust duct radiation monitors which provide input to the Refueling Area Secondary Containment Isolation System. The Unit 1 Refueling Area HVAC system exhaust duct radiation monitors, the isolation activation instrumentation, and the isolation valves are required to be operable when irradiated fuel is being handled in the refueling area secondary containment, during core alterations, and during operations with the potential for draining the reactor vessel when the vessel head is off. An isolation signal from either unit's exhaust duct radiation monitors will cause both the Unit 1 and Unit 2 Refueling Area HVAC systems to isolate. The Unit 2 radiation monitors located in the Refuel Area HVAC exhaust duct are not presently connected to the Unit 1 isolation logic. Completion of the tie-in would require the Unit 2 HVAC isolation activation instrumentation, isolation valves, and the exhaust duct radiation monitors to be operable for the appropriate Operational conditions.

The proposed changes to the TSs add various Unit 2 SGTS and Refueling Area HVAC equipment operability requirements and reflect the completion and tie-in of Unit 2. Specifically, the proposed changes are the following.

(a) Technical Specification Table 3.3.2-1, Table 3.3.2-2, Table 3.3.2-3, and 4.3.2.1-1 would be revised to include the "Refueling Area Unit 2 Ventilation Exhaust Duct Radiation - High" radiation monitors. The Limiting Conditions for Operation, setpoints, and Surveillance Requirements for these monitors are the same as that for the existing Unit 1 radiation monitors contained in the Unit 1 Technical Specifications. Since the Refuel Area is common to both units, operation of either Unit 1 or 2 Refuel Area Ventilation System during OPCON * represents a potential exhaust pathway and the associated radiation monitors should be Operable. Therefore, Tables 3.3.2-1 and 4.3.2.1-1 will be revised to show the applicable Operational Condition as * which is defined as when: (1) in Operational Condition * and, (2) during operation of the associated ventilation exhaust system. Finally to reflect completion of Unit 2 construction, Technical Specification Table 3.6.5.2.2-1 Footnote ** is being deleted for the Refueling Area Ventilation Supply Valves (HV-76-217 and HV-76-218) and the Drywell Purge Exhaust inboard and outboard valves (HV-57-214 and HV-57-215), and the suppression Purge Exhaust inboard and outboard valves (HV-57-204 and HV-57-212) to eliminate the provision not to have these valves operable during Unit 2 construction.

(b) Technical Specification Table 3.6.5.2.1-1 (also listed in Table 3.6.5.2.2-1) would be revised to include the Unit 2 drywell purge exhaust valves (HV-57-214 and HV-57-215) and suppression purge exhaust valves (HV-57-204 and HV-57-212). These valves are required to be operable in order to maintain the Unit 1 Reactor Enclosure secondary containment isolation boundary. Any breech of this isolation boundary to an area outside of the Unit 1 Reactor Enclosure affects the ability of the SGTS to perform its design functions. Therefore, these valves are added to the list of Reactor Enclosure Secondary Containment Ventilation System Automatic Isolation Valves, Table 3.6.5.2.1-1. In addition, since these drywell and suppression pool purge exhaust valves also provide a primary containment function, their dual function, as Reactor Enclosure isolation valves for the other unit will be reflected in Table Notation 33 to Table 3.6.3-1.

(c) Technical Specification 3.6.5.2.1, Action C, is being revised to include a reference to slide gate dampers. The slide gate dampers are normally open and are located in the Unit 2 ductwork. These slide gate dampers can be used to isolate the drywell and/or suppression pool exhaust lines in the event that the exhaust valves are not operable. The inclusion of the slide gate dampers into Specification 3.6.5.2.1 provides manual isolation capability in these lines.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

In the submittal of January 27, 1989, the licensee has addressed each of these standards and has concluded that the proposed amendment does not constitute a significant hazards consideration based upon the following:

(1) The proposed changes to add various Unit 2 SGTS and Refueling Area HVAC equipment operability requirements or clarifications to reflect the completion and tie-in of Unit 2 do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes only incorporate additional limitations, restrictions or controls into the Technical Specifications as the result of the completion and tie-in of common Unit 2 systems. The changes reflect the original two unit design and will not affect nor change any plant hardware, plant design or plant system operation from that already described in the Final Safety Analysis Report. Therefore, the proposed changes do not modify or add any initiating parameters that would significantly increase the probability or consequences of any previously analyzed accident.

(2) The proposed changes, to add various Unit 2 SGTS and Refueling Area HVAC equipment operability requirements and reflect the completion and tie-in of Unit 2, do not create the possibility of a new or different kind of accident from any previously evaluated.

The design bases of the Limerick Generating Station will remain the same. Therefore, the current station Final Safety Analysis Report will remain complete and accurate in its discussion of the licensing basis events and in analyzing plant response and consequences. As discussed in (1) above, the proposed changes do not affect any equipment nor do they involve any potential initiating events that would create any new or different kind of accident. As such, the plant initial conditions utilized for the design basis accident analyses are still valid.

(3) The proposed changes to add various Unit 2 SGTS and Refueling Area HVAC equipment operability requirements or clarifications to reflect the completion and tie-in of Unit 2 does not involve a significant reduction in a margin of safety.

As discussed in (1) above, the changes only incorporate additional limitations, restrictions or controls in the Technical Specification as the result of the completion and tie-in of common Unit 2 systems.

Finally, the deletion of footnotes referencing Unit 2 construction in the Technical Specifications which reflect the completion of Unit 2 construction are considered purely administrative and as such do not require a No Significant Hazards Determination.

The staff has reviewed the licensee's submittal and significant hazards analysis and concurs with the licensee's determination as to whether the proposed amendment involves a significant hazards consideration. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

*Local Public Document Room location:* Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

*Attorney for licensee:* Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

*NRC Project Director:* Walter R. Butler

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York**

*Date of amendment request:* May 19, 1988.

*Description of amendment request:* The proposed amendment would revise Appendix B, Radiological Effluent Technical Specifications (RETS), of the Facility Operating License to clarify or correct minor problems. These changes do not change the intent of the RETS sections being addressed. The proposed amendment would also revise the Technical Specifications (TS) (Appendix A of the Facility Operating License) to clarify the reporting requirements for major modifications to radioactive waste systems. The TS change is administrative in nature and is designed to clarify the RETS provisions by reducing the need for interpretations, but not change their intent.

The proposed RETS portion of the amendment would: (1) modify Note (b) to Table 2.2-1 by changing the analysis required if the monitors do not meet operability requirements from a gross radioactivity (beta or gamma) to a principal gamma emitter analysis since gamma emitters are analyzed using gamma spectroscopy which is more reliable and accurate; (2) add Iodine-133 to Table 3.2-1 for the type of activity analysis included in the radioactive gaseous waste sampling and analysis program for consistency with the program for determining the gaseous dose rates of Section 3.2 and the Offsite Dose Calculation Manual (ODCM); (3) reformat and combine some Table 3.2-1 notes for clarity and consistency; (4) change the noble gas sample location designated in Surveillance 3.5.a. from the Steam Jet Air Ejector discharge (only) to either the Steam Jet Air Ejector discharge or the offgas recombiner discharge (prior to delay of the offgas) in order to obtain a more representative sample of gross radioactivity release rate during offgas recombiner operation; (5) add new LCOs and corresponding surveillance requirements to Specification 3.6 to address charcoal bed bypass capability (rather than bypass of the offgas treatment system) and required actions per the ODCM since it is the charcoal beds which specifically treat the offgas; (6) modify LCO specification 3.7.b.2 and 3.7.b.3 concerning isolation of the offgas system dealing with the offgas recombiner inlet and outlet temperature sensor instrumentation limits for clarity; (7) modify Surveillance Requirement 3.7.c so that it more closely reflects its corresponding LCO by specifying the recombiner effluent rather than the recombiner for the sample location; (8) modify Table 3.10-1 to show that Footnote (a) only applies to the first six trip functions listed in the table and to show that the requirement for operability in Footnote (a) is concerned with one operable or tripped instrument channel per system; (9) delete Note (i) from the calibration column of Table 3.10-2 since the test only applies to instrument channel functional testing. The proposed amendment would also change the instrument channel calibration frequency for the turbine and radwaste building radiation exhaust monitors from semiannual to quarterly for consistency with similar tests; (10) correct an error by deleting the words "ground level" and corresponding footnote from Note (d) to Figure 5.1-1 since the actual evaluation of the vents is taken into account in the offsite dose calculations method in the ODCM; (11) delete the contents found under the Food Products subheading (Items a. and b. of Table 6.1-1) since it provides an unnecessary alternative for milk sampling. Milk sampling has been, and will continue to be, performed in conjunction with similar programs at Nine Mile Point (NMP) Units 1 and 2; (12) change the reporting levels of 2 and 1 pCi/liter for Iodine-131 in water samples in Tables 6.1-2 and 6.1-3 respectively, to 20 and 15 pCi/liter respectively, for consistency with recent NRC criteria and NMP site RETS, since the direction and distance to the nearest water intake means that the plant does not have a drinking water pathway under normal operating conditions; (13) change Specification 7.3.d. to show that the reactor centerline used for determining sample locations listed in the Annual Environmental Operating Report can be either the NMP Unit 2 or the FitzPatrick reactor centerlines. This will allow continued use of the NMP

BEST COPY AVAILABLE

VOL 54 ISS 44 MR 8 1989 UMI

Unit 2 reactor centerline to determine sample locations, which is consistent with NRC guidance for sites with joint environmental programs.

The proposed change to the TS (Appendix A to the Operating License) Specification 6.18, would eliminate the annual FSAR update as an alternative method for reporting major modifications to the radioactive waste systems. This requirement will be furnished in either the semiannual report or the annual 10 CFR 50.59 Safety Evaluation Report, as specified in this TS section.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed amendment against the standards provided above and has made the following determination:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated, because the changes are only designed to clarify and correct RETS. They are administrative changes such as: consolidating footnotes; clarifying wording; and correcting reporting levels to achieve consistency with Nine Mile Point. There is no impact on plant operations. There are no setpoint changes regarding isolation or alarms. There is no change to the environmental monitoring program. The changes will have no impact on previously evaluated accidents.

2. The proposed changes will not create the possibility of a new or different kind of accident previously evaluated. The proposed amendment does not involve physical changes to the facility. The changes are administrative in nature and do not involve safety limit changes. These proposed changes are intended to further clarify and improve RETS. The changes cannot create a new or different accident.

3. The proposed changes do not involve a significant reduction in the margin of safety. The proposed amendment will achieve consistency throughout the specifications and clarify or correct minor errors. There is no impact on plant operation, nor are there any setpoint or safety limit changes regarding isolation or alarms. There is no change to the environmental monitoring program. The proposed changes are designed to improve and facilitate the use of RETS. The changes will assist the operator in better understanding of these specifications. The proposed changes do not reduce safety margins of any kind.

The staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

*Local Public Document Room location:* State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

*Attorney for licensee:* Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

*NRC Project Director:* Robert A. Capra, Director

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York**

*Date of amendment request:* June 10, 1988

*Description of amendment request:* The proposed amendment would revise the Technical Specification (TS) Sections 3.11.B. and 4.11.B., "Crescent Area Ventilation," to clarify and eliminate inconsistencies in the Limiting Condition for Operation (LCO) and Surveillance Testing requirements. One change to Section 3.11.B. would replace the term "compartment" with the nomenclature "half of the crescent area" to more precisely define the applicable area of the plant using the generic terminology. Another change to this section would replace the reference to Specification 3.5.D. with 3.5.B. since Specification 3.5.D. is the Automatic Depressurization System (which is not associated with the crescent rooms) and Specification 3.5.B. is the Containment Cooling Subsystem of the RHR System (which does have equipment located in the area). The proposed change to Specification 4.11.B. would eliminate the existing conflict between Specifications 3.11.B.1. and 4.11.B.1. in determining the applicability of the 7-day and 24-hour LCOs when more than one cooler in a crescent room is inoperable. The proposed amendment deletes the 7-day LCO, retains the 24-hour LCO, and moves the specification from the surveillance section to the LCO section of the TS.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed TS change against the standards provided above and has determined that the proposed changes to the TS do not involve hardware or procedural changes to the plant. Further, operation of the plant in accordance with the proposed amendment would not involve significant hazards consideration as defined in 10 CFR 50.92, since it would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because the change results in clarifying the operability of the crescent area ventilation system. Also, the proposed change will eliminate Specification 4.11.B.1 which is in conflict with and non-conservative with respect to Specification 3.11.B.1.

2. Create the possibility of a new or different kind of accident previously evaluated. As stated above, the proposed amendment does not involve physical changes to the facility. These proposed changes will facilitate the understanding of the crescent area ventilation operations and not create a new or different kind of accident. Also, the proposed change will eliminate the conflict between Specifications 3.11.B.1 and 4.11.B.1 by the selection of the more conservative LCO.

3. Involve a significant reduction in the margin of safety. The proposed amendment clarifies the area ventilation system and eliminates the conflict that existed prior to the change. This will help the operator in better understanding of these specifications.

The staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and above discussions, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

*Local Public Document Room location:* State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

*Attorney for licensee:* Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

*NRC Project Director:* Robert A. Capra, Director

**Power Authority of The State of New York, Docket No. 50-286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York**

*Date of amendment request:* January 20, 1989, supplemented February 2, 1989.

*Description of amendment request:* The licensee has provided, in part, the following description: The proposed amendment would provide for the use of Vantage 5 fuel and changes the Technical Specifications appropriately to reflect the use of Vantage 5 fuel. Indian Point Unit 3 is currently operating in Cycle 6 with a transition fueled core containing Westinghouse 15x15 low-parasitic (LOPAR) assemblies and 15x15 Optimized Fuel Assemblies (OFAs). For subsequent cycles, it is planned to refuel and operate Indian Point Unit 3 with the Westinghouse 15x15 Vantage 5 improved fuel design. As a result, future core loadings would range from approximately a 60%-65% OFA and 35%-40% Vantage 5 transition core (Cycle 7) to eventually an all Vantage 5 fueled core. The 15x15 Vantage 5 fuel assembly is designed as a modification to the current 15x15 LOPAR and the optimized fuel assembly (OFA) designs (Reference 1). Except for the 15x15 fuel array, no Intermediate Flow Mixer (IFM) grids and the use of a Debris Filter Bottom Nozzle (DFBN), the Indian Point Unit 3 15x15 Vantage 5 fuel assembly has the same design features as the standard 17x17 fuel assembly.

This change also reduces the shutdown margin from 10% delta k/k to 5% delta k/k.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has provided the following analysis:

1. Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response

The transition to Vantage 5 fuel does not involve a significant increase in the probability of an accident previously evaluated. The proposed changes do not effect any systems or equipment which are involved in the initiation or mitigation of any previously analyzed accident. Therefore, the proposed changes cannot increase the probability of any accident previously evaluated. The IP-3 FSAR accident analyses for non-LOCA and LOCA (large and small breaks) transients have been reanalyzed and evaluated by Westinghouse with regard to the proposed changes. These reanalyses and evaluations show that the proposed changes do not significantly increase the consequences of previously evaluated accidents.

The change of the shutdown margin from 10% delta k/k to either 5% delta k/k or 1900 ppm, whichever results in the greater boron concentration, does not involve a significant increase in the probability of an accident previously evaluated. The proposed change does not affect any system or equipment which are involved in the initiation or mitigation of any previously analyzed accident. Therefore, the proposed change cannot increase the probability of any accident previously evaluated. Westinghouse has reanalyzed the inadvertant boron dilution transient (chemical and volume control malfunction). The results show that boron concentration in the refueling water must reduce from 1900 ppm to approximately 1300 ppm before the reactor will go critical. Since this will take significantly more than 30 minutes, the operator has ample time to initiate corrective actions. Therefore, the proposed change does not significantly increase the consequences of previously evaluated accidents.

2. Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response

The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. None of the proposed changes introduce any new equipment or require any existing equipment or systems to perform a different type of function than they are currently designed to perform. The proposed changes provide operation limits and a means to monitor those limits to assure that the consequences of existing accidents are not affected.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response

Westinghouse has reanalyzed and evaluated the IP-3 FSAR accident analyses for non-LOCA and LOCA (large and small breaks) transients with regard to the Vantage 5 fuel transition. The results of the non-LOCA reanalyses and evaluations show that the transition from 15x15 OFA to 15x15 Vantage 5 fuel can be accommodated with margin to the applicable FSAR safety limits. With regard to the LOCA transients, the reanalyses for both the large and small breaks show that the acceptance criteria of 10 CFR 50.46 is met. Therefore, the proposed transition to Vantage 5 fuel does not involve a significant reduction in a margin of safety.

The purpose of the decrease in the shutdown margin from 10% delta k/k to 5% delta k/k is to incorporate the guidance of the Westinghouse Standard Technical Specifications (WSTS) and to enhance fuel management flexibility. The WSTS recommend a shutdown margin of 5% delta k/k for the refueling condition. Westinghouse has reanalyzed the inadvertant boron dilution transient (chemical and volume control malfunction) using 5% delta k/k shutdown margin. This reanalysis shows that the minimum boron concentration of the refueling water is typically 1900 ppm for a shutdown margin of 5% delta k/k. The boron concentration must be reduced from 1900 ppm to approximately 1300 ppm before the reactor will go critical. This would require significantly more than 30 minutes. Since information on the status of the reactor coolant makeup is continuously available to the operator, this is ample time for the operator to initiate corrective actions. An additional conservatism exists in that the greater of the two boron concentrations, either 1900 ppm or that required for a 5% delta k/k margin, is to be used during refueling activities. Therefore, the proposed change in the shutdown margin does not involve a significant reduction in a margin of safety.

Based on the above analysis, the staff proposes to conclude that these changes do not involve a significant hazards consideration.

*Local Public Document Room location:* White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

*Attorney for licensee:* Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

*NRC Project Director:* Robert A. Capra, Director

**Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey**

*Date of amendment request:* April 14, 1987 and October 5, 1988

*Description of amendment request:* The proposed amendments would modify the Salem Unit 1 and 2 Technical Specifications, Section 3/4.7.9, Snubbers, to incorporate Generic Letter 84-13, Technical Specifications for Snubbers, dated May 3, 1984. The proposed changes would eliminate the tables that list the snubbers, Tables 3.7.4a and 3.7.4b, revise Section 3/4.7.9 to eliminate references to the Tables and revise Bases 3/4.7.9 to require a detailed list of individual snubbers be maintained at the plant. The requirement that the Station Operations Review Committee approve the accessibility classification of each snubber and that additions or deletions from the list of snubbers must undergo a 10 CFR 50.59 review is being added to Bases 3/4.7.9 for both Units. Also, a footnote to Section 4.7.9c of the Unit 1 Technical Specifications is being deleted

VOL 54 ISS 44 MR 8 1989 UMI

because it is no longer applicable. In addition, Bases 3/4.7.9 for Unit 1 is being revised to bring it into agreement with the Unit 2 Bases 3/4.7.9.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee evaluated the proposed changes against the standards of 10 CFR 50.92 and has determined that the amendments would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The surveillances will still be performed in accordance with the existing requirements. Only the location of where the list of snubbers is maintained has changed. Revision of the Bases is administrative and does not change the intent.

2. Create the possibility of a new or different kind of accident from any previously analyzed. There are no equipment, instrument, or setpoint changes related to the proposed change to Technical Specifications.

3. Involve a significant reduction in a margin of safety. The scope of applicability and test requirements for snubbers remains unchanged.

The staff has reviewed the licensee's submittal and significant hazards analysis and concurs with the licensee's determination that the proposed amendment does not involve a significant hazards consideration. Therefore, the staff proposes to determine that the proposed amendments involve no significant hazards consideration.

*Local Public Document Room location:* Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

*Attorney for licensee:* Mark J. Wetterhahn, Esquire, Conner and Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

*NRC Project Director:* Walter R. Butler

**Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey**

*Date of amendment request:* July 23, 1987

*Description of amendment request:* The proposed amendment revises the emergency core cooling system (ECCS) limiting conditions for operation, surveillance requirements and associated basis to clearly define the emergency core cooling subsystem alignment and component availability requirements in various modes. Changes are also proposed that eliminate the requirement to issue a report when an action statement is entered as a result of inservice testing. Changes are also proposed that will make the Salem Unit 1 emergency core cooling technical specifications consistent with the Salem Unit 2 emergency core cooling technical specifications.

Specifically, this amendment request proposes to modify the Technical Specifications as follows:

1. Technical Specification 3.5.2

This section is being modified to explicitly identify the flow paths into the Reactor Coolant System (RCS) which are required to be Operable in Modes 1, 2 and 3.

Also, an Action Statement that allows both ECCS subsystems to be inoperable for up to one hour for surveillance testing is being added. Shutdown must commence if this time limit is exceeded.

2. Technical Specification 4.5.2

The first change adds a requirement to verify the RH19 valves open once per 12 hours. The second change adds the requirement to verify that the Salem 1 ECCS piping is full of water by venting once every 31 days. This requirement already appears in the corresponding Salem Unit 2 Surveillance Requirement. The third change clarifies that with the CS14 valve inoperable the affected system is the Containment Spray System (Spray Additive Tank) and directs the operator to Technical Specification 3.6.2.2.

3. Technical Specification 3.5.3

This section is being modified to explicitly identify the required Operable flow paths into the RCS for each ECCS subsystem in Mode 4.

The second part is for clarification only. This change makes it explicitly clear that one safety injection (SI) or one centrifugal charging pump shall be Operable when the RCS temperature is less than or equal to 312° F.

Third, the following note that appears in the Salem Unit 2 Technical Specifications: "Note: This particular restriction also applies in Modes 5 and 6" is being added to the Unit 1 Technical Specifications to achieve consistency between the two documents.

4. Technical Specification Bases Section 3/4.5.2 and 3/4.5.3

The first part serves to reiterate the requirement to maintain the capability to supply all four RCS cold legs with each ECCS subsystem. The second part reflects the phrase being added to the pound symbol footnote of Technical Specification 3.5.3 addressing the operability requirements for the safety injection and charging pumps in Modes 4, 5 and 6.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

1. The licensee has analyzed the proposed changes to Technical Specification 3.5.2 to determine if a significant hazard exists:

The proposed changes to Technical Specification 3.5.2 do not involve a significant hazards consideration because operation of Salem Unit 1 and 2 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The first change is being made for clarification only. Its purpose is to clearly reflect ECCS-LOCA design bases requirements in the Technical Specifications. No physical change to plant systems is involved, nor is there an impact on the licensing bases of the units. Therefore, this change cannot increase the probability or consequences of an accident. The second change allows IST stroke testing of valves listed in Surveillance 4.5.2 to continue without submittal of an LER. The IST stroke testing intervals remain unchanged, as do the Action Statement time limits. Therefore this second change cannot increase the probability or consequences of an accident.

(2) Create the possibility of a new or different kind of accident from any previously analyzed. The first change only serves to emphasize ECCS-LOCA requirements for injection flow paths into the RCS. These requirements are not new as they are already part of the design and licensing bases of the Salem units. The second change makes no changes to the Action Statement time limits associated with IST surveillances conducted on valves listed in Technical Specification Surveillance 4.5.2. It only serves to address reporting requirements. Therefore, these changes do not create the possibility of a new or different kind of accident.

(3) Involve a significant reduction in a margin of safety. The first change serves to maintain the current margin of safety associated with the LOCA accident analysis and ensure that the ECCS subsystems are aligned as assumed in the design bases for the ECCS-LOCA. The second change maintains the Action Statement time limitations associated with IST stroke testing. Therefore, these changes make no reduction in a margin of safety.

The staff has reviewed the licensee's significant hazards consideration analysis for changes to Technical Specification 3.5.2 and concurs with the licensee's determination that the proposed changes do not involve a significant hazards consideration.

2. With respect to the proposed changes to Technical Specification 4.5.2 and 3.5.3, the Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 by providing certain examples (51 FR 7751). One of the examples, (i), of an amendment likely to involve no significant hazards consideration relates to "A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error or a change in nomenclature."

Another example, (ii), of an amendment likely to involve no significant hazards consideration relates to "A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications, e.g., a more stringent surveillance requirement."

The proposed changes to Technical Specifications 4.5.2 and 3.5.3 relate to one of these examples:

a. Technical Specification 4.5.2

The RH19 valves must be open in order for the residual heat removal (RHR) pumps to be capable of injecting into each RCS cold leg. This helps ensure that the design bases for the ECCS-LOCA (Loss of Coolant Accident) is maintained. The addition of the RH19 valves to the Surveillance Requirements is a means of additional control on the plant and represents a more stringent surveillance requirement. Therefore, this meets example ii.

The requirement to verify that the Salem 1 ECCS piping is full of water is an example of a more stringent surveillance requirement. This meets example ii. In addition, the requirement to verify that the ECCS piping is full already appears in the Salem 2 Technical Specifications. This change will achieve consistency between units. This meets example i.

The directing of operators to Technical Specification 3.6.2.2 for appropriate action if the CS14 valve is inoperable clarifies the action requirements. By addition of the reference to Technical Specification 3.6.2.2, the Action Statement for an inoperable Spray Additive Tank will be followed if valve CS14 becomes inoperable. CS14 is part of the Containment Spray System. Because it is a clarification, it is deemed an administrative change as illustrated in example i.

b. Technical Specification 3.5.3

This change will clearly reflect the design bases flow paths for the ECCS-LOCA in the Technical Specifications. This change does not modify the ECCS injection or recirculation flow paths in any way. The identification of the required flow path for the operable ECCS subsystem represents a means of control not currently in the technical specifications. This meets example ii.

The addition of the footnote to clearly specify that only one safety injection pump or one centrifugal charging pump need be operable in Mode 4, 5 and 6 is a restriction not currently in the technical specifications. This meets example ii. The addition to the note in the Salem 1 Technical Specifications of the applicability to Modes 5 and 6 is also more restrictive, an illustration of example ii, and already appears in the Salem 2 Technical Specifications, an illustration of example i.

Based on the above, the staff proposes to determine that the changes to Technical Specification 4.5.2 and 3.5.3 do not involve significant hazards considerations because they provide additional controls or are more restrictive than the current technical specifications or involve administrative changes.

3. The licensee has analyzed the proposed changes to Technical Specification Bases Section 3/4 5.2 and 3/4 5.3 to determine if a significant hazard exists:

The proposed changes to Technical Specification Bases Sections 3/4 5.2 and 3/4 5.3 do not involve a significant hazards consideration because operation of Salem Unit 1 and 2 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The first change is for clarification only and serves to highlight the ECCS-LOCA requirements to maintain the capability to supply all four RCS cold legs. The second change again only clarifies in the Bases Section existing requirements that serve to maintain the RCS pressure below the 10 CFR 50, Appendix G limits in case of an inadvertent mass addition.

(2) Create the possibility of a new or different kind of accident from any previously analyzed. The first change does not involve any hardware or procedure modifications and only serves to identify an existing design bases for the ECCS-LOCA. Likewise, the second change clarifies in the Bases Section existing requirements. No new or different kind of accident can be postulated as a result of these changes.

(3) Involve a significant reduction in a margin of safety. These changes serve to identify existing design bases for the ECCS-LOCA and RCS pressure limits in Mode 4. They do not impact any margin of safety.

The staff has reviewed the licensee's significant hazards consideration analysis for changes to Technical Specification Bases Sections 3/4 5.2 and 3/4 5.3 and concurs with the licensee's determination that the proposed changes do not involve a significant hazards consideration.

Based on the staff's review and analysis of the licensee's submittal as detailed above, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

*Local Public Document Room location:* Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

*Attorney for licensee:* Mark J. Wetterhahn, Esquire, Conner and Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

*NRC Project Director:* Walter R. Butler

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* April 26, 1988 (Reference PCN-247)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.6.4.2, "Electric Hydrogen Recombiners." TS 3/4.6.4.2 requires that two hydrogen recombiners be operable during startup or power operation (Modes 2 and 1, respectively), defines periodic surveillance tests to verify operability, and requires compensatory actions to be taken when the minimum operability requirements are not met.

The hydrogen recombiners are part of the post accident combustible gas control system. During a postulated loss of coolant accident, hydrogen gas would evolve from the reaction of water with fuel cladding, radiolytic decomposition of water, and corrosion of metals inside containment. The function of the

VOL 54 ISS 44 MR 8 1989 UMI

combustible gas control system is to maintain the post accident concentration of hydrogen gas in the containment atmosphere below the explosive gas limit and thereby prevent a hydrogen gas explosion from challenging containment integrity.

To verify operability of the hydrogen recombiners, TS 3/4.6.2.a requires that a functional test be performed at least once per six months. In addition, TS 4.6.4.2.b requires each hydrogen combiner system to be demonstrated operable at least once per 18 months by performance of the following surveillance requirements: (1) TS 4.6.4.2.b.1 requires a channel calibration of all hydrogen recombiner instrumentation and control circuits. This test verifies electrical resistance and calibrates thermocouples to plus or minus one percent. (2) Technical Specification 4.6.4.2.b.2 and 3 require that (a) there is no evidence of abnormal conditions within the recombiners by performing a visual examination, and (b) the integrity of the heater electrical circuits is satisfactory by performing a continuity and resistance to ground test.

The proposed change would increase the interval for performance of TS 4.6.4.2.b surveillance tests from at least once per 18 months to at least once per refueling.

*Basis for proposed no significant hazards consideration determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The function of the hydrogen recombiners is to maintain the post accident concentration of hydrogen gas in the containment atmosphere below the explosive gas limit [and] thereby prevent a hydrogen gas explosion from challenging containment integrity. The proposed change increases the interval for surveillance tests currently performed at 18 month intervals. There has been a low incidence of problems detected by the 18 month surveillance tests. Additionally the functionality of the hydrogen recombiners is demonstrated at six month intervals by the required functional test, which is unaffected by the proposed change. Because of the low incidence of problems, and the functional testing at six month intervals, the proposed change will not significantly affect the hydrogen recombiners' availability to function post accident. Therefore, the proposed change will not significantly increase the probability [or consequences] of previously analyzed accidents.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change affects only the frequency of hydrogen recombiner surveillance testing. The proposed change does not alter the configuration of the facility or its operation. Therefore, the proposed change does not create the possibility of new or different kind of accident.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change affects only the frequency of certain hydrogen recombiner surveillance tests which may result in a small reduction of confidence in hydrogen recombiner operability and the associated margin of safety. However, the 18 month surveillances have historically detected few problems and the six month functional tests are unaffected by the proposed change. Therefore, the proposed change will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensee:* Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* April 20, 1988 (Reference PCN-249)

*Description of amendment request:* The proposed change would revise Technical Specification 3/4.1.3.4, "CEA Drop Time." This specification provides an individual full length control element assembly (CEA) maximum drop time restriction. The individual (shutdown and control) CEA drop time is measured from the time that electrical power is interrupted to the CEA drive mechanism (from a fully withdrawn position) to the time the CEA reaches its 90% insertion position. The maximum allowable CEA drop time (less than or equal to 3.2 seconds) is consistent with the value assumed in the safety analyses. CEA drop times are required to be measured following each removal and reinstallation of the reactor vessel head (Surveillance Requirement (SR) 4.1.3.4.a); following any maintenance on, or modification to, the CEA drive system which could affect the drop time of those specific CEA's (SR 4.1.3.4.b); and at least once per 18 months (SR 4.1.3.4.c).

The proposed change would revise the frequency of the CEA drop time testing required by Surveillance Requirement 4.1.3.4.c of this Specification from the current 18 month interval to an interval of at least once per refueling.

*Basis for proposed no significant hazards consideration determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change ties the CEA drop time testing to a refueling interval frequency.... Factors that could adversely affect rod drop times during a cycle are addressed by other surveillance requirements not affected by this proposed change. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change only redefines the periodic surveillance interval for CEA drop time testing. The requirements to conduct CEA drop time testing following maintenance which might affect the drop time or following reactor vessel head removal are not changed. No physical modification to the plant is proposed, nor is there a change in how the facility is operated. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change extends the 18 month interval for performing the CEA drop time surveillance to a refueling interval.... The actual time interval between surveillances will be a function of the plant capacity factor for the particular fuel cycle.... [For a nominal 24 month cycle,] the fuel cycle length will be 513 effective full power days (EFPD). Assuming a production factor of 90% and a 75 day refueling outage, an actual cycle length and surveillance interval would be approximately 21 months. Technical Specification 4.0.2.a permits a maximum allowable extension not to exceed 25% of the current surveillance interval.... Thus, the proposed change does not represent a radical increase over what is already permitted by

technical specifications. Therefore, the proposed change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensee:* Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* April 20, 1988 (Reference PCN-250)

*Description of amendment request:* The proposed change would revise Technical Specification 3/4.3.3.10, "Loose-Part Detection Instrumentation." The loose part detection instrumentation serves to provide early detection of loose metallic parts in the primary system to avoid and/or mitigate damage to the primary system components. The Vibration and Loose Parts Monitoring System (V&LPM) monitors the major reactor primary system components. The selected locations provide a qualitative indication of vibration throughout the primary system.

Surveillance Requirement 4.3.3.10.c states that each channel of the loose-part detection system shall be demonstrated operable by the performance of a channel calibration at least once per 18 months. The proposed change would revise this requirement from at least once per 18 month interval to at least once per refueling.

*Basis for proposed no significant hazards consideration determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The operability of the V&LPM ensures that sufficient capability exists to detect loose metallic parts in the primary system and [to] avoid or mitigate damage to primary system components. The system serves no safety function and is not credited in the accident analyses. The proposed change will revise the frequency of the channel calibration test to an interval [of] at least once per refueling. Most failures of the system are detected during performance of the daily and monthly testing. Therefore, the proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The V&LPM is a monitoring system and does not initiate any automatic protective functions. The proposed change extends the surveillance interval (for a test intended to be performed during a refueling outage) to coincide with the refueling outage interval.... Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change extends the 18 month interval for performing the... channel calibration surveillance to refueling intervals. The actual time interval between surveillances will be a function of the plant capacity factor for the particular fuel cycle. For the equilibrium cycle, the fuel cycle length will be 513 effective full power days (EFPD). A production factor of 90% and a 75 day refueling outage would result in an actual cycle length of 21 months. Technical Specification 4.0.2.a permits a maximum allowable extension not to exceed 25% of the current surveillance interval.... Thus, the proposed change does not represent a radical increase over what is already permitted by technical specifications.... Therefore, the proposed change will not involve a significant increase in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensee:* Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* October 11, 1988 (Reference PCN-264)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.4.5.2, "Operational Leakage." The purpose of this specification is to provide limits on operational leakage. The surveillance requirements for the Reactor Coolant System (RCS) Pressure Isolation Valves provide added assurance of valve integrity, thereby reducing the probability of gross valve failure and a consequent intersystem Loss Of Coolant Accident (LOCA). Leakage from the RCS Pressure Isolation Valves is identified leakage and will be considered as a portion of the allowable limit. The RCS Pressure Isolation Valves function to create a pressure boundary isolating the RCS from connecting systems. Surveillance Requirement 4.4.5.2.2.a requires verifying valve leakage to be within its limit at least once every 18 months. The proposed change would revise the surveillance interval from at least once per 18 months to at least once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10 CFR 50.91 (a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The function of the RCS Pressure Isolation Valves is to create a pressure boundary between the RCS and connected systems. The proposed change increases the interval for surveillance testing currently performed at 18 month intervals to a refueling interval, nominally 24 months. There has been one failed leak test detected in the 18 month surveillance program which is not expected to be repeated due to the implementation of the recommendations provided in IE Bulletin 85-03. Therefore, the proposed change will not significantly increase the probability [or consequences] of previously analyzed accidents.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change affects only the frequency of the RCS Pressure Isolation Valves surveillance. The proposed change does not alter the configuration of the facility or its operation. Therefore, the proposed

VOL 54 ISS 44 MR 8 1989 UMI

change does not create the possibility of a new or different kind of accident.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change affects the frequency of the surveillance test which may result in a small reduction in confidence in system operability and the associated margin of safety. However, the 18 month surveillances have only detected one failure, which has been resolved in conjunction with IE Bulletin 85-03. In addition, other [T]echnical [S]pecification surveillances establish requirements to monitor leakage from the reactor coolant system on a more frequent basis. Therefore, the proposed change will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* October 11, 1988 (Reference PCN-265)

*Description of amendment request:* The proposed change would revise Surveillance Requirement 4.5.1.e of Technical Specification (TS) 3/4.5.1, "Safety Injection Tanks." The purpose of this specification is to ensure that the Safety Injection Tanks are operable. Surveillance Requirement 4.5.1.e requires verifying that each Safety Injection Tank isolation valve opens automatically before Reactor Coolant System (RCS) pressure exceeds 715 psia, and upon a SIAS test signal. The proposed change would revise the surveillance interval for these tests from at least once per 18 months to at least once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10CFR 50.91 (a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The [S]afety [I]njection [T]ank isolation valves are used to separate the RCS from the [S]afety [I]njection [T]anks when depressurizing the RCS. The proposed change increases the interval for surveillance testing currently performed at 18 month intervals to a refueling interval, nominally 24 months. There have been no failures in the 18 month surveillance program. Therefore, the proposed change will not significantly increase the probability [or consequences] of previously analyzed accidents.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change affects only the frequency of the [S]afety [I]njection [T]ank isolation valve surveillance. The proposed change does not alter the configuration of the facility or its operation. Therefore, the proposed change does not create the possibility of a new or different kind of accident.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change affects only the frequency of the surveillance test which may result in a small reduction in confidence in system operability and the associated margin of safety. However, the 18 month surveillances have detected no failures. Therefore, the proposed change will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* October 24, 1988 (Reference PCN-258)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.6.3, "Containment Isolation Valves." TS 3/4.6.3 lists the containment isolation valves and specifies their required response times for closure. Operability of the containment isolation valves ensures that the containment atmosphere will be isolated from the outside environment in the event of a release of radioactive material to the containment atmosphere. Containment isolation within the time limits specified ensures that the release of radioactive material to the environment will be consistent with the assumptions used in the accident analyses. TS 3/4.6.3 also defines periodic surveillance tests and action to be taken if the minimum operability requirements are not met. Surveillance Requirement (SR) 4.6.3.2 requires that each isolation valve (except check valves) specified in Section A and B of Table 3.6-1, "Containment Isolation Valves," of this specification, be demonstrated operable at least once per 18 months during cold shutdown or refueling by verifying that on an Engineered Safety Features Actuation System (ESFAS) test signal, each isolation valve actuates to its isolation position. The proposed change would revise this surveillance interval from at least once per 18 months to at least once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No

The required semi-annual testing of the components included within the scope of these [T]echnical [S]pecifications provides a high level of assurance that the equipment is capable of proper operation. The frequency of the semi-annual testing is not affected by this change.... Based on [a] review of the... surveillance testing to date, the results have demonstrated reliable equipment performance. Additional assurance of proper operation of ASME pumps and valves is provided by inservice testing. Therefore, the proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change only affects the frequency of refueling interval testing and does not alter the configuration of the facility or its operation. Therefore, this proposed change will not create the possibility of a

new or different kind of accident from any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No

The proposed change only affects the frequency of testing on a sub-system basis (18 months) without affecting the testing frequency that is done on a sub-group basis (semi-annual). The semi-annual test is capable of detecting problems which are most likely to occur. Inservice testing of ASME pumps and valves provides additional assurance of proper operation. This, coupled with reliable equipment performance, makes any potential reduction in safety margin negligible. Therefore, the proposed change will not involve a significant increase in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* October 24, 1988 (Reference PCN-261)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.1.2.2, "Reactivity Control Systems, Boration Flow Paths-Operating," and TS 3/4.5.2, "Emergency Core Cooling Subsystems-Tavg Greater Than or Equal to 350° F." TS 3/4.1.2.2 defines the required number of operable boron injection flow paths to the Reactor Coolant System. TS 3/4.5.2 defines the required number of operable Emergency Core Cooling System (ECCS) subsystems. The boron injection system ensures that negative reactivity control is available during each mode of reactor operation. TS 3/4.5.2 requires two independent operable Emergency Core Cooling Systems (ECCS) in modes 1, 2, and 3. The operability of two separate and independent ECCS subsystems ensures that sufficient emergency core cooling capability will be available in the event of a LOCA assuming the loss of one subsystem through any single failure consideration. In addition, each Technical Specification defines periodic surveillance tests and action to be taken if the minimum operability requirements are not met. These tests require verification that components will operate upon energization/deenergization of the respective initiation relays, that the shutdown cooling isolation valve interlocks will operate properly, and that the Containment Sump is not blocked or damaged.

Surveillance Requirement (SR) 4.1.2.2.c requires that, at least once per 18 months during shutdown, each valve in the boron injection flow path be demonstrated operable by verifying that it actuates to its correct position upon a Safety Injection Actuation Signal (SIAS) test signal. SR 4.5.2.e requires that, at least once per 18 months during shutdown, the components in the ECCS flow paths be demonstrated operable by verifying that they actuate to their correct position upon a Safety Injection Actuation Signal (SIAS) or Recirculation Actuation Signal (RAS) test signal. SR 4.5.2.d.1 requires verifying, at least once every 18 months, automatic closure of the Shutdown Cooling Isolation valves when the simulated RCS pressure equals or exceeds 715 psia, and that interlocks prevent opening the valves when the RCS pressure equals or exceeds 376 psia. SR 4.5.2.d.2 requires a visual inspection of the Containment Sump to verify that all sump inlets are not restricted by debris and that no evidence of structural distress or abnormal conditions exists. The proposed change would revise the interval of these surveillance tests from at least once per 18 months during shutdown to at least once per refueling interval during shutdown.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The required semi-annual testing of the components included within the scope of Surveillance Requirements 4.1.2.2 and 4.5.2.e provides a high level of assurance that the equipment is capable of proper operation. The frequency of the semi-annual testing is not affected by this change. Inservice testing of ASME pumps and valves provides additional assurance of proper operation. Results of surveillance testing to date have demonstrated reliable equipment performance. The proposed change also increases the interval for surveillance testing associated with Shutdown Cooling Isolation Valve interlocks, currently performed at 18 month intervals. No problems have been detected in the 18 month surveillance program. Access to the Containment Sump area is severely restricted, especially during non-refueling outage periods. This essentially precludes events which could cause the condition of the Containment Sump to deteriorate. Inspections since the beginning of commercial operation of both units have all been satisfactory. Therefore, the proposed change will not significantly increase the probability or consequences of an accident previously analyzed.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change only affects the frequency of refueling interval testing and does not alter the configuration of the facility or its operation. Based on the review of plant history, it has been demonstrated that most deficiencies have been detected by means other than surveillances. Therefore, this proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change only affects the frequency of testing on a subsystem basis (18 months) without affecting the testing frequency that is done on a sub-group basis (semi-annual). The semi-annual test is capable of detecting problems which are most likely to occur. Inservice testing of ASME pumps and valves provides additional assurance of proper operation. This, coupled with reliable equipment performance, makes any potential reduction in safety margin negligible. The proposed change also affects the frequency of certain shutdown cooling isolation valve surveillance tests which may result in a small reduction in confidence in valve operability and the associated margin of safety. However, the 18 month surveillances have historically detected no problems. Therefore, the proposed changes will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

VOL 54 ISS 44 MR 8 1989 UMI

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* December 16, 1988 (Refernce PCN-254)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.8.4.1, "Containment Penetration Conductor Overcurrent Protective Devices," and TS 3/4.8.4.2 "Motor Operated Valves Thermal Overload Protection Bypass." TS 3.8.4.1 requires circuits entering containment to be provided with an overcurrent protective device. The containment penetration conductor overcurrent protective devices listed in Table 3.8-1 of this Specification are required to be operable in Mode 1 through Mode 4. Containment electrical penetrations and penetration conductors are protected by either deenergizing circuits not required during reactor operation or by demonstrating the operability of primary and backup overcurrent protection circuit breakers during periodic surveillance. The overcurrent protective devices provide protection of the containment penetration to maintain containment integrity. TS 3.8.4.2 requires the thermal overload protection to be bypassed by a bypass device integral with the motor starter of each valve listed in Table 3.8-2 of this Specification. The thermal overload bypass device ensures that the motor will not trip off due to a thermal overload. The bypass devices are required to be operable whenever the motor-operated valve is required to be operable.

Surveillance Requirement 4.8.4.1.a requires all containment penetration conductor overcurrent devices listed in Table 3.8-1 of the Technical Specification be demonstrated operable at least once per 18 months by verifying that the medium voltage (4-15KV) circuit breakers are operable. This is accomplished by selecting on a rotating basis at least 10 percent of the circuit breakers of each voltage level, and performing a Channel Calibration of the associated protective relays and an integrated system functional test. For any circuit breaker found inoperable, an additional representative sample of at least 10 percent of the circuit breakers of the inoperable type shall also be functionally tested. In addition, 10 percent of the lower voltage circuit breakers are functionally tested on a rotating basis. Again, if any circuit breaker is found inoperable, an additional representative sample of 10 percent will be tested. Surveillance Requirement 4.8.4.1.a states that the thermal overload protection on motor operated valves (MOVs) shall be verified bypassed by integral bypass devices at least once per 18 months. The proposed change would revise these surveillance intervals from at least once per 18 months to at least to once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No

Containment penetration overcurrent devices are installed to protect equipment from being damaged due to an overcurrent condition. The thermal overload bypass device ensures that the motor will not trip off due to a thermal overload. The proposed change revises the frequency of surveillance tests to demonstrate the operability of the electrical equipment protective devices. While the proposed change increases the interval between surveillance tests, past surveillances have demonstrated high system reliability. Therefore, the proposed change will not significantly increase the probability.... or consequences of previously evaluated accidents.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No

The proposed change only redefines the surveillance interval for containment penetration overcurrent protection and the surveillance interval for MOV thermal overload bypass verification. No physical modification to the plant is proposed, nor is there a change in how the facility is operated. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated(.)

Will operation of the facility in accordance with this proposed change involve a significant reduction in a margin of safety?

Response: No

The proposed change reduces the frequency of the surveillance tests which may reduce the confidence in the electrical equipment protective devices[']' operability at the end of the surveillance interval and may reduce the associated margin of safety. A review of plant history documentation reveals that the surveillance test provides excellent results in equipment operability. Therefore, the proposed change will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposed to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* December 19, 1988 (Reference PCN-279)

*Description of amendment request:* The proposed change would revise Technical Specification (TS) 3/4.4.5.1, "Reactor Coolant System Leakage." The system functions to detect liquid level in the containment sump using two redundant transmitters which provide information to the control room. The level signal from train 'B' also inputs to the Critical Function Monitoring System (CFMS), which converts changes in level signal to flowrate. Surveillance Requirement (SR) 4.4.5.1.b requires performing a channel calibration at least once every 18 months. The proposed change would revise the surveillance interval from at least once per 18 months to at least once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No. This [T]echnical [S]pecification addresses equipment used for measuring level in the Containment sump. Leak detection is accomplished by monitoring the changes in level indication as opposed to using the absolute value that is indicated. The containment sump inlet flow surveillance calibrates the monitoring instrumentation. The proposed change increases the interval for surveillance testing currently performed at 18 month intervals. There has been only one out of calibration condition determined through the 18 month surveillance test. Since these instruments are used by monitoring the changes, the instrument may be capable of performing its leak detection function even though the instrument is out of calibration on an absolute basis. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change affects only the frequency of the containment sump inlet flow surveillance. The proposed change does not alter the configuration of the facility or its operation. Therefore the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change affects only the frequency of the surveillance. The 18 month surveillances have detected no out of calibration conditions since 1985. All other problems have been identified by Operations channel comparisons (performed each shift). Therefore, the proposed change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California**

*Date of amendment request:* December 28, 1988 (Reference PCN-271)

*Description of amendment request:* The proposed change would revise Technical Specification 3/4.3.4, "Turbine Overspeed Protection." This specification is provided to ensure that the turbine speed control valves are operable and will protect the turbine form excessive overspeed. The main generator overspeed tripping circuits are designed to trip the turbine if the factory recommended maximum speed is approached. This circuit consists of dual train protection with two independent tripping mechanisms and electrical circuits which initiate a trip on the turbine if the turbine speed reaches the trip setpoint. Turbine overspeed protection is considered necessary to prevent postulated turbine missiles from being generated and potentially damaging safety related structures.

Surveillance Requirement 4.3.4.c specifies that the turbine overspeed protection system shall be demonstrated operable at least once per 18 months by performance of a channel calibration on the turbine overspeed protection systems. The proposed change would revise the surveillance interval from at least once per 18 months to at least once per refueling interval.

*Basis for Proposed No Significant Hazards Consideration Determination:* As required by 10CFR 50.91 (a), the licensee has provided the following no significant hazards consideration determination:

Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The main turbine overspeed trip test has consistently proven system integrity and component reliability. No detrimental trends or degradation of components have been found. Recalibration of protective and control relays ha[s] been minimal. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change only revises the period the 18 month channel calibration is performed. The facility will not be operated any different[ly] than it is currently. Therefore, the proposed change will not create the possibility of a new or different kind of accident form any accident previously evaluated.

Will operation of the facility in accordance with the proposed change involve a significant reduction in a margin of safety?

Response: No.

Based on the results of the turbine overspeed protection surveillance, currently performed every 18 months,.... extending it to a refueling interval, nominally 24 months, will [not] involve a significant reduction in a margin of safety.

The NRC staff has reviewed this analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

*Local Public Document Room location:* General Library, University of California, P.O. Box 19557, Irvine, California 92713.

*Attorney for licensees:* Charles R. Kocher, Assistant General Counsel and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770.

*NRC Project Director:* George W. Knighton

**Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee**

*Date of amendment requests:* January 27, 1981 (TS 88-31)

*Description of amendment requests:* The Tennessee Valley Authority (TVA) proposes to modify the Sequoyah Nuclear Plant (SQN) Units 1 and 2 Technical Specifications (TS). The changes affect the limiting condition for operation (LCO) 3.4.8, Specific Activity, for radioiodine in the reactor coolant system. The proposed changes would (1) delete the Action a for Modes 1, 2 and 3, eliminating the reporting requirement for the number of hours above the allowable dose equivalent Iodine 131 (I-131) limit; (2) delete the part of the Action a for Modes 1, 2, 3, 4 and 5 that involves the special report requirement for I-131 and proposed an additional requirement in TS Section 6.9, Annual Reports, to include an annual report to NRC regarding instances when the I-131 specific activity limit was exceeded; and (3) within the Bases sections for TS 3/4.4.8, delete the discussion of the Specific Activity shutdown requirement for operation in excess of 800 hours above the dose limit in a 12-month period.

*Basis for proposed no significant hazards consideration determination:* TVA provided the following information on the proposed TS changes in its submittal:

TVA is requesting this change to reduce unnecessary reporting requirements and eliminate an unnecessary shutdown requirement. The proposed changes are made in response to NRC Generic Letter (GL) 85-19.

The primary coolant-specific activity is sampled for radioiodine in accordance with SQN technical specification table 4.4-4. Technical specification 3.4.8 contains specific actions to be taken in response to high specific [I-131] activities. These requirements ensure plant operation within the assumptions of previous accident analyses. In addition, waste sampling for radioiodine is performed in accordance with technical specification tables 4.11-1 and 4.11-2. Radioiodine effluent monitoring instrumentation requirements are specified in technical specification tables 3.3-12 and 3.3-13 for liquid and gaseous effluent release paths. These sampling and monitoring programs ensure that radioactive effluent

VOL 54 ISS 44 MR 8 1989 UMI

releases are maintained within regulatory limits.

NRC issued GL 85-19 to recommend that licensees delete unnecessary reporting and plant shutdown requirements. The recommendation was based on the NRC review of nuclear fuel quality and performance and an assessment of the usefulness of the standard technical specification reporting and plant shutdown requirements. TVA's fuel performance at SQN is consistent with the industry experience. Therefore, the recommendations of GL 85-19 are applicable to SQN.

The Commission has provided Standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). 10 CFR 50.91 requires that at the time a licensee requests an amendment, it must provide to the Commission its analyses, using the standards in Section 50.92, on the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the licensee has performed and provided the following analysis:

TVA has evaluated the proposed technical specification change and has determined that it does not represent a significant hazards consideration based on criteria established in 10 CFR 50.92(c). Operation of SQN in accordance with the proposed amendment will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change to the unnecessary reporting requirements regarding radioiodine 131 levels in the primary coolant system is strictly administrative and involves no change to plant hardware or its configuration. The shutdown requirement deleted by this change has been evaluated by the NRC in GL 85-19 as being unnecessary and serving in no way to increase plant safety. TVA fuel performance at SQN is consistent with industry experience. The remaining requirements of technical specification 3.4.8 ensure that the probability or consequences of accidents previously evaluated remain unchanged. Therefore, deletion of the unnecessary administrative requirements changes neither the probability of occurrence nor the consequences of a previously evaluated accident.

(2) Create the possibility of a new or different kind of accident from any previously analyzed. The administrative change to delete certain unnecessary reporting and plant shutdown requirements does not affect plant hardware or its configuration. Therefore, deletion of the unnecessary administrative requirements creates no new or different type of accident. The remaining requirements of technical specification 3.4.8 ensure plant operation within the bounds of previous accident analyses. The requirements of technical specifications 3.3.3.8, 3.3.3.10, 3.11.1.1, and 3.11.2.1 ensure that radioactive effluent releases are maintained within regulatory limits.

(3) Involve a significant reduction in a margin of safety. The margin of safety is not reduced by the administrative change to delete certain unnecessary reporting and shutdown requirements. The remaining requirements of technical specification 3.4.8 and the requirements of technical specifications 3.3.3.8, 3.3.3.10, 3.11.1.1, and 3.11.2.1 ensure that the margin of safety is preserved.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendments involves no significant hazards considerations.

*Local Public Document Room location:* Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

*Attorney for licensee:* General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

*NRC Assistant Director:* Suzanne Black

**Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia**

*Date of amendment requests:* October 11, 1988

*Description of amendment requests:* The proposed amendments would modify Surry Units 1 and 2 Technical Specifications (TS) Sections 3.0, "Turbine Cycle," 3.9, "Station Service System," and 3.13, "Emergency Power Systems." The proposed modifications address the operability and redundancy requirements of the cross-connect feature of the Auxiliary Feedwater (AFW) System. The proposal is the result of the identification of an apparent discrepancy between the analyses presented in the Updated Final Safety Analysis Report (UFSAR) and the requirements of the TS. This discrepancy was found to result in the potential for inadequate AFW flow via the Unit-to-Unit Cross-Connect for certain high energy line break events.

Surry Units 1 and 2 AFW systems can be cross-connected. Thus, in the event of a failure of all of one Unit's AFW pumps, core cooling can be provided by the other Unit's AFW pumps via the cross-connect. The current TS require that in order to operate a Unit, only one of the other Unit's AFW pumps need be operable. The proposed change would increase the number of required available pumps to two. This would provide an additional margin of safety for common mode failure events. Allowance is made for the outage time necessary to conduct maintenance on the AFW pumps.

*Basis for proposed no significant hazards consideration determination:* The Commission has provided criteria for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three criteria in the amendment application and made a proposed no significant hazards consideration determination. In regard to the first criterion, the licensee provided the following analysis:

The effect of the changes will be to increase the reliability of the auxiliary feedwater cross-connect feature, which is relied on for mitigation of certain high energy line breaks outside containment and fires [sic]. The current UFSAR accident analysis results and conclusions are not affected by the proposed changes.

With respect to the second criterion, the licensee stated:

The redundancy requirements for the auxiliary feedwater system have no impact on the range of initiating events previously assessed.

In regard to the third criterion, the licensee provided the following statement:

Since the results of the existing UFSAR accident analyses remain bounding, the safety margins are not impacted.

The staff has reviewed the analysis provided by the licensee in support of a proposed no significant hazards consideration determination. The staff agrees with the licensee's analysis and believes that the licensee has met the criteria for such a determination. In addition, the Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples (51 FR 7751). One of the examples of actions involving no significant hazards considerations is example (ii), a change that constitutes an additional restriction not presently included in the TS; e.g., a more stringent surveillance requirement. The proposed changes fall within the scope of this example. Therefore, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

## PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the Federal Register on the day and page cited. This notice does not extend the notice period of the original notice.

**Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana**

*Date of amendment request:* December 16, 1988 as supplemented January 24, 1989

*Brief description of amendment request:* The proposed amendment would modify the Technical Specifications (TSs) to provide one-time exceptions to the provisions of TS 3.0.4 for three TSs for use during the second refueling outage scheduled to begin March 15, 1989. These exceptions are applicable in operations conditions 4 or 5 to allow entry into a specified operational conditions without meeting the Limiting Condition for Operation (LCO), provided that the requirements of the associated action statements are met.

*Date of publication of individual notice in* Federal Register: January 31, 1989 (54 FR 4927) and corrected February 16, 1989 (54 FR 7115)

*Expiration date of individual notice:* March 2, 1989

*Local Public Document Room location:* Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

**Houston Lighting & Power Company, Docket No. 50-498, South Texas Project, Unit 1, Matagorda County, Texas**

*Date of amendment request:* January 17, 1989

*Brief description of amendment request:* The proposed amendment would revise the Unit 1 Technical Specifications to incorporate the Unit 1/Unit 2 Combined Technical Specifications which are to be issued with the Unit 2 full power license. At the time Unit 2 receives an operating license, Houston Lighting & Power Company will receive Technical Specifications that are applicable for both units, i.e., Combined Technical Specifications. To implement the Combined Technical Specifications on Unit 1, the Unit 1 license requires an administrative change.

*Date of publication of individual notice in* Federal Register: February 2, 1989 (54 FR 5292).

*Expiration date of individual notice:* March 6, 1989

*Local Public Document Room Locations:* Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701

**Houston Lighting & Power Company, Docket No. 50-498, South Texas Project, Unit 1, Matagorda County, Texas**

*Date of amendment request:* January 25, 1989

*Brief description of amendment request:* The proposed amendment would change the technical specifications by modifying the Fuel Handling Building Exhaust Air Subsystem electric heaters to operate at 38 kW instead of the current 50 kW; modifying the Source Range Neutron Monitor calibration requirements to ensure that a new model of preamplifier can be installed for use in the Source Range Neutron Monitoring instrumentation circuit; and clarifying action statements for the Chemical Detection System and the Control Room Ventilation System.

*Date of publication of individual notice in* Federal Register: February 15, 1989 (54 FR 6789)

*Expiration date of individual notice:* March 16, 1989

*Local Public Document Room Locations:* Wharton County Junior College Library, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701

**Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania**

*Date of amendment request:* June 12, 1987 as amended February 7, 1989

*Brief description of amendment request:* This amendment will modify the Technical Specifications to reflect the instrumentation required by ATWS (10 CFR 50.62) Rule.

*Date of publication of individual notice in* Federal Register: February 17, 1989 (54 FR 7313)

*Expiration date of individual notice:* March 20, 1989

*Local Public Document Room location:* Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

## NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the Federal Register as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has

VOL 54 ISS 44 MR 8 1989 UMI

made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

**Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County,. Illinois**

*Date of application for amendments:* November 15, 1988

*Brief description of amendments:* Delete tabular listing of safety-related snubbers from Technical Specifications in accordance with Generic Letter 84-13.

*Date of issuance:* February 22, 1989

*Effective date:* February 22, 1989

*Amendment Nos.:* 115 and 111

*Facility Operating License Nos. DPR-29 and DPR-30.* Amendments revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** December 30, 1988 (53 FR 53091). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 22, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

**Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan**

*Date of application for amendment:* December 22, 1988, as supplemented on October 26, 1988.

*Brief description of amendment:* This amendment revises the station battery surveillance test time from the present 8-hour requirement to two hours.

*Date of issuance:* February 15, 1989

*Effective date:* February 15, 1989

*Amendment No.:* 94

*Facility Operating License No. DPR-6.* The amendment revises the Technical Specifications.

*Date of initial notice in* **Federal Register:** March 25, 1987 (52 FR 9566). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 15, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

**Duke Power Company, et al., Docket No. 50-414, Catawba Nuclear Station, Unit 2, York County, South Carolina**

*Date of application for amendment:* May 24, 1988

*Brief description of amendment:* The amendment revised license condition 2.C.(11) to delete item 6 of Attachment 1.

*Date of issuance:* February 15, 1989

*Effective date:* February 15, 1989

*Amendment No.:* 53

*Facility Operating License No. NPF-52.* Amendment revised the Operating License.

*Date of initial notice in* **Federal Register:** October 19, 1988 (53 FR 40984). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 15, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

**Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania**

*Date of application for amendment:* November 1, 1988

*Brief description of amendment:* The amendment revises license condition 2.c(5) and eliminates most fire protection specifications from the Technical Specifications. Approval of this amendment is in accordance with our Generic Letter 86-10 and 88-12.

*Date of issuance:* February 17, 1989

*Effective date:* February 17, 1989

*Amendment No.:* 136

*Facility Operating License No. DPR-66.* Amendment revised the License and the Technical Specifications.

*Date of initial notice in* **Federal Register:** December 14, 1988 (53 FR 50326). An earlier notice was published on July 15, 1987 (52 FR 26585) as a result of the licensee's submittal dated April 7, 1987. The November 1, 1988 submittal replaces the April 7, 1987 submittal.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

**Duquesne Light Company, Docket No. 50-412, Beaver Valley Power Station, Unit No. 2, Shippingport, Pennsylvania**

*Date of application for amendment:* June 27, 1988

*Brief description of amendment:* The amendment revises one of the reporting requirements in Table 3.3-6, "Radiation Monitoring Instrumentation", of the Technical Specifications. The amendment also effects a number of editorial changes.

*Date of issuance:* February 14, 1989

*Effective date:* February 14, 1989

*Amendment No.* 13

*Facility Operating License No. NPF-73.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** September 7, 1988 (53 FR 34603). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1989

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

**Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida**

*Date of application for amendment:* November 16, 1987, as revised August 25, 1988 and supplemented October 31, 1988

*Brief description of amendment:* The amendment revised the maximum allowable temperature of the ultimate heat sink.

*Date of issuance:* February 14, 1989

*Effective date:* February 14, 1989

*Amendment No.:* 109

*Facility Operating License No. DPR-72.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** November 30, 1988 (53 FR 48338). The letter dated October 31, 1988 provided additional information which did not alter the staff's proposed determination that the amendment involved no significant hazards considerations.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room Location:* Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629

**Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida**

*Date of application for amendment:* April 15, 1987

*Brief description of amendment:* The amendment revised the Technical Specifications surveillance requirements to allow testing of the high and low pressure systems in Modes 3, 4, 5, or 6, rather than in Mode 6 only.

*Date of issuance:* February 16, 1989

*Effective date:* February 16, 1989

*Amendment No.:* 110

*Facility Operating License No. DPR-72.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** April 20, 1988 (53 FR 13015). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 16, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room Location:* Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629

**General Public Utilities Nuclear Corporation, Docket No. 50-320, Three Mile Island Nuclear Station, Unit No. 2, (TMI-2), Dauphin County, Pennsylvania**

*Date of application for amendment:* March 11, 1988

*Brief description of amendment:* The amendment modifies Appendix A Technical Specification Section 6 changing the requirement that all retraining and replacement training for TMI-2 personnel be under the direction of the Plant Training Manager and substitutes the requirement that this training be under his cognizance. Actual direction of the specific training program would be the responsibility of the TMI-2 organization requiring the training. The exception to this change, which is consistent with the existing Technical Specifications, is the Radiological Controls Training which may remain under the direction of the Vice President Radiological and Environmental Controls.

*Date of Issuance:* February 14, 1989

*Effective date:* February 14, 1989

*Amendment No.:* 32

*Facility Operating License No. DPR-50.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** September 7, 1988 (53 FR 34605). The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated February 14, 1989

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

**Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-321, Edwin I. Hatch Nuclear Plant, Unit 1, Appling County, Georgia**

*Date of application for amendment:* September 6, 1988

*Brief description of amendment:* The amendment modified the definitions of hot shutdown and cold shutdown and modified relevant Technical Specification sections to specify which equipment must be, or need not be, operable during performance of hydrostatic and leakage pressure testing.

*Date of issuance:* February 24, 1989

*Effective date:* February 24, 1989

*Amendment No.:* 160

*Facility Operating License No. DPR-57.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** November 2, 1988 (53 FR 44251). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 24, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

**Illinois Power Company, Docket No. 50-461, Clinton Power Station, Unit 1, DeWitt County Illinois**

*Date of application for amendment:* October 30, 1987, as supplemented December 21, 1988.

*Description of amendment request:* The proposed changes will achieve consistency with previously approved changes and to clarify existing requirements.

*Date of issuance:* February 22, 1989

*Effective date:* February 22, 1989

*Amendment No.:* 19

*Facility Operating License No. NPF-62.* The amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** January 27, 1988 (53 FR 2317 and 53 FR 2318). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 22, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

**Indiana Michigan Power Company, Dockets Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Units Nos. 1 and 2, Berrien County, Michigan**

*Date of application for amendments:* March 26, 1987, as supplemented August 25, 1987, June 7, 1988 and August 31, 1988.

*Brief description of amendments:* The amendments revise the Technical Specifications (TS) on boron concentrations; change the moderator temperature coefficient to a ramp function rather than a step function; remove 3-loop operation in Modes 1 and 2; add additional restrictions because of safety analyses; add footnotes such that addition of water from the RWST does not constitute a boron dilution; clarify trip channel positions for different pressure between steam lines in 3-loop operation; require two PORV's be available in Modes 1, 2, and 3; add 4.0.4 and 3.0.4 section exemptions; change values related to boron dilution events, half-loop operation, RCS flow measurement, auxiliary feedwater flow measurements, and flow measurement error; change descriptions of P-12 interlock; simplify power distribution and APDMS requirements; make changes to achieve similarity between units; and make miscellaneous editorial changes

*Date of issuance:* February 10, 1989

*Effective date:* February 10, 1989

*Amendments Nos.:* 120 and 107

*Facility Operating Licenses Nos. DPR-58 and DPR-74.* Amendments revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** June 3, 1987 (52 FR 20801) and May 6, 1988 (53 FR 16949). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 10, 1989

*No significant hazards consideration comments received:* No. Clarifications to the proposed TS changes were submitted in letters dated August 25, 1987 and January 13, June 7 and August 31, 1988. A portion of the amendment request was withdrawn by letter dated June 7, 1988. These changes did not substantially alter the action initially noticed or affect the Commission's initial determination of no significant hazards consideration.

VOL 54 ISS 44 MR 8 1989 UMI

*Local Public Document Room location:* Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

**Indiana Michigan Power Company, Docket No. 50-315, Donald C. Cook Nuclear Plant, Unit No. 1, Berrien County, Michigan**

*Date of application for amendment:* August 9, 1988, as revised January 10, 1989.

*Brief description of amendment:* The amendment grants one-time surveillance interval extensions for surveillances associated with ice basket weighing and resistance temperature detector calibrations.

*Date of issuance:* February 23, 1989
*Effective date:* February 23, 1989
*Amendment No.:* 121
*Facility Operating License No. DPR-58.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** January 17, 1989 (54 FR 1806). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

**Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi**

*Date of application for amendment:* August 19, 1988, as supplemented October 10, 1988.

*Brief description of amendment:* The amendment changes the downtravel power cutoff setpoint for the refueling platform hoist in TS 3/4.9.6, "Refueling Equipment."

*Date of issuance:* February 15, 1989
*Effective date:* February 15, 1989
*Amendment No.* 55
*Facility Operating License No. NPF-29.* This amendment revises the Technical Specifications.

*Date of initial notice in* **Federal Register:** November 2, 1988 (53 FR 44252). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 15, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

**Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota**

*Date of application for amendment:* February 16, 1987, as revised August 17, 1988

*Brief description of amendment:* This amendment revises the plant Technical Specifications (TSs) to: (1) clarify the location for monitoring airborne radioiodine and particulates consistent with and as set forth in the approved Offsite Dose Calculation Manual; (2) delete page 251a, incorrectly retained, and which should have been deleted by License Amendment No. 46 (July 1, 1986); (3) delete Section 6.8 which was superseded by the publication of 10 CFR 50.49, "Environmental qualification of electric equipment important to safety for nuclear power plants"; (4) standardize reports and correspondence to reflect addressee changes in conformance with 10 CFR 50.4; and (5) indicate the current ANSI standard referenced in the updated Qualify Assurance Plan for Monticello operation by replacing "Paragraph 4.4 of ANSI N18.7-1972" with "ANSI N18.7-1976 as modified by the Operational Quality Assurance Plan" on page 239 of the TSs.

*Date of issuance:* February 16, 1989
*Effective date:* February 16, 1989
*Amendment No.:* 59
*Facility Operating License No. DPR-22.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** October 5, 1988 (53 FR 39173). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 16, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

**Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska**

*Date of amendment request:* December 16, 1988.

*Brief description of amendment:* This amendment modified the Technical Specifications to (1) increase the minimum allowable Safety Injection and Refueling Water Tank (SIWRT) temperature from 40° F to 50° F, (2) change the title of the Senior Vice President - Nuclear Operations, Production Operations, Production Engineering, and Quality and Environmental Affairs to Senior Vice President - Nuclear Operations, Production Engineering, and Quality and Environmental Affairs, (3) administratively correct the listed NRC address to which the Monthly Operating Reports are sent, and (4) correct two references to the Updated Safety Analysis Report in T 3.5(8)b.(i) and 2.1.3. Additionally, the amendment revised Facility Operating License DPR-40 to delete a license condition, related to a modification to the Spent Fuel Pool storage capacity, which has been satisfied.

*Date of issuance:* February 14, 1989
*Effective date:* Full implementation within 30 days from the date of issuance.
*Amendment No.:* 119
*Facility Operating License No. DPR-40.* Amendment revised the Technical Specifications and license.

*Date of initial notice in* **Federal Register:** January 11, 1989 (54 FR 1022). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

**Philadelphia Electric Company, Public Service Electric and Gas Company Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania**

*Date of application for amendments:* March 21, 1988 as supplemented on September 23, 1988. The supplemental letter did not make substantive changes to the original application.

*Brief description of amendments:* The amendments (a) revised the Technical Specifications (TS) Bases to reflect the Codes now applicable to the recirculation system piping for Units 2 and 3, (b) revised the TS to reflect removal of the head spray piping for Unit 3, and (c) revised the TS to reflect removal of the recirculation system cross-tie piping and equalizer valves for Units 2 and 3.

*Date of issuance:* February 10, 1989
*Effective date:* February 10, 1989
*Amendments Nos.:* 138 and 140
*Facility Operating License Nos. DPR-44 and DPR-56:* Amendments revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** June 15, 1988 (53 FR 22404). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 10, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

**Philadelphia Electric Company, Public Service Electric and Gas Company Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania**

*Date of application for amendments:* August 26, 1988

*Brief description of amendments:* These amendments authorized the removal of that portion of the carbon dioxide fire suppression system (CARDOX) which is installed in the control room due to the potential for unexpected releases of carbon dioxide in the control room.

*Date of issuance:* February 13, 1989
*Effective date:* February 13, 1989
*Amendments Nos.:* 139 and 141
*Facility Operating License Nos. DPR-44 and DPR-56:* Amendments revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** December 30, 1988 (53 FR 53095). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 13, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York**

*Date of application for amendment:* September 13, 1988

*Brief description of amendment:* The amendment reflects deletion of pressure switches used to bypass the main steam line isolation valve (MSIV) reactor scram signal and to bypass the MSIV isolation signal on low main condenser vacuum when reactor pressure was below the setpoint, with the mode switch in the refuel or startup positions. The effect of the changes is to make the bypass dependent on the position of the mode switch alone, and independent of reactor pressure.

*Date of issuance:* February 7, 1989.
*Effective date:* February 7, 1989.
*Amendment No.:* 122
*Facility Operating License No. DPR-59:* Amendment revised the Technical Specification.

*Date of initial notice in* **Federal Register:** November 16, 1988 (53 FR 46152). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated Februray 7, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Penfield Library, State University College of Oswego, Oswego, New York.

*NRC Project Director:* Robert A. Capra.

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York**

*Date of application for amendment:* February 5, 1988 (TAC 67145)

*Brief description of amendment:* Reflects management reorganization of the New York Power Authority headquarters staff which merged the engineering staff and construction management functions into the existing operations departments.

*Date of issuance:* February 13, 1989
*Effective date:* February 13, 1989
*Amendment No.:* 123
*Facility Operating License No. DPR-59:* Amendment revised the Technical Specification.

*Date of initial notice in* **Federal Register:** April 20, 1988 (53 FR 13017). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 13, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Penfield Library, State University College of Oswego, Oswego, New York.

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York**

*Date of application for amendment:* December 1, 1986, November 19, 1987, and March 7, 1988

*Brief description of amendment:* This amendment modifies paragraph 2.D of the license to require compliance with the amended Physical Security Plan. This Plan was amended to conform to the requirements of 10 CFR 73.55. Consistent with the provisions of 10 CFR 73.55, search requirements must be implemented within 60 days and miscellaneous amendments within 180 days from the effective date of this amendment.

*Date of issuance:* February 14, 1989
*Effective date:* February 14, 1989
*Amendment No.:* 124
*Facility Operating License No. DPR-59:* This amendment revised the license.

*Date of initial notice in* **Federal Register:** December 30, 1988 (53 FR 53097). The Commission's related evaluation of the amendment is contained in a letter to the Power Authority of the State of New York dated February 14, 1989 and a Safeguards Evaluation Report dated February 14, 1989

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Penfield Library, State University College of Oswego, Oswego, New York.

**Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York**

*Date of application for amendment:* November 9, 1988

*Brief description of amendment:* The amendment completes the Commission action initiated in our letter of November 16, 1988, "Temporary Waiver of Compliance With Technical Specification Surveillance Tests 4.7.A.2.a(10) and 4.7.A.2.f." and supersedes the Temporary Waiver. This amendment also completes the Commission Action Concerning our letter dated November 29, 1988 which transmitted the "Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration and Opportunity For Hearing." This Notice was published in the **Federal Register** on December 7, 1988 (53 FR 49366). The amendment eliminates two tests required by the Technical Specifications during the 1988 refueling outage. These tests are a Type A primary containment integrated leak rate test and a Type A, Type B, or Type C leak rate test following replacement of the turbine exhaust line manual block valve in the high pressure coolant injection system. An exemption from the requirements of Appendix J to 10 CFR Part 50 to perform the tests was granted by our letter of November 16, 1988 and published in the **Federal Register** on November 25, 1988 (53 FR 47784).

*Date of issuance:* February 17, 1989
*Effective date:* February 17, 1989
*Amendment No.:* 125
*Facility Operating License No. DPR-59:* Amendment revised the Technical Specification. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1989.

VOL 54 ISS 44 MR 8 1989 UMI

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Penfield Library, State University College of Oswego, Oswego, New York.

**Tennessee Valley Authority, Docket No. 50-260, Browns Ferry Nuclear Plant, Unit 2, Limestone County, Alabama**

*Date of application for amendment:* July 29, 1988 (TS 246)

*Brief description of amendment:* This Technical Specification change updates and corrects all references to the present ADS timers in Table 3.2.B, "Instrumentation that Initiates or Controls the Core and Containment Cooling Systems." These modifications involve changes to the setpoints for the existing automatic depressurization system and add surveillance and setpoint requirements for the high drywell pressure bypass timer.

TVA's September 12, 1988 response to NRC's August 10, 1988 request for additional information provided the complete design package change for the ADS actuator modification, which did not change the substance of the Notice of Consideration of issuance of an amendment which the staff issued in the Federal Register on August 24, 1988 on TVA's application for TS 246.

*Date of issuance:* January 30, 1989

*Effective date:* January 30, 1989, and shall be implemented within 60 days

*Amendment No.:* 162

*Facility Operating License No. DPR-52:* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** August 24, 1988 (53 FR 32297). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 30, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* Athens Public Library, South Street, Athens, Alabama 35611.

**Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio**

*Date of applications for amendment:* December 1, 1986 and January 12 and January 29, 1988

*Brief description of amendment:* The amendment modified paragraph 2.D of the license to require compliance with the amended Physical Security Plan. This plan was amended to conform to the requirements of 10 CFR 73.55. Consistent with the provisions of 10 CFR 73.55, search requirements must be implemented within 60 days and miscellaneous amendments within 180 days from the effective date of this amendment. The amendment also permits modifications to vital area designations and the vital area access authorization system at the site.

*Date of issuance:* February 14, 1989.

*Effective date:* February 14, 1989.

*Amendment No.* 129

*Facility Operating License No. NPF-3.* Amendment revised the license.

*Date of initial notice in* **Federal Register:** December 30, 1988 (53 FR 53103). The Commission's related evaluation of the amendment is contained in a Safeguards Evaluation Report dated February 14, 1989.

*No significant hazards consideration comments received:* No

*Local Public Document Room location:* University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

**Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri**

*Date of application for amendment:* December 16, 1988

*Brief description of amendment:* The amendment revised Technical Specification 5.3.2, "Control Rod Assemblies," to allow the use of hafnium and/or silver-indium-cadmium as the absorber material in the rod cluster control assemblies.

*Date of issuance:* February 14, 1989

*Effective date:* February 14, 1989

*Amendment No.:* 41

*Facility Operating License No. NPF-30.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** January 11, 1989 (54 FR 1026). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251 and the John M. Olin Library, Washington University, Skinker and Lindell Boulevards, St. Louis, Missouri 63130.

**Virginia Electric and Power Company, et al., Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia**

*Date of application for amendments:* January 13, 1989

*Brief description of amendments:* The amendments revised the NA-1&2 TS 3/4.9.10, Refueling Operations Water Level-Reactor Vessel, to allow control rod movement with the requirement of 23 feet of water above the irradiated fuel assemblies within the reactor pressure vessel. The amendments removed the ambiguity associated with control rod latching and unlatching operations where control rods are raised (with the upper internals package installed) for weight or drag testing.

*Date of issuance:* February 15, 1989

*Effective date:* February 15, 1989

*Amendment Nos.:* 115 and 98

*Facility Operating License Nos. NPF-4 and NPF-7.* Amendments revised the Technical Specifications.

*Public comments requested as to proposed no significant hazards consideration:* Yes (54 FR 4355, dated January 30, 1989). That notice provided an opportunity to submit comments on the Commission's proposed no significant hazards consideration determination. No comments have been received. The notice also provided for an opportunity to request a hearing by March 1, 1989, but indicated that if the Commission makes a final no significant hazards consideration determination any such hearing would take place after issuance of the amendments. The Commission's related evaluation is contained in a Safety Evaluation dated February 15, 1989.

*Local Public Document Room location:* The Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

**Washington Public Power Supply System, Docket No. 50-397, Nuclear Project No. 2, Benton County, Washington**

*Date of application for amendment:* November 19, 1987

*Brief description of amendment:* This amendment revises the statement of the number of channels per trip system for main steam line flow, main steam line tunnel temperature, and temperature gradient in Technical Specification Table 3.3.2-1, "Isolation Actuation Instrumentation."

*Date of issuance:* February 22, 1989

*Effective date:* February 22, 1989

*Amendment No.:* 65

*Facility Operating License No. NPF-21:* Amendment changed the Technical Specifications.

*Date of initial notice in* **Federal Register:** May 10, 1988 (53 FR 16804). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 22, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Richland City Library, Swift and Northgate Streets, Richland, Washington 99352.

**Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin**

*Date of application for amendments:* May 24, 1988 and supplemented on November 7, 1988.

*Brief description of amendments:* The amendments revised the testing frequency specified in Technical Specification Table 15.4.1-1 for a number of instrumentation channels.

*Date of issuance:* February 8, 1989

*Effective date:* February 8, 1989

*Amendment Nos.:* 116 and 119

*Facility Operating License Nos. DPR-24 and DPR-27.* Amendments revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** July 27, 1988 (53 FR 28298) and December 14, 1988 (53 FR 50336). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 8, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room location:* Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

**Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas**

*Date of amendment request:* October 19, 1988

*Brief description of amendment:* The amendment removed the operating corporation and onsite organization charts (Figure 6.2-1 and 6.2-2) from Section 6 of the Technical Specifications and incorporated essential organization requirements such as lines of authority, responsibility, and communication. The amendment also made additional editorial changes to delete references to the removed organization charts. The changes are in accordance with NRC Generic Letter 88-06, "Removal of Organization Charts from Technical Specification Administrative Control Requirements," dated March 22, 1988.

*Date of Issuance:* February 14, 1989

*Effective date:* February 14, 1989

*Amendment No.:* 24

*Facility Operating License No. NPF-42.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** November 30, 1988 (53 FR 46341). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room Location:* Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621

**Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas**

*Date of amendment request:* November 21, 1988

*Brief description of amendment:* The amendment revised Wolf Creek Generating Station, Unit No. 1, Technical Specification Section 6.5.1.2, Plant Safety Review Committee Composition, to add the Manager Nuclear Plant Engineering Wolf Creek as an additional committee member.

*Date of Issuance:* February 21, 1989

*Effective date:* February 21, 1989

*Amendment No.:* 25

*Facility Operating License No. NPF-42.* Amendment revised the Technical Specifications.

*Date of initial notice in* **Federal Register:** December 30, 1988 (50 FR 53105). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 21, 1989.

*No significant hazards consideration comments received:* No.

*Local Public Document Room Location:* Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621.

## NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant

VOL 54 ISS 44 MR 8 1989 UMI

to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By April 7, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

**Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska**

*Date of amendment request:* February 9, 1989 and a supplement thereto dated February 10, 1989

*Brief description of amendment:* This amendment revised the effective date of the portion previously issued Amendment No. 115 related to the Intermediate Range Monitor/Source Range Monitor Power supply from February 11, 1989 to "before loading fuel during the 1989 refueling outage" currently scheduled to begin in April 1989.

*Date of issuance:* February 21, 1989

*Effective date:* February 10, 1989

*Amendment No.:* 128

*Facility Operating License No. DPR-46.* Amendment revised the license.

*Public comments requested as to proposed no significant hazards consideration:* No

The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated February 21, 1989.

*Attorney for licensee:* Jay Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037

*Local Public Document Room location:* Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Dated at Rockville, Maryland, this 2nd day of March, 1989.

For the Nuclear Regulatory Commission

**General Public Utilities Nuclear Corp. et al. (Three Mile Island Nuclear Station, Unit 2) (Disposal of Accident-Generated Water); Reconstitution of Atomic Safety and Licensing Appeal Board**

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this operating license amendment proceeding. As reconstituted, this Appeal Board will consist of the following members:

Thomas S. Moore, Chairman, Christine N. Kohl, Howard A. Wilber.

Barbara A. Tompkins,

*Secretary to the Appeal Board.*

Dated: March 2, 1989.

[FR Doc. 89-5364 Filed 3-7-89 8:45 am]

BILLING CODE 7590-01-D

**Gulf States Utilities Co.; Issuance of Amendment to Facility Operating License**

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 34 to Facility Operating License No. NPF-47, issued to Gulf States Utilities Company, (the licensee), which revised the license for operation of the River Bend Station, Unit 1 located in West Feliciana Parish, Louisiana.

The amendment was effective as of the date of its issuance.

The amendment deleted the License Condition 2.C.(4), Attachment 2, Item 1 requirement to install an additional brace on the control rod hydraulic units as used in the qualification testing.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

The Notice of Consideration of Issuance of Amendment was published in the Federal Register on December 2, 1988 (53 FR 48743).

No request for a hearing or petition for leave to intervene was filed following the notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action, see: (1) The application for amendment dated November 9, 1988; (2) Amendment No. 34 to Facility Operating License No. NPF-47; and (3) the Commission's related Safety Evaluation and Environmental Assessment. All these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803. A copy of items (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland, this 22nd day of February 1989.

For the Nuclear Regulatory Commission.

Walter A. Paulson,

*Project Manager, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.*

## POSTAL RATE COMMISSION

[Docket No. A89-5; Order No. 819]

**Post Office Closings; Petitions for Appeal; Crawford, WV; Order Accepting Appeal and Establishing Procedural Schedule**

Issued March 1, 1989.

Before Commissioners: Janet D. Steiger, Chairman; Patti Birge Tyson, Vice-Chairman; John W. Crutcher; Henry R. Folsom; W. H. "Trey" LeBlanc III.

*Docket Number:* A89-5.

*Name of Affected Post Office:* Crawford, West Virginia 26343.

*Name(s) of Petitioner(s): Mrs. Elsie I. Snyder.*

*Type of Determination:* Closing.

Date of Filing of Appeal Papers: February 27, 1989.

*Categories of Issues Apparently Raised:*

1. Effect on postal services (39 U.S.C. 404(b)(2)(C)).
2. Effect on the community (39 U.S.C. 404(b)(2)(A)).

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule (39 U.S.C. 404(b)(5)), the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

*The Commission orders:*

(A) The record in this appeal shall be filed on or before March 14, 1989.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the Federal Register.

By the Commission.

Charles L. Clapp,

*Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-26585; File No. SR-NASD 89-7]

**Self-Regulatory Organizations; National Association of Securities Dealers; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Revising the Fee for NASDAQ Level 2/3 Service**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 17, 1989, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The following is the full text of a proposed amendment to Part IX of Schedule D of the Schedules to the By-Laws of the National Association of Securities Dealers, Inc. ("NASD"), revising the fee for NASDAQ Level 2/3 service. (New language is italicized; deleted language is bracketed.)

**Schedule D**

*Part IX—Schedule of charges*

A. System Services

* * * * *

2. NASDAQ Level 2/3 Service.

The charge to be paid by the subscriber for each terminal receiving NASDAQ Level 2 or NASDAQ Level 3 Service shall be $150 per month *plus $140 per month communication charge*, [and $0.02 per quotation request] plus equipment related charges as detailed in Parts B, C, and D below. Equipment and related charges include an installation charge, a terminal charge and conversion, removal and relocation charges.

* * * * *

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

The purpose of the pricing modification proposed in this filing is to convert the current variable rate of $0.02 per query to a fixed monthly communication charge of $140 per month. Recent cost experience for the Level 2/3 service shows that the average regional telephone line communication costs per terminal, including allocated dial back-up charges, are approximately $140 per month. In the past, the $0.02 cost per query for Level 2/3 service on the Harris and Harris emulation terminals was sufficient to recoup the communication costs of the service, due to the number of terminals in use as well as the number of queries transmitted to the processor. Today, however, because significant numbers of the Harris terminal peopulation are converting to Workstation™ service, and the number of queries has decreased generally because of market conditions, NASDAQ is unable to recoup the full communication costs of Level 2/3 service utilizing the current query fee method. In order to maintain the quality of service available to the remaining Harris terminal population, the NASD believes that it is equitable and appropriate to establish a fixed monthly communication charge, which seeks to recover the costs of the regional telephone lines and allowable dial back-up facilities associated with delivery of the Level 2/32 service to Harris and Harris emulation terminals.

The statutory basis for the proposed rule change is found in section 15A(b)(5) of the Securities Exchange Act of 1934 ("Act"). Section 15A(b)(5) requires that the rules of the NASD "provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which the association operates or controls." The communication fee proposed in this filing has been formulated on the basis of the cost of operating that service in light of the decreasing use of the query function and the diminishing Harris terminal population. The NASD believes that assessing the users of Level 2/3 service for the costs of communication lines is an equitable allocation of reasonable fees as prescribed in section 15A(b)(5); further, we believe that converting to a flat rate based on communication line costs is a non-discriminatory method of allocating Level 2/3 service costs among the remaining Harris terminal users, rather than readjusting the individual query rate upward to support the system as the Harris population continues to decline.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The NASD does not foresee any burden on competition by the proposed rule change not necessary or appropriate in furtherance of purposes of the Act because the proposed fee seeks to recover costs of regional telephone lines, and will be applicable to all NASDAQ Level 2/3 subscribers. In addition, there are other services equivalent to Level 2 service currently available from vendors.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

Comments were neither solicited nor received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number SR-NASD-89-7, and should be submitted by March 29, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: March 2, 1989.

**Jonathan G. Katz,**

*Secretary.*

[FR Doc. 89-5427 Filed 3-7-89; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35-24830]

**Filings Under the Public Utility Holding Company Act of 1935 ("Act")**

March 2, 1989.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 27, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the manner. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

**Alabama Power Company (70-7211)**

Alabama Power Company ("Alabama"), 600 North 18th Street, Birmingham, Alabama 35291, an electric utility subsidiary of The Southern Company, a registered holding company, has filed a post-effective amendment to its application filed with this Commission pursuant to section 6(b) of the Act and Rule 50(a)(5) thereunder.

By supplemental order dated March 17, 1987 (HCAR No. 24347), Alabama was authorized, in relevant part, to issue and sell short-term notes ("Notes") to banks and commercial paper ("Commercial Paper") to dealers in an aggregate principal amount at any one time outstanding of up to $300 million, from time-to-time prior to April 1, 1989, pursuant to an exception from the competitive bidding requirements of Rule 50 under subsection (a)(5) thereunder. Alabama now proposes to extend its authorization to issue and sell its Notes and Commercial Paper through April 1, 1991, pursuant to an exception from competitive bidding, and to increase the aggregate principal amount of Notes and Paper at any one time outstanding to $350 million.

**New England Energy Incorporated, et al. (70-7813)**

New England Electric System ("NEES"), a registered holding company, its fuel subsidiary, New England Energy Incorporated ("NEEI") and NEES' generation and transmission subsidiary, New England Power Company ("NEP"), (together, "Applicants"), all located at 25 Research Drive, Westborough, Massachusetts, 01582, have filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rule 45 thereunder.

NEEI proposes to issue short-term notes to refinance its existing short-term bank debt in connection with its oil and gas exploration program ("Old Program") ("New Program") (HCAR No. 23658, April 8, 1985), through a financing arrangement with a syndicate of banks led by Citibank, N.A., as Agent ("Credit Agreement"). The Credit Agreement would provide for a revolving short-term credit facility of up to $400 million aggregate principal amount outstanding at any one time, which would reduce incrementally to $50 million by December 31, 1997, and terminate on December 31, 1998. NEEI would also have the option to further reduce the available facility. In order to secure borrowings under the Credit Agreement, Applicants also propose to extend the term of the Fuel Purchase Contract between NEEI and NEP (HCAR No. 23873, October 22, 1985) and the Capital Funds Agreement, the Loan Agreement (both authorized by HCAR No. 23658, April 8, 1985) and the Capital Maintenance Agreement (HCAR No. 23873, October 22, 1985) between NEEI and NEES, so they will be in effect throughout the term of the Credit Agreement.

NEEI's interest rate options under the Credit Agreement would be based upon and selected among the then applicable LIBOR rate plus a margin of ¼% in years 1-3, ⅜% in years 4-5, ½% in years 6-7 and ⅞% in years 8-10; the Citibank base rate in years 1-3, the base rate plus a margin of ⅛% in years 4-5, ⅜% in years 6-7, and ⅝% in years 8-10; the Certificate of deposit rate plus a margin of ⅜% in years 1-3, ½% in years 4-5, ¾% in years 6-7, and 1% in years 8-10; and rates obtained through competitive bids.

The security for the borrowings would be an assignment by NEEI to the banks of its rights under the Fuel Purchase Contract, the Capital Funds Agreement and the Loan Agreement to secure Old Program borrowings, and an assignment to the banks of its rights under the Capital Maintenance Agreement to secure New Program borrowings. NEEI would pay a facility fee of ⅛% per year on the available facility; and a commitment fee of 1/16% per year on the unused balance.

The Applicants also request that the authorization previously granted for NEES to invest in NEEI be increased by $25 million to $75 million, to replace, on a less costly basis, investments that may be required under the Capital Maintenance Agreement.

**The Southern Company, et al. (70-7614)**

The Southern Company ("Southern"), a registered holding company, 64 Perimeter Center East, Atlanta, Georgia, and two of its public utility subsidiaries, Gulf Power Company ("Gulf"), 75 North Pace Boulevard, Pensacola, Florida 32505, and Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, have filed an application-declaration subject to sections 6(a), 6(b), 7(e), 12(b) and 12(e) of the Act and Rules 45, 50(a)(5), 62 and 65 thereunder.

Southern proposes to use the proceeds of borrowings previously authorized by the order dated December 29, 1987 (HCAR No. 24552), together with treasury funds and the proceeds from other external sources including but not limited to the issuance of common stock authorized in the order dated September 13, 1988 (HCAR No. 74713), to make additional equity investments, through March 31, 1991, in the form of capital contributions to Gulf, Mississippi and Georgia Power Company, also a utility subsidiary of Southern, in amounts not to exceed $200 million, $10 million and $20 million, respectively.

Gulf and Mississippi propose to issue and sell from time to time, up to the aggregate principal amount of $50 million for Gulf and $120 million for Mississippi, through March 31, 1991: (1) Short-term notes to banks; (2)

VOL 54 ISS 44 MR 8 1989 UMI

commercial paper to dealers; and/or (3) Short-term non-negotiable promissory notes to public entities in connection with the financing of certain pollution control facilities through the issuance by public entities of their revenue bond anticipation notes. Borrowings from banks will be at the lending bank's prevailing rate offered to corporate borrowers of similar quality or the prime rate. Compensation for the credit facilities is currently provided by balances equal to approximately 5% of the available facility or by fees equal to ⅛ of 1% per annum of the amount of the facility.

Mississippi also proposes to submit to the holders of its outstanding preferred stock for consideration and action at a special meeting of such holders to be held on or about May 18, 1989, a proposal that Mississippi be authorized, by vote of its preferred stockholders, to issue or assume, until July 1, 1999, securities representing unsecured debt having maturities of less than ten years in excess of 10% of capital, surplus and secured debt, provided that (a) the amount of securities representing unsecured debt having maturities of less than ten years outstanding on January 1, 2000 shall not exceed said 10% limitation, and (b) Mississippi's total indebtedness represented by unsecured securities shall at no time exceed 20% of capital stock, surplus and secured debt. Mississippi also proposes to solicit proxies from the holders of its preferred stock in connection with the proposed amendment to its Charter.

Gulf and Mississippi have requested an exception from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5) in connection with the issue and sale of the commercial paper.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

**[Release No. 33-6821, File No. S7-6-89]**

## Securities Uniformity; Annual Conference on Uniformity of Securities Law

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Publication of release announcing issues to be considered at a conference concerning uniformity of securities laws, announcing a hearing and requesting written comments.

**SUMMARY:** In conjunction with a conference to be held on April 26, 1989, the Commission and the North America Securities Administrators Association, Inc. today announced public hearings and published a request for comments on the proposed agenda for the conference. This inquiry is intended to carry out the policies and purposes of section 19(c) of the Securities Act of 1933, adopted as part of the Small Business Investment Incentive Act of 1980, to increase uniformity in matters concerning state and federal regulation of securities, maximize the effectiveness of securities regulation in promoting investor protection, and reduce burdens on capital formation through increased cooperation between the Commission and the state securities regulatory authorities.

**DATES:** The conference will be held on April 26, 1989. A public hearing will be held on April 7, 1989 commencing at 10:00 a.m. All witnesses are requested to submit 15 copies of their prepared statments no later than March 31, 1989. Written comments not prepared in connection with an oral presentation must be received on or before April 21, 1989 in order to be considered by the conference participants.

**ADDRESSES:** The public hearing will be held at the headquarters of the Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549, Room 1C-35, on April 7, 1989. All witnesses should notify Richard K. Wulff or William E. Toomey in writing of their desire to testify as soon as possible and submit 15 copies of their prepared statements by March 31, 1989 to Richard K. Wulff or William E. Toomey, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. Written comments not prepared in connection with an oral presentation should be submitted in triplicate by April 21, 1989 to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. Comments should refer to File No. S7-6-89. All written submissions, including the written texts submitted in connection with oral presentations and the transcripts of such oral presentations, will be available for public inspection at the Commission's Public Reference Room, 450 5th Street NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** Richard K. Wulff or William E. Toomey, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549, (202) 272-2644.

**SUPPLEMENTARY INFORMATION:**

### I. Discussion

A dual system of federal-state securities regulation has existed since the adoption of a federal regulatory structure in the Securities Act of 1933 (the "Securities Act").[1] Issuers attempting to raise capital through securities offerings, as well as participants in the secondary trading markets, are responsible for complying with federal securities laws as well as all applicable state regulations. In recent years, it has been recognized that there is a need to increase uniformity between federal and state regulatory systems and to improve cooperation among those regulatory bodies so that capital formation can be made easier while investor protections are retained.

The importance of facilitating greater uniformity in securities regulation was endorsed by Congress with the enactment of section 19(c) of the Securities Act in the Small Business Investment Incentive Act of 1980 (the "Investment Incentive Act").[2] Section 19(c) authorizes the Commission to cooperate with any association of state securities regulators which can assist in carrying out the declared policy and purpose of section 19(c). The declared policy of the section is that there should be greater federal and state cooperation in securities matters, including: (1) Maximum effectiveness of regulation; (2) maximum uniformity in federal and state standards; (3) minimum interference with the business of capital formation; and (4) a substantial reduction in costs and paperwork to diminish the burdens of raising investment capital, particularly by small business, and to diminish the costs of the administration of the government programs involved. In order to establish methods to accomplish these goals, the Commission is required to conduct an annual conference. The 1989 conference will be the sixth annual conference.

### II. 1989 Conference

The Commission and the North American Securities Administrators Association, Inc. ("NASAA")[3] are planning the 1989 Conference on Federal-State Securities Regulation (the "Conference") to be held April 26, 1989, in Washington, DC. At the Conference, representatives from the Commission and NASAA will divide into working groups in the areas of corporation finance, investment management, market regulation, and enforcement, to discuss methods of enhancing cooperation in securities matters in order to improve the efficiency and effectivess of federal and state securities regulation. Generally, attendance will be limited to representatives from the Commission and NASAA in an effort to maximize the ability of Commission and state representatives to engage in frank and uninhibited discussion. However, each working group, in its own discretion, may decide to invite certain self-regulatory organization to attend and participate in certain sessions.

Representatives from the Commission and NASAA currently are in the process of formulating an agenda for the Conference. As part of that process, the public, securities associations, self-regulatory organizations, agencies, and private organizations are invited to participate through the submission of written comments or by making oral presentations to a panel of Commission and NASAA representatives at a public hearing on April 7, 1989 on the issues set forth below. In addition, comment is requested on other appropriate subjects that commenters wish to be included in the Conference agenda. All comments will be considered by the Conference attendees.

### III. Tentative Agenda and Request for Comments

The tentative agenda for the Conference consists of the following topics in the areas of corporation finance, investment management, market regulation and oversight and enforcement.

*(1) Corporation Finance Issues*

a. Uniform Limited Offering Exemption

Congress specifically acknowledged the need for a uniform limited offering exemption in enacting section 19(c) of the Securities Act and authorized the Commission to cooperate with NASAA in its development. Working with the states, the Commission developed Regulation D, the federal exemption governing exempt limited offerings. Regulation D was adopted by the Commission in March 1982. On September 21, 1983, NASAA endorsed a revised form of the Uniform Limited Offering Exemption ("ULOE") that is intended to coordinate with Regulation D.

ULOE provides a uniform exemption from state registration for certain issuers. An issuer raising capital in a state which has adopted ULOE may take advantage of both a state registration exemption and a federal exemption under Regulation D. To date, more than half of the states have adopted some form of ULOE. Both the Commission and NASAA continue to make a concerted effort toward the universal adoption of ULOE.

Because Regulation D provides the framework for ULOE, NASAA's assistance in developing proposals to change Regulation D is invaluable. During 1986, the Commission, with NASAA's cooperation, adopted several changes for Form D, the notice used to report offerings pursuant to Regulation D, and revised Rule 503 to delete six-month updates and final filings on Form D.[4] At its 1987 Spring meeting, NASAA adopted these revisions as part of ULOE. In March 1988, the Commission adopted several additional changes to Regulation D,[5] which were subsequently endorsed by NASAA. In fact, all changes to Regulation D to date have been made a part of the ULOE policy statement. In December 1988, a number of proposals were made regarding Regulation D.[6] These proposals were developed with the cooperation of NASAA. Discussions regarding additional possible improvements in the regulation will be held among the conferees.

The Commission and NASAA hope to achieve the goal of uniformity envisioned by the statute. Comment is requested on approaches to achieve this goal and on other issues relating to uniformity of exemptions.

b. Disclosure Policy and Standards

The Commission has an ongoing program of considering, reviewing and revising its policies with regard to the most appropriate methods of ensuring the disclosure of material information to the public. Coordination with the states has been beneficial. For example, such cooperation was helpful in the development of guidelines for real estate offerings. Discussions have been held and will continue to be held with respect to such issues as the inclusion of various ratings of securities, such as those based upon investment risk, in filings made with the regulatory authorities as well as in the materials provided to investors. Additional consideration of a uniform legend policy at both the federal and the states levels will be undertaken.

The conferees will consider the area of general advertising and the use of sales literature in the contexts of both public and private offerings and whether any uniformity may be attanied in the regulation thereof.

Commenters are invited to discuss other areas where federal-state cooperation could be of particular significance as well as any ways in which federal-state cooperation could be improved.

c. Multinational Securities Offerings

The Commission published a release in 1985 soliciting comments on methods of harmonizing disclosure and distribution practices for multinational offerings by non-governmental issuers.[7] At that time, the Commission published for comment two conceptual approaches to facilitating such offerings—a "common prospectus" approach and a "reciprocal prospectus" approach.

A majority of the commenters favored the reciprocal approach, and the staff of the Commission commenced discussions with the staffs of the Ontario and Quebec Securities Commissions with a view toward establishing a system of multijurisdictional registration based on a reciprocal approach. The Internationalization Committee of NASAA is working with the staff of the Commission since it is important that any system developed be acceptable to the states. It is anticipated that the multijurisdictional system will initially cover investment grade debt and equity offerings by certain substantial issuers, as well as certain rights and exchange offerings. The current status of the multijurisdictional system will be discussed. Comment is specifically requested on ways to coordinate federal and state treatment of multinational offerings.

d. Other Rulemaking Initiatives and Areas for Discussion

Participants at the Conference will consider possible rulemaking initiatives which the Commission may introduce. One such proposal involves an exemptive rule from registration for the offer and sale of securities pursuant to certain offerings with an issuer's existing securityholders. Outstanding Commission rulemakings such as

---

VOL 54 ISS 44 MR 8 1989 UMI

Regulation S[8] and Rule 144A[9] also will be considered.

It is expected that the conferees will address the general areas of classifying issuers to govern their entry into and exit from the Commission's full disclosure system, takeover regulation and the impact of the Edgar system upon the full disclosure program.

*(2) Investment Management Issues*

a. Investment Companies

(i) *Uniform Disclosure Requirements.* At the 1988 Conference, representatives from NASAA met with the staff of the Commission and discussed the possibility of finding a method by which the Commission and as many states as possible could accept the same disclosure documents from investment company registrants. This result could be achieved by either harmonizing the federal and state disclosure requirements, as was done with Form ADV, the investment adviser registration form, or by providing a way to create a disclosure filing that meets Commission and all state requirements even if the Commission or some states would not alone require all of the disclosure. With respect to open-end management investment companies and unit investment trusts, it is important to note that many states use the currently existing uniform application forms, Forms U-1 and U-2. Streamlining uniform state filing procedures would have the added advantage of facilitating eventual one-stop electronic filing meeting both federal and state requirements. The conferees will review what progress has been made to achieve this goal.

(ii) *Blue Sky Laws.* In the past year the Commission has encountered situations in which investment companies have failed to register initially or to maintain the registration of their shares under state "Blue Sky" laws. Failure to register may result in the investment company accruing substantial contingent liabilities. This, in turn, raises questions concerning the accurate calculation of net asset values and the adequacy of prospectus disclosure. The conferees will discuss how to better assure compliance with applicable state registration requirements and the regulatory problems resulting from the failure of an investment company to comply with these requirements.

(iii) *Use of Company Assets To Pay for Distribution Expenses.*

In June 1988, the Commission proposed amendments to Rule 12b-1 under the Investment Company Act of 1940 that would substantially revise conditions under which open-end management investment companies (mutual funds) are permitted to use fund assets to pay for distribution expenses.[10] The conferees expect to discuss state and federal regulatory concerns that arise out of the use of mutual fund assets to pay these expenses.

b. Investment Advisers

(i) *Proposed Federal Registration Exemptions.* In March, 1988, the Commission authorized its staff to seek NASAA's views on possible rulemaking to exempt certain smaller investment advisers from most federal adviser regulations, other than statutory antifraud prohibitions, if the advisers were registered in all states in which they do business. NASAA polled its members in response to the staff's draft exemptive rules and, in December 1987, its Board of Directors endorsed the concept of the draft rules, with certain changes.

On September 16, 1987, the Commission proposed rules exempting certain small and intrastate advisers similar to the draft rules endorsed by the NASAA Board of Directors.[11] The proposals, which include both an interstate and intrastate exemption, would determine eligibility for the exemptions by reference to the size of the adviser's business, whether the adviser has custody of clients' funds or securities, and whether the adviser is registered as an adviser in all states in which it does business. In addition, the Commission proposed amendments to Rules 206(4)-1 (advertising), 206(4)-3 (cash solicitation), and 206(4)-4 (financial and disciplinary disclosures) to make these rules and those provisions of the Advisers Act that restrict principal agency cross transactions inapplicable to advisers taking advantage of the small and intrastate adviser exemptions. The comment period ended on November 22, 1988, and the Commission received 15 comments on the proposals including letters from NASAA and two states. The purpose of the proposed exemptions is to place primary regulatory responsibility for certain smaller advisers with states that regulate advisers. The conferees will discuss the status of the rulemaking proposals.

(ii) *Central Registration Depository.* The Central Registration Depository ("CRD") is a computerized system that was developed by NASAA and the National Association of Securities Dealers, Inc. ("NASD") and is used to register securities industry personnel with the NASD and the states. In October, 1985, NASAA and the Commission adopted a uniform adviser registration form for advisers registering with the Commission and the states that register advisers. At that time NASAA and the Commission indicated that a clearing house procedure, such as the CRD, would be considered to process adviser registration filings. In 1986, the CRD, in a pilot test, began registering investment adviser representatives for the state of Virginia, which had just begun to require registration of advisers and their representatives.

The conferees will continue to discuss developing a central registration system for advisers. The discussions will consider, among other things, how the system should be designed, what cost savings to advisers and regulatory benefits would result from a central registration processing system, what the experience is of the Virginia representative registration pilot, and whether costeffective means can be developed for Commission participation in any central processing system using the CRD. As discussed below, participants in the sessions on Market Regulation issues will discuss the use of the CRD in connection with broker-dealer registration.

(iii) *Investment Adviser Registration Form.* Last summer, the Forms Revision Committee of NASAA began exploring possible revisions to Form ADV to accommodate future entry of the form onto NASD's CRD system and to establish uniform Federal-State updating requirements. The conferees will discuss the progress of this committee's efforts.

(iv) *Inspections.* The conferees also expect to discuss the ongoing cooperative efforts of the Commission and the states to increase routine surveillance of investment advisers. A joint Commission-state inspection and training program was instituted in 1984 to coordinate regulatory efforts by sharing registration and examination information, thereby increasing the overall regulatory coverage of the investment adviser industry. To date this program has provided training to more than 125 inspectors from 30 states.

(v) *Self-Regulatory Organization for Investment Advisers.* In June 1987, the Board of Governors of the NASD passed a resolution to take steps to become a self-regulatory organization ("SRO") with jurisdiction over the investment advisory activities of its members and affiliates that are investment advisers. Subsequent to that action, the staff of the Commission's Division of Investment Management asked the NASD to consider whether it would be feasible to expand the scope of the proposal to cover all registered investment advisers. The NASD recently informed the Division that it intends to conduct a study to determine the feasibility of such an expansion of the SRO proposal. In the meantime, the Division has been evaluating the NASD SRO proposal and expects to make a recommendation to the Commission for its consideration when the evaluation is completed. The conferees are expected to discuss the merits of investment adviser self-regulation and the NASD proposal.

*(3) Market Regulation Issues*

a. Central Registration Depository ("CRD")

As indicated above, certain aspects of the CRD will be discussed under investment management issues. The CRD will also be discussed by the market regulation working group. The NASD, forty-nine states, the District of Columbia, Puerto Rico and the New York Stock Exchange presently approve or register broker-dealer agents by means of the CRD. Persons filing applications for agent registration file a Form U-4 and any required fees with the CRD, which disseminates the information contained on the forms and transmits fees electronically to the appropriate jurisdictions. This agent phase of CRD, known as Phase I, similarly provides for the filing of U-4 amendments and for the transfer of agent registration under certain circumstances. Implementation of the final stage of Phase II was completed on February 1, 1989, and broker-dealers are now able to use CRD for Form BD filings as well as filings for associated persons.

During the sessions, participants will focus on the present efficacy of the CRD, future uses of the CRD by the states and the relationship of the Commission to the CRD (including processing of broker-dealer registrations with the Commission through the system). In this regard, the Commission has requested funding for fiscal year 1990 to contract with the NASD to develop a one-stop filing concept for broker-dealer documents, consistent with the Commission's electronic filing policy. This will permit broker-dealers to make one filing of a uniform registration form and amendments with the NASD, which will include the filing in the CRD. In addition to improving the efficiency of the registration process, the new system will provide better access to critical data and result in substantial cost savings to registrants by eliminating multiple filings with several regulatory bodies.

Commenters are requested to address the effectiveness and efficiency of the CRD (including any suggestions for improving the system) as well as the future direction of the system.

b. National Market System Exemption from Registration

Most state securities laws currently provide an exemption from their securities registration requirements to issuers that list on the New York ("NYSE") or American ("Amex") Stock Exchanges, or, in some cases, certain regional stock exchanges. Recently, some states have extended these exemptions to include over-the-counter ("OTC") securities designated as National Market System ("NMS") securities, while other states and legislatures have rejected such proposals. In December 1988, the Commission issued a release announcing a Memorandum of Understanding between NASAA and the NASD on the development of exemptive standards for NASDAQ/NMS securities that are comparable to the exemptive standards for exchange-listed securities. Furthermore, last year the Commission amended Rule 11Aa2-1 to designate as NMS securities all listed and OTC equity securities for which real-time last sale reporting is required by a transaction reporting plan. At the same time the Commission approved proposed amendments to the NASD's transaction reporting plan that add corporate governance standards for OTC NMS securities. The effect of these amendments is to designate as NMS securities all NYSE and Amex-listed equity securities and all equity securities listed on regional exchanges that meet Amex's listing standards and that are reported pursuant to a transaction reporting plan. All current OTC NMS securities also would continue to be designated as NMS securities if they satisfy the new corporate governance standards. Commenters are asked to address whether the states generally should exempt certain securities from registration, particularly in light of the changes to company listing standards on corporate governance and foreign issuers. Commenters are asked to address, in particular, the adoption of a uniform, objective exemptive standard, applicable to all reported securities in light of increasing competition between NASDAQ and the exchanges.

c. Forms Revisions

The Commission and NASAA are considering revisions to Schedules A, B, and C of Form BD to clarify the ownership disclosure requirements of those schedules, simplify the presentation of this information, and possibly reduce the reporting burden.

d. Internationalization of the Securities Markets

The implications of multinational securities offerings are being discussed in the corporation finance working group with a particular focus on the development of a reciprocal prospectus for certain offerings. The Market Regulation Task Force will also discuss internationalization with the resulting development of the global securities markets. The Commission continues to follow closely these developments and, to that end, requests comment on the direction of the internationalization of the trading markets. Commenters are asked to address steps that would be useful on the national and state levels to facilitate international markets while protecting investors and maintaining fair and orderly markets in the United States.

e. "Pink Sheet" Fraud

The Commission and NASAA will discuss regulatory approaches to reducing the incidence of fraud in the sale of "pink sheet" securities. The discussions will include possible rule proposals to improve information available to customers and heighten broker-dealer compliance with their fiduciary duties to customers.

*(4) Enforcement Issues*

In addition to the above stated topics, the state and federal regulators will discuss various enforcement related issues which are of mutual interest.

*(5) General*

There are a number of matters which are applicable to all, or a number, of the areas noted above. These include Edgar, the Commission's pilot electronic disclosure system, the coordination of Commission rulemaking procedures with the states, training and educating staff examiners and analysts, and sharing of information.

The Commission and NASAA request specific public comments and recommendations on the above-mentioned topics. Commenters should focus on the agenda but may also

BILLING CODE 8010-01-M

[Release No. 34-26576; File No. SR-BSE-87-1]

**Self-Regulatory Organizations; Boston Stock Exchange, Inc. Order Partially Approving Rule Change and Request for Comment Relating to the Establishment Automated Communications Order-routing Network (BEACON)**

**Introduction**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on February 22, 1989, the Boston Stock Exchange, Inc. ("BSE") requested that the Securities and Exchange Commission ("Commission") extend a trial period for the implementation of the BSE's proposed BEACON system.[2] On August 25, 1988, BSE received approval to proceed with the implementation of BEACON up to full-scale operational levels during a six-month trial period, which ends on February 25, 1989. BSE therefore requested an extension of this trial period until the Commission has completed its review pursuant to BSE's request for permanent approval of BEACON.

As proposed by the Exchange, BEACON routes orders in eligible stocks from member firms to the BSE. For stocks traded on the Intermarket Trading System ("ITS"),[3] BEACON guarantees either an automatic or manual execution of up to either 500 or 1,299 shares, depending on the classification of the stock, at the BEACON quotation.[4] To accomplish this, a BEACON order electronically entered into the system by a member firm is transmitted to a BSE specialist's post where it is displayed on the specialist's terminal together with the automatically assigned BEACON quote at which the order would be automatically executed. The order is displayed on the specialist's terminal for up to 15 seconds to permit the specialist to intervene in the automatic execution of the order should he wish to improve on the BEACON quotation. Where the specialist does not intervene, the order automatically will be executed at the BEACON quote.

**Description of Proposed Rule**

The BSE's proposed BEACON rules, described below, define the specific procedures for the entry and executions of orders in the system. These include how orders are entered into the system, the types of orders that may be entered, how orders will be executed, how the execution price will be determined, and how the system may be used to route orders.

Section 1 of the proposed rules provides that BEACON is available to BSE member organizations and to foreign stock exchanges with which BSE has established a trading link.[5] All issues traded on the Exchange will be eligible for BEACON but only agency orders (orders executed on behalf of a member organization's client) will be eligible for automatic execution.

Section 2 provides that BEACON will permit orders to be routed to specialists or to floor brokers.[6] The system also will allow floor brokers to transmit orders to specialists. Under subparagraph (c), member firms may send market and limit orders to BSE over the system in size parameters established by the BSE.[7] Once orders are routed to the specialist, they may be executed either automatically (if eligible) or manually.

Execution parameters for BEACON are set out in Section 3 of the proposed rule. Market and marketable limit orders in issues traded over ITS transmitted to the specialist prior to the BSE's opening will be provided the opening price on the primary market on which the issue is traded. The primary market opening price usually will be the NYSE or Amex opening price for the stock. The only exception to applying the primary market opening price to an opening transaction would be where the member firm entering the order asks, instead, for the order to be provided the consolidated opening price.

Market and marketable limit orders entered after the opening will receive an execution price based upon the BEACON quotation.[8] As noted previously, these orders, when transmitted to the specialist for execution, will be displayed on the specialist's video display terminal for up to 15 seconds (so-called "exposure period") to allow the specialist to improve on the BEACON quotation that was automatically determined when the system received the order. Certain types of orders entered on BEACON always would be manually executed. These include cross orders entered in the system; nonmarketable limit orders; orders that are "stopped"; and orders entered prior to opening, which are executed at the primary market opening price.

The circumstances under which orders entered on BEACON are eligible for automatic execution are set out in section 5 of the proposed rule.[9] The system automatically will execute all market and marketable limit orders in ITS issues up to 1,299 shares for Tier I stocks and 599 shares for Tier II stocks.[10] This section also permits specialists to provide guaranteed automatic execution of 2,500 shares on specific stocks.[11] Automatic execution guarantee levels for BEACON orders will be published in BEACON and in hard copy. Guarantee levels in excess of 2,500 shares may be made by arrangement between a specialist and a specific member organization. These guarantees will not be published in BEACON unless requested by the specialist.

Market orders that would be executed outside the primary market price range for the day will be "stopped" and will be executed at the BEACON quotation or better as subsequent trades occur on the consolidated tape. An order that has been "stopped" must be executed by the close of trading.

**Discussion**

The Commission has determined that it is appropriate to grant the BSE an extension of the trial period of the implementation and operation of the BEACON system until the Commission has determined to approve or disapprove permanently the BSE's proposed rule change. The BSE stated that it currently received orders in 500 stocks (out of a total of 1,500 stocks listed on the exchange) from 5 firms through BEACON. All specialists on the floor have at least one stock where market orders are automatically executed and reported back to the firm. In addition, day limit orders are maintained for all 500 issues through BEACON to the specialist. In addition, one completed book (77 issues) has been activated in total. The BSE believes that it should have full floor participation by mid-June. Thus, the Commission believes it is appropriate to extend the trial period while the BSE continues to bring BEACON fully operational to afford the Commission further opportunities to review BEACON's performance.

The proposed BEACON system is similar in many respects to automatic execution systems currently in operation on other regional stock exchanges such as the Midwest Stock Exchange's "MAX" system, the Pacific Stock Exchange's "SCOREX" system, and the Philadelphia Stock Exchange's "PACE" system. These systems are all designed to receive small orders electronically from member firms and route them to the appropriate specialist for automatic or manual execution. These systems provide the primary means of handling the vast majority of small orders executed on these regional exchanges.

Before the development of BEACON, the BSE was unique among the regional exchanges because it only had manual systems for the routing and execution of small orders. BEACON is a key element in the BSE's overall effort to automate a substantial portion of its operations. The Exchange's development of BEACON represents a major improvement for the BSE in terms of the speed and efficiency with which it can process and execute retail orders and provide reports of executed trades. BEACON, once it is fully operational, will interface with the BSE's BASE system,[12] a computerized back office system that currently processes all orders executed on the Exchange floor. Once the BEACON and BASE interface is completed, BASE will be able to generate a report immediately confirming the execution of a BEACON order, including the number of shares and the execution price, and transmit it to the member firm that entered the order. The new system will also be able to provide BSE specialists with continuous updates of their positions, average costs, concentrations (short or long), and a computerized limit order book.

On July 15, 1988, the Commission gave approval to the BSE to proceed with the initial stages of the implementation of BEACON[13] and on August 25, 1988, authorized the BSE to institute a six-month trial period during which the BSE was to gradually phase-in use of BEACON.[14] The Commission stated that it intended to closely review results of operational tests on the system as the Exchange added stocks and connected more specialist posts and member firms to BEACON. In addition, the order stated that the BSE would submit results of stress tests on the system to demonstrate that BEACON has the capacity to handle transaction and order volume levels similar to those encountered by the Exchange during the October 1987 market break without experiencing significant order queues or delays in execution.

The Commission has received and reviewed the preliminary test results on the implementation stages of BEACON. From the data provided by the Exchange and discussions with BSE officials, the Commission is satisfied with the results thus far. In addition, the BSE has provided the Commission with the results of several simulated traffic stress tests.[15] The first test was conducted by SIAC and designed to test the performance of vendors and other market participants such as the BSE to receive output from the consolidated transaction and quotation lines for equities and options. The BEACON system adequately handled the sustained output message traffic from SIAC. In addition, the BSE recently conducted a series of stress tests with SIAC during which the traffic from SIAC was well above the October, 1987 peaks. The BSE stated that BEACON was easily able to handle the traffic from SIAC and had excess capacity of approximately 20–35%.

**Request for Comment**

As noted above, the BSE has requested that the Commission permanently approve the proposed rule change implementing BEACON.[16] Thus, interested persons are invited to submit written data, views and arguments concerning that request. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and

---

[1] 15 U.S.C. 78 s(b).

[2] *See* letter from George W. Mann, Jr., BSE, to Christine A. Sabasch, Division of Market Regulation, dated February 22, 1989. The BSE also renewed its request for permanent approval of the proposed rule change.

The term "BEACON" is an acronym for Boston Exchange Automated Communications Order-routing Network. The initial set of rules proposed for BEACON (File No. SR-BSE-87-4) was noticed in Securities Exchange Act Release No. 26187 (March 6, 1987), 52 FR 8662. No comments were received on this proposal. Subsequently, the Commission received amendments to the BSE's proposed BEACON rules. These amendments were noticed in Securities Exchange Act Release No. 24880, July 8, 1987, 52 FR 26612. On December 8, 1987, June 10, 1988, July 1, 1988, and August 19, 1988, the Commission received additional amendments to the proposed BEACON rules. These amendments were not separately noticed by the Commission; however, on August 25, 1988, the Commission approved BEACON for a six-month trial period. Securities Exchange Act Release No. 26029 (August 25, 1988), 53 FR 27564.

[3] ITS is a communications system designed to facilitate trading among competing markets by providing each market with order routing capabilities based on current quotation information. Specifically, ITS links the participating markets (American Stock Exchange, BSE, Cincinnati Stock Exchange, Midwest Stock Exchange, New York Stock Exchange, Pacific Stock Exchange, Philadelphia Stock Exchange, and the National Association of Securities Dealers) and provides facilities and procedures for: (1) Display of composite quotation information from each participating market so that brokers are able to determine the best bid and offer available from any participating market for a multiply traded security; (2) efficient routing of orders and administrative messages between participating markets; and (3) participation, under certain conditions, by members of all participating markets in opening transactions in those markets. As of June 30, 1988, 1,539 stocks were traded over ITS.

[4] *See* discussion *infra* note 7.

[5] The Exchange currently has a trading link with the Montreal Stock Exchange. The BSE has informed the Commission, however, that it has no plans to make BEACON available for transactions over the Montreal linkage. Should the BSE subsequently decide that it wants to make access to BEACON available over the Montreal linkage, a proposed rule change would have to be submitted to the Commission for consideration under the requirements of section 19(b) of the Act and Rule 19b-4 thereunder.

[6] A floor broker receiving such an order would bring the order to the trading crowd for execution.

[7] The BSE has informed the Commission that there are currently no size limits for orders routed on BEACON and that it has no plans to adopt such limits. Telephone conversation between George Mann, Senior Vice President and General Counsel, BSE, and Howard Kramer, Assistant Director, Division of Market Regulation, on June 30, 1988. Automatic execution limits for BEACON are discussed *infra* at 5.

[8] The BEACON quotation, defined in Section 3(c) of the proposed rule, is the primary market quotation price, except that, where bids and offers from other markets are displayed that are superior to the BEACON price, the BEACON order will be executed at that superior price up to the size of the quote displayed.

[9] As noted previously, automatic execution guarantees under BEACON are available to agency orders only.

[10] Subparagraph (b) of Section 5 provides that all ITS issues will be deemed Tier I stocks. Tier II stocks will be comprised of exceptions from Tier I. These exceptions may be requested by specialists who must submit a statement to the BSE's Market Performance Committee that would set forth the specific reasons that would cause Tier I classification of the stock to be burdensome (e.g., a high priced, lightly traded stock).

[11] The Exchange currently has an execution guarantee under Chapter II, section 33 of the BSE Rules. Under this provision, BSE specialists guarantee execution on all agency orders from 100 up to 1,299 shares in all issues traded through ITS registered to a BSE member specialist. For the 100 most actively traded stocks reported to the consolidated tape, BSE specialists must guarantee execution on all agency orders of up to 2,500 shares. Market orders filled under this guarantee must be filled on the basis of the best Consolidated Quotation System ("CQS") bid or offer or better.

[12] "BASE" is an acronym for Brokerage Accounting Systems Element.

[13] Securities Exchange Act Release No. 25918 (July 15, 1988).

[14] Securities Exchange Act Release No. 26029 (August 25, 1988).

[15] *See* letter from George Mann, Senior Vice President and General Counsel, BSE, to Howard Kramer, Assistant Director, Division of Market Regulation, dated July 12, 1988.

[16] *See supra* note 2.

VOL 54 ISS 44 MR 8 1989 UMI

all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing will also be available for inspection and copying at the principal office of the BSE. All submissions should refer to File No. SR-BSE-88-1 and should be submitted by March 29,1989.

**Partial Approval of Proposed Rule Change**

The BSE also requested that the Commission extend the trial period under which the BSE has been implementing BEACON. On the basis of the BSE's experience with BEACON in the trial period to date, the Commission has concluded that it is appropriate to grant the BSE an extension of the trial period for the implementation of BEACON up to full-scale operational levels. During this extension the Commission will continue to review closely the BSE's operational test results as more stocks, specialists, and member firms are brought on to the system. Once the system is fully operational, BSE should be able to provide the Commission with additional stress test data to ensure that BEACON has the capacity to handle order and transaction levels like those BSE encountered in the October 1987 market break without experiencing significant queues or execution delays.

Accordingly, the Commission has determined that the BSE may continue its implementation of BEACON up to full-scale operational levels, operating under the procedures outlined in the proposed BEACON rule, as amended.

In view of the above, the Commission concludes that an extension of the trial period of the BSE's proposed BEACON system while the Commission determines to approve or disapprove permanently the proposed rule change is reasonable and is consistent with the requirements of the Act, particularly Section 6(b)(5).

It is therefore ordered, Pursuant to Section 19(b)(2) of the Act that the proposed rule change be, and hereby is, approved with the limitations cited above.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

**Jonathan G. Katz,**

**Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and Opportunity for Hearing; Boston Stock Exchange, Incorporated**

March 2, 1989

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

Bariod Corp., Common Stock, $.10 Par Value (File No. 7-4247)
Lyondell Petrochemical Co., Common Stock, $1 Par Value (File No. 7-4248)
Magma Copper Co., Class B Common, $.01 Par Value (File No. 7-4249)
Athlone Industries, Inc., Common Stock, $.10 Par Value (File No. 7-4250)
Carpenter Technology Corp., Common Stock, $5 Par Value (File No. 7-4251)
Crompton & Knowles Corp., Common Stock, $5 Par Value (File No. 7-4252)
CRS Sirrine, Inc., Common Stock, $1 Par Value (File No. 7-4253)
Premier Industrial Corp., Common Stock, $1 Par Value (File No. 7-4254)
British Steel, PLC, Interim American Depository Shares, No Par Value (File No. 7-4255)
Beazer, PLC, American Depository Shares, No Par Value (File No. 7-4256)
Hong Kong Telecommunications, Ltd., American Depository Shares, No Par Value (File No. 7-4257)
Racal Telecom, PLC, American Depository Shares, No Par Value (File No. 7-4258)
Service Merchandise Co., Inc., Common Stock, $.50 Par Value (File No. 7-4259)
Shawmut National Corp., Common Stock, $.01 Par Value (File No. 7-4260)

These securities are listed and registered on one or more other national securities exchanges and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 23, 1989, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

**[Release No. 34-26677; File No. DTC-88-18]**

**Self Regulatory Organizations; Depository Trust Company; Order Extending Temporary Approval of a Proposed Rule Change**

On October 26, 1988, the Depository Trust Company ("DTC") filed a proposed rule change (File No. SR-DTC-88-18) with the Commission pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] The proposal established a pilot program for DTC's International Institutional Delivery ("IID") System. The Commission published notice of the proposal in the **Federal Register** November 10, 1988.[2]

On December 20, 1988, the Commission temporarily approved the proposed rule change through January 31, 1989.[3] At DTC's request, on January 26, 1989, the Commission extended the temporary approval until February 28, 1989.[4] DTC again has requested that the pilot program be extended, this time through March 31, 1989.[5] DTC also has filed a proposed rule change requesting approval of the IID System as a full service, effective sometime in March.[6] Extension of the temporary approval through March 31, 1989, will ensure that DTC may continue to operate the pilot

program until permanent approval is obtained. For the reasons expressed in Securities Exchange Act Release Nos. 26374 and 26492, the Commission believes the proposal is consistent with the Act, and is therefore extending temporary approval of the proposed rule change through March 31, 1989.

*It is therefore ordered,* Pursuant to section 19(b) of the Act, that DTC's proposed rule change (File No. SR-DTC-88-18), be, and it hereby is, approved temporarily through March 31, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

**Jonathan G. Katz,**

*Secretary.*

Dated: February 28, 1989.

[FR Doc. 89-5299 Filed 3-7-89; 8:45 am]

BILLING CODE 8010-01-M

**[Release No. 34-26675; File Nos. SR-MBS-88-7, MBS-88-9, and MBS-88-11]**

**Self-Regulatory Organizations; MBS Clearing Corporation; Order Temporarily Approving Proposed Rule Changes.**

On April 11, 1988, the MBS Clearing Corporation ("MBSCC") filed with the Commission three proposed rule changes (File Nos. SR-MBS-88-7, MBS-88-9, and MBS-88-11) under section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] The proposals would amend various MBSCC Depository Division rules including those pertaining to participant accounts, transfers of mortgage-backed securities, the MBSCC participants fund, and the MBSCC certificate withdrawal policy. The Commission published notice of the proposals in the **Federal Register** on May 11, 1988.[2]

The Commission preliminarily believes that the proposals are consistent with the Act and is approving the proposals on a temporary basis. The Commission believes that the proposals are designed appropriately to clarify MBSCC's rules and to strengthen MBSCC's procedures, thereby enhancing MBSCC's ability to safeguard securities and funds and promote prompt and accurate clearance and settlement. The Commission, however, intends to continue to analyze the proposals and to discuss with MBSCC the actual operation of the proposals and the need for any refinements or enhancements to the proposals. For those reasons, the Commission is temporarily approving the proposals through March 31, 1989.

*It is therefore ordered,* Pursuant to section 19(b) of the Act, that MBSCC's proposed rule changes (File Nos. SR-MBS-88-7, MBS-88-9, and MBS-88-11) be, and thereby are approved temporarily through March 31, 1989.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

**Designation of Number of Arbitrators**

Section 19(*a*) Except as otherwise provided in *Section 13 of the* [this] Code, in all arbitration matters involving public customers and where the [matter] *amount* in controversy [exceeds $10,000,] *does not exceed $30,000,* [or where the amount in controversy does not involve or disclose a money claim, the Director of Arbitration shall appoint an arbitration panel which consists of no fewer than three (3) nor more than five (5) arbitrators] *the Director of Arbitration shall appoint a single arbitrator knowledgeable in but who is not from the securities industry to decide the dispute, claim or controversy. Upon the request of a party in its initial filing or the arbitrator, the Director of Arbitration shall appoint a panel of three (3) arbitrators which shall decide the matter in controversy.* At least a majority of [whom] *the arbitrators appointed* shall not be from the securities industry, unless the public customer requests a panel consisting of at least a majority from the securities industry.

*(b) In arbitration matters involving public customers and where the amount in controversy exceeds $30,000, or where the matter in controversy does not involve or disclose a money claim, the Director of Arbitration shall appoint an arbitration panel which consists of no fewer than three (3) nor more than five (5) arbitrators, at least a majority of whom shall not be from the securities industry, unless the public customer requests a panel consisting of at least a majority from the securities industry.*

*(c) An arbitrator will be deemed as being from the securities industry if he or she:*

*(1) is a person associated with a member or other broker/dealer, municipal securities dealer, government securities broker, or government securities dealer, or*

*(2) has been associated with any of the above within the past three (3) years, or*

*(3) is retired from any of the above, or*

*(4) is an attorney, accountant, or other professional who has devoted twenty (20) percent or more of his or her professional work effort to securities industry clients within the last two years.*

*(d) An arbitrator who is not from the securities industry shall be deemed a public arbitrator. A person will not be classified as a public arbitrator if he or she has a spouse or other members of the household who is a person who is associated with a member or other broker/dealer, municipal securities dealer, government securities broker, or government securities dealer.*

* * * * *

**Awards**

**Section 41**

* * * * *

*(e) The award shall contain the names of the parties, a summary of the issues in controversy, the damages and other relief requested, the damages and other relief awarded, a statement of any other issues resolved, the names of the arbitrators, and the signatures of the arbitrators concurring in the award.*

*(f) All awards involving public customers and their contents, excluding the names of the arbitrators, shall be made publicly available. A party to an arbitration involving a public customer may request that the Director of Arbitration provide copies of all awards rendered by the arbitrator(s) chosen to decide its case. A party wishing to obtain such information must notify the Director of Arbitration within three (3) business days of receipt of notification of the identity of the person(s) named to the panel.*

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

A Uniform Arbitration Code (the "Uniform Code") has been developed by the Securities Industry Conference on Arbitration ("SICA"), which is composed of representatives of the NASD, nine other self-regulatory organizations, four public members, and the Securities Industry Association. The Uniform Code, as implemented by the various self-regulatory organizations, has established throughout the securities industry a uniform system of arbitration procedures. The proposed rule change to subparagraphs (c) and (d) of section 19 of the Code is intended substantially to conform the provisions of the NASD's Code to changes in the Uniform Code approved by SICA on August 16, 1988, except as discussed below; and the proposed rule change to subparagraph (e) of section 41 is intended to conform the provisions of the Code to changes in the Uniform Code approved by SICA on July 28, 1988.

The proposed changes to section 9 and subparagraphs (a) and (b) of section 19 were recommended by the NASD's National Arbitration Committee.

*Composition of Panels:* Section 9 of the Code currently requires, in all arbitration proceedings other than those conducted under the Simplified Industry Arbitration procedures set forth in section 10 of the Code, that in all arbitration matters between or among members and/or persons associated with members, an arbitration panel consisting of no fewer than three (3) nor more than five (5) arbitrators, all of whom are from the securities industry, shall be used. The proposed rule change to section 9(a) would permit the Director of Arbitration to assign such industry cases in which the amount in controversy exceeds $10,000 but does not exceed $30,000 to a single arbitrator from the securities industry. However, either at the request of an industry party in its initial complaint or answer or at the request of the designated arbitrator, the rule change provides that the Director of Arbitration would be required to designate a panel of three (3) arbitrators, all from the securities industry. Proposed new section 9(b) would continue the current practice of appointing a panel of three (3) arbitrators from the securities industry

to hear industry cases in which the amount in controversy exceeds $30,000.

By authorizing the handling of claims between securities professionals of less than $30,000 by a single industry arbitrator, the proposed rule change to section 9(a) would appreciably reduce costs and delays while preserving the opportunity to be heard before a three-person industry panel upon timely motion of a party or the designated arbitrator. Proposed section 9(b) would, in addition, codify the current administrative practice of appointing no more than three arbitrators to panels hearing industry disputes, a measure taken to reduce costs and delays generated by the appointment of five-member panels.

*Designation of Number of Arbitrators:* Section 19 of the Code currently requires in all arbitration matters involving public customers and where the matter in controversy exceeds $10,000 or does not involve or disclose a money claim, that the Director of Arbitration appoint a panel of no fewer than three (3) nor more than five (5) arbitrators, at least a majority of whom shall not be from the securities industry, unless the public customer requests a panel consisting of at least a majority from the securities industry. The proposed section 19(a) would permit the Director of Arbitration to assign cases involving public customers in which the amount in controversy exceeds $10,000 but does not exceed $30,000 to a single public arbitrator. At the request of a party in its initial complaint or answer, or at the request of the designated arbitrator, the Director of Arbitration would be required to designate a panel of three (3) arbitrators, constituted as set forth in current section 19 of the Code. Proposed new section 19(b) would continue the current requirement that the Director of Arbitration, in all arbitration matters involving public customers, where the matter in controversy exceeds $30,000 or does not involve or disclose a money claim, appoint a panel of no fewer than three (3) nor more than five (5) arbitrators, constituted as set forth in current section 19 of the Code.

By authorizing the handling of claims involving public customers of less than $30,000 by a single public arbitrator, the proposed rule change to section 19(a) would appreciably reduce costs and delays while preserving the opportunity to be heard before a three-person panel upon timely motion of a party or the designated arbitrator. Proposed new section 19(b) would, in addition, require the appointment of a three- or five-person arbitration panel in all matters involving public customers where the amount in controversy exceeds $30,000 or where the matter does not involve or disclose a money claim. Both sections 19 (a) and (b) would continue to require that a majority of the arbitrators not be from the securities industry, unless the public customer requests a panel consisting of at least a majority from the securities industry.

Proposed new sections 19 (c) and (d) codify in substantial part the definitions of "securities industry arbitrator" and "public arbitrator" approved by SICA on August 16, 1988. In an effort to address possible perceptions of bias or interest, and in the absence of recorded instances in which the bias or interest occurring as a result of familial relationship was shown to have influenced the rendition of an award, SICA determined, as set forth in proposed section 19(d), that a person should not be classified as a public arbitrator if he or she has a spouse or other member of the household who is a person associated with a member or other broker/dealer, municipal securities dealer, government securities broker or government securities dealer. Attorneys, accountants, or other professionals who have devoted 20% or more of their professional work effort to Securities industry clients within the last 2 years would now be classified as securities industry arbitrators rather than public arbitrators. In addition, the NASD's proposed definition of "securities industry arbitrator," in contrast with the corresponding SICA proposal, does not include current or former registered investment advisors not associated with a member firm, their spouses, or members of their households. The NASD believes that registered investment advisors are generally well-informed and well-qualified individuals and are, in fact, independent from the securities industry in that their income is derived from investors rather than from the securities industry. Further, such individuals represent an untapped source whose enrollment would serve to replenish the NASD's pool of public arbitrators, which would be significantly depleted by proposed sections 19 (c) and (d).

*Awards:* Proposed new sections 41 (e) and (f) represent the results of initiatives of the Commission, and were approved by SICA on July 28, 1988. Proposed section 41(e) codifies the minimum content of all NASD arbitration awards, which would contain the names of the parties, a summary of the factual issues, the relief requested and awarded, a statement of any other issues resolved, the names of the arbitrators, and the signatures of the arbitrators concurring in the award.

Consistent with SICA's endorsement of the practice of making the information contained in arbitration awards involving public customers, including any opinions voluntarily prepared by the arbitrators in such cases, publicly available in accordance with the individual policies of the sponsoring self-regulatory organization, Proposed section 41(f) would make all NASD awards involving public customers, with the exclusion of the names of the arbitrators, publicly available. Upon implementation of Proposed sections 41 (e) and (f), the NASD will make all awards involving public customers issued subsequent to the effective date of these sections available to the public by means of a reading room. Proposed section 41(f) would also permit parties to an arbitration involving a public customer to obtain copies of all awards rendered pursuant to proposed section 41(e) by the arbitrator or arbitrators assigned to hear their case if a request is made to the Director of Arbitration within 3 business days of receipt of notification of the identity of the arbitrators.

The NASD believes that the proposed rule change is consistent with section 15A(b)(6) of the Act, as the proposed rule change will facilitate the arbitration process in the public interest and, therefore, is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and, in general, protect investors and the public interest.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The NASD does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others*

The NASD has neither solicited nor received comments on the proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and

VOL 54 ISS 44 MR 8 1989 UMI

publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR-NASD-88-51 and should be submitted by March 29, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: March 1, 1989.

Jonathan G. Katz,

*Secretary.*

[Release No. 34-26866; File No. SR-NSCC-89-2]

## National Securities Clearing Corp.; Proposed Rule Change Relating to Acceleration of the OTC Comparison Cycle and Modification of NSCC Procedures With Respect Thereto

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 8, 1989, NSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The proposed rule change would amend NSCC's Rules and Procedures concerning certain aspects of trade comparison.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

(a) The primary purpose of the proposed rule change is to accelerate the comparison of transactions executed Over-the-Counter ("OTC") and on national securities exchanges other than the New York Stock Exchange (hereinafter referred to as "OTC transactions"). The proposed rule change accelerates by approximately 11 hours the time frame for input and accelerates by approximately 24 hours the time frame for the corresponding output relative to comparison of OTC transactions.

The market break in October, 1987 prompted the securities industry to review processing time frames for comparison of securities transactions. It was recognized that by shortening the comparison process, Members will be able to reconcile transactions earlier, thereby reducing financial exposure. As a result, initiatives are underway to accelerate and redesign the comparison process for transactions in listed and OTC securities.

In December of 1988 NSCC convened a Comparison Advisory Committee comprised of representatives from NSCC, the New York Stock Exchange, the National Association of Securities Dealers, Inc., the American Stock Exchange and fourteen firms representing different aspects of the industry. The purpose of the Committee was to discuss developments in the comparison process, including new systems being developed by the self-regulatory organizations and to obtain guidance from Member firms on the best way for all entities to implement and coordinate the changes. The Committee, at a meeting in January 1989, discussed the proposed modifications to listed and OTC comparison. The Committee discussed the fact that the listed project involves *both* acceleration and redesign. It was, therefore, agreed that it would be prudent to familiarize the firms with acceleration first so that the redesign portion, when implemented, could be accomplished more smoothly. Moreover, it was determined that implementation of one project at a time would provide the Members with greater control over each project and, therefore, promote greater efficiency. Members input OTC and listed transactions separately. Accordingly, there is no difficulty in bifurcating the acceleration process. The proposed rule change reflects the accelerated input and output time frames for comparison of OTC transactions.

Currently, Members submit non-systematized transactions to NSCC by 1:00 p.m. on T+1. Members may also submit deletes to this T+1 input by 3:00 p.m. on T+1. NSCC runs an initial match and issues Regular Way T+1 Contract Lists, reflecting the results of the initial match by 8:00 a.m. on T+2.

Under the proposal, Members will be required to submit all non-systematized transactions to NSCC no later than 2:00 a.m. the morning of T+1. NSCC will then produce Regular Way T+1 Contract Lists by 7:00 a.m. on T+1. Upon receiving these contracts, Members will be able to submit adjustments until 2:00 p.m. on T+1, rather than 2:00 p.m. on T+2, with NSCC issuing corresponding output by 7:00 a.m. on T+3. After this point, Members will be able to submit adjusting information with NSCC generating corresponding output until the final comparison output on T+4.

Presently, the procedures for comparison of OTC transactions incorporate by reference some of the procedures for comparison of listed transactions. Since the proposed rule change will accelerate the OTC comparison process, certain of the procedures covered by the listed section must be set forth separately in the procedures section on OTC comparison and modified accordingly.

In addition, the proposed rule change makes clarifying changes to the entire Trade Comparision Service by differentiating between the comparison of regular way transactions and when-issued transactions. Further, the term "T+1 input" is being changed to "Original Trade Data" in order to differentiate that type of input from the time the input is required. Finally, NSCC is modifying the reference throughout the rules from "Advisory Notice" and "Contract List" to "Advisory Listing" and "Regular Way T+1 Contract List", to reflect current usage.

(b) Earlier comparison is integtral to an efficient, settlement system. By accelerating the comparison cycle, less trades will be unresolved at later points in the settlement process, and thus participants will achieve a higher comparison rate closer to the point of trade execution. Since the proposed rule change promotes the prompt and accurate clearance and settlement of securities transactions, it is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to NSCC.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

NSCC does believe that the proposed rule will have an impact or impose a burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others*

Members have been advised by Important Notice dated November 16, 1988. One written comment was received. NSCC will notify the Commission of any other written comments received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR-NSCC-89-01 and should be submitted by March 29, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

Dated: March 1, 1989.

## Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and Opportunity for Hearing; Philadelphia Stock Exchange, Incorporated

March 2, 1989.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

Audio/Video Affiliates, Inc., Common Stock, $.01 Par Value (File No. 7-4227)
Energy Service Company, Inc., Common Stock, $.01 Par Value (File No. 7-4228)
KeyCorp., Common Stock, $5 Par Value (File NO. 7-4229)
L.A. Gear, Inc., Common Stock, No Par Value (File No. 7-4230)
Acme-Cleveland Corporation, Common Stock, $1 Par Value (File No. 7-4231)
Central Vermont Public Service Corp., Common Stock, $6 Par Value (File No. 7-4232)
Copperweld Corporation, Common Stock, $0.833 Par Value (File No. 7-4233)
Excel Industries, Inc., Common Stock, No Par Value (File No. 7-4234)
Fiat, S.P.A., American Depository Shares (File No. 7-4235)
Green Mountain Power Corporation, Common Stock, $3.33 ⅓ Par Value (File No. 7-4236)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 23, 1989, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

[File No. 1-7938]

## Issuer Delisting; Application To Withdraw From Listing and Registration on the American and Pacific Stock Exchanges; First City Industries, Inc., 6¾% Convertible Subordinated Debentures, Due 1991

March 2, 1989.

First City Industries, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American ("Amex") and Pacific ("PSE") Stock Exchanges.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

On January 4, 1989, First City Acquisition Corp. ("Acquisition") completed a tender offer for all of the Company's common stock, pursuant to which, First City Developments Corp. (the parent corporation) along with Acquisition became the beneficial owner of approximately 99.2% of the Company's outstanding common stock. On January 30, 1989, Acquisition was merged with and into the Company and the Company became a wholly-owned subsidiary of First City Developments Corp. As a result of that merger, the remaining holders of the common stock became entitled to receive $13.10 in cash for each share of common stock they owned and the common stock was

VOL 54 ISS 44 MR 8 1989 UMI

subsequently delisted from the New York and Pacific Stock Exchanges.

On February 27, 1989, there were only 219 holders of record of $569,300 principal amount of the Company's Debentures. The Company has determined that the cost of continued listing of the Debentures is no longer justified because of the small number of holders of the Debentures and the very limited trading.

Any interested person may, on or before March 23, 1989, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

BILLING CODE 8010-01-M

[Release No. 35-24831]

**Filings Under the Public Utility Holding Company Act of 1935 ("Act"); Savannah Electric and Power Co.**

March 2, 1989.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 27, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the manner. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

**Savannah Electric and Power Company (70-7831)**

Savannah Electric and Power Company ("Savannah"), 600 Bay Street, East, Savannah, Georgia 31401, an electric utility subsidiary of The Southern Company, a registered holding company, has filed a post-effective amendment to its application-declaration pursuant to sections 6(a)(2), 6(b), 7(e) and 12(e) of the Act and Rules 50, 62 and 65 thereunder.

By order dated September 2, 1988 (HCAR No. 24709), Savannah was authorized to solicit proxies with respect to several proposals, including amendments to its Charter, to be presented at a special meeting of its shareholders held in September 28, 1988. By order dated November 30, 1988 (HCAR No. 24763) Savannah was authorized, among other things, to amend its Charter to increase the permitted amount of unsecured short-term debt. At the September 28, 1988 meeting, all of the proposals were duly adopted, with the exception of the proposal to increase the permitted amount of unsecured short-term debt.

Savannah now proposes to submit for consideration and action by its preferred stockholders at the annual meeting to be held on or about May 16, 1989, the proposal that Savannah be authorized, until July 1, 1990, to issue or assume unsecured debt having maturities of less than ten years in excess of 10% of capital stock, surplus and secured debt, provided that (a) none of such additional short-term debt outstanding on July 1, 1990, shall mature on or after January 1, 2000, and (b) Savannah's total indebtedness represented by unsecured securities shall at no time exceed 20% of capital stock, surplus and secured debt.

Savannah requests that the effectiveness of its post-effective amendment to its application-declaration with respect to the solicitation of proxies for voting by its stockholders on the proposal to amend the Charter, be permitted to become effective as provided in Rule 62(d). Savannah proposes to mail a notice of meeting, proxy statement and proxy to its preferred stockholders for the annual meeting on or about May 16, 1989.

It appearing to the Commission that Savannah's post-effective amendment to its application-declaration regarding the proposed solicitation of proxies should be permitted to become effective forthwith, pursuant to Rule 62:

It is ordered, That the post-effective amendment to its application-declaration regarding the proposed solicitation of proxies, be, and it hereby is, permitted to become effective forthwith, pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

[CGD 89-015]

**Houston/Galveston Navigation Safety Advisory Committee**

Prusant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of the twentieth meeting of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, May 11, 1989 in the conference room of the Houston Pilots Office, 8150 South Loop East, Houston, Texas. The meeting is scheduled to begin at approximately 9:30 a.m. and end at approximately 1:00 p.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Presentation of the minutes of the Inshore and Offshore Waterways Subcommittees and discussion of recommendations.
3. Discussion of previous recommendations made by the Committee.
4. Presentation of any additional new items for consideration of the Committee.
5. Adjournment.

The purpose of this Advisory Committee is to provide recommendations and guidance to the Commander, Eighth Coast Guard District on navigation safety matters affecting the Houston/Galveston area.

Attendance is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Lieutenant Commander C.T. Bohner, USCG, Executive Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Gaurd District (oan), Room 1141, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396, telephone number (504) 589-4686.

Dated: February 17, 1989.

A.E. Henn,

*Captain, U.S. Coast Gaurd, Commander, 8th Coast Guard District, Acting.*

**Houston/Galveston Navigation Safety Advisory Committee; Offshore Waterway Management Subcommittee Meeting**

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Offshore Waterway Management Subcommittee of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, April 27, 1989 at the Houston Yacht Club, 3620 Miramar Drive, Laporte, Texas. The meeting is scheduled to begin at 9:00 a.m. and end at 10:30 p.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Discussion of previous recommendations made by the full Advisory Committee and the Offshore Waterway Management Subcommittee.
3. Presentation of any additional new items for consideration by the Subcommittee.
4. Adjournment.

Attendance is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Lieutenant Commander C.T. Bohner, USCG, Executive Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), Room 1141, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396, telephone number (504) 589-4686.

Dated: February 17, 1989.

A.E. Henn,

*Captain, U.S. Coast Guard, Commander, 8th Coast Guard District, Acting.*

## DEPARTMENT OF THE TREASURY

**Public Information Collection Requirements Submitted to OMB for Review.**

Date: March 7, 1989.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

**Alcohol, Tobacco and Firearms**

*OMB Number:* 1512-0034.
*Form Number:* ATF F 5000.9.
*Type of Review:* Extension.
*Title:* Personnel Questionnaire—Alcohol and Tobacco Products.
*Description:* The information listed on ATF F 5000.9, Personnel Questionnaire, enables ATF to determine whether or not an applicant for an alcohol or tobacco permit meets the minimum qualifications. The form identifies the individual, residence, business background, financial sources for business and criminal record. If the applicant is found not to be qualified, the permit may be denied.
*Respondents:* Individuals or households, Businesses and other for-profit, Small businesses or organizations.
*Estimated Number of Respondents:* 5,000.
*Estimated Burden Hours Per Response:* 2 hours.
*Frequency of Response:* On occasion.
*Estimated Total Reporting Burden:* 10,000 hours.

*OMB Number:* 1512-0298.
*Form Number:* ATF REC 5120/1.
*Type of Review:* Extension.
*Title:* Usual and Customary Business Records Relating to Wine.
*Description:* Usual and customary business records relating to wine are routinely inspected by ATF officers to ensure the payment of alcohol taxes due to the Federal Government.
*Respondents:* Individuals or households, Farms, Businesses or other for-profit, Small businesses or organizations.
*Estimated Number of Recordkeepers:* 1,246.
*Estimated Total Recordkeeping Hours:* 1 hour.
*Frequency of Response:* Recordkeeping.
*Estimated Total Recordkeeping Burden:* 1 hour.

*OMB Number:* 1512-0461.
*Form Number:* ATF Requirement 5120/5.
*Type of Review:* Extension.
*Title:* Marks on Tanks and Other Bulk Wine Containers on Wine Premises.
*Description:* ATF requires that tanks and other bulk wine containers on wine premises be marked with identifying information. The prescribed marks

VOL 54 ISS 44 MR 8 1989 UMI

provide a control over revenue accountability used by ATF to validate the propriety of revenue received by the Federal Government..

*Respondents:* Farms, Businesses and other for-profit, Small businesses or organizations.

*Estimated Number of Respondents:* 1,126.

*Estimated Burden Hours Per Response:* 1 hour.

*Frequency of Response:* On occasion.

*Estimated Total Reporting Burden:* 1 hour.

*Clearance Officer:* Robert Masarsky (202) 566–7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue NW., Washington, DC 20226.

*OMB Reviewer:* Milo Sunderhauf (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

**Lois K. Holland,**

*Departmental Reports Management Officer.*

BILLING CODE 4810–31–M

## Public Information Collection Requirements Submitted to OMB for Review

Date: March 2, 1989.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

### Internal Revenue Service

*OMB Number:* 1545–0755.

*Form Number:* None.

*Type of Review:* Extension.

*Title:* Related Group Election With Respect to Qualified Investments in Foreign Base Company Shipping Operations.

*Description:* The election described in the attached justification converted an annual election to an election effective until revoked. The computational information required is necessary to assure that the U.S. shareholder correctly reports any shipping income of its controlled foreign corporations which is taxable to that shareholder.

*Respondents:* Businesses or other for-profit.

*Estimated Number of Respondents:* 100.

*Estimated Burden Hours Per Response:* 2 hours.

*Frequency of Response:* Nonrecurring annual election.

*Estimated Total Reporting Burden:* 205 hours.

*OMB Number:* 1545–0955.

*Form Number:* None.

*Type of Review:* Extension.

*Title:* Time and Manner of Making Quarterly Payments of the Railroad Unemployment Repayment Tax.

*Description:* Section 3321 imposes a tax (railroad unemployment repayment tax) on every rail employer with respect to rail wages paid to the employees of such employer and on every employee representative with respect to rail wages received by such employee representative.

*Respondents:* Individuals or households, Businesses or other for-profit.

*Estimated Number of Respondents:* 2,457.

*Estimated Burden Hours Per Response:* 661 hours.

*Frequency of Response:* Quarterly, Annually.

*Estimated Total Reporting Burden:* 661 hours.

*Clearance Officer:* Garrick Shear (202) 535–4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

*OMB Reviewer:* Milo Sunderhauf (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

## VETERANS ADMINISTRATION

### Career Development Committee; Open Meeting

The Veterans Administration gives notice under Pub. L. 92–463 that a meeting of the Career Development Committee, authorized by 38 U.S.C. 4101, will be held in the State Room of the Governor's House Holiday Inn, Rhode Island Avenue at 17th Street NW, Washington, DC, April 26 through 28, 1989, starting at 8 a.m., April 26. The meeting will be for the purpose of scientific review of applications for appointment to the Career Development Program in the Veterans Administration. The committee advises the Director, Medical Research Service, on selection and appointment of Associate Investigators, Research Associates, Clinical Investigators, Medical Investigators, and Senior Medical Investigators.

The meeting will be open to the public up to the seating capacity of the room from 8 a.m. to 8:30 a.m. on April 26, 1989, to discuss the general status of the program. Because of the limited seating capacity of the room, those who plan to attend should contact Mr. David D. Thomas, Executive Secretary of the Career Development Committee (151J), Veterans Administration Central Office, Washington, DC 20420 (202–233–2317) prior to April 21, 1989. The meeting will be closed from 8:30 a.m. to 5 p.m., on April 26, 8 a.m. to 5 p.m. on April 27, 8 a.m. to 3 p.m. on April 28, for consideration of individual applications for positions in the Career Development Program. This necessarily requires examination of personnel files and discussion and evaluation of the qualifications, competence, and potential of the candidates, disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, closure of this portion of the meeting is permitted by section 10(d) of Pub. L. 92–463 as amended, in accordance with subsection (c) (6), 5 U.S.C. 552b.

Minutes of the meeting and rosters of the committee members may be obtained from David D. Thomas, Chief, Career Development Program, Medical Research Service (151J), Veterans Administration, Washington, DC 20420 (phone 202–233–3267).

Dated: February 28, 1989.

By direction of the Administrator.

**Rose Maria Fontanez,**

*Committee Management Officer.*

[FR Doc. 89–5294 Filed 3–7–89; 8:45 am]

BILLING CODE 8320–01–M

### Special Medical Advisory Group; Open Meeting

The Veterans Administration gives notice under Pub. L. 92–463 that a meeting of the Special Medical Advisory Group will be held on March 23 and 24, 1989. The session on March 23 will be held at the Capital Hilton Hotel, 16th and "K" Streets, NW., Washington, DC 20036, and the session on March 24 will be held in the Omar Bradley Conference Room (10th floor) at the Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420.

The purpose of the Special Medical Advisory Group is to advise the Administrator and Chief Medical Director relative to the care and treatment of disabled veterans, and other matters pertinent to the Veterans Administration and the Department of Medicine and Surgery. The session on March 23 (held at the Capital Hilton Hotel) will convene at 8 p.m. and the session on March 24 will convene at 8 a.m. All sessions will be open to the public up to the seating capacity of the rooms. Because this capacity is limited, it will be necessary for those wishing to attend to contact Lorri Fertal, Office of the Chief Medical Director, Veterans Administration (phone 202/233–3666) prior to March 16, 1989.

Dated: February 28, 1989.

By direction of the Acting Administrator.

**Rose Maria Fontanez,**

*Committee Management Officer.*

[FR Doc. 89–5295 Filed 3–7–89; 8:45 am]

BILLING CODE 8320–01–M

### Cooperative Studies Evaluation Committee; Meeting

The Veterans Administration gives notice under Pub. L. 92–463 (Federal Advisory Committee Act) as amended by section 5(c) of Pub. L. 96–409 that a meeting of the Cooperative Studies Evaluation Committee will be held at the Royal Sonesta Hotel, 5 Cambridge Parkway, Cambridge, MA 02142, April 11 and 12, 1989. The session on April 11 is scheduled to begin at 7:30 a.m. and end at 6 p.m. and the session on April 12 is scheduled to begin at 7:30 a.m. and end at 2:30 p.m. The meeting will be for the purpose of reviewing five proposed new clinical trials, one in diabetes, one in arthritis, one in alcoholic liver disease, one in hypertension, one in heart disease, and the progress of two ongoing cardiovascular cooperative studies. The Committee advises the Director, Medical Research Service, through the chief of the Cooperative Studies Program on the relevance and feasibility of the studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects.

The meeting will be open to the public up to the seating capacity of the room from 7:30 to 8 a.m., on April 11, 1989 to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. Fing Hsiung, Coordinator, Cooperative Studies Evaluation Committee, Veterans Administration Central Office, Washington, DC (202–233–2981), prior to April 6, 1989.

The meeting will be closed from 8 a.m. to 6 p.m. on April 11, and from 7:30 a.m. to 3:10 p.m. on April 12, 1989, for consideration of specific proposals in accordance with provisions set forth in section 10(d) of Pub. L. 92–463 (the Federal Advisory Committee Act), as amended by section 5(c) of Pub. L. 94–409, and 5 U.S.C. 552b(c)(6). During this portion of the meeting, discussions and recommendations will deal with qualifications of personnel conducting the studies, staff and consultant critiques of research protocols, and similar documents, and the medical records of patients who are study subjects, the disclosure of which would constitute clearly unwarranted invasion of personal privacy.

Dated: February 27, 1989.

By direction of the Acting Administrator.

**Rose Maria Fontanez,**

*Committee Management Officer.*

[FR Doc. 89–5296 Filed 3–7–89; 8:45 am]

BILLING CODE 8320–01–M

### Advisory Committee on Structural Safety of Veterans Administration Facilities; Meeting

The Veterans Administration gives notice under Public Law 92–463 that a meeting of the Advisory Committee on Structural Safety of Veterans Administration facilities will be held in Room 442 of the Lafayette Building, 811 Vermont Avenue, NW., Washington, DC, on April 14, 1989, at 10 a.m. The committee members will review Veterans Administration construction standards and criteria relating to fire, earthquake and other disaster resistant construction.

The meeting will be open to the public up to the seating capacity of the room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Mr. Richard D. McConnell, Director, Structural Engineering Service, Office of Facilities, Veterans Administration Central Office (phone 202–233–2864) prior to April 12, 1989.

Dated: February 27, 1989.

By direction of the Administrator.

**SECURITIES AND EXCHANGE COMMISSION**

Agency Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of March 13, 1989.

Open meetings will be held on Tuesday, March 14, 1989, at 10:00 a.m., followed by a closed meeting, and on March 15, 1989 at 9:30 a.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open meeting scheduled for Tuesday, March 14, 1989, at 10:00 a.m., will be:

1. Consideration of whether to approve proposed rule changes by the Philadelphia Stock Exchange, Inc. ("Phlx"), American Stock Exchange, Inc. ("Amex"), and the Chicago Board Options Exchange, Inc. ("CBOE") to establish index participations trading rules and list for trading index participations based on both established and newly developed broad based stock indices. For further information, please contact Ivan D. Davis at (202) 272-2088.
2. Consideration of whether to withdraw proposed amendments to rules 134, 436, and 482 under the Securities Act of 1933 and a staff guideline to Form N-1A. The rule amendments would have permitted money market mutual funds assigned a rating by a nationally recognized statistical rating organization ("NRSRO") to include that rating in tombstone ads, prospectuses, and "omitting prospectuses" without obtaining the NRSRO's consent to being named as having prepared or certified the rating. The staff guideline to Form N-1A concerned disclosure of ratings in registration statements. For further information, please contact Ernest P. Francis at (202) 272-2107.

The subject matter of the closed meeting scheduled for Tuesday, March 14, 1989, following the 10:00 a.m. open meeting, will be:

Institution of injunctive actions.
Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceeding of an enforcement nature.
Opinions.

The subject matter of the open meeting scheduled for Wednesday, March 15, 1989, at 9:30 a.m., will be:

The Commission is hosting a roundtable to discuss proposed Rule 144A and issues in the Securities Act Release No. 6808. Rule 144A, which was published for comment on October 25, 1988, would provide a safe harbor from the registration requirements of the Securities Act of 1933 for resale of securities to institutional investors. For further information, please contact Sara Hanks at (202) 272-2848.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Pat Daugherty at (202) 272-2200.

Jonathan G. Katz,
*Secretary.*

**Enforcement of Nondiscrimination on the Basis of Handicap in Federally Assisted Programs**

**AGENCIES:** ACTION, Departments of Agriculture, Education, Energy, Health and Human Services, and State, Environmental Protection Agency, International Development Cooperation Agency, National Aeronautics and Space Administration, National Foundation on the Arts and the Humanities, National Endowment for the Arts and National Endowment for the Humanities, National Science Foundation, Nuclear Regulatory Commission, Small Business Administration, Veterans Administration.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This proposed regulation would amend the regulations issued by the agencies listed above for enforcement of section 504 of the Rehabilitation Act of 1973, as amended, in federally assisted programs or activities to include a cross-reference to the Uniform Federal Accessibility Standards (UFAS). Because some facilities subject to new construction or alteration requirements under section 504 are also subject to the Architectural Barriers Act, governmentwide reference to UFAS will diminish the possibility that recipients of Federal financial assistance would face conflicting enforcement standards. In addition, reference to UFAS by all Federal funding agencies will reduce potential conflicts when a building is subject to the section 504 regulations of more than one Federal agency.

**DATE:** Comments must be received by May 8, 1989.

**ADDRESSES:** See individual agencies below.

Copies of this notice are available on tape for persons with impaired vision. They may be obtained from the Coordination and Review Section, Civil Rights Division, Department of Justice, Washington, DC 20530; (202) 724–2222 (voice) or 724–7678 (TDD).

**FOR FURTHER INFORMATION CONTACT:** See individual agencies below.

**SUPPLEMENTARY INFORMATION:** Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), provides in part that

> No otherwise qualified individual with handicaps in the United States * * * shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance * * *.

The above listed agencies' existing section 504 regulations for federally assisted programs or activities require that new construction be designed and built to be accessible and that alterations of facilities be made in an accessible manner. Except as otherwise noted in the additional supplementary information, the regulations state that new construction or alteration accomplished in accordance with the "American National Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped" published by the American National Standards Institute, Inc. (ANSI A117.1–1961 (R1971) (ANSI)) meets the requirements of section 504. Three agencies (the Department of Agriculture, the Environmental Protection Agency, and the Small Business Administration) reference the 1980 edition, ANSI A117.1–1980. The proposed revision set forth in this document will reference UFAS in place of the current standard.

On August 7, 1984, UFAS was issued by the four agencies establishing standards under the Architectural Barriers Act (49 FR 31528 (see discussion *infra*)). The Department of Justice (DOJ), as the agency responsible under Executive Order 12250 for coordinating the enforcement of section 504, has recommended that agencies amend their section 504 regulations for federally assisted programs or activities to establish that, with respect to new construction and alterations, compliance with UFAS shall be deemed to be compliance with section 504. Because some facilities subject to new construction or alteration requirements under section 504 are also subject to the Architectural Barriers Act, governmentwide reference to UFAS will diminish the possibility that recipients of Federal financial assistance would face conflicting enforcement standards. In addition, reference to UFAS by all Federal funding agencies will reduce potential conflicts when a building is subject to the section 504 regulations of more than one Federal agency.

**Background of Accessibility Standards**

The Architectural Barriers Act of 1968, 42 U.S.C. 4151–4157, requires certain Federal and federally funded buildings to be designed, constructed, and altered in accordance with accessibility standards. It also designates four agencies (the General Services Administration, the Departments of Defense, and Housing and Urban Development, and the U.S. Postal Service) to prescribe the accessibility standards. Section 502 of the Rehabilitation Act of 1973 established the Architectural and Transportation Barriers Compliance Board (ATBCB). In 1978 the Rehabilitation Act was amended to require the ATBCB, *inter alia*, to issue minimum guidelines and requirements for the standards to be issued by the four standard-setting

agencies. The minimum guidelines were published on August 4, 1982 (47 FR 33862), and are codified at 36 CFR Part 1190.[1]

On August 7, 1984, the four standard-setting agencies issued UFAS as an effort to minimize the differences among their Barriers Act standards, and among those standards and accessibility standards used by the private sector. The General Services Administration (GSA) and Department of Housing and Urban Development (HUD) have incorporated UFAS into their Barriers Act regulations (*see* 41 CFR Subpart 101–19.6 (GSA) and 24 CFR Part 40 (HUD)). In order to ensure uniformity, UFAS was designed to be consistent with the scoping and technical provisions of the ATBCB's minimum guidelines and requirements, as well as with the technical provisions of ANSI A117.1–1980. ANSI is a private, national organization that publishes recommended standards on a wide variety of subjects. The original ANSI A117.1 was adopted in 1961 and reaffirmed in 1971. The current edition, issued in 1986, is ANSI A117.1–1986. The 1961, 1980, and 1986 ANSI standards are frequently used in private practice and by State and local governments.

This proposed amendment would amend the agencies' section 504 regulations to refer to UFAS.

The agencies have determined that they will not require the use of UFAS, or any other standard, as the sole means by which recipients can achieve compliance with the requirement that new construction and alterations be accessible. To do so would unnecessarily restrict recipients' ability to design for particular circumstances. In addition, it might create conflicts with State or local accessibility requirements that may also apply to recipients' buildings and that are intended to achieve ready access and use. It is expected that in some instances recipients will be able to satisfy the section 504 new construction and alteration requirements by following applicable State or local codes, and vice versa.

**Effect of Amendment**

Except as otherwise noted in the additional supplementary information for individual agencies, the agencies' current section 504 rules require that new facilities be designed and constructed to be readily accessible to and usable by persons with handicaps and that alterations be accessible to the maximum extent feasible. The amendment would not affect the current requirement but would merely provide that compliance with UFAS with respect to buildings (as opposed to "facilities," a broader term that encompasses buildings as well as other types of property) shall be deemed compliance with these requirements with respect to those buildings. Thus, for example, an alteration is accessible "to the maximum extent feasible" if it is done in accordance with UFAS. It should be noted that UFAS contains special requirements for alterations where meeting the general standards would be impracticable or infeasible (*see, e.g.*, UFAS sections 4.1.6(1)(b), 4.1.6(3), 4.1.6(4), and 4.1.7).

The amendment also includes language providing that departures from particular UFAS technical and scoping requirements are permitted so long as the alternative methods used will provide substantially equivalent or greater access to and utilization of the building. Allowing these departures from UFAS will provide recipients with necessary flexibility to design for special circumstances and will facilitate the application of new technologies that are not specified in UFAS. As explained under "Background of Accessibility Standards," the agencies anticipate that compliance with some provisions of applicable State and local accessibility requirements will provide "substantially equivalent" access. In some circumstances, recipients may choose to use methods specified in model building codes or other State or local codes that are not necessarily applicable to their buildings but that achieve substantially equivalent access.

The amendment requires that the alternative methods provide "substantially" equivalent or greater access, in order to clarify that the alternative access need not be precisely equivalent to that afforded by UFAS. Application of the "substantially equivalent access" language will depend on the nature, location, and intended use of a particular building. Generally, alternative methods will satisfy the requirement if in material respects the access is substantially equivalent to that which would be provided by UFAS in such respects as safety, convenience, and independence of movement. For example, it would be permissible to depart from the technical requirement of UFAS section 4.10.9 that the inside dimensions of an elevator car be at least 68 inches or 80 inches (depending on the location of the door) on the door opening side, by 54 inches, if the clear floor area and the configuration of the car permits wheelchair users to enter the car, make a 360° turn, maneuver within reach of controls, and exit from the car. This departure is permissible because it results in access that is safe, convenient, and independent, and therefore substantially equivalent to that provided by UFAS.

With respect to UFAS scoping requirements, it would be permissible in some circumstances to depart from the UFAS new construction requirement of one accessible principal entrance at each grade floor level of a building (see UFAS section 4.1.2(8)), if safe, convenient, and independent access is provided to each level of the new facility by a wheelchair user from an accessible principal entrance. This departure would not be permissible if it required an individual with handicaps to travel an extremely long distance to reach the spaces served by the inaccessible entrances or otherwise provided access that was substantially less convenient than that which would be provided by UFAS.

It would not be permissible for a recipient to depart from UFAS' requirement that, in new construction of a long-term care facility, at least 50% of all patient *bedrooms* be accessible (see UFAS section 4.1.4(9)(b)), by using large accessible wards that make it possible for 50% of all *beds* in the facility to be accessible to individuals with handicaps. The result is that the population of individuals with handicaps in the facility will be concentrated in large wards, while able-bodied persons will be concentrated in smaller, more private rooms. Because convenience for persons with handicaps is therefore compromised to such a great extent, the degree of accessibility provided to persons with handicaps is not substantially equivalent to that intended to be afforded by UFAS.

It should be noted that the amendment does not require that existing buildings leased by recipients meet the standards for new construction and alterations. Rather, it continues the current Federal practice under section 504 of treating newly leased buildings as subject to the program accessibility standard for existing facilities.

Buildings under design on the effective date of this amendment will be governed by the amendment if the date that bids were invited falls after the effective date. This interpretation is consistent with GSA's Architectural

[1] The ATBCB Office of Technical Services is available to provide technical assistance to recipients upon request relating to the elimination of architectural barriers. Its address is: U.S. ATBCB, Office of Technical Services, 1111 18th Street, NW., Suite 500, Washington, DC 20036. The telephone number is (202) 653–7834 [voice/TDD]. This is not a toll free number.

VOL 54 ISS 44 MR 8 1989 UMI

Barriers Act regulation incorporating UFAS, at 41 CFR Subpart 101–19.6.

The proposed revision includes language modifying the effect of UFAS section 4.1.6(1)(g), which provides an exception to UFAS 4.1.6, *Accessible buildings: Alterations.* Section 4.1.6(1)(g) of UFAS states that "mechanical rooms and other spaces which normally are not frequented by the public or employees of the building or facility or which by nature of their use are not required by the Architectural Barriers Act to be accessible are excepted from the requirements of 4.1.6." Particularly after the development of specific UFAS provisions for housing alterations and additions, UFAS section 4.1.6(1)(g) could be read to exempt alterations to privately owned residential housing, which is not covered by the Architectural Barriers Act unless leased by the Federal Government for subsidized housing programs. This exception, however, is not appropriate under section 504, which protects beneficiaries of housing provided as part of a federally assisted program. Consequently, the proposed amendment provides that, for purposes of this section, section 4.1.6(1)(g) of UFAS shall be interpreted to exempt from the requirements of UFAS only mechanical rooms and other spaces that, because of their intended use, will not require accessibility to the public or beneficiaries, or result in the employment or residence therein of persons with handicaps.

The proposed revision also provides that whether or not the recipient opts to follow UFAS in satisfaction of the ready access requirement, the recipient is not required to make building alterations that have little likelihood of being accomplished without removing or altering a load-bearing structural member. This provision does not relieve recipients of their obligation under the current regulation to ensure program accessibility.

Several agencies' section 504 regulations for federally assisted programs are contained in parts entitled "Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance." This document deletes the phrase "or benefiting from" from those titles. The phrase is being deleted pursuant to *Department of Transportation* v. *Paralyzed Veterans of America*, 477 U.S. 597 (1986), which held that air transportation services provided by airlines were not part of the covered program or activity because the airlines were not the intended recipient of the Federal financial assistance to airports, even if the airlines benefited from that assistance. The recent passage of the Civil Rights Restoration Act of 1987, Pub. L. 100–259, does not overrule or alter this result. S. Rep. No. 64, 100th Cong., 1st Sess. 29 (1987).

This document has been reviewed by DOJ. It is an adaptation of a prototype prepared by DOJ under Executive Order 12250 of November 2, 1980. The ATBCB has been consulted in the development of this document in accordance with 28 CFR 41.7.

The proposed common rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this proposed rule will not have a significant impact on small business entities.

### Adoption of the Common Rule

The adoption of the common rule by the agencies in this document appears below.

## DEPARTMENT OF AGRICULTURE

### 7 CFR Part 15b

**ADDRESSES:** Comments should be sent to: The Associate Director, Equal Opportunity, Office of Advocacy and Enterprise, U.S. Department of Agriculture, Washington, DC 20250.

Comments received will be available for public inspection in the Office of Advocacy and Enterprise, Equal Opportunity, Room 1226, South Bldg., 14th and Independence Ave., SW., Washington, DC 20250 from 8:30 a.m. to 5:00 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** James A. Westbrooks, Special Assistant, Equal Opportunity, Office of Advocacy and Enterprise, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–5681, TTY 382–1130.

**ADDITIONAL SUPPLEMENTARY INFORMATION:** This notice also revises the definition of "historic properties" in § 15b.3(q) in order to conform it to UFAS section 4.1.7(1)(a). Historic properties under the current definition are limited to those listed or eligible for listing in the National Register of Historic Places. The special historic preservation section of UFAS applies additionally to buildings and facilities designated as historic under State and local law.

**List of Subjects in 7 CFR Part 15b**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Historic preservation, Loan programs.

For the reasons stated in the preamble, Part 15b of title 7 of the Code of Federal Regulations is proposed to be amended as follows:

### PART 15b—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

1. The title for Part 15b is revised to read as set forth above.

2. The authority citation for Part 15b is revised to read as follows:

**Authority:** 29 U.S.C. 794.

2. In § 15b.3, "Definitions," paragraph (q) is revised to read as follows:

**§ 15b.3 Definitions.**

* * * * *

(q) For purposes of § 15b.18(d), "Historic properties" means those buildings or facilities that are eligible for listing in the National Register of Historic Places, or such properties designated as historic under a statute of the appropriate State or local government body.

* * * * *

**§ 15b.19 [Amended]**

4. In § 15b.19, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**William C. Payne, Jr.,**

*Deputy Associate Director.*

## NUCLEAR REGULATORY COMMISSION

### 10 CFR Part 4

**ADDRESSES:** Comments should be sent to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attention: Docketing & Service Branch. Comments received will be available for public inspection at The NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555 from 7:30 a.m. to 4:15 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Mr. Edward E. Tucker, Manager, Civil Rights Program, Office of Small and Disadvantaged Business Utilization/ Civil Rights, U.S. Nuclear Regulatory Commission, Washington, DC 20555.Telephone: (301) 492-7697 (voice) or (800) 638-8282 (TDD).

**List of Subjects in 10 CFR Part 4**

Administrative practice and procedure, Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Federal aid programs, Grant programs, Handicapped, Loan programs, Reporting and recordkeeping requirements, Sex discrimination.

For the reasons stated in the preamble, Part 4 of title 10 of the Code of Federal Regulations is proposed to be amended as follows:

### PART 4—NONDISCRIMINATION IN FEDERALLY ASSISTED COMMISSION PROGRAMS

1. The authority citation for Part 4 is revised to read as follows:

**AUTHORITY:** Sec. 181, 68 Stat. 948, as amended (42 U.S.C. 2201); sec. 274, 73 Stat. 688, as amended (42 U.S.C. 2021); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); sec. 207, Pub. L. 95–604, 92 Stat. 3033.

Subpart A also issued under secs. 602–605, Pub. L. 88–352, 78 Stat. 252, 253 (42 U.S.C. 2000d–1–2000d–4); sec. 401, 88 Stat. 1254 (42 U.S.C. 5891). Subpart B also issued under sec. 504, Pub. L. 93–112, 87 Stat. 394 (29 U.S.C. 706); sec. 119, Pub. L. 95–602, 92 Stat. 2984 (29 U.S.C. 794); sec. 122, Pub. L. 95–602, 92 Stat. 2984 (29 U.S.C. 706(6)). Subpart C also issued under Title III of Pub. L. 94–135, 89 Stat. 728, as amended (42 U.S.C. 6101). Subpart E also issued under 29 U.S.C. 794.

**§ 4.128 [Amended]**

2. In § 4.128, "New construction," paragraph (a) is amended by adding the heading *"Design, construction, and alteration."* to the beginning of the paragraph.

3. Section 4.128 is further amended by revising paragraph (b) to read as set forth at the end of this document.

**Victor Stello, Jr.,**

*Executive Director for Operations.*

## DEPARTMENT OF ENERGY

### 10 CFR Part 1040

**ADDRESSES:** Comments should be sent to: Marion A. Bowden, 1000 Independence Avenue, SW., Rm. 4B–112, Washington, DC 20585.

Comments received will be available for public inspection at 1000 Independence Avenue, SW., Rm. 4B–112, Washington, DC 20585 from 8 a.m. to 5 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Marion A. Bowden, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–2218 (voice) or 252–9777 (TDD).

**List of Subjects in 10 CFR Part 1040**

Aged, Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs, Sex discrimination.

For the reasons stated in the preamble, Part 1040 of title 10 of the Code of Federal Regulations is proposed to be amended as follows:

### PART 1040—NONDISCRIMINATION IN FEDERALLY-ASSISTED PROGRAMS

1. The authority citation for Part 1040 is revised to read as follows:

**Authority:** 20 U.S.C. 1681–1686; 29 U.S.C. 794, 794a., 794b., 42 U.S.C. 2000d to 2000d–4, 3601–3631, 5891, 6101–6107, 6870, 7161 *et seq.*

**§ 1040.73 [Amended]**

2. In § 1040.73, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**July 1, 1988.**

**Marion A. Bowden,**

*Director, Office of Equal Opportunity*

## SMALL BUSINESS ADMINISTRATION

### 13 CFR Part 113

**ADDRESSES:** Comments should be sent to: J. Arnold Feldman, Chief, Office of Civil Rights Compliance, 1441 L Street NW., Suite 501, Washington, DC 20416

Comments received will be available for public inspection at 1441 L Street NW., Suite 501, Washington, DC, from 8:30 a.m. to 5 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** J. Arnold Feldman, Chief, Office of Civil Rights Compliance, Small Business Administration, 1441 L Street NW., Suite 501, Washington, DC 20416, (202) 653–6054 (Voice), (202) 653–6579 (TDD) These are not toll-free numbers

**ADDITIONAL SUPPLEMENTARY INFORMATION:** The Small Business Administration currently requires compliance with a particular standard (the 1980 edition of the ANSI). Under this amendment, compliance with a particular standard is no longer mandated. Rather, recipients are encouraged to follow UFAS for new construction and alterations subject to the regulation

**List of Subjects in 13 CFR Part 113**

Blind, Buildings, Civil rights, Discrimination based on race, Color, Religion, Sex, Marital status, Age Handicap or national origin, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs

For the reasons stated in the preamble, Part 113 of title 13 of the Code of Federal Regulations is proposed to be amended as follows:

### PART 113—NONDISCRIMINATION IN FINANCIAL ASSISTANCE PROGRAMS OF SBA—EFFECTUATION OF POLICIES OF FEDERAL GOVERNMENT AND SBA ADMINISTRATOR

1. The authority citation for Part 113 is revised to read as follows:

**Authority:** Secs. 5, 308, 72 Stat. 385, 694, as amended; 15 U.S.C. 633, 634, 657, 1691; 20 U.S.C. 1681–1688; 29 U.S.C. 794.

**§ 113.3–3 [Amended]**

1. In 113.3–3, "Structural accommodations for handicapped clients," paragraph (a) is amended by adding the heading *"Existing facilities."* at the beginning of the paragraph.

2. Section 113.3–3 is further amended by adding the heading *"Design, construction, and alteration."* at the beginning of paragraph (b) and by adding a new sentence after the heading to read as follows: "New facilities shall be designed and constructed to be readily accessible to and usable by persons with handicaps."

3. Section 113.3–3 is further amended by revising paragraph (c) to read as set forth at the end of this document.

**James Abdnor,**

*Administrator.*

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### 14 CFR Part 1251

**ADDRESS:** Ms. Lynda Sampson, Handicapped and Aged Employment Program Manager, National Aeronautics and Space Administration, Room 6111, Code UI, 400 Maryland Avenue SW., Washington, DC 20546.

Comments received will be available for public inspection at the above address from 10:00 a.m. to 3:00 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Ms. Lynda Sampson, (202) 453–2177 (voice) or (202) 426–1436 (TDD)

**List of Subjects in 14 CFR Part 1251**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 1251 of title 14 of the Code of Federal Regulations is proposed to be amended as follows:

VOL 54 ISS 44 MR 8 1989 UMI

## PART 1251—NONDISCRIMINATION ON BASIS OF HANDICAP

1. The authority citation for Part 1251 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

**§ 1251.302 [Amended]**

2. In § 1251.302, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**James C. Fletcher,**

*Administrator.*

## DEPARTMENT OF STATE

### 22 CFR Part 142

**ADDRESSES:** Comments should be sent to: William O. Wallace, Attorney-Adviser, Office of Equal Employment Opportunity and Civil Rights, Department of State, Room 4216, Washington, DC 20520.

Comments received will be available for public inspection at Room 4216, Department of State, Washington, DC 20520 from 8:15 a.m. to 4:45 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** William O. Wallace, Attorney-Adviser, Office of Equal Employment Opportunity and Civil Rights, Department of State, Room 4216, Washington, DC 20520, (202) 647–9258 (voice or TDD).

**ADDITIONAL SUPPLEMENTARY INFORMATION:** The Department of State's existing section 504 requirement for alterations, contained at 22 CFR 142.17(b), mandates compliance with the standards set forth in 41 CFR subpart 101–19.6 (*i.e.*, UFAS). Under this amendment, compliance with UFAS is no longer mandated, but is merely encouraged. This notice also amends paragraph (a), which incorrectly implies that all federally funded construction since 1968 is subject to the Architectural Barriers Act. In fact, only certain federally funded construction triggers Architectural Barriers Act coverage.

**List of Subjects in 22 CFR Part 142**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 142 of title 22 of the Code of Federal regulations is proposed to be amended as follows:

## PART 142—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

1. The title for Part 142 is revised to read as set forth above.

2. The authority citation for Part 142 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

3. In § 142.17, paragraphs (a) and (b) are revised to read as follows:

**§ 142.17 New construction.**

(a) *Design and construction.* Each facility or part of a facility constructed by, on behalf of, or for the use of a recipient shall be designed, constructed, and operated in a manner so that the facility or part of the facility is accessible to and usable by persons with handicaps, if the construction was commenced after the effective date of this part.

(b) *Alteration.* Each facility or part of a facility which is altered by, on behalf of, or for the use of a recipient after the effective date of this part in a manner that affects or could affect the usability of the facility or part of the facility shall, to the maximum extent feasible, be altered so that the altered portion of the facility is readily accessible to and usable by persons with handicaps.

* * * * *

3. Section 142.17 is further amended by revising paragraph (c) to read as set forth at the end of this document.

**Kenneth Hunter,**

*Associate Director for Personnel, Department of State.*

## DEPARTMENT OF EDUCATION

### 34 CFR Part 104

**ADDRESSES:** Comments should be sent to: LeGree S. Daniels, Assistant Secretary for Civil Rights, Room 5000, Mary E. Switzer Building, 330 C Street SW., Washington, DC 20202–1100.

Comments received will be available for public inspection at Office for Civil Rights Law Library, Room 5022, Mary E. Switzer Building, 330 C Street SW., Washington, DC 20202–1100 from 9 a.m. to 5 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Frederick T. Cioffi, Acting Director, Policy and Enforcement Service, Room 5046A, Mary E. Switzer Building, 330 C Street SW., Washington, DC 20202–1100, 732–1635 (Voice) or 566–2673 (TDD).

**List of Subjects in 34 CFR Part 104**

Blind, Buildings, Civil rights, Education, Educational facilities, Employment, Equal educational opportunity, Equal employment opportunity, Grant programs, Handicapped, Loan programs, School construction.

For the reasons stated in the preamble, Part 104 of title 34 of the Code of Federal Regulations is proposed to be amended as follows:

## PART 104—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

1. The title for Part 104 is revised to read as set forth above.

2. The authority citation for Part 104 is revised to read as follows:

**Authority:** 20 U.S.C. 1405; 29 U.S.C. 794.

**§ 104.23 [Amended]**

3. In § 104.23, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**Appendix A—[Amended]**

4. Appendix A, No. 21, referring to the ANSI standard, is removed.

**Laura F. Cavazos,**

*Secretary of Education.*

---

## VETERANS ADMINISTRATION

### 38 CFR Part 18

**ADDRESS:** Interested person are invited to submit written comments, suggestions, or objections to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW, Washington, DC 20420. All written comments received will be available for public inspection in the Veterans Services Unit, room 132, at the above address only between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until April 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. William Nunn, Equal Opportunity Specialist, Office of Equal Opportunity, (202) 233–2150 or (202) 233–3710 (TDD).

**ADDITIONAL SUPPLEMENTARY INFORMATION:** The VA has determined that this proposed regulation is not a "major rule" within the meaning of Executive Order 12291, Federal Regulation. It will not have an annual effect on the economy of $100 million or more, will not cause a major increase in costs or prices for consumers or individual industries, and will not have any other significant adverse effects on the economy.

The Administrator hereby certifies that this proposed regulation will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this proposed regulation is therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reasons for this certification are that the proposed regulation does not impact on small entities.

The Catalog of Federal Domestic Assistance program numbers affected by this regulation are 64.005, 64.013, 64.014, 64.015, 64.016, 64.018, 64.019, 64.020, 64.021, 64.121, 64.124, 64.203. Other financial assistance to which this requirement applies is listed in Appendix A of 38 CFR Part 18, Subpart D.

**List of Subjects in 38 CFR Part 18**

Administrative practice and procedure, Aged, Authority delegations, Blind, Buildings, Civil rights, Employment, Equal educational opportunity, Equal employment opportunity, Grant programs, Handicapped, Investigations.

Approved: February 24, 1988.

**Thomas K. Turnage,**

*Administrator.*

38 CFR Part 18, Nondiscrimination in Federally-Assisted Programs of the Veterans Administration—Effectuation of Title VI of the Civil Rights Act of 1964, is proposed to be amended as follows:

## PART 18—[AMENDED]

1. The heading and authority citation for Subpart D are revised to read as follows:

**Subpart D—Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving Federal Financial Assistance**

**Authority:** 29 U.S.C. 794; 42 U.S.C. 2000d–1 to 2000d–4, 6101–6107.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 7

**ADDRESSES:** Comments should be sent to: Ms. Suzanne E. Olive, Associate Director for Discrimination Complaints and External Compliance Programs, Office of Civil Rights (A–105), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Comments received will be available for public inspection at the U.S. Environmental Protection Agency, Office of Civil Rights, Room 206 West Tower, 401 M Street SW., Washington, DC 20460, from 9:00 a.m. to 3:00 p.m., Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Ms. Nereid Maxey, Office of Civil Rights, EPA, at the above address; telephone 202/382–4567 (Voice) or TDD 202/382–4565.

**List of Subjects in 40 CFR Part 7**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs, Sex discrimination.

For the reasons stated in the preamble, Part 7 of title 40 of the Code of Federal Regulations is proposed to be amended as follows:

## PART 7—NONDISCRIMINATION IN PROGRAMS RECEIVING FEDERAL ASSISTANCE FROM THE ENVIRONMENTAL PROTECTION AGENCY

1. The authority citation for Part 7 is revised to read as follows:

**Authority:** 42 U.S.C. 2000d to 2000d–4, 29 U.S.C. 794; 33 U.S.C. 1251 nt.

**§ 7.70 [Amended]**

2. In § 7.70, "New construction," paragraphs (b), (c), and (d) are removed.

3. Section 7.70 is further amended by adding a new paragraph (b) to read as set forth at the end of this document.

**Nathaniel Scurry,**

*Director, Office of Civil Rights.*

---

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### 45 CFR Part 84

**ADDRESSES:** Comments should be sent to: Audrey F. Morton, Director, Office for Civil Rights, Department of Health & Human Services, Washington, DC 20201.

Comments received will be available for public inspection at Room 5034, HHS-North Building, 330 Independence Avenue SW., Washington, DC 20201, from 9:00 a.m. to 5:30 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Marcella Haynes, Director, Policy & Special Projects Staff, or Frank EG Weil, Chief, Policy Branch on (202) 245–6671 TDD (202) 472–2916.

**List of Subjects in 45 CFR Part 84**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Health facilities, Hospitals, Loan programs.

For the reasons stated in the preamble, Part 84 of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

VOL 54 ISS 44 MR 8 1989 UMI

**PART 84—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE**

1. The title for Part 84 is revised to read as set forth above.

2. The authority citation for Part 84 is revised to read as follows:

**Authority:** 20 U.S.C. 1405; 29 U.S.C. 794; 42 U.S.C. 290dd–2; 21 U.S.C. 1174.

**§ 84.23 [Amended]**

3. In § 84.23, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**Don Newman,**
*Acting Secretary.*

## NATIONAL SCIENCE FOUNDATION

**45 CFR Part 605**

**ADDRESSES:** Comments should be sent to: Brenda M. Brush, Director, Office of Equal Opportunity, National Science Foundation, 1800 G Street NW., Room 546, Washington, DC 20550.

Comments received will be available for public inspection at the National Science Foundation, Room 546, 1800 G Street NW., Washington, DC 20550, from 8:30 a.m. to 5:00 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Brenda M. Brush, Director, Office of Equal Opportunity, 1800 G Street NW., Room 546, Washington, DC 20550, (202) 357–9619. TDD No.: (202) 357–9667.

**List of Subjects in 45 CFR Part 605**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 605 of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

**PART 605—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE**

1. The title for Part 605 is revised to read as set forth above.

2. The authority citation for Part 605 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

**§ 605.23 [Amended]**

3. In § 605.23, "New construction," paragraph (c) is revised to read as set forth at the end of this document.

**John H. Moore,**
*Acting Director, National Science Foundation.*

---

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

**National Endowment for the Arts**

**45 CFR Part 1151**

**ADDRESS:** Comments should be sent to: Arthur A. Warren, Deputy General Counsel, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Room 522, Washington, DC 20506.

Comments received will be available for public inspection at National Endowment for the Arts, Office of General Counsel, Room 522, 1100 Pennsylvania Avenue NW., Washington, DC 20506, from 9:00 a.m. to 5:30 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Paula Terry, Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Washington, DC 20506, (202) 682–5532, TTY Number: (202) 682–5496.

**List of Subjects in 45 CFR Part 1151**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 1151 of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

**PART 1151—NONDISCRIMINATION ON THE BASIS OF HANDICAP**

1. The authority citation for Part 1151 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

**§ 1151.23 [Amended]**

2. In § 1151.23, "New construction," paragraph (a) is amended by adding the heading "*Design, construction, and alteration*" to the beginning of the paragraph.

3. Section 1151.23 is further amended by revising paragraph (b) to read as set forth at the end of this document.

**Francis S.M. Hodsoll,**
*Chairman, National Endowment for the Arts.*

**National Endowment for the Humanities**

**45 CFR Part 1170**

**ADDRESS:** Comments should be sent to: Carol M. Gordon, Director, Office of Equal Opportunity.

Comments received will be available for public inspection at 1100 Pennsylvania Avenue NW., Room 419, Washington, DC 20506 from 8:30 a.m. to 4:00 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Carol M. Gordon (202) 786–0410 (Voice) or 786–0282 (TDD).

**List of Subjects in 45 CFR Part 1170**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 1170 of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

**PART 1170—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN FEDERALLY ASSISTED PROGRAMS AND ACTIVITIES**

1. The authority citation for Part 1170 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

**§ 1170.33 [Amended]**

2. In § 1170.33 "New construction," paragraph (a) is amended by adding the heading "*Design, construction, and alteration*" to the beginning of the paragraph.

3. Section 1170.33 is further amended by revising paragraph (b) to read as set forth at the end of this document.

**Lynne V. Cheney,**
*Chairman.*

## ACTION

**45 CFR Part 1232**

**ADDRESSES:** Comments should be sent to: Jeanne D. McCamley, ACTION, Office of the Director, Equal Opportunity Staff, 806 Connecticut Avenue NW., Washington, DC 20525.

Comments received will be available for public inspection at 806 Connecticut Avenue NW—Room 207, Washington, DC from 9:00 a.m. to 5:00 p.m. Monday through Friday except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Jeanne D. McCamley, ACTION, Office of the Director, Equal Opportunity Staff, 806 Connecticut Avenue NW., Washington, DC 20525. 634–9312 (voice) or 566–2673 (JDD).

**List of Subjects in 45 CFR Part 1232**

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Grant programs, Handicapped, Loan programs.

For the reasons stated in the preamble, Part 1232 of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

**PART 1232—NON-DISCRIMINATION ON BASIS OF HANDICAP IN PROGRAMS RECEIVING FEDERAL FINANCIAL ASSISTANCE FROM ACTION**

1. The authority citation for Part 1232 is revised to read as follows:

**Authority:** 29 U.S.C. 794.

**§ 1232.15 [Amended]**

2. In § 1232.15, "New construction," paragraph (a) is amended by adding the heading "*Design, construction, and alternation.*" to the beginning of the paragraph.

3. Section 1232.15 is further amended by revising paragraph (b) to read as set forth at the end of this document.

**Donna M. Alvarado,**
*Director.*

---

**Text of the Common Rule**

The text of the common rule as adopted by the agencies in this document appears below.

§ _____

* * * * *

(____) *Conformance with Uniform Federal Accessibility Standards.* (1) Effective as of [insert the effective date of this regulation], design, construction, or alteration of buildings in conformance with sections 3–6 of the Uniform Federal Accessibility Standards (UFAS) (Appendix A to 41 CFR Subpart 101–19.6) shall be deemed to comply with the requirements of this section with respect to those buildings. Departures from particular technical and scoping requirements of UFAS by the use of other methods are permitted where substantially equivalent or greater access to and usability of the building is provided.

(2) For purposes of this section, section 4.1.6(1)(g) of UFAS shall be interpreted to exempt from the requirements of UFAS only mechanical rooms and other spaces that, because of their intended use, will not require accessibility to the public or beneficiaries or result in the employment or residence therein of persons with physical handicaps.

(3) This section does not require recipients to make building alterations that have little likelihood of being accomplished without removing or altering a load-bearing structural member.

## DEPARTMENT OF EDUCATION

### Office of Special Education and Rehabilitative Services

### Handicapped Special Studies Program

**AGENCY:** Department of Education.

**ACTION:** Notice of final annual evaluation priority.

**SUMMARY:** The Secretary announces an annual evaluation priority for the Handicapped Special Studies program. This priority has been selected to ensure effective use of program funds and to meet requirements of the Education of the Handicapped Act (EHA).

**EFFECTIVE DATE:** This priority takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this priority call or write the Department of Education contact person.

**FOR FURTHER INFORMATION CONTACT:** Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3511–M/S 2313), Washington, DC 20202. Telephone: (202) 732–1099.

**SUPPLEMENTARY INFORMATION:** The Handicapped Special Studies program, authorized by section 618 of Part B of the Education of the Handicapped Act (EHA), as amended, supports studies to evaluate the impact of the Act, including efforts to provide a free appropriate public education and early intervention services to infants, toddlers, children and youth with handicaps. The results of these studies must be included in the annual report submitted to the Congress by the Department.

A notice of proposed funding priorities was published in the **Federal Register** on September 29, 1988 at 53 FR 38254, which contained the following two proposed priorities for fiscal year 1989 awards under this program:

(1) State Agency/Federal Evaluation Studies Projects; and

(2) Design Study for Obtaining National Estimates of Outcome Data on Children and Youth with Handicaps.

There is no difference between the proposed priorities and these final priorities.

However, due to budget constraints, the Secretary intends to award a contract in fiscal year 1990 to carry out the study described in priority (2). Under the Department's procedures, requests for proposals for individual contracts are announced in the *Commerce Business Daily* pursuant to the Federal Acquisition Regulation in 48 CFR Chapter 1 and the Education Department Acquisition Regulation in 48 CFR Chapter 34, and are not subject to section 431 of the General Education Provisions Act, which establishes procedures for promulgating rules and regulations that apply to the Department's non-procurement programs. The priority described under (1), *State Agency/Federal Evaluation Studies Projects*, has been selected as a final priority for cooperative agreements to be entered into by the Secretary and State agencies, and, therefore, is included in this notice of final annual evaluation priority, in accordance with section 431.

### Public Comment

In the September 29th notice, the Secretary invited comments on the proposed annual priorities. The Secretary did not receive any comments. The Secretary has made no changes in the priorities since publication of the proposed priorities.

### Priority

The Secretary announces a priority under the Handicapped Special Studies Program. In accordance with the Education Department General Administrative Regulations (EDGAR, 34 CFR 75.105(c)(1)), the Secretary invites applications for cooperative agreements to support certain types of studies.

*Priority 1. State Agency/Federal Evaluation Studies Projects.* (CFDA No. 84.159)

The purpose of this priority is to support evaluation studies by State agencies to assess the impact and effectiveness of activities assisted under the Education of the Handicapped Act. Within this priority, the Secretary particularly invites studies that: (1) Examine the relationship between State and local administrative factors (e.g., funding formulas, personnel certification, or other policies and procedures) and placement of students with handicaps in regular education environments; (2) examine the impact of various aspects of educational reform (e.g., increased graduation requirements, use of minimum competency testing to determine graduation eligibility, increased academic and curricular requirements, more rigorous promotion policies, etc.) on special education; or (3) examine the relationship between students' educational characteristics and their adult service needs.

In accordance with the Education Department General Administrative Regulations (EDGAR, 34 CFR 75.105(c)(1)), applications for studies described in items (1), (2), and (3) will not receive a competitive or absolute preference over other applications that propose evaluation studies to assess the impact and effectiveness of activities assisted under the Education of the Handicapped Act.

**Authority:** 20 U.S.C. 1418.

Dated: February 21, 1989.

**Lauro F. Cavazos,**

*Secretary of Education.*

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

SUBSCRIPTIONS AND COPIES

PUBLIC

Subscriptions:

| | |
|---|---|
| Paper or fiche | 202-783-3238 |
| Magnetic tapes | 275-3328 |
| Problems with public subscriptions | 275-3054 |

Single copies/back copies:

| | |
|---|---|
| Paper or fiche | 783-3238 |
| Magnetic tapes | 275-3328 |

**THE FEDERAL REGISTER**

**WHAT IT IS AND HOW TO USE IT**

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

**PHILADELPHIA, PA**

WHEN: March 30, at 1:00 p.m.
WHERE: 841 Chesnut Street, Room 705, Philadelphia, Pa
RESERVATIONS: Call the Philadelphia Federal Information Center
Philadelphia: 215-597-1788
New Jersey: 800-366-4480

**WASHINGTON, DC**

WHEN: April 11, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

**SALT LAKE CITY, UT**

WHEN: April 12, at 9:00 a.m.
WHERE: State Office Building Auditorium, Capitol Hill, Salt Lake City, UT
RESERVATIONS: Call the Utah Department of Administrative Services, 801-538-3010

# Rules and Regulations

Federal Register
Vol. 54, No. 45
Thursday, March 9, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 510

### Animal Drugs, Feeds and Related Products: Sponsor Name and Address Changes

*CFR Correction*

In Title 21 of the Code of Federal Regulations, Parts 500 to 599, revised as of April 1, 1988, portions of the table in § 510.600(c)(1) appeared incorrectly.

**§ 510.600 [Corrected]**

On page 101, in the second column, the drug labeler codes in the table in paragraph (c)(1) beginning with the firm name "Solvay Veterinary, Inc." and continuing through and including "Steris Laboratories, Inc." are corrected to read "053501", "001800", "049685", "035955", "036108", "000003", "017153", "017032" and "000402" respectively.

BILLING CODE 1505-01-M

## DEPARTMENT OF JUSTICE

### 28 CFR Part 11

**[Order No. 1322-89]**

### Offset of Debts Owed the United States

**AGENCY:** Department of Justice.

**ACTION:** Interim final rule.

**SUMMARY:** The Department of Justice amends Part 11 of Title 28 of the Code of Federal Regulations by establishing procedures for referring to the Secretary of the Treasury debts that have been reduced to judgment for collection by offset against Federal income tax refunds. This regulation contains safeguards for the debtor while strengthening the ability of the Department to collect outstanding debts.

**EFFECTIVE DATE:** March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert C. Niffenegger, United States Department of Justice, Justice Management Division, Room 1121, 10th Street and Constitution Avenue NW., Washington, DC 20530; (202) 633-5345. (This is not a toll free number).

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 2653 of the Deficit Reduction Act, 31 U.S.C. 3720A, authorizes the Secretary of the Treasury to offset a delinquent debt owed to the Federal Government from the income tax refund due a taxpayer when other collection efforts have failed to recover the amount due. The purpose of the Act is to improve the ability of the Government to collect money owned it while adding certain notice requirements and other protections for the debtor.

The Department published a Notice of Proposed Rulemaking to implement 31 U.S.C. 3720A on June 13, 1988 (53 FR 22026). No comments were received. At the time of the initial notice publication, the Debt Collection Act provisions on tax refund offsets were to expire on July 1, 1988. The effective date of the Act was extended from July 1, 1988 to January 10, 1994 by sec. 701 of the Family Support Act of 1988, enacted October 13, 1988 (Pub. L. 100-485, 102 Stat. 2343).

The rule provides for referral of judgment debts of individuals to the Department of the Treasury for offset. (A complete discussion of the rule is contained in the Federal Register notice of June 13, 1988 [53 FR 22026].)

The Department is considering expanding its use of the tax offset program to include procedures for the collection of debts not reduced to judgment. For that reason, this rule is being published as an interim final rule. In the event that the Department determines that such expansion is warranted, the Department will publish a new notice of proposed rulemaking.

**Other Matters**

This is not a major rule within the meaning of section 1(b) of Executive Order 12291. The Department certifies that this regulation will not have a significant economic impact on a substantial number of small entities. These procedures will only apply to named individuals. Thus, the regulation will not affect any small entities. Accordingly, this rule is exempt from requirements to the Regulatory Flexibility Act, 5 U.S.C. 601-612 (Supp. 1988). This rule contains no reporting and recordkeeping requirements subject to the Paperwork Reduction Act of 1980.

**List of Subjects in 28 CFR Part 11**

Claims.

By virtue of the authority vested in me as Attorney General by 31 U.S.C. 3720A and 28 U.S.C. 301, 509 and 510, Part 11 of Title 28 of the Code of Federal Regulations is hereby amended:

**PART 11—[AMENDED]**

1. The authority citation for 28 CFR Part 11 is revised to read as follows:

**Authority:** 28 U.S.C. 301, 509, 510, 31 U.S.C. 3716, 3720A.

2. A new Subpart B is added and reserved to read as follows:

**Subpart B—[Reserved]**

3. A new Subpart C is added consisting of § 11.10 to read as follows:

**Subpart C—Tax Refund Offsets**

Sec.
§ 11.10 Procedures for tax refund offsets for the collection of judgments.

**Subpart C—Tax Refund Offsets**

**11.10 Procedures for tax refund offsets for the collection of judgments.**

(a) The Department may refer any past-due, non-paid final civil or criminal judgment debts imposed by a court of the United States against an individual to the Secretary of the Treasury for offset. (Judgments in amounts lower than $25.00 or outstanding for longer than ten years are not subject to referral.)

(b) The Department will provide the civil or criminal judgment debtor with written notice of its intent to offset before initiating the offset. Notice will be mailed to the debtor at the current address of the debtor, as determined from information obtained from the IRS' prior year's tax records or from information regarding the debt maintained by the Department of Justice. The notice sent to the debtor will inform the debtor that:

VOL 54 ISS 45 MR 9 1989 UMI

(1) The civil or criminal judgment debt is past due;

(2) The Department intends to refer the civil or criminal judgment to the Secretary of the Treasury for offset from income tax refunds that may be due to individuals;

(3) The debtor, within 65 days of the date on the written notice, has an opportunity to:

(i) Present evidence that all or part of a civil judgment debt or a criminal fine and/or assessment is not past-due;

(ii) Present evidence that the amount of the civil judgment debt or criminal fine and/or assessment, as reported to the IRS, is not the amount currently owed;

(iii) Present evidence that the judgment debt has been stayed or satisfied.

(4) If the civil or criminal judgment debtor wishes to contest the offset, he or she must present evidence set forth under paragraph (b)(3) of this section by a date specified in the notice. The debtor must present such evidence to the Assistant Attorney General for Administration at the address specified in the notice. The Assistant Attorney General for Administration will review the evidence and make a determination whether to terminate efforts to offset the judgment, modify the amount to be referred, or refer for offset the amount stated in the notice, and notify the debtor in writing. There is no appeal of this decision.

(5) The authority of the Assistant Attorney General for Administration may be redelegated to subordinate officials as appropriate.

Date: February 6, 1989.

**Dick Thornburgh,**

*Attorney General.*

BILLING CODE 4410-01-M

## DEPARTMENT OF THE INTERIOR

### Office of Surface Mining Reclamation and Enforcement

### 30 CFR Part 931

### New Mexico Permanent Regulatory Program

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Final rule; approval of amendment.

**SUMMARY:** OSMRE is announcing the approval of an amendment to the New Mexico permanent regulatory program (hereinafter referred to as the New Mexico program), as administered by the New Mexico Mining and Minerals Division (MMD), under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment pertains to the training, examination, and certification of blasters; annual reports; regarding and stabilizing of rills and gullies; inspection and enforcement; permit conditions, applications and fees; backfilling and grading; support facilities; and disposal of noncoal waste. The amendment revises the State program to be consistent with the corresponding Federal regulations and to incorporate additional flexibility afforded by revised Federal regulations.

**EFFECTIVE DATE:** March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue SW., Suite 310, Albuquerque, NM 87102; Telephone (505) 766-1486.

**SUPPLEMENTARY INFORMATION:**

## I. Background on the New Mexico Program

On December 31, 1980, the Secretary of the Interior conditionally approved the New Mexico program. Information regarding the general background of the New Mexico program, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval can be found in the December 31, 1980, **Federal Register** (45 FR 86459). Actions taken subsequent to approval are found in 30 CFR 931.12, 931.13, 931.15, 931.16, and 931.30.

## II. Discussion of the Amendment

By letter dated June 17, 1987, New Mexico submitted to OSMRE a proposed amendment to certain provisions of Coal Surface Mining Commission (CSMC) Rule 80-1 (Administrative Record No. NM-356). OSMRE published a notice in the July 28, 1987 **Federal Register** (52 FR 28162) announcing receipt of the proposed amendment and inviting public comment on its adequacy. After reviewing the proposed amendment and all comments OSMRE notified New Mexico by letter dated November 10, 1987, of several provisions that appeared to be inconsistent with the Federal regulations (Administrative Record No. NM-390). By letter dated February 18, 1988 (Administrative Record No. NM-393) New Mexico clarified and revised those provisions which pertain to hydrologic balance protection, disposal of noncoal waste, inspection and enforcement, and backfilling and regarding of rills and gullies. To allow the public an opportunity to comment on the additional material, OSMRE reopened and extended the comment period to April 15, 1988, in a **Federal Register** notice dated March 31, 1988 (53 FR 10398). On August 10, 1988, New Mexico withdrew the proposed revisions concerning protection of the hydrologic balance at CSMC Rule 80-1-20-42(a) (3), (5), (6) and (8) (Administrative Record No. NM-438).

## III. Director's Findings

The Director finds, in accordance with SMCRA, 30 CFR 732.15, and 30 CFR 732.17, that the proposed amendment submitted by New Mexico on June 17, 1987, as subsequently revised and clarified on February 18, 1988 and August 10, 1988, meets the requirements of SMCRA and 30 CFR Chapter VII as discussed below.

*1. Training, Examination, and Certification of Blasters*

(a) *General.* Under 30 CFR 850.12 (a) and (b), States are required to develop and adopt a program to examine and certify persons directly responsible for blasting in surface coal mining and reclamation operations. To satisfy this requirement and its State-specific counterpart at 30 CFR 931.16(a), New Mexico is adding a new Part 33 to CSMC Rule 80-1 to establish a State blaster certification program. For the reasons discussed below, the Director finds that the New Mexico submission meets the requirements of and is no less effective than the Federal rules governing State blaster training, examination and certification programs in 30 CFR Part 850.

(b) *Training examination and experience requirements.* CSMC Rule 80-12-33-13 specifies minimum training requirements for certification identical to those in the corresponding Federal rule at 30 CFR 850.13. However, New Mexico does not plan to conduct either a training or an examination program. Instead, section 33-14 requires all candidates for State certification to be certified under another OSMRE-approved State or Federal blasters certification program. Paragraph 33-14(a) requires the MMD Director to verify that any such program requires training in the topics specified in section 33-13. The Director also must verify that the applicant successfully completed this training program and passed an examination on the topics. Paragraph 33-14(b) further requires candidates for certification to have at least one year of practical field experience, thus satisfying the requirement of 30 CFR 850.15(a)(2) that applicants have an adequate level of experience.

The Federal standards for State blaster certification programs in 30 CFR 850.14 include specific requirements, such as a written examination, that are not included in the New Mexico rule. However, under the proposed rule, New Mexico cannot and will not certify candidates unless they are already certified under an OSMRE-approved program in another State. Therefore, it is not necessary for New Mexico to adopt all the specific examination and experience standards of 30 CFR 850.14 since candidates will already have met those requirements in another State.

(c) *Certificate issuance, maintenance, renewal, suspension and revocation.* CSMC Rule 80-1-33-15 authorizes the MMD Director to enforce all certification conditions and requirements placed on the applicant by the State in which he or she is certified. Also, persons certified under Section 33-14 must meet all requirements for recertification and demonstration of continued competency in the other State(s) in which they are certified if they desire to maintain their New Mexico certification. The State rules thus meet the certification and recertification requirements of 30 CFR 850.15 (a) and (c).

New Mexico's provisions for protection, suspension and revocation of blasters' certificates in paragraphs 33-15 (c) and (d) include all requirements of the corresponding Federal regulations in 30 CFR 850.15 (b) and (d). In addition, if the Director of MMD suspends or revokes a certificate, the State rule requires that he notify all other States in which the individual is certified.

(d) *Conditions for maintaining certification.* CSMC Rule 80-1-33-15(3) specifies that, to maintain certification, a blaster must immediately exhibit his certificate to an authorized representative of the MMD Director upon request, and refrain from assigning or transferring his or her certification or delegating blasting responsibility to any individual who is not a certified blaster. The corresponding Federal regulation at 30 CFR 850.15(e) requires three similar conditions, which differ from the State conditions only in that the Federal rules, unlike the State rules, require that the blaster exhibit his or her certificate to an authorized representative of OSMRE upon request.

In correspondence with OSMRE, New Mexico has stated that it is not necessary for State regulations to require blasters to exhibit certificates to an authorized representative of OSMRE (Administrative Record No. NM-348). New Mexico believes that OSMRE has authority under 30 CFR 842.13(a)(2) to require exhibition of blasters certificates to OSMRE representatives.

Under 30 CFR 842.13(a)(2), OSMRE has access to, and the authority to copy, any records of a surface coal mining operation. The Director finds that while it would provide clarity in the New Mexico program to require that the blaster exhibit his or her certificate to an authorized representative of OSMRE, the lack of such a provision does not render the program less effective than the Federal rules because OSMRE has such authority under the Federal regulations at 30 CFR 842.13(a)(2).

Since, except as noted above, CSMC Rule 80-1-33-15(e) is identical to 30 CFR 850.15(e), the Director finds that the State rule is no less effective than, and meets the requirements of, its Federal counterpart.

*2. Annual Reports*

New Mexico proposes to add to CSMC Rule 80-1 a new section 5-26 to require an annual report from a permittee detailing reclamation measures taken during the previous year. This report, due every March 1, would include a map showing permit boundaries, mine facilities, roads, drainage features, impoundment features, coal waste disposal areas, soil stock piles, and reclaimed areas. Each subsequent annual report would show updates from the previous year and would thus provide an additional means of monitoring operator compliance with the approved permit.

There is no comparable requirement in SMCRA or the Federal regulations. Under 30 CFR 730.11(b), any State regulation which provides for more stringent control or regulation of surface coal mining and reclamation operations than the Federal regulations shall not be construed to be inconsistent with the Federal regulations. Adoption of the annual report requirement will not adversely affect other provisions of the program.

Therefore, the Director finds that New Mexico's requirement for annual reports is not inconsistent with SMCRA and the Federal regulations.

*3. Regrading and Stabilizing Rills and Gullies*

CSMC Rule 80-1-20-106 requires the stabilization of certain rills and gullies that form in areas which have been regraded and topsoiled. New Meixco is amending section 20-106(a) to add a general requirement that regraded and topsoiled areas be protected and stabilized to effectively control erosion and air pollution attendant to erosion. The added erosion control requirement is identical to the corresponding Federal erosion control requirement in 30 CFR 816.95(a).

Section 20-106 also is amended to remove the specific requirement that rills and gullies deeper than nine inches be filled or stabilized. This requirement is being replaced with a new requirement in section 20-106(b) to fill, regrade or otherwise stabilize, topsoil and revegetate rills and gullies which disrupt the postmining land use or the reestablishment of the vegetative cover, or which cause or contribute to a violation of water quality standards. Revised section 20-106(b) is identical to the corresponding Federal provisions in 30 CFR 816.95(b).

As currently approved, CSMC Rule 80-1-20-106(b) includes a "State window" provision allowing the MMD Director to waive rill and gully repair requirements if it is demonstrated that erosion on the reclaimed lands does not exceed erosion levels on similar unmined lands in the area, and if the rills and gullies do not and would not adversely affect compliance with other specific provisions of the New Mexico regulation. The amendment recodified this provision as paragraph (c) and revises it to require a demonstration that the unrepaired rills and gullies will not affect compliance with "all applicable parts of these rules and regulations." Thus, the revised wording broadens the environmental protection provided by this rule.

For the reasons discussed above, the Director finds revised CSMC Rule 80-1-20-106 no less effective than the Federal regulations and no less stringent than the requirements of SMCRA.

*4. Permit Conditions*

New Mexico is amending CSMC Rule 80-1-11-27 to add a new subsection (d). The new subsection requires each New Mexico permittee to notify the MMD Director, in writing, of his or her intention to begin operations at least 10 days prior to initial surface disturbance.

There is no direct Federal counterpart to the New Mexico notification requirement. However, this reporting requirement will improve New Mexico's ability to monitor mining activity and it will not adversely affect other requirements of the State program. Therefore, the Director finds that the amendment is not inconsistent with the requirements of SMCRA and the Federal regulations.

*5. Disposal of Noncoal Waste*

New Mexico is amending CSMC Rule 80-1-20-89 to include a new subsection (e). This subsection provides that any

VOL 54 ISS 45 MR 9 1989 UMI

noncoal mine waste defined as "hazardous" under section 3001 of the Federal Resource Conservation and Recovery Act (RCRA) and 40 CFR Part 261 shall be handled in accordance with Subtitle C of RCRA, the New Mexico Hazardous Waste Act, and regulations associated with either Act.

The New Mexico requirement is identical to 30 CFR 816.89(d) and 817.89(d) to the extent that it requires compliance with RCRA. The requirement for compliance with the New Mexico Hazardous Waste Act and associated regulations represents an additional State requirement authorized under 30 CFR 730.11(b). The Federal regulations at 30 CFR 816.89(d) and 817.89(d) were suspended on November 20, 1986, (51 FR 41952) to implement the decision of the U.S. District Court for the District of Columbia in *In re: Permanent Surface Mining Regulation Litigation (II)* (Civil Action No. 79–1144, July 15, 1985). The court remanded these rules because OSMRE failed to comply with the public notice and public comment requirements of the Administrative Procedure Act in promulgation of the regulations. No substantive issues were involved. Since New Mexico is not subject to the Administrative Procedures Act, failure to comply with this Act need not be considered in evaluating this proposed amendment.

Therefore, for the reasons discussed above, the Director finds that CSMC Rule 80–1–20–89(e) is no less stringent than SMCRA and no less effective than the Federal regulations.

*6. Permit Fees*

Revised CSMC Rule 80–1–5–25(b) deletes the minimum annual permit acreage fee of $1,000 and provides for determination of the amount based on disturbed acreage, without establishing a minimum fee. Although 30 CFR 777.17 provides for the assessment of permit application fees, the method for determining the amount of such fees is left to the discretion of the regulatory authority. Therefore, the Director finds that New Mexico's revised permit fee schedule is not inconsistent with any Federal requirements.

*7. Support Facilities and Utility Installations*

New Mexico is amending CSMC Rule 80–1–20–181(a) to include fuel, chemical and lubricant storage facilities as activities subject to the coal surface mining performance standards. Subsection 80–1–20–181(a) is also being modified editorially to eliminate paragraphs (1) and (2) while retaining the same language as a continuation of paragraph (a).

The Federal regulations for support facilities at 30 CFR 816/817.181 do not specifically mention fuel, chemical and lubricant storage, although storage areas, in general, are included under other Federal provisions. The New Mexico requirement adds specificity to CSMC Rule 80–1–20–181(a); therefore, the Director finds that the revised rule is not inconsistent with SMCRA and the Federal requirements.

*8. Cut-and-Fill Terraces*

New Mexico is amending its backfilling and grading requirements at CSMC Rule 80–1–20–102(b)(3) by deleting a requirement that the outslopes of cut-and-fill terraces have a minimum static safety factor of 1.3.

The Federal rules concerning cut-and-fill terraces at 30 CFR 816/817.102(g) do not include the specific provision that terrace outslopes have a 1.3 static safety factor. Since New Mexico's rules and the Federal regulations at 30 CFR 816/817.102(g) both include requirements that all backfilled areas attain a minimum static safety factor of 1.3, the separate requirement of CSMC Rule 80–1–20–102(b)(3) is redundant. Therefore, the Director finds that New Mexico's revised rule is no less effective than the Federal regulations at 30 CFR 816/817.102(g).

*9. Covering Coal and Acid and Toxic-Forming Materials*

New Mexico is amending CSMC Rule 80–1–20–103(a) by adding a new paragraph (2) and recodifying current paragraph (2) as paragraph (3). The revised rule allows the Director of MMD to specify thicker amounts of backfill to isolate coal seams and acid and toxic-forming and combustible materials. The Federal regulations require similar safeguards at 30 CFR 816/817.41 and 816/817.102(f). Therefore, the Director finds that the revised New Mexico rule is no less effective than the Federal regulations.

*10. Inspections*

CSMC Rule 80–1–29–11 is being amended to provide for aerial partial inspections, reduce the inspection frequency for inactive surface mining operations, and provide for quarterly inspections for permitted operations that have not commenced operations.

New Mexico's currently approved program requires all inspections to be on-the-ground inspections and does not distinguish between active and inactive operations with regard to inspection frequency. The procedures for aerial inspections at CSMC Rule 80–1–29–11(a) are similar to 30 CFR 840.11 (a) and (d); therefore, the Director finds the revised New Mexico rule regarding aerial inspections to be no less effective than the Federal regulations.

Revised CSMC Rule 80–1–29–11(b) defines inactive operations and provides for quarterly complete inspections of such sites in a manner similar to 30 CFR 840.11 (b) and (f). Although not specifically mentioned, the Director of New Mexico MMD also has the authority to require such partial inspections of inactive coal surface mining operations as are necessary to ensure effective enforcement consistent with the Federal rule at 30 CFR 840.11(a). Both the Federal and New Mexico rules establish minimum inspection frequencies but neither limits additional inspections which may be performed. Therefore, the Director finds New Mexico's procedures and requirements for inspecting inactive coal surface mining operations to be no less effective than the Federal regulations.

New Mexico is adding a new subsection (c) to CSMC Rule 80–1–29–11. This new paragraph requires quarterly inspections of undisturbed permits until the permittee notifies the MMD it is commencing operations. Since a permit is not subject to the inspection criteria of 30 CFR Part 842 until disturbed, the Director finds New Mexico's rule is not inconsistent with the Federal requirements and provides the necessary safeguards to monitor the commencement of new operations. The Director notes that in revising CSMC Rule 80–1–29–11 New Mexico added a new subsection (c) but did not redesignate existing subsection (c) or the paragraphs that follow. Therefore, New Mexico will have two paragraphs codified as (c) under Rule 80–1–29–11 when this program amendment becomes effective. The Director expects that New Mexico will correct this editorial error during its next rulemaking.

*11. Miscellaneous Provisions*

The amendment includes two additional changes. CSMC Rule 80–1–8–11 is being amended to add a provision that information on premining resources will be used during evaluation of the permit application.

Although the corresponding Federal rules at 30 CFR 779.11 and 783.11 lack a similar provision, the Director finds that, by implication, they have a similar purpose. Therefore, the revised New Mexico rule is no less effective than the cited Federal rules.

CSMC Rule 80–1–9–18(b)(4) is being revised for clarity by changing the word "topdressing" to "topsoil". Since this is a nonsubstantive change, the Director finds that it does not render the New Mexico program less effective than the Federal requirements.

## IV. Summary and Disposition of Comments

No public comments were received. Pursuant to Section 503(b) of SMCRA and 30 CFR 732.17(h)(11), comments were solicited from various Federal and State agencies with an actual or potential interest in the New Mexico program.

The Environmental Protection Agency (EPA) submitted comments (Administrative Record No. NM–403) on the proposed regulations concerning water quality standards. Based on EPA's comments and other considerations, New Mexico withdrew all proposed amendments concerning water quality standards (Administrative Record No. NM–438). EPA's comments are, therefore, no longer applicable to this rulemaking. EPA did not comment on the remainder of the proposed regulations.

The New Mexico Office of Cultural Affairs and Historical Preservation recommended that cultural resources information, such as mitigation stipulations, known site information, and a summary of completed and anticipated work be included in the annual report (Administrative Record No. NM–368). As noted in Finding 2 above, there is no Federal requirement for an annual report. Therefore, OSMRE cannot require the State to include specific items in the report. Other sections of the New Mexico program either contain or are being amended to include all the mandatory cultural resource requirements.

## V. Director's Decision

The Director, based on the above findings, is approving the amendment submitted by New Mexico on June 17, 1987, as revised and clarified on February 18, 1988, and August 10, 1988. The Director is approving these rules provided that they are adopted in a form identical to that submitted to and reviewed by OSMRE and the public.

The Director is amending 30 CFR Part 931 to reflect his approval of this amendment and the removal of a required program amendment concerning blaster training, examination, and certification. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to conform their programs to Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

## VI. Procedural Matters

*1. Compliance with National Environmental Policy Act*

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

*2. Executive Order No. 12291 and the Regulatory Flexibility Act*

On July 12, 1984, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any requirements established by SMCRA and the Federal rules will be met by the State.

*3. Paperwork Reduction Act*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

**List of Subjects in 30 CFR Part 931**

Coal mining, Intergovernmental relations, Surface Mining, Underground Mining.

Date: March 3, 1989.

**Robert H. Gentile,**

*Director, Office of Surface Mining Reclamation and Enforcement.*

For the reasons set out in the preamble, Title 30, Chapter VII, Subchapter T of the Code of Federal Regulations is amended as set forth below.

## PART 931—NEW MEXICO

1. The authority citation for Part 931 continues to read as follows:

**Authority:** 30 U.S.C. 1201 *et seq.*

2. In § 931.15, a new paragraph (h) is added to read as follows:

**§ 931.15 Approval of amendments to State regulatory program.**

* * * * *

(h) The following amendment is approved effective March 9, 1989. Revisions to or addition of the following portions of New Mexico Coal Surface Mining Commission (CSMC) Rule 80–1, as submitted on June 17, 1987, and clarified and modified on February 18, 1988, and August 10, 1988, provided New Mexico promulgates these rules in a form identical to that in which they were reviewed by OSMRE:

Section 5–25 Permit Fees.
Section 5–28 Annual Reports.
Section 8–11 General Requirements for Permit Applications.
Section 9–18 General Requirements for Reclamation Plan.
Section 11–27 Permit Conditions.
Section 20–89 Disposal of Noncoal Waste.
Section 20–102 Cut-and-Fill Terraces.
Section 20–103 Covering Coal and Acid and Toxic-Forming Materials.
Section 20–106 Regrading and Stabilizing Rills and Gullies.
Section 20–181 Support Facilities and Utility Installations.
Section 29–11 Inspections.

Part 33 Training, Examination, and Certification of Blasters.

**§ 931.16 [Removed and Reserved]**

3. Section 931.16 is removed and reserved.

### Certificate of Release or Discharge From Active Duty (DD Form 214/5 Series)

**AGENCY:** Department of Defense.

**ACTION:** Final rule.

**SUMMARY:** This document amends 32 CFR Part 45 to incorporate the correct pages of Appendix A of this part. On February 21, 1989, the Department of Defense published in the **Federal Register** this final rule. Appendix A was not accurately displayed, therefore, we are revising Appendix A.

**EFFECTIVE DATE:** January 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Lt. Col. T. Sutherland, Office of the Assistant Secretary of Defense (Force Management and Personnel), the Pentagon, Washington, DC 20301, telephone 202–695–6312.

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 32 CFR Part 45**

Armed forces reserves, Military personnel.

Accordingly, 32 CFR Part 45 is amended as follows:

VOL 54 ISS 45 MR 9 1989 UMI

1. The authority citation continues to read as follows:

Authority: 10 U.S.C. 1158 and 972.

2. Appendix A is revised as follows:

L.M. Bynum,
*Alternate OSD Federal Register Liaison Officer, Department of Defense.*
March 3, 1989.

**32 CFR Part 358**

**[DoD Directive 5105.41]**

## Defense Advanced Research Projects Agency (DARPA)

**AGENCY:** Department of Defense.

**ACTION:** Final rule.

**SUMMARY:** This document revises 32 CFR Part 358 to reflect placement of the Defense Advanced Research Projects Agency under the authority, direction, and control of the Under Secretary of Defense for Acquisition; to change the title of the Assistant Secretary of Defense (Comptroller) to Comptroller of the Department of Defense pursuant to 10 U.S.C. 131; and to make minor editorial changes.

**EFFECTIVE DATE:** January 25, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. R., Furtner, Office of the Director for Administration and Management, Washington, DC 20301-1155, telephone 202-697-0709.

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 32 CFR Part 358**

Organization and management.

Accordingly, Title 32 CFR Part 358 is revised as follows:

## PART 358—DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

Sec.

358.1 Purpose.
358.2 Mission.
358.3 Organization and Management.
358.4 Responsibilities and Functions.
358.5 Authority.
358.6 Relationships.
358.7 Administration.

Appendix—Delegation of Authority

**Authority:** 10 U.S.C. 133

### § 358.1 Purpose.

Pursuant to the authority vested in the Secretary of Defense under Title 10 U.S.C., this document revises 32 CFR Part 358 to update the responsibilities, functions, relationships, and authorities of the Defense Advanced Research Projects Agency (DARPA).

### § 358.2 Mission.

As the central research and development organization of the Department of Defense with a primary responsibility to maintain U.S. technological superiority over potential adversaries, DARPA shall:

(a) Pursue imaginative and innovative research and development projects offering significant military utility.

(b) Manage and direct the conduct of basic and applied research and development that exploits scientific breakthroughs and demonstrates the feasibility of revolutionary approaches for improved cost and performance of advanced technology for future military applications.

(c) Stimulate a greater emphasis on prototyping in defense systems by conducting prototype projects that embody technology that might be incorporated in joint programs, programs in support of deployed U.S. Forces (including the Unified and Specified Commands), or selected Military Department programs, and on request, assist the Military Departments in their own prototyping programs.

### § 358.3 Organization and Management.

DARPA is established as a separate Agency of the Department of Defense under the direction, authority, and control of the Under Secretary of Defense (Acquisition) (USD(A)), in accordance with 32 CFR Part 382. It shall consist of a Director and such subordinate elements as are established by the Director within resources authorized by the Secretary of Defense.

### § 358.4 Responsibilities and Functions.

The *Director, DARPA,* shall:

(a) Organize, direct, and manage the DARPA and all assigned resources.

(b) Provide guidance and assistance, as appropriate, to all DoD Components and other U.S. Government activities on matters pertaining to the projects assigned to DARPA.

(c) Recommend to the Secretary of Defense, through the USD(A)), the assignment of research projects to DARPA.

(d) Arrange for the performance of, and supervise the work connected with, DARPA projects assigned to the Military Departments, other U.S. Government activities, individuals, private business entities, educational institutions, or research institutions, giving consideration to the primary functions of the Military Departments.

(e) Engage in assigned advanced research projects.

(f) Keep the USD(A), the Military Departments, the Joint Chiefs of Staff (JCS), and other DoD Agencies informed, as appropriate, on significant new developments, breakthroughs, and technological advances within assigned projects and on the status of such projects to facilitate early operational assignment.

(g) Prepare and submit to the Comptroller of the Department of Defense, in accordance with established procedures, the DARPA annual program budget estimates, to include the assignment of appropriation program priorities.

(h) Perform such other functions as may be assigned by the USD(A).

### § 358.5 Authority.

The Director, DARPA, is specifically delegated authority to:

(a) Place funded work orders with Military Departments and other DoD Components or directly with subordinate levels of the Military Departments, after clearance with the Secretary of the Military Department concerned.

(b) Authorize the allocation, as appropriate, of funds made available to DARPA for assigned advanced projects.

(c) Establish for DARPA, the Military Departments, and other R&D activities, procedures required in connection with work being performed for DARPA, consistent with policies and instructions governing the Department of Defense.

(d) Serve as head of an Agency and Contracting Activity within the meaning of, and subject to the limitations of, FAR Subpart 2.1, April 1, 1984, as supplemented by DFARS Subpart 202.1.

(e) Prosecute assigned advanced research projects by contract, grant, cooperative agreement, or any other authorized means.

(f) Acquire or construct, directly or through a Military Department or other U.S. Government Agency, such research, development, and test facilities and equipment required to carry out assignments that may be approved by the Secretary of Defense in accordance with applicable statutes and DoD Directives.

(g) Obtain reports and information, consistent with the policies and criteria of DoD Directive 7750.5 and advice and assistance from other DoD Components, as necessary, to carry out DARPA functions and responsibilities.

(h) Exercise the administrative authorities in the Appendix to this part.

### § 358.6 Relationships.

(a) In the performance of assigned functions, the Director, DARPA, shall:

(1) Maintain appropriate liaison for the exchange of information and advice in the field of assigned responsibility with other DoD Components, Agencies of the executive branch, foreign research activities, and non-DoD R&D activities including private business entities and educational institutions.

(2) Ensure that appropriate staff elements of the Office of the Secretary of Defense (OSD), the Joint Chiefs of Staff and the Joint Staff, the Military Departments, and other DoD Components are kept fully informed concerning DARPA activities with which they have substantive concern.

VOL 54 ISS 45 MR 9 1989 UMI

(3) Make appropriate use of established facilities and services in the Department of Defense or other governmental Agencies, wherever practicable, to achieve maximum efficiency and economy.

(b) The Secretaries of the Military Departments and heads of other DoD Components shall:

(1) Provide assistance and support, in their respective fields of responsibility and within available resources, to the Director, DARPA, as may be necessary to carry out the responsibilities and functions assigned to DARPA.

(2) Coordinate with the Director, DARPA, on all matters related to responsibilities and functions assigned to DARPA.

**§ 358.7 Administration.**

(a) The Director, DARPA, shall be a civilian selected by the Secretary of Defense.

(b) DARPA shall be authorized such personnel, facilities, funds, and other administrative support as the Secretary of Defense deems necessary.

(c) The Military Departments shall assign personnel to DARPA in accordance with approved authorizations and procedures for assignment to joint duty.

(d) Administrative support required for DARPA shall be provided by the Director, Washington Headquarters Services (WHS), and other DoD Components, as appropriate.

**Appendix—Delegations of Authority**

Pursuant to the authority vested in the Secretary of Defense, and subject to the direction, authority, and control of the Secretary of Defense, and in accordance with DoD policies, Directives, and Instructions, the Director, DARPA, or in the absence of the Director, the person acting for the Director, is hereby delegated authority as required in the administration and operation of DARPA to:

1. Designate any position in DARPA as a "sensitive" position, in accordance with 5 U.S.C. 7532; Executive Orders 10450, 12333, and 12356; and DoD Directive 5200.2, "DoD Personnel Security Program," December 20, 1979, as appropriate.

2. Authorize and approve overtime work for DARPA civilian officers and employees in accordance with 5 U.S.C. Chapter 55, Subchapter V, and applicable OPM regulations.

3. Authorize and approve:

a. Travel for DARPA civilian officers and employees in accordance with Joint Travel Regulations, Volume, 2, "DoD Civilian Personnel."

b. Temporary duty travel for military personnel assigned or detailed to DARPA in accordance with Joint Travel Regulations, Volume I, "Members of Uniformed Services."

c. Invitational travel to persons serving without compensation whose consultive, advisory, or other highly specialized technical services are required in a capacity that is directly related to, or is in connection with, DARPA activities, pursuant to 5 U.S.C. 5703.

4. Approve the expenditure of funds available for travel by military personnel assigned or detailed to DARPA for expenses incident to attendance at meetings of technical, scientific, professional or other similar organizations in such instances where the approval of the Secretary of Defense, or designee, is required by law (37 U.S.C. 412 and 5 U.S.C. 4110 and 4111). This authority cannot be redelegated.

5. Develop, establish, and maintain an active and continuing Records Management Program, pursuant to Section 506(b) of the Federal Records Act of 1950 (44 U.S.C. 3102).

6. Enter into and administer contracts, directly or through a Military Department, DoD contract administration services component, or other Government Department or Agency, as appropriate, for supplies, equipment, and services required to accomplish the mission of DARPA. To the extent that any law or Executive order specifically limits the exercise of such authority to persons at the Secretarial level, such authority shall be exercised by the appropriate Under Secretary or Assistant Secretary of Defense.

7. Enter into and administer grants, cooperative agreements, and other authorized transactions with any Agency, university, non-profit corporation or other organization to carry out or support work required to execute any assigned advanced research project.

8. Establish and use imprest funds for making small purchases of material and services, other than personal, for DARPA, when it is determined more advantageous and consistent with the best interests of the Government, in accordance with DoD Instruction 5100.71, "Delegation of Authority and Regulations Relating to Cash Held at Personal Risk Including Imprest Funds," March 5, 1973.

9. Authorize the publication of advertisements, notices, or proposals in newspapers, magazines, or other public periodicals as required for the effective administration and operation of DARPA consistent with 44 U.S.C. 3702.

10. Promulgate the necessary security regulations for the protection of property and places under the jurisdiction of the Director, DARPA, pursuant to DoD Directive 5200.8, "Security of Military Installations and Resources," July 29, 1980.

11. Establish and maintain, for the functions assigned, an appropriate publications system for the promulgation of common supply and service regulations, instructions, and reference documents, and changes thereto, pursuant to the policies and procedures in DoD 5025.1–M, "Department of Defense Directives System Procedures," April 1981.

12. In coordination with the Director of Administration and Management, enter into support and service agreements with the Military Departments, other DoD Components, or other Government Agencies, as required for the effective performance of DARPA functions and responsibilities.

13. Establish and maintain appropriate property accounts for DARPA and appoint Boards of Survey, approve reports of survey, relieve personal liability, and drop accountability for DARPA property contained in the authorized property accounts that has been lost, damaged, stolen, destroyed, or otherwise rendered unserviceable, in accordance with applicable laws and regulations.

The Director, DARPA, may redelegate these authorities as appropriate, and in writing, except as otherwise specifically indicated above or as otherwise provided by law or regulation.

March 6, 1989.

## Department of the Army

## 32 CFR Part 518

**[Army Reg. 340–17]**

## Release of Information and Records From Army Files

**AGENCY:** Department of the Army, DoD.

**ACTION:** Final rule.

**SUMMARY:** The Department of the Army is amending its rule for administering the Freedom of Information Act by revising Initial Denial Authorities' responsibilities.

**DATE:** Effective on March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. William A. Walker, Policy and Strategy Directorate, Office of the Director of Information Systems for Command, Control, Communications and Computers, Office of the Secretary of the Army, Washington, DC 20310–0107.

**SUPPLEMENTARY INFORMATION:** This amendment shifts responsibilities for initial denial authority held by the Administrative Assistant to the Secretary of the Army, by designating new initial denial authorities as follow: Assistant Secretary of the Army (Financial Management) for finance and accounting records; Assistant Secretary of the Army (Research, Development and Acquisition) for procurement records; and, Director of Information Systems for Command, Control, Communications and Computers for information resources management related records. It also provides that special initial denial authority may be designated in cases that do not specifically fall under an existing initial denial authority purview. This rule is not a "major rule" as defined by Executive Order 12291. Therefore, no regulatory impact analysis has been prepared. The Department of the Army certifies that this document will not have an impact on a significant number of small entities under the Regulatory Flexibility Act (5 U.S.C. *et seq.*) Therefore, no regulatory flexibility analysis has been prepared. The rule has no collection of information requirements and therefore does not require the approval of OMB under 44 U.S.C. 3501 *et. seq.*

**Lists of Subjects in 32 CFR Part 518**

Information, Archives and records, Privacy, Freedom of information.

Dated: March 1, 1989.

**John O. Roach,**

*Department of the Army Liaison Officer with the Federal Register.*

**PART 518—[AMENDED]**

32 CFR Part 518 is amended to read as follows:

**Subpart E—Release and Processing Procedures**

1. 32 CFR Part 518.15 is amended by revising paragraphs (a)(4) (i) through (xxiv) as follows:

**§ 518.15 Initial determinations.**

(a) * * *

(4) * * *

(i) The Administrative Assistant to the Secretary of the Army is authorized to act for the Secretary of the Army (SA) on requests for all records maintained by the Office of the Secretary of the Army and its serviced activities, except those specified in paragraphs (a)(4) (ii) through (vi) of this section, as well as those requests requiring the personal attention of the SA.

(ii) The Assistant Secretary of the Army, (Financial Management) is authorized to act on requests for finance and accounting records.

(iii) The Assistant Secretary of the Army, (Research, Development and Acquisition), is authorized to act on requests for procurement records, other than those under the purview of the Chief of Engineers and the Commander, U.S. Army Materiel Command.

(iv) The Director of Information Systems for Command, Control, Communications and Computers is authorized to act on requests for records pertaining to the Army Information Resources Management Program (automation, telecommunications, visual-information, records management, publications and printing, and libraries).

(v) The Inspector General is authorized to act on requests for all Inspector General records under Army Regulation 20–1.

(vi) The Auditor General is authorized to act on requests for records relating to audits done by the U.S. Army Audit Agency under Army Regulation 10–2. This includes requests for related records developed by the Audit Agency.

(vii) The Deputy Chief of Staff for Operations and Plans is authorized to act on requests for records relating to strategy formulation; force development, individual and unit training policy, strategic and tactical command and control systems, nuclear and chemical matters, use of DA forces, and military police records and reports, prisoner confinement, and correctional records.

(viii) The Deputy Chief of Staff for Personnel is authorized to act on requests for case summaries; letters of instruction to boards; behavioral science records, general education records, and alcohol and drug prevention and control records. Excluding individual treatment/test records; which is a responsibility of The Surgeon General.

(ix) The Deputy Chief of Staff for Logistics is authorized to act on requests for records to DA logistical requirements and determinations, policy concerning materiel maintenance and use, equipment standards, and logistical readiness.

(x) The Chief of Engineers is authorized to act on requests for records involving civil works, military construction, engineer procurement, and ecology; and the records of the U.S. Army Engineer divisions, districts, laboratories, and field operating agencies.

(xi) The Surgeon General is authorized to act on requests for medical research and development records, and the medical records of active duty military personnel, dependents, and persons given physical examinations or treatment at DA medical facilities; to include alcohol and drug treatment/test records.

(xii) The Chief of Chaplains is authorized to act on requests for records involving ecclesiastical relationships, rites performed by DA chaplains, and non-privileged communications relating to clergy and active duty chaplains military personnel files.

(xiii) The Judge Advocate General (TJAG) is authorized to act on requests for records relating to claims, courts-martial, legal services, and similar legal-type records. TJAG is also authorized to act on requests for records described elsewhere in this AR, if those records relate to litigation in which the United States has an interest. In addition, TJAG is authorized to act on requests for records that are not within the functional areas of responsibility of any other IDA.

(xiv) The Chief, National Guard Bureau is authorized to act on requests for all Army National Guard records, unless such records clearly fall within another IDA's responsibility. This includes National Guard organization and training files, plans, operations, and readiness files, policy files, historical files, and files relating to National Guard military support and civil disturbance activities.

(xv) The Chief of Army Reserve is authorized to act on requests for all personnel and medical records of retired, separated, discharged, deceased, and reserve component military personnel, and all Army reserve (USAR) records, unless such records clearly fall within another IDA's responsibility. This includes records relating to USAR plans, policies and operations, changes in the organizational status of USAR units; mobilization and demobilization policies, active duty tours, and the Individual Mobilization Augmentation Program.

(xvi) The Commander, United States Army Material Command (AMC) is authorized to act on requests for the records of AMC headquarters and its subordinate commands, units, and activities that relate to procurement, logistics, research and development, and supply and maintenance operations.

(xvii) The Commander, United States Army Criminal Investigation Command (USACIDC), is authorized to act on requests for criminal investigative records of USACIDC headquarters and its subordinate activities. This includes criminal investigation records, investigation-in-progress records, and military police reports that result in criminal investigation reports.

(xix) The Commander, United States Total Army Personnel Command, is authorized to act on requests for military personnel files relating to active duty (other than those of reserve and retired personnel) military personnel matters, personnel locator, physical disability determinations, and other military personnel administration records; records relating to military

VOL 54 ISS 45 MR 9 1989 UMI

casualty and memorialization activities; heraldic activities, voting, records relating to identification cards, naturalization, citizenship, commercial solicitation, Military Postal Service Agency and Army postal and unofficial mail service, civilian personnel records, other civilian personnel matters and personnel administration records.

(xx) The Commander, United States Army Community and Family Support Center is authorized to act on requests for records relating to morale, welfare and recreation activities; nonappropriated funds, child development centers, community life programs, family action programs, retired activities, club management, Army emergency relief, consumer protection, retiree survival benefits, and records dealing with DA relationships and social security, veterans' affairs, United Service Organization, U.S. Soldiers' and Airmen's Home, and American Red Cross.

(xxi) The Commander, United States Army Intelligence and Security Command is authorized to act on requests for intelligence and investigation and security records, foreign scientific technological information, intelligence training, mapping and geodesy information, ground surveillance records, intelligence threat assessments, and missile intelligence data relating to tactical land warfare systems.

(xxii) The General Counsel, Army and Air Force Exchange Service (AAFES) is authorized to act on requests for AAFES records, under Army Regulation 60-301/ Air Force Regulation 147-14.

(xxiii) The Commander, Forces Command, as a specified commander, is authorized to act on requests for specified command records that are unique to Forces Command under DOD 5400.7-R, paragraph 1-510.

(xxiv) Special IDA authority for time-event related records may be designated on a case-by-case basis. These will be published in the **Federal Register**. Current information on special delegations may be obtained from the Office of the Director of Information Systems for Command, Control, Communications and Computers, Attention: SAIS-PSP, Washington, DC 20310-0107 (697-5798).

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

**[FRL-3496-8; NC-021]**

### Approval and Promulgation of Implementation Plans North Carolina Stack Height Rules

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY OF ACTION:** In this action, EPA is approving North Carolina's stack height regulations. This action will approve the original stack height regulations (2D.0533) proposed on March 29, 1983 (48 FR 13052). It will also approve revisions to rule 2H.0603 proposed on October 17, 1984 (49 FR 40807), and revisions to rule 2D.0533 proposed on May 26, 1987 (52 FR 19539). These regulations satisfy EPA's stack height requirements.

Although EPA generally approves North Carolina's stack height rules on the grounds that they satisfy 40 CFR Part 51, this action may be subject to modification when EPA completes rulemaking in response to the decision in *NRDC* vs *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). If EPA's response to the NRDC remand modifies the July 8, 1985, stack height regulations, EPA will notify the State of North Carolina that its rules must be changed to comport with EPA's modified requirements. This may result in revised emission limitations or may affect other actions taken by North Carolina and source owners or operators.

**DATE:** These actions are effective April 10, 1989.

**ADDRESSES:** Copies of the materials submitted by the State may be examined during normal business hours at the following locations:

Air Programs Branch, Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Public Information Reference Unit Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

North Carolina Department of Natural Resources and Community Development, P.O. Box 27687, Raleigh, North Carolina 27611.

**FOR FURTHER INFORMATION CONTACT:** Beverly T. Hudson, EPA Region IV, Air Programs Branch at the above listed address, telephone (404) 347-2864 or FTS 257-2864.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of July 8, 1985 (50 FR 27892), EPA published final regulations to implement Section 123 of the Clean Air Act (CAA), which regulates the manner in which dispersion of pollutants from a source may be considered in setting emission limitations. Pursuant to these regulations and the Clean Air Act Amendments of 1977, all states were required to (1) review and revise, as necessary, their state implementation plans (SIPs) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations and (2) review all existing emission limitations to determine whether these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, states were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to EPA within nine months of promulgation.

#### State Submission

On September 24, 1982 North Carolina submitted to EPA a new regulation (2D.0533) on stack heights, which was intended to satisfy EPA's February 8, 1982, stack height requirements (see 47 FR 5858). On March 29, 1983 (48 FR 13052), EPA proposed to approve the regulation provided the State submitted appropriate provision for public comment in cases where fluid modeling would be used to allow stack height credit in excess of good engineering practice (GEP).

North Carolina submitted an additional regulation change (2H.0803) on April 17, 1984, which would satisfy the public comment requirement of EPA's stack height regulations. This additional change was presumed to make regulation 2D.0533 fully approvable under the Agency's 1982 requirements. EPA proposed to approve the revision to 2H.0803 on October 17, 1984 (49 FR 40807).

*The Sierra Club vs. EPA* court decision substantially revised EPA's stack height regulations and North Carolina was required to revise 2D.0533 to make it consistent with the new federal requirements. A revision to 2D.0533 was submitted to EPA on February 25, 1988, and was proposed for approval on May 26, 1987 (52 FR 19539). The regulations apply to both new and existing sources, thereby satisfying requirements for state new source review regulations in 40 CFR 51.164. The regulations apply to all stacks not in existence on December 31, 1970, and all dispersion techniques implemented, since December 31, 1970.

EPA's stack height regulations were challenged in *NRDC* vs. *Thomas*, 838 F2d 1224 (D.C. Cir. 1988). On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit issued a decision affirming the regulations in large part, but remanding three provisions to EPA for reconsideration:

1. Grandfathering pre-October 11, 1983, within-formula stack height increases from demonstration requirements [40 CFR 51.100(kk)(2)].

2. Dispersion credit for sources originally designed and constructed with merged or multi-flue stacks [40 CFR 51.100(hh)(2)(ii)(A)].

3. Grandfathering pre-1979 use of the refined H+1.5L formula [40 (FR 51.100(ii)(2)].

If EPA's response to the NRDC remand modifies the July 8, 1985, stack height regulations, EPA will notify the State of North Carolina that its rules must be changed to comport with EPA's modified requirements. This may result in revised emission limitations or may affect other actions taken by North Carolina and source owners or operators.

#### Public Comment

EPA received one comment on the North Carolina stack height regulations (2D.0533) proposal of March 29, 1983 (48 FR 13052). This comment objected to the regulations because their effect would be to increase stack heights, causing pollution problems and greater danger of acid rain.

The purpose of the stack height regulations is to prohibit stacks taller than good engineering practice (GEP) height and other dispersion techniques from affecting the emission limitation required to meet the National Ambient Air Quality Standards (NAAQS) or Prevention of Significant Deterioration air quality increments (PSD increments). These regulations were promulgated to implement section 123 of the Clean Air Act. Although they do not limit actual stack height, they would also not lead sources to construct stacks heigher than GEP. On the contrary, approval of stack height regulations will tend to lead to lower stacks than would exist in the absence of such regulations. Furthermore, EPA has no mandate in section 123 to consider the effect of stack heights on acid precipitation, but is required only to assure that dispersion is not used instead of control to bring ground-level concentration of criteria pollutants within the NAAQS.

#### Final Action

EPA is approving North Carolina's stack height regulations and associated regulatory revisions. These revisions are consistent with EPA's stack height requirements as Part 51 of Chapter I, Title 40 of the Code of Federal Regulations.

However, EPA points out again that this action may be subject to modification when EPA completes rulemaking to respond to the decision in *NRDC* vs. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). If EPA's response to the NRDC remand modifies the July 8, 1985, stack height regulations, EPA will notify the State of North Carolina that its rules must be changed to comport with EPA's modified requirements. This may result in revised emission limitations or may affect other actions taken by North Carolina and source owners or operators.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 8, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

#### List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Incorporation by reference.

Note.—Incorporation by reference of the North Carolina State Implementation Plan was approved by the Director of the Federal Register on July 1, 1982.

Date: December 15, 1988.

**Lee M. Thomas,**

### 40 CFR Part 52

**[FRL-3534-3; NC-010]**

### Approval and Promulgation of Implementation Plans; North Carolina; $SO_2$ SIP Revision for Alba Waldensian and Valdese Manufacturing

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** Today, EPA is approving a source-specific revision to the North Carolina State Implementation Plan (SIP) for sulfur dioxide ($SO_2$), which was proposed on November 3, 1988 (53 FR 44495). No comments were received. Ambient air quality modeling to support this SIP relaxation was submitted to EPA by the State on April 2, 1986. The modeling demonstrated that a less stringent $SO_2$ limit is approvable for Alba Waldensian, Inc., and Valdese Manufacturing Company and that the National Ambient Air Quality Standards (NAAQS) for $SO_2$ will be protected. No interstate impacts or attainment problems are expected as a result of approving this SIP revision.

**DATES:** This action is effective April 10, 1989.

**ADDRESSES:** Copies of the State's submittals are available for review during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Air Quality Section, Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, Archdale Building, 512 North Salisbury Street, Raleigh, North Carolina 27611.

Air Programs Branch, Region IV, U.S. Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365.

**FOR FURTHER INFORMATION CONTACT:** Rosalyn Hughes of the Region IV EPA Air Programs Branch, at the above address and the following phone: (404) 347-2864, or (FTS) 257-2864.

**SUPPLEMENTARY INFORMATION:** On December 7, 1982 (47 FR 54934), EPA approved, for all but 24 sources in the State of North Carolina, a revision to the State's regulation 2D.0516 which relaxed the $SO_2$ limit for fuel-burning sources. The original version of 2D.0516 prescribed a stepdown in $SO_2$ emissions for all fuel-burning sources (from 2.3 pounds per million BTU (lb/MBTU) to 1.6 lb/MBTU) by July 1, 1980. Air quality dispersion modeling submitted by the State in 1982 indicated that removal of the $SO_2$ stepdown requirement was approvable for all but 24 sources.

EPA indicated in the December 7, 1982, **Federal Register** notice that if future modeling could show that the relaxed $SO_2$ limit of 2.3 lb/MBTU was adequate to protect the NAAQS, then the stepdown requirement could be eliminated for other sources as well.

Alba Waldensian, Inc., and Valdese Manufacturing Company were two of the sources excluded from EPA's approval of the revised fuel-burning regulation. On April 2, 1986, North Carolina submitted the ambient air quality analysis necessary to show the Alba Waldensian and Valdese Manufacturing Company could be allowed to emit 2.3 lb $SO_2$/MBTU without jeopardizing the NAAQS. On November 3, 1988 (53 FR 44495), EPA proposed approval and no comments were received.

The modeling analysis differs from the modeling submitted January 11, 1982, in that the load capacities for the Alba Waldensian facilities and the Valdese Manufacturing plant have been reduced. The new load capacities for the Alba Waldensian facilities are contained in permits No. 4786 and No. 4920. The new Valdese Manufacturing load capacities are in permit number 504R3. EPA will incorporate the permits into the SIP so that the reduced load capacities will become federally enforceable.

The VALLEY dispersion model was used to estimate the ambient impact of the allowable $SO_2$ emission limit because the sources are located close together in complex terrain. The results of the analysis showed a maximum 24-hour concentration of 346 ug/m³, which is below the 24-hour NAAQS of 365 ug/m³. Demonstration of attainment with the 3-hour and annual ambient $SO_2$ standards was also made. In addition, the ISCST model was used to determine the downwash effects of nearby buildings on $SO_2$ concentrations near the two facilities. The maximum impacts predicted by this model were well below the NAAQS for $SO_2$.

The modeling techniques supporting the demonstration are primarily based on modeling guidance in place at the time that the analysis was performed, i.e., the EPA Guidance of Air Quality Modeling (1978). Since that time, revisions to the modeling guidance have been promulgated (51 FR 32176, September 9, 1986, and 53 FR 592, January 6, 1988). Since the modeling was completed and reviewed by EPA prior to publication of the revised guidance, EPA accepts the analysis.

In its review of the State's submittal for these two sources, EPA became aware of deficiencies in North Carolina's compliance test method for $SO_2$. The State has revised their compliance test method. The new method was approved by EPA on June 9, 1988 (53 FR 21638).

Actual $SO_2$ emissions at the two facilities have not increased as a result of eliminating the $SO_2$ stepdown requirement. Therefore, EPA's Prevention of Significant Deterioration (PSD) regulations (August 7, 1980, 45 FR 52676) do not apply to this SIP revision.

No analysis is required for compliance with the Good Engineering Stack Height rule revision because the stacks of both sources are below 65 meters. Also, there are no merged plume issues associated with this source-specific SIP revision.

EPA has also reviewed this SIP revision for consistency with Section 110(a)(2)(E) of the Clean Air Act, and has found that the interstate impact of these sources will be significantly less than the significant impact concentrations for each averaging period. Due to present limitations on air quality modeling, the ambient analysis was limited to a 50 km radius around the Alba Waldensian and Valdese Manufacturing facilities. Both plants are located further than 50 km from any interstate boundary. Also, as shown in the technical Support Document for this SIP revision, the VALLEY model demonstrate that the 3-hour and 24-hour ambient $SO_2$ concentrations resulting from these two sources' emissions woud decrease markedly a short distance from the plant and the predicted ambient concentrations would fall in every case below the $SO_2$ standards. Therefore, in EPA's judgment, the revision will not contribute to $SO_2$ nonattainment in Tennessee, South Carolina, Virginia or more distant states. Neither will this revision interfere with PSD measures in the states surrounding North Carolina.

**Final Action**

Based on the foregoing, EPA hereby approves the revision to North Carolina regulation 2D.0516, submitted to EPA on March 22, 1977, as it applies to Alba Waldensian and Valdese Manufacturing. This will replace the existing federally approved limit of 1.6 lb $SO_2$/MBTU with the limit of 2.6 lb $SO_2$/MBTU for these two sources.

For further discussion of these issues and the air quality modeling analysis, please consult the Technical Support Document, which is available for public inspection at the EPA Region IV Office in Atlanta, Georgia.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate Circuit by May 8, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

The Office of Management and Budget (OMB) has exempted this rule from the requirements of Section 3 of Executive Order 12291.

**List of Subjects in 40 CFR Part 52**

Air pollution control, Intergovernmental relations, Incorporation by reference, Sulfur oxides.

**Note:** Incorporation by reference of the State Implementation Plan for the State of North Carolina was approved by the Director of the Federal Register on July 1, 1982.

Date: February 15, 1989.

BILLING CODE 6560-50-M

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Office of the Secretary**

**42 CFR Part 1001**

**Medicare and Medicaid Programs: Fraud and Abuse; Administrative Adjudication of Certain Health Care Exclusion Cases**

**AGENCY:** Office of the Secretary, HHS; Office of Inspector General (OIG).

**ACTION:** Final rule.

**SUMMARY:** This final rule will allow for the administrative hearings and administrative appeal of certain health care exclusion cases governed by 42 CFR part 1001 to be handled by the Departmental Appeals Board of this Department. The purpose of this final rule is to conform existing regulations in this Part to the delegations of authority made by the Secretary on June 16, 1988 to handle these hearings and appeals.

**EFFECTIVE DATE:** These regulations are effective on March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Joel J. Schaer, Office of Inspector General, Legislation, Regulations and Public Affairs Staff, (202) 472-5270.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

42 CFR Part 1001 currently contains the substantive and procedural regulations for implementing sections 1128, 1842(j), 1862(e), and former section 1862(d) of the Social Security Act. These statutory provisions constitute some of the authorities that provide for exclusions under the Medicare and Medicaid programs. The procedures for conducting hearings and appeals of cases arising under these statutory provisions are set forth in regulations at 42 CFR 1001.107(c) and 1001.128 (b) and (c). In the past, hearings in these cases have been conducted by administrative law judges assigned to the Office of Hearings and Appeals of the Social Security Administration, while the administrative appeals of these cases have been handled by the Appeals Council also of the Social Security Administration. In all cases, subsequent judicial review is available in United States District Court.

On June 16, 1988, the Secretary delegated to the administrative law judges assigned or detailed to the Departmental Appeals Board the authority to conduct administrative hearings for a number of statutory authorities, including those governed by 42 CFR Part 1001. In addition, the Secretary delegated to the Departmental Appeals Board the authority to hear administrative appeals of these cases. (53 FR 25543, July 7, 1988.)

**II. Provisions of the Regulation**

This final rule is designed to conform existing regulations governing the administrative adjudication of certain types of health care exclusion cases to the June 16, 1988 delegations of authority made by the Secretary. Specifically, the revisions to 42 CFR Part 1001 provide that hearings in these type cases may be conducted by administrative law judges assigned or detailed to the Departmental Appeals Board. These regulations further provide that administrative appeals of such cases may be decided by the members of the Departmental Appeals Board. At the discretion of the Secretary, these changes to the regulations may be applied to cases pending in administrative adjudication.

These regulations are rules of agency procedure and practice exempt from the notice and comment rulemaking requirement (5 U.S.C. 553(b)).

**III. Impact Analysis**

*Executive Order 12291*

We have determined that these regulations do not meet the criteria for a major rule as defined by section 1(b) of Executive Order 12291. Under those criteria, a rule is classified as major if it would have an annual effect on the economy of $100 million or more; cause a major increase in costs or prices for consumers, government agencies, industry or a geographic region; or cause significant adverse effects on business.

*Regulatory Flexibility Analysis*

These regulations do not constitute a rule as defined under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601(2)).

**List of Subjects in 42 CFR Part 1001**

Administrative practice and procedure, Fraud, Health facilities, Health professions, Medicare.

42 CFR Chapter V, Part 1001 is amended as set forth below:

**PART 1001—PROGRAM INTEGRITY**

1. The authority citation for Part 1001 continues to read as follows:

**Authority:** Secs. 1102, 1128, 1842(j), 1862(d), 1862(e), 1866(b)(2) (D), (E) and (F), and 1871 of the Social Security Act (42 U.S.C. 1302, 1320a-7, 1395u(j), 1395y(d), 1395y(e), 1395cc(b)(2) (D), (E) and (F), and 1395hh), unless otherwise noted.

2. Section 1001.107 is amended by revising paragraph (c) to read as follows:

**§ 1001.107 Notice of exclusion or termination to affected party.**

* * * * *

(c) This decision and notice constitute an "initial determination" and a "notice of initial determination" for purposes of the administrative appeals procedures specified in Subparts D and E of Part 498 of this title, except that (1) the authority to conduct hearings and render decisions may be exercised by administrative law judges assigned to, or detailed to, the Departmental Appeals Board, and (2) the authority to render final determinations may be exercised by the Departmental Appeals Board.

3. Section 1001.128 is amended by revising paragraphs (b) and (c) to read as follows:

**§ 1001.128 Appeal procedures.**

* * * * *

(b) A hearing under this section will be conducted in accordance with procedures set forth in Subpart D of Part 498 of this title, except that the authority to conduct hearings and render decisions may be exercised by administrative law judges assigned to, or detailed to, the Departmental Appeals Board.

(c) If any party to the hearing is dissatisfied with the hearing decision, that party is entitled to request review of the decision as specified in Subpart E of Part 498 of this title, except that the authority to render final determinations may be exercised by the Departmental Appeals Board. A suspended party may also seek judicial review of the final administrative decision.

Dated: November 28, 1988.

**Richard P. Kusserow,**

*Inspector General, Department of Health and Human Services.*

Approved: January 18, 1989.

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Part 2**

**[FCC 89-19]**

## Non-Government Use of the Tracking and Data Relay Satellite System

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** By this action the Commission is adopting a new United States footnote to permit non-Government space stations to transmit to National Aeronautical and Space Administration's (NASA) Tracking and Data Relay Satellite System (TDRSS) in the 14.896–15.121 GHz band. This action is necessary to facilitate the expansion of commercial space ventures by providing lower-cost, more efficient radiocommunications to and from earth. By taking this action the Commission will be furthering the President's directive to remove regulatory obstacles to non-Government space activities.

**EFFECTIVE DATE:** March 31, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Damon C. Ladson, Frequency Allocations Branch, Office of Engineering and Technology, (202) 653–8108.

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 47 CFR Part 2**

Radio.

This is a summary of the Commission's order, FCC 89–19, adopted January 27, 1989, and released February 15, 1989.

The full text of the Commission's decisions are available for inspection and copying during normal business hours in the FCC dockets branch (room 230), 1919 M Street Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street Northwest, Suite 140, Washington, DC 20037.

**Summary of Order**

1. The Commission is amending § 2.106, 47 CFR Part 2, by adding a new United States footnote to permit non-Government space stations to transmit to NASA's Tracking and Data Relay Satellite System in the 14.896–15.121 GHz band. The footnote also provides power flux density limits consistent with recommendations of the International Radio Consultative Committee (CCIR). The 14.896–15.121 GHz band is currently allocated for Government fixed and mobile services on a primary basis and Government space research on a secondary basis. Presently, there is no non-Government allocation in this band.

2. On February 11, 1988, the President issued a revised directive on national space policy, calling upon the Government to identify and eliminate regulatory impediments to non-Government space sector activities. In order to further that directive, NTIA has requested that the Commission adopt a footnote to permit commercial users access to the 14.896–15.121 GHz NASA TDRSS frequencies. This footnote will provide that access. Since there are no other non-Government operations in the 14.896–15.121 GHz band, this action will not affect other non-Government spectrum users.

*Ordering Clause*

This action is taken pursuant to 47 U.S.C. 154(i), 303(c), 303(f), 303(g) and 303(r).

*Rule Changes*

Part 2 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS**

1. The authority citation in Part 2 continues to read:

**Authority:** Sec. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted.

2. Section 2.106, the Table of Frequency Allocations, is amended by listing footnote US310 in column 4 for the 14.7145–15.1365 GHz band, and column 5 for the 14.50–15.35 GHz band and adding the text of footnote US310 to the list at the end of the table as follows:

**§ 2.106 Table of frequency allocations.**

## Control and Security Alarm Devices

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This action denies a petition for reconsideration filed by the National Academy of Science's Committee On Radio Frequencies (CORF) and the National Radio Astronomy Observatory (NRAO), requesting certain changes to the Report and Order in General Docket 86–422. Based on this action, the limits specified in the subject report and order will remain in effect.

**EFFECTIVE DATE:** March 9, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** John A. Reed, telephone (202) 653–7313.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Memorandum Opinion and Order in General Docket 86–422, adopted February 10, 1989, and released February 27, 1989. The full text of the Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

**Summary of Memorandum Opinion and Order**

1. In the *Report and Order (Order)* in General Docket 86–422, adopted March 9, 1988, FCC 88–101 (53 FR 11861, April 11, 1988), the Commission, among other things, limited the emissions permitted in certain restricted bands above 1000 MHz, to a level of 500 uV/m at a distance of 3 meters. This level was established after considering the need to minimize the potential for interference to sensitive radio services authorized to operate in those bands.

2. On May 12, 1988, the National Academy of Science's Committee on Radio Frequencies (CORF) and the National Radio Astronomy Observatory (NRAO) filed a petition for reconsideration. CORF/NRAO requested that the Commission set aside its decision and revert to a previously established limit of 125 uV/m at 3 meters in four radio astronomy bands; 1400–1427 MHz, 1660–1668.5 MHz, 2690–2700 MHz and 4990–5000 MHz. Although this limit had been established in a proceeding prior to the initiation of General Docket 86–422, it was not enforced due to a partial stay of the rules and a waiver with regard to the requirement to measure unwanted emissions above 1000 MHz. This resulted in a situation where, for all practical purposes, there were no limits on the level of emissions permitted in the restricted bands above 1000 MHz, for control and security alarm devices including the frequency bands of concern to CORF/NRAO.

3. Oppositions to the CORF/NRAO petition were filed by Interactive Technologies, Inc. ("ITI"), Pittway Corporation ("Pittway"), Linear Corporation ("Linear"), The Door Operator and Remote Controls Manufacturers Association ("DORCMA"), The Chamberlain Group ("Chamberlain"), and Rollins, Inc. ("Rollins"). They believe that there should be no stay in the effectiveness of the Report and Order in this proceeding, and that the Commission should re-affirm its findings. There were no filings in support of the petition.

4. In the *Order*, the Commission pointed out that the objective in establishing emission limits in the restricted frequency bands is to minimize the potential for interference to the sensitive radio services, including radio astronomy, authorized to operate in those bands. The 500 uV/m at 3 meter limit was established as a balance between the desire for interference control and the economic difficulty of producing devices to comply with the limit.

5. The Commission observed that there are numerous potential sources of unwanted emissions, in addition to Part 15 control and security devices which could affect operations possibly within the radio astronomy bands. CORF/NRAO was unable to identify a single source of interference to their operations; whether from Part 15 devices or from transmitters operated in the authorized services. It is important to note that unwanted emissions from equipment used in the authorized services are permitted to be more than 1000 times greater than unwanted emissions from Part 15 devices, and these greater emissions are also permitted within the radio astronomy bands. Since unwanted emissions from equipment used in the authorized services are permitted within the radio astronomy bands, and at a much higher level than those permitted to be radiated from Part 15 devices, the Commission must recognize the probability that the unidentified interference referenced by CORF/NRAO may be caused by emissions from equipment used in the authorized services. Therefore, the Commission cannot accept speculation that significant interference has been caused by Part 15 devices.

6. The Commission finds that CORF/NRAO have not presented any new information in their petition for reconsideration that had not been considered previously by the Commission in reaching the decision in this proceeding. Furthermore, the Commission finds that the CORF/NRAO petition does not contain any persuasive arguments or evidence to warrant a change in the emission limit of 500 uV/m at 3 meters for emissions in the restricted bands above 1000 MHz, caused by control and security alarm devices operated under the provisions of Part 15 of the Rules. For these reasons, and in light of the above discussion, the Commission is not persuaded by the arguments set forth in CORF/NRAO's request for reconsideration of the decisions in the Report and Order in General Docket 86–422.

**Ordering Clause**

7. Accordingly, *It Is Ordered* that the petition for reconsideration filed by the National Academy of Science, through its Committee on Radio Frequencies, and the National Radio Astronomy Observatory *is denied.*

## Radio Broadcasting Services; Anchorage, AK

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document substitutes Channel 277C2 for Channel 276A at Anchorage, Alaska, and modifies the Class A license of Korlyn Broadcasting, Inc. for Station KXDZ(FM), as requested, to specify operation on the higher class channel. This will provide Anchorage with an additional expanded coverage area FM service. Reference coordinates for Channel 277C2 at Anchorage are 61–09–58 and 149–49–34. With this action, the proceeding is terminated.

**EFFECTIVE DATE:** April 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Nancy Joyner, Mass Media Bureau, (202) 634–6530.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Report and Order, MM Docket No. 88–29, adopted February 8, 1989, and released March 3, 1989. **Radio Broadcasting Services; Carthage, IL**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document substitutes Channel 221B for Channel 221A and modifies the license of Station WCAZ(FM) at Carthage, Illinois, to specify the higher class channel, at the request of Bryan Broadcasting, Inc., licensee of Station WCAZ(FM). A *Report and Order* was issued in this proceeding on November 4, 1988, dismissing the petition for rule making for lack of interest. According to petitioner timely comments were filed but were never received by Commission staff responsible for acting on petitions. Petitioner's late expression of interest has been accepted for the purpose of substituting Channel 221B1 for Channel 221A at Carthage, Illinois. The restricted site coordinates for Channel 221B1 are 40-18-01 and 91-11-54. With this action, this proceeding is terminated.

**EFFECTIVE DATE:** April 17, 1989.

**Broadcast Television and Cable Television Service; Cross-Interest Policy**

**AGENCY:** Federal Communications Commission.

**ACTION:** Policy statement.

**SUMMARY:** Through this decision the Commission reduces the scope and applicability of its cross-interest policy. The cross-interest policy essentially prevents individuals or entities from having "meaningful" relationships in two competing media outlets serving the same area. The meaningful relationships which have been considered by the Commission to be encompassed by this policy include: (1) Consulting positions; (2) joint ventures; (3) time brokerage arrangements; (4) advertising agencies; (5) nonattributable equity interests; and (6) key employee relationships. The cross interest policy was originally developed as a supplement to the Commission's duopoly rule and, in later years, was extended through case-by-case adjudication as a corollary to the Commission's other ownership rules. Like these rules, the cross-interest policy was aimed at ensuring the public's access to a diversity of viewpoints and at preventing undue concentration of economic power in broadcast licensees.

The Commission believes, for a variety of reasons, that the cross-interest policy, as it has applied to consulting positions, time brokerage arrangements and advertising agency relationships, is not longer essential to maximize diversity of viewpoints or to prevent undue concentration of economic power in broadcast markets. First, the substantial growth of media outlets across markets of all sizes has vastly emeliorated diversity concerns. Second, the new attribution provisions in the ownership rules amply define those relationships which create program and economic diversity concerns and those which do not. In many respects, these new rules duplicate, or are more extensive than the cross-interest policy, thereby rendering it superfluous. Third, other legal remedies exist that reduce or deter potential anticompetitive consequences which the cross-interest policy is designed to curb. Finally, our analysis indicates that the cross-interest policy imposes costs and burdens on the public, as well as the Commission, that are especially difficult to justify given the reduced need for the policy. At the same time that the Commission issues this decision reducing the scope of the cross-interest policy, it is also issuing a separate *Further Notice of Inquiry/Notice of Proposed Rulemaking* inviting further comment for a more extensive record before determining whether to eliminate the cross-interest policy as it applies to key employees, certain nonattributable equity interests and joint ventures. Thus, until this proceeding is completed, the cross-interest policy remains in effect as it applies to these relationships.

**EFFECTIVE DATE:** April 6, 1989.

**Policy Statement**

Adopted: October 27, 1988; Released: February 28, 1989.

By the Commission:

*Introduction*

1. On May 14, 1987, we instituted a *Notice of Inquiry* (*Notice*) into the cross-interest policy, which essentially prevents individuals or entities from having "meaningful" cross-interests in two broadcast stations, or a daily newspaper and a broadcast station, or a cable television system and a television broadcast station, serving substantially the same area.[1] As a result of our comprehensive review of the cross-interest policy, we are today issuing this Policy Statement reducing the scope and applicability of that policy. A careful review of the record, our considerable regulatory experience in administering this policy, and our analysis of the public interest costs and benefits, convince us that continued review of many relationships within the cross-interest policy can no longer be justified as a matter of sound policy. Because issues remain with respect to the policy as it applies to key employee relationships, certain nonattributable equity interests and certain joint ventures, we are issuing a *Further Notice of Inquiry/Notice of Proposed Rulemaking* requesting additional comment on those matters.

*Purpose and Scope of Inquiry*

2. In the *Notice* in this proceeding, we sought comment on the possible elimination of the cross-interest policy.[2] Based on our experience in applying the policy and the developments in the communications marketplace, we expressed skepticism that the cross-interest policy, as applied on an *ad hoc* adjudicatory basis, continued to serve the public interest. Our *Notice* solicited comment on whether retention of the cross-interest policy is necessary to prevent anticompetitive abuses from occurring, whether alternative policing mechanisms exist to assure competition, and whether continued regulation of relationships not specifically addressed by the Commission's rules is necessary. More specifically, we requested commenters to discuss the role of market forces, private remedies, and the antitrust laws to deter anticompetitive misconduct and to ensure competitive communications markets. In addition, we asked whether we should amend our attribution rules to include key employees.

3. In the *Notice*, we identified certain relationships to be within the ambit of the cross-interest policy. These relationships involve key employees, consulting positions, advertising agency representative relationships, time brokerage arrangements, sales representative relationships, nonattributable equity interests, and joint ventures. We observed that the concerns relating to certain cross-interest relationships had either been eliminated or specifically addressed by the Commission's rules. In particular, we

[1] *Reexamination of the Commission's Cross-Interest Policy*, 2 FCC Rcd 3699 (1987).

[2] *Id.* at 3702.

VOL 54 ISS 45 MR 9 1989 UMI

noted that sales representative relationships had been stricken from the cross-interest policy because we found the examination of such relationships unnecessary to promote economic competition and that, to the extent that abuses arose, they could be addressed more adequately by remedies other than regulatory intervention. We further noted that certain minority stock interests and positional interests, such as officers and directors, were now encompassed by the local ownership rules and, therefore, the need to address these interests in the context of our existing cross-interest policy was unnecessary. Accordingly, based upon the considerations described above, we proposed to eliminate most of the remainder of the existing policy.

4. We conclude that retention of our policies relating to consulting positions, advertising agency representative relationships and time brokerage arrangements are no longer warranted in the public interest.[3] Before discussing the reasons for this determination, we shall initially describe the different types of cross-interests addressed in this *Policy Statement* which have created regulatory concern under our existing policy, provide an overview of the policy's evolution, and summarize the comments filed in this proceeding. We shall then focus our attention on the reasons which, considered together, persuade us that these parts of our cross-interest policy are no longer essential to promote economic competition or diversity of viewpoint or otherwise necessary to serve the public interest.

*Background*

1. Cross-Interests Proscribed Under Policy

5. The cross-interest policy is designed to address instances in which an individual or entity has a "meaningful" relationship in two competing media outlets serving substantially the same area. The meaningful relationships which the Commission has determined to be encompassed under the policy are set forth below.[4]

6. *Consulting Positions.* The Review Board has applied the cross-interest policy where a consultant who provides advice and/or has what would now be an attributable interest in one media outlet in the market also provides advice to other competing stations in the same market.[5] For example, the policy was applied where a spouse of the sole owner of one radio station was to serve as an accountant/bookkeeper or program director for that station as well as serve in a consulting capacity for competing radio stations in the same market. The Review Board reasoned that the consultant had access to confidential finanical or programming information of competitors and, therefore, had the potential to impair arms-length competition.[6]

7. *Time Brokerage Arrangements.* The cross-interest policy has also been considered in instances where a radio station proposes to enter into a "time brokerage" arrangement to purchase varying amounts of time from a competing station in the same market in order to air programming and sell advertising during those segments. Generally, the Commission has found that such proposals implicate the cross-interest policy because of the potential for diminution of competition arising from owning and programming one station and making programming decisions at an independently-owned station.[7]

8. *Advertising agencies.* The cross-interest policy is also triggered when an individual has ownership interests in both a broadcast station and an advertising agency, and the ad agency purchases advertising time on behalf of its clients on other stations in the same service in the same market as the commonly owned station. In these instances, the Commission reasoned that the ad agency may be in a position to favor the commonly-owned station as against competing stations in the placement of advertising. In the past, hearings were held to determine whether such cross-interests implicated the policy.[8]

2. Development of the Cross-Interest Policy

9. The cross-interest policy has evolved almost entirely through case-by-case adjudication. The cross-interest policy was developed in the 1940's as a supplement to the "duopoly" rule, which then prohibited the common ownership, operation, or control of two stations in the same broadcast service covering substantially the same area.[9] At that time, either actual working control or ownership of fifty percent or more of the stock of the licensee were necessary to meet the "ownership, operation or control" requirement of the "duopoly" rule.[10] This phrase, therefore, did not

[3] As indicated above, our inquiry also included examination of our cross-interest policy as it relates to joint ventures, key employee relationships, and nonattributable equity interests. In order to develop a fuller record, however, we are issuing a separate notice requesting additional comment on these issues.

[4] In addition to determining what constitutes a "meaningful" cross-interest, it is also necessary to ascertain when media outlets serve substantially the same area. Generally, the policy applies to stations or media outlets located in the same community or substantially in the same market. *See, e.g., Farmville Broadcasting Co.*, 47 FCC 2d 663, 664 (1974); *Guy S. Erway*, 80 FCC 2d 750, 752 (Rev. Bd. 1980). The cross-interest policy has not been applied, however, in situations that merely involve a minimal overlap of the 1 mV/m contours of the stations because such stations are not considered to be in the same market. *See, e.g., United Community Enterprises, Inc.*, 37 FCC 2d 953 (Rev. Bd. 1972).

[5] Consultants, as distinguished from key employees, usually involve relationships with the licensee that are limited in duration and scope and generally confined to providing advice, which can either be accepted or rejected by the licensee. In general, consultants are not considered, and hence do not serve, as "employees" of the licensee but rather as independent contractors who are hired for their expertise in one or a number of areas. For example, a consultant may be hired to prepare audience surveys and, based on these surveys, report findings and recommend a course of action. Thus, while consultants may be engaged by licensees to make findings and recommendations regarding aspects of a station's management, operations or direction, they would not have the final say as to whether the recommendations should be implemented. Rather, such matters would usually be undertaken by officers or directors of the licensee.

[6] *See, e.g., Lexington County Broadcasters, Inc.*, 42 FCC 2d 581 (Rev. Bd. 1973); *Guy S. Erway*, 98 FCC 2d at 758.

[7] *WCVL, Inc.*, 66 FCC 2d 879 (1975); *Station WWSM*, 31 FCC 2d 564 (1971).

[8] *Eastern Broadcasting Corp.*, 30 FCC 2d 745 (Rev. Bd. 1971) (specific allegations of fact were sufficient to raise questions as to whether applicant's interest in an advertising agency and proposed broadcast station serving the same area were contrary to the public interest). *Cf. Atlantic Broadcasting Co. (WUST)*, 5 FCC 2d 717 (1966) [cross-interest issue not warranted because of absence of specific allegations of fact that the interest would be contrary to the public interest].

[9] The "duopoly" rule currently prohibits the common ownership, operation, or control of two commercial broadcast stations in the same broadcast service which serve the same local area. It accomplishes this goal by prohibiting the overlap of the 3.16 mV/m contours of commonly-owned FM stations, the 5 mV/m contours of commonly-owned AM stations, or the Grade B contours of commonly-owned television stations. *See* 47 CFR 73.3555(e) (1988). The "duopoly" rule, as well as the one-to-a-market rule (47 CFR 73.3555(b) (1987)), *see infra* note 18, have recently been reexamined in a separate proceeding. *See Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, ___ FCC Rcd ___ (1988) *(First Report and Order* in MM Docket No. 87-7, adopted October 27, 1988) (Radio Duopoly Rule). *Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, ___ FCC Rcd ___ (1988) *(Second Report and Order* in MM Docket No. 87-7, adopted December 12, 1988) (One-to-a-Market-rule).

[10] *Rules Governing Standard and High Frequency Broadcast Stations*, 5 Fed. Reg. 2,382, 2,384 (1940) (FM and Television Duopoly); *Rules Governing Standard and High Frequency Broadcast Stations*, 8 Fed. Reg. 16,065 (1943) (AM Duopoly).

encompass minority stock interests or positional interests such as being an officer, a director or a manager.[11] Thus, situations in which the owner of one station obtained an interest in another station in the same area through a position as an officer, director, manager or minority stockholder were not prohibited by the "duopoly" rule then in effect. Even though these cross-interests were not covered by the "duopoly" rule, they were perceived to create the same kind of anticompetitive concerns addressed by the rule. To address these concerns, the Commission applied a policy which went beyond the scope of the "duopoly" rule by limiting "cross-interests" in more than one broadcast service covering substantially the same area.

10. One of the earliest cases where this new policy was applied involved an entity which had a controlling interest in one television station and a minority stock interest at another television station in the same community.[12] In a similar vein, this policy was invoked by the Commission where principals proposed to be officers or directors of competing stations in the same market.[13] In both instances, the Commission noted that the underlying purpose served was to promote and maintain full competition between stations located in the same city.[14] Further, the Commission indicated that prevention, not correction, of anticompetitive practices was the goal sought. In subsequent decisions, the Commission expanded the purpose underlying the cross-interest policy beyond its original intent by stating that it was designed to restrict not only those relationships having the potential to threaten economic competition but also those having the potential to lessen diversity of viewpoint.[15]

11. In an effort to promote the dual goals of competition and diversity, the cross-interest policy was invoked, in 1969, to prohibit a national or regional sales representative company that was wholly or partially owned by a licensee of a broadcast station from representing and soliciting advertising for competing stations in the same service in the same area.[16] This policy known as the *Golden West* policy, was based upon the concern that such a "sales rep" could impair competition by colluding or price fixing in the sale of advertising time, or placing the station it did not own at a competitive disadvantage. The Commission also expressed concern that this type of relationship was antithetical to the promotion of diversity of viewpoint. In 1981, the Commission instituted a rulemaking proceeding in which it questioned the regulatory wisdom underlying the *Golden West* policy. Finding that limiting these types of relationships did not appear necessary to further the goals of promoting diversity of viewpoint or economic competition, the Commission eliminated the policy.[17] The Commission concluded that the operation of market forces and application of the antitrust laws would be adequate to deter anticompetitive practices that the policy sought to address.

12. Although the cross-interest policy was originally developed as an intra-service supplement to the duopoly rule, it was subsequently extended to the Commission's other local ownership rules,[18] including the broadcast one-to-a-market rule,[19] and the broadcast/newspaper [20] and cable/television cross-ownership rules.[21] Subsequent case-by-case adjudications, under the cross-interest policy, have resulted in creation of additional restraints beyond those expressly prohibited by the local ownership rules.[22]

13. At the time the policy developed, and for much of its history, the attribution rules were narrow, leaving many relationships outside their purview.[23] Under the former rules only the duopoly provisions were in effect. Thus, only the cross-interest policy prevented an owner of one station from holding a position as an officer, director, manager, or minority stockholder in a competitor. In 1953, the attribution rules were revised, as they applied to the national ownership limit, to include all minority interests, partners, and officers and directors.[24] Recently, the attribution rules were further modified to exempt from their scope holders of less than five percent of the voting stock of the licensee and limited partners.[25] In addition, relief from attribution was provided to certain officers and directors whose duties are unrelated to broadcast operations. Thus, under the revised attribution rules, ownership of as little as five percent of the voting stock of a broadcasting station is treated

[12] *See Minnesota Broadcasting Corp.*, 13 FCC 672 (1949). *See also Macon Broadcasting Co.*, 10 FCC 444 (1945), in which the Commission conditioned its grant of a construction permit for a new AM station upon the applicant's two majority shareholders divesting themselves of "any connection" with a competing AM station in the same community.

[13] *Shenandoah Life Insurance Co.*, 19 RR 1 (1959). The cross-interests addressed in both *Minnesota Broadcasting* and *Shenandoah Life Insurance* are now prohibited by our local ownership rules.

[14] *Id.* at 2.

[15] *Compare Minnesota Broadcasting Corp.*, 13 FCC at 672 (singular purpose of economic competition) *with United Community Enterprises, Inc.*, 37 FCC 2d at 953 (dual purpose of economic competition and diversity of viewpoint).

[16] *Golden West Broadcasters*, 16 FCC 2d 918 (1969).

[17] *Golden West Policy*, 87 FCC 2d 668 (1981) (Report and Order in BC Docket No. 80-438).

[18] These rules, described below, including the duopoly rule, will be collectively referred to hereinafter as "the local ownership rules."

[19] *See, e.g., Cleveland Television Corp.*, 91 FCC 2d 1129 (Rev. Bd. 1982), *rev. denied*, FCC 83-235 (released May 18, 1983), *affirmed sub nom. Cleveland Television Corp. v. FCC*, 732 F.2d 962 (D.C. Cir. 1984) (radio-television cross-interest case). Unlike the "duopoly" rule, the "one-to-a-market" rule restricts common ownership between commercial stations in different broadcast services. In essence, it restricts a party to one AM-FM combination or one television station in a market. *See* 47 CFR 73.3555(b) (1988).

[20] The broadcast/newspaper cross-ownership rule prohibits common interests in a broadcast station and a daily newspaper if the broadcast station's relevant service contour would encompass the entire community in which such newspaper is published. *See* 47 CFR 73.3555(c) (1988). *See Wisconsin Television, Ltd.*, 59 RR 2d 193 (1985) (television-newspaper cross-interest case). Although recent appropriations legislation circumscribes Commission authority in the area of newspaper cross-ownership, the legislation is inapplicable to the non-attributable relationships discussed herein. *See Making Appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies for the Fiscal Year Ending September 30, 1989, and for Other Purposes*, Pub. L. No. 100-459 (signed October 1, 1988).

[21] *News International, PLC*, 97 FCC 2d 349, 367-71 (1984) (cross-interests between cable television systems and television stations in same market). The cable/broadcast cross-ownership rule prohibits, *inter alia*, the common ownership of a cable television system and a television broadcast station whose predicted Grade B contour covers any portion of the service area of the cable television system. *See* 47 CFR 76.501(a)(2) (1988). This provision of the cable/broadcast cross-ownership rule was recently codified in the Cable Communications Policy Act of 1984, Pub. L. No. 98-549, 98 Stat. 2779, 2785 (codified at 47 U.S.C. 553(a) (Supp. II 1984)).

[22] For example, even though the multiple ownership rules permit the common ownership of colocated commercial AM and FM stations, the cross-interest policy has been invoked where cross-interests exist between separately controlled AM and FM stations in the same market. *See, e.g., Lexington County Broadcasters, Inc.*, 42 FCC 2d 581 (Rev. Bd. 1973).

[23] The attribution provisions are contained in notes appended to the local ownership rules and, in essence, constitute the means by which the local ownership rules are implemented. Currently, they provide that, *inter alia*, partnership and direct ownership interests of voting stock of five percent or more will be cognizable as ownership interests significant enough to invoke the rule. They also provide that officers and directors of a licensee are positions which entail an amount of control great enough to require prohibition under the rule. 47 CFR 73.3555, Note 2(a) (1988). Exempted from attributable interest are passive investor interests under ten percent, holders of nonvoting stock, limited partners and certain officers and directors who certify that they are not materially involved in the management or operation of the licensee. 47 CFR 73.3555, Note 2(c), (f), (g)(1), and (h) (1988).

[24] *Amendment of the Multiple Ownership Rules*, 18 FCC 288 (1953).

[25] *See* 47 CFR 73.3555, 76.501, Notes 1, 2 (1988).

VOL 54 ISS 45 MR 9 1989 UMI

the same as majority ownership for purposes of applying the local ownership rules. As a result of these intervening revisions, the attribution rules now proscribe many of the interests that originally led to the adoption of the cross-interest policy.[16] For example, interests of officers and directors, and of minority stockholders that were originally prohibited by the cross-interest policy alone now come within the purview of Commission rules. Similarly, where voting ownership interests at or above five percent are involved, the rules, instead of the policy, now apply.

*Summary of Comments*

14. The majority of commenters agree with the initial views expressed in the *Notice* that the cross-interest policy no longer serves the public interest and should be eliminated.[17] Commenters supporting elimination of the policy, including NAB, Group W, Morgan Stanley, and Cox, cite the confusion and uncertainty created by the cross-interest policy as it relates to the multiple ownership rules. They express concern with the *ad hoc* application of the policy that fails to provide the kind of clear guidelines which the rules provide in this area. They maintain that the unpredictable application of the cross-interest policy may require evaluation whether a relationship permitted by the Commission's rules will be transformed into one which is prohibited pursuant to the cross-interest policy. Such a determination is difficult for a licensee to make in light of the varying case law, and any conclusion in this area often lacks certainty, thus impeding efficient decision making. Commenters further assert that the concerns underlying the policy are now addressed by either market forces or alternative rules and remedies. They argue that market pressure creates incentives for licensees to meet the needs and desires of the public rather than enter into relationships which would have a deleterious effect on competition and diversity. Audience reaction aside, commenters maintain that state and federal antitrust actions, as well as remedies based on contracts between parties, will discourage abuses and provide relief should any such abuse occur. Thus, they conclude that the public interest can be protected through means less restrictive and more certain than the cross-interest policy.

15. Specifically, these commenters argue that retention of the policy harms the public interest through delay and, in many instances, discouragement of investment in media properties. They assert that the risk of a cross-interest challenge always exists even if the relationship is structured to comport with Commission rules. They stress that this uncertainty hampers the ability of broadcasters to enter into relationships which may improve existing facilities or provide new facilities.

16. These commenters assert that the policy is no longer necessary to promote competition and viewpoint diversity due to the growth of the marketplace. They maintain that the proliferation of media outlets has attenuated the need for Commission-imposed restraints to ensure against anti-competitive abuses. They assert further that, in the event such abuses do occur, marketplace forces should correct the misconduct without Commission intervention. They argue that the cross-interest policy is an artificial and unnecessary impediment to the functioning of the marketplace which, due to competitive pressure, polices itself. They conclude that practices that are anticompetitive and reduce diversity are simply too difficult to coordinate due to the number of outlets and, therefore, will be ineffective. Further, stations must try to optimize performance in order to retain a share of the market, and that effort could be thwarted by an adverse reaction, from their audience or competitors, to any anticompetitive practices.

17. All commenters who support elimination of the cross-interest policy also argue that the local ownership rules, particularly the attribution provisions, include the majority of relationships sought to be addressed by the cross-interest policy. They point out that the local ownership rules and the attribution provisions are the product of extensive rulemaking proceedings designed to determine which interests create a level of concern sufficient to require proscription. They maintain that relationships falling outside of the rules are of minimal significance and have, therefore, been deemed nonattributable. They further assert that the cross-interest policy undercuts the purpose of these rulemakings by creating uncertainty where the rules strive for clarity. Commenters, therefore, conclude that the local ownership rules and the attribution provisions should stand as the Commission's determination of what relationships are inconsistent with the public interest. To the extent that the multiple ownership rules do not address all relationships contemplated by the policy, commenters reiterate their contention that alternative policing mechanisms exist in the marketplace which would discourage anticompetitive misconduct before it occurs, or provide a remedy in the event such abuse arises.

18. In opposing elimination of the cross-interest policy, CFA/TRAC argue that while streamlining the policy is desirable, elimination is unwarranted. They point to what they characterize as an overwhelming desire of the Commission to eliminate all multiple ownership rules as demonstrated by a recent rule making proceeding inquiring into the duopoly and one-to-a-market rules.[18] These commenters specifically take issue with the Commission's assertion, in the *Notice*, that revisions of the attribution rules have abrogated the need for the cross-interest policy in many instances. They argue that, in light of the duopoly rulemaking proceeding, it is disingenuous for the Commission to rely on the local ownership rules and the attribution provisions as support for eliminating the cross-interest policy. CFA/TRAC points out that the Commission has previously predicated repeal of one policy on the existence of another even as the latter faces repeal, and is following a similar course in the instant proceeding. They assert that repeal of the one-to-a-market rule [19] has already been accomplished through a liberal policy of granting stays of outstanding divestiture obligations. Thus, in conjunction with the Commission's lack of commitment to the ownership rules, repeal of the cross-interest policy will leave unchecked relationships which will lead to an increase in predatory practices resulting in a diminution of competition and a reduction in program options. They conclude that retention of the policy in a clarified form is, therefore, required to promote the public interest.

19. Similarly, in reply comments, ABI maintains that the NAB relies too heavily on the attribution provisions as support for elimination of the cross-interest policy. ABI argues that the policy is designed to supplement the attribution provisions and provide the Commission with the means by which to promote, independent of other government agencies, arms-length competition. It further asserts that the NAB points to no instance in which the antitrust laws have addressed competitive abuses of the type encompassed by the cross-interest policy, thus failing to demonstrate that reliance on antitrust laws to cope with cross-interest concerns is either an effective deterrent or remedy. Arguing that the cross-interest policy is necessary to promote arms-length competition, ABI concludes that the Commission's rules, without more, are inadequate to protect against certain anticompetitive practices. ABI contends that where specific rules are applicable the cross-interest policy should not apply, but where there are gaps in the rules the cross-interest policy is required to stem abuses. ABI concludes that the policy should, therefore, be clarified and retained for use only on an "as needed" basis.

*Discussion*

20. Although, as indicated, there are aspects of this policy with respect to which further comment is being sought, the analysis that follows provides not only the justification for the changes we are adopting but establishes a background against which the remainder of the policy should eventually be judged. After a careful review of the record in this proceeding, we find that the public interest would be better served by reducing the scope of the cross-interest policy.[20] While this policy may have been at one time regarded as necessary to preserve competition and diversity of viewpoint, a number of different factors, including changes in the mass media marketplace, modifications of the attribution rules, and the adequacy of other legal remedies, convince us that a substantial part of this policy is not essential to maximize diversification of viewpoints to the public or to prevent undue concentration of economic power. Similarly, we are further convinced that, with respect to the interests addressed herein, the costs associated with continued case-by-case review outweigh the minimal public interest benefits that might be derived therefrom. As we explain below, we are confident that the public's access to a multiplicity of programs, information, and viewpoints will not be adversely affected as a result of our removal of these unnecessarily restrictive aspects of the policy. We are also equally confident that economic competition in mass media markets will not materially diminish, but, on the contrary, will continue to flourish to the overall benefit of the public.

Growth of Media Outlets

21. Since the implementation of the cross-interest policy, there has been rapid and widespread growth in mass media outlets. This growth has led to a significant increase in diversity nationwide and, of even more relevance to the instant proceeding, locally. While we do not rely upon these changes alone to reach the determinations herein, we do believe that, together with the other factors presented below, they undercut the notion that any single entity or individual is capable of manipulating or otherwise skewing competition in the marketplace of ideas or in the economic marketplace to the detriment of the public through the cross-interests mentioned above.

22. *National Growth.* To the extent that the logic behind the cross-interest policy was appropriate when first developed, the substantial growth in broadcast services across all markets, and the resulting increase in competition and diversity have reduced our concerns about the relationships addressed by the policy. For example, between 1950 and 1988, the total number of AM, FM, and TV broadcast stations authorized increased from 3,144 to 12,207 outlets, an increase of 288.3%.[21] Moreover, continued growth in the broadcast services can be expected as a result of recent Commission actions designed to foster growth of the industry.[22] In addition, there has been substantial expansion of alternate media services such as cable television, low power television (LPTV), and video cassette recorders (VCRs).[23] The potential for even further growth of media outlets exists from other developing technologies, including multipoint distribution systems (MDS) and satellite master antenna television systems (SMATVs).[24]

23. *Local Growth.* This growth of media outlets on a national level is paralleled by the growth of such outlets on the local level. In analyzing the need for the cross-interest policies, the number of outlets at the local level is more relevant than national growth because the policy was developed as a supplement to the local ownership rules. With this in mind, we note that a study submitted by the NAB [25] assessed the number of media outlets, including publications, within all television markets (Designated Market Areas). The study shows that there are a large number of media outlets and information sources in local markets of all sizes. For example, whereas the top 25 markets average about 72 radio and television stations per market, even the smallest television markets average

[17] Comments supporting elimination of the cross-interest policy were filed by the National Association of Broadcasters (NAB), Westinghouse Broadcasting, Inc. (Group W), Morgan Stanley & Co., Inc. (Morgan Stanley), and Cox Enterprises, Inc. (Cox). London Bridge Broadcasting, Inc. (London Bridge) filed comments which generally support elimination of the cross-interest policy except as it applies to key employee positions. Comments opposing elimination of the policy were filed jointly by the Consumer Federation of America and Telecommunications Research and Action Center (CFA/TRAC). Amherst Broadcasting, Inc. (ABI), in a reply to the comments of NAB, opposed elimination of the policy. To the extent these comments and reply comments address the subject of cross-interests involving key employees nonattributable equity interests or joint ventures, they will be incorporated by reference in the record of the new proceeding instituted today.

[18] *Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, 2 FCC Rcd 1138 (1987) (*Notice of Proposed Rulemaking* in MM Docket No. 87-7).

[19] 47 CFR 73.3555(b) (1988).

[20] As stated earlier, exempted from this policy statement shall be cross-interests involving certain joint ventures not otherwise addressed by the attribution rules, key employees, and certain nonattributable equity interests. Subject to the outcome of our *Further Notice of Inquiry/Notice of Proposed Rulemaking*, these cross-interests will continue to be subject to review.

[21] In 1950 there were 2,302 AM, 732 FM, and 109 television stations. *Sixteenth Annual Report of the Federal Communications Commission—FY 1950*, at 102. The 1988 station totals are based on Commission records as of October 31, 1988, which indicate that there are 4,823 AM, 4,930 FM, and 1,791 television stations.

[22] *See Modification of FM Broadcast Station Rules to Increase the Availability of Commercial FM Broadcast Assignments*, 94 FCC 2d 152 (1983) (*Report and Order* in BC Docket No. 80-90), *recon. denied*, 97 FCC 2d 279 (1984); *see also FM Broadcast Assignments*, 100 FCC 2d 1332, 1340-1379 (1985) (implementation of BC Docket No. 80-90) (the Commission established 889 new commercial FM allotments, the majority of which are in medium and small radio markets, and created three new classes of FM channels); *Preparation for an International Telecommunication Union Region 2 Administrative Radio Conference for the Planning of Broadcasting in the 1605-1705 kHz Band*, 51 FR 8,706 (1986) (Second Report in Gen. Docket No. 84-467) (international agreement provides for more spectrum use by AM radio service, potentially stimulating a significant number of new AM stations in the future).

[23] The number of cable television systems has increased from 300 in 1954 to about 8,000 in 1987. *See Twentieth Annual Report of the Federal Communications Commission—FY 1954*, at 90. Of all television households, 79% are passed by cable television systems. "Cable Stats," *Cable Vision*, Aug 31, 1987, at 88. Approximately 49.5% of all television households subscribe to cable. Nielsen Media Research estimate, quoted in "July Numbers," *Broadcasting*, Sept 21, 1987, at 78. Currently, there are about 410 licensed LPTV stations, and we estimate that this service may ultimately increase by an additional 4,000 stations. *Report Concerning General Fairness Doctrine Obligations of Broadcast Licensees*, 102 FCC 2d 143, 212 (1985). The percentage of television households with VCRs has increased from 19% in 1984 to 48.7% in 1987. See A.C. Nielsen estimate, quoted in Comments of NAB, "An Analysis of Media Outlets by Market" ("NAB Media Outlet Study"), Appendix B at 1 (June 1987), filed in MM Docket 87-7, which NAB incorporates by reference in comments filed in the current proceeding. *See* Comments of NAB at 8 n. 16 (July 1987) (MM Docket No. 87-154).

[24] As of June 30, 1986, MDS systems reached approximately 280,880 subscribers and estimates suggest the number of subscribers could reach more than nine million. Paul Kagan Associates, Inc., *Multicast Newsletter*, No. 322, November 10, 1986.

[25] NAB Media Outlet Study, *supra* note 23.

VOL 54 ISS 45 MR 9 1989 UMI

about 9 radio and television outlets per market.[36] In addition, our own analysis of Arbitron data by Metropolitan Statistical Area, the geographic market measure that may be more appropriate for radio reception, shows that while the top 25 radio markets average approximately 35 total AM and FM stations, even the smallest radio markets average approximately 10 commercial AM and FM stations. As these figures demonstrate, there are a significant number of commercial broadcast outlets throughout markets of all sizes. Further, if cable and VCRs are taken into account, listeners and viewers have even more sources of programs. Cable penetration actually increases as the size of television markets decreases,[37] and VCR penetration appears to be relatively constant across market sizes.[38] This multitude of media sources provides audiences with a wide diversity of choices, and also encourages broadcasters to provide service in the public interest.

24. We believe the competitive and diverse market which has developed since the initial implementation of the cross-interest policy substantially attenuates the need for our regulatory oversight of the interests at issue here to promote diversity and economic competition. As suggested by Cox, market conditions have reduced diversity concerns because stations are under strong market pressure to maximize performance and typically do so through providing service desired by the public.[39] With many competing media outlets available to the public, consumers can easily switch from one station to another if the first station's programs do not suit their tastes. Hence, stations have strong incentives to take into account the tastes and needs of viewers or listeners. Moreover, we recognized, in a previous proceeding eliminating regulations which encroached on licensee's business practices, that the increased number of stations and the increase in facilities give new importance to the uniqueness of a program format in an effort to attract advertising dollars.[40] This plethora of media services, and the resulting increase in the diversity of voices, therefore, strongly undercuts, in our view, any underlying need for restraints on consulting agreements.

advertising agencies, and time brokerage arrangements to enhance diversity.

25. Moreover, the considerable choice which exists in the marketplace creates incentives for service providers to compete as vigorously as possible. Because of the many competing stations, they are more likely to be acutely aware of their audience's desires, and to attempt to meet those desires in order to compete successfully. For example, it is doubtful that consulting agreements would continue to be a legitimate concern, since the station entering into such an agreement must continue to remain responsive to the needs and interests of its audience or risk losing a portion of that audience. Thus, a station would likely disregard advice from a consultant which would only serve to protect the consultant's cross-interest and would not improve the outlet's competitive stance. If a station is unresponsive to its audience, its ratings will drop, and the resultant decrease in earnings will influence the station as much as, if not more than, Commission policy. Accordingly, we believe that the remarkable growth in the broadcast market, and the mass media marketplace generally, are important factors which suggest that continued review of interests such as these is not needed to achieve its original and primary goal of preserving diversity and competition among media voices in a given market.

Costs/Burdens Imposed By Operation Of The Cross-Interest Policy

26. We have also evaluated the costs and burdens imposed on the public by continuing to scrutinize consulting arrangements, advertising agency arrangements, and time brokerage agreements. We conclude that these aspects of the cross-interest policy impose costs and burdens on the public, as well as the Commission, which are difficult to justify given the reduced need for continued oversight of these relationships. As discussed below, these costs vary in character, but are alike in that they are not counterbalanced by any significant concomitant public interest benefits.

27. *The Policy Creates Uncertainty in Broadcasters and Other Media Entrepreneurs.* First, the *ad hoc* development of the policy has had the unintended effect of surrounding certain media transactions with a cloud of uncertainty. In the line of cases from which the policy has evolved the Commission has tried to determine whether particular relationships are "meaningful" and whether the media outlets at issue serve "substantially" the same area. Inconsistencies among these cases render difficult, if not impossible, a definitive determination by broadcasters, in advance of adjudication, as to whether an overlap in service areas is substantial enough or a relationship sufficiently meaningful to warrant regulatory intervention. For example, it is unclear, from an examination of the case law, how the cross-interest policy would be applied to time brokerage arrangements. In one case, the Commission permitted this type of relationship relying, in part, on the large number of radio stations in the market.[41] The Commission indicated that the small percentage of local stations programmed by the same licensee reduced concern that the time brokerage relationship would have a negative effect on the pubic interest. In another decision, the Commission found no violation of the cross-interest policy even though the time brokerage agreement resulted in one licensee programming the only two nighttime radio stations operating in the area during the brokered time period.[42]

28. As commenters assert, the inconsistency in the case law complicates the business planning of inherently complex media transactions. In spite of bona fide efforts to avoid any actual control in another media entity through the use of relationships which are clearly permitted by our cross-ownership rules, broadcasters may unintentionally run afoul of our policy.[43] Further, the fact that the cross-interest policy addresses potential rather than actual harm, together with the absence of a requirement that specific allegations of fact be demonstrated,[44] leave broadcasters particularly vulnerable to cross-interest challenges by competitors, even if groundless. It is, therefore, possible that parties might decide not to enter into a particular relationship merely because of the absence of clear-cut guidelines about whether the relationship would pass muster under the cross-interest policy.[45] In fact, Morgan Stanley asserts that there are numerous situations in which unobjectionable relationships will not be undertaken due to uncertainty regarding potential effects of the policy. In short, the policy places burdens on outside sources and on the Commission's resources which must be

[41] *Dual-Language TV/FM Programming in Puerto Rico*, 33 RR 2d 515 (1975).
[42] *Station WWSM*, 31 FCC 2d 564 (1971).
[43] *See* Comments of Morgan Stanley at 5–11.
[44] *Cleveland Television Corp.*, 732 F.2d at 970.
[45] *See* Comments of Morgan Stanley at 11–12.

borne by the public. Even if it is quite likely that the relationship would be approved, the affected parties have no way of reliably predicting that result in advance.[46] Past cases construing the policy afford some general guidance, but do not approach the specificity required for parties to determine, in advance, the propriety of the anticipated relationship. Thus, relationships which might benefit licensees and the public often may be avoided or aborted because of the policy's lack of clarity.[47]

29. *Limitations on Use of Qualified Personnel.* A second burden imposed by the cross-interest policy is that it hinders the ability of media outlets to attract and utilize, in consulting positions, qualified personnel with substantial broadcast experience. Barring contract provisions to the contrary, the absence of the cross-interest policy would permit experts to work at, or have interests in, multiple outlets. This would allow a station to attract and utilize personnel who are cognizant of the requirements of station management and the programming needs and unique characteristics of the particular market. In turn, this may enable a station to increase revenues or decrease costs. The increased profits obtained from such efficiencies could then be recycled into improved programming or facilities, providing more resources to stations suffering from declining revenues and ratings. As a result, a previously unpopular format or station, rather than succumbing to competition, may experience new life and viability in the market through the expertise of a consultant. Thus, the use of qualified personnel, now potentially barred by our cross-interest policy, may "rescue" the station, avoiding a diminution in local diversity and competition.

30. Some would argue that allowing the same person to be employed by two outlets will only contribute to a diminution of diversity and competition. To the contrary, permitting common ownership of media outlets, in certain circumstances, does not detract from diversity of viewpoint but may, in fact, enhance diversity and competition, providing benefits which inure to the public interest.[48] Given the trend towards counterprogramming and narrowcasting, it is reasonable to assume that this same result may occur by permitting broadcast stations to attract and utilize all qualified personnel. Consultants and similar professionals have a clear business incentive to provide advice and assistance that address the individual needs of their clients. Viewed in that light, a consultant will counsel each client station according to its particular situation. For this reason, a consultant serving different broadcasters in the same market might well give each client different advice regarding the type of programming that will effectively maximize its audience. The consultant might recommend, for example, a "top-forty" format to one radio station while advising another competing outlet to use an all news format, thereby stimulating diversity in the market. Furthermore, as a general proposition, freed of the cross-interest policy, broadcasters will have more flexibility to enter into relationships which may strengthen their viability and thus preserve existing levels of diversity of viewpoint and competition. We, therefore, believe it is in the public interest to permit the use of qualified personnel between competing media outlets.

31. *Imposition of Administrative Costs.* A third burden imposed by the continued application of the cross-interest policy results in administrative costs placed upon affected parties as well as the Commission. Such costs could be justified, but only if the review process involved was likely to lead to discovery of significant public interest concerns not otherwise remediable. Where a potential cross-interest issue is raised, the Commission must review the facts and allegations and determine if a *prima facie* case has been presented under the policy. Where the facts of a case are such that a cross-interest issue is designated for hearing, this process can be even longer and more complex. Often, an individual must go through administrative review in order to show that his proposed relationship does not violate the cross-interest policy.[49] This process is often time consuming and costly to the participants and the Commission. As we recognized in a prior proceeding, even one investigation culminating in a hearing significantly increases the resources required to administer our policies.[50] Further, in addition to the costs of investigation and enforcement, countless staff hours may be spent responding to inquiries relating to the applicability and interpretation of the policy.[51] In view of the lack of benefits involved in continued retention of the policy to address consultancies, advertising agency relationships and time brokerage agreements, the costs of applying the policy to these relationships are unjustifiably high. Given the questionable value of continued oversight of these relationships in the current competitive market, these cost may be reduced, and the public better served, by reliance on methods other than the policy to protect the public interest.

Adequacy of Existing Regulatory Prohibitions

32. We also believe that the need for the existing cross-interest policy has decreased with the adoption of new attribution provisions in the ownership rules that have superceded the cross-interest policy in several respects. Originally, the cross-interest policy was developed to fill the interstices left by the early ownership rules. Since then, we have amended the ownership rules[52] and adopted new attribution provisions[53] to encompass a greater number of relationships that previously were addressed only by the cross-interest policy. At the time the Commission adopted the new attribution rules, we stated that the duopoly and one-to-a-market rules would be applied, in lieu of the policy, "where voting ownership interests at or above the relevant benchmarks [five

[46] For example, although the Commission intended to apply the cross-interest policy to ownership interests in newspapers, *see Multiple Ownership*, 50 FCC 2d 1046, 1079–77 (1975), the Commission declined to do so when it approved a transfer which resulted in a nonattributable stock interest in the licensee of a television station being held by the owner of a daily newspaper which served the same market. *Evening Star Broadcasting Co.*, 66 FCC 2d 129 (1978). Although the Commission discussed the impact on competition in that case, the cross-interest policy was not invoked to ban the transaction.

[47] We recognize that vagueness is not fatal to the cross-interest policy. However, even if the policy were clarified in an effort to cure this uncertainty, our decision to delete the policy, for the reasons stated herein, would not be altered.

[48] *Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules.* ——— *FCC Record* ——— *(1988) (Second Report and Order* in MM Docket No. 87–7, adopted December 12, 1988) ¶¶ 51–64. *See also* P. Steiner, *Program Patterns and Preferences, and the Workability of Competition in Radio Broadcasting*, 66 Quarterly J. Economics 194; FCC Network Inquiry Special Staff, *New Television Networks: Entry, Jurisdiction, Ownership, and Regulation*, Volume I, at 365–66.

[49] *See, e.g., Metromedia Broadcasting Corporation*, 1 FCC Rcd 1622 (1986); *Wisconsin Television, Ltd.*, 102 FCC 2d at 1001.

[50] *Elimination of Unnecessary Broadcast Regulation*, 59 RR 2d at 1509.

[51] ABI argues that these administrative burdens can be minimized by applying the policy only on an "as needed" basis where it is necessary to ensure free competition. This approach, however, would in no way preclude the need for case-by-case adjudication and might further complicate the process by requiring the Commission to make findings or establish guidelines as to when the policy should be invoked.

[52] *Amendment of the Multiple Ownership Rules*, 18 FCC 288 (1958).

[53] *See Attribution of Ownership Interests*, 97 FCC 2d at 1032–33.

VOL 54 ISS 45 MR 9 1989 UMI

percent stock ownership or officers or directors) are involved."[64] Thus, for example, cross directorships and substantial minority interests, which, until amendment of the ownership rules only fell within the purview of the policy, are now expressly covered by these rules.

33. In developing the local ownership rules, in the 1940s, and modifying the scope of our attribution provisions in the 1980s, the Commission identified those relationships which were of genuine concern because of their potential for abuse. We concluded that ownership of five percent or more of a station's stock or a position as an officer or director of a licensee were situations which would be deemed attributable for purposes of the multiple ownership rule.[65] Conversely, nonvoting stockholders and limited partners, we decided, do not take part in control and, therefore, would not be considered attributable for the purposes of the ownership rules.[66] These actions reflected our informed policy judgment on the types of relationships which would detrimentally affect diversity and competition and should, therefore, be restricted in order to promote the public interest.[67] As for CFA/TRAC's argument that our reliance on the multiple ownership rules is misplaced because we are proposing to repeal those rules,[68] we think it is sufficient to note that our recent decisions only modestly revised the duopoly and one-to-a-market rules.[69]

34. Further reducing our concern with respect to the need for the existing cross-interest policy are remedies in the form of federal and state antitrust laws, which may be available to reduce or deter potential anticompetitive consequences which the cross-interest policy is designed to curb. Antitrust analysis will take into account the market sizes and the number of competitors when determining if a violation has occurred. The potential for anti-competitive consequences perceived to be present in such relationship as consulting agreements, time brokerage arrangements, and relationships involving advertising agencies is reduced by the presence of these laws. The existence of such laws and remedies has supported modification or elimination of other rules and policies.[70] To the extent that they reduce anticompetitive effects, these remedies may also have an ancillary effect which, in conjunction with the substantial market growth, discussed *supra* paras. 21–25, reduces our concern over diversity. We believe that reliance on such alternative forms of deterrence will more effectively serve the public interest and preclude the need for a stringent policy to insure against anticompetitive consequences.[71]

35. Also, contractual arrangements into which the parties enter may provide further protection from anticompetitive activity. For example, the improper use of consultants or advertising agencies could conceivably give rise to a cause of action for breach of contract. Alternatively, such actions might give rise to a breach of a fiduciary duty imposed by either the contracting party or by the entity with which the cross-interest relationship exists. Further, a station that wishes to hire a consultant may insert into the terms of the contract a provision to require that any confidential business information obtained during the consultancy period not be disclosed to a rival station for which the consultant also worked.[72] Similarly, contracts can protect stations in situations in which an advertising agency with a cross-interest in one station in a market contracts to purchase time on competing stations. As part of the contractual relationship, a client may require the agency to spread advertising among competing stations in order to reach a larger audience or a broader demographic base. Thus, if the agency favors the station with which it shares a common interest by directing advertisers exclusively to that station, an action for breach of contract may lie. Notwithstanding the legal remedies available, the harm to the reputation of one who breaches these types of contractual requirements acts as a strong incentive to conduct themselves in a forthright manner. The existence of these alternative prohibitions further reduces our concern that permitting cross-interest relationships will result in harm to the public interest.

Summary

36. *Consulting Positions and Advertising Agencies.* The vast changes in the media marketplace reduce our concern that these interests will result in harm to the public interest. Current market conditions require consultants and advertising agencies to represent clients vigorously in order to remain competitive. Thus, it would not avail representatives to favor one client over any other. Our concern with the possible anticompetitive effects of these interests is further attenuated by the availability of alternative methods to prevent and remedy abuses. Specifically, contract provisions can create enhanced duties of care, confidentiality requirements, or affirmative obligations in the method of conducting business. These agreements can protect the rights of the parties as well as deter anticompetitive conduct. In the event of abuse, less speculative remedies are available in the form of federal and state antitrust laws or, if the relationship is contractual, an action for breach. These alternatives serve both deterrent and remedial purposes and will address actual abuses, should they occur, rather than circumscribe potentially beneficial relationships in an effort to prevent speculative abuses.

37. *Time Brokerage Arrangements.* The substantial increase in media outlets, and the corresponding increase in diversity and competition, since the implementation of the cross-interest policy, reduces the need to prohibit time brokerage arrangements to protect the public interest. Competitive conditions require a station that decides to broker its time to another to remain alert to the needs of its audience or risk losing some of that audience to a competitor, with a resultant decrease in ratings and revenue. Thus, the amount of choice available to listeners and viewers insures that competition will be vigorous in order for a station to retain its share of the audience. Should an anticompetitive arrangement occur, the antitrust laws are equally applicable to remedy this situation as they are to remedy abuse of relationships involving consulting positions and advertising agencies. Moreover, since a licensee entering into a time brokerage arrangement must continue to maintain control over its programming, the fact that some of its programming may be provided by another station in the market does not raise the same viewpoint diversity questions that may be raised if stations in the market were under common ownership or shared key employees.

38. Our decision to narrow the scope of the cross-interest policy is further based on the fact that revisions to the attribution rules now directly address a number of interests previously limited only by the policy. Moreover, our action here will reduce the number of *ad hoc* determinations required, thus making it easier for broadcasters and others to determine when a relationship will be circumscribed. This will, in turn, reduce the chilling effect on potentially beneficial relationships because of the lack of specificity on which to base a determination whether the relationship will ultimately be permitted.

39. In our view, wherever feasible it is more efficient and effective to confront whatever cross-interest problems arise by applying the various remedies (*e.g.*, breach of contract and federal and state antitrust provisions) which are designed to discourage activities that may be inimical to the welfare of the public. Our present policy ignores the fact that every cross-interest covered by the policy is not certain to harm the public; in fact, we conclude that some might be beneficial. We will thus allow parties affected by particular cross-interests and, as to antitrust issues, the Justice Department and the Federal Trade Commission, to identify and take appropriate action as those cross-interests emerge.

40. The decision contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980, and found to impose a new or modified information collection requirement on the public. Implementation of any new or modified requirement will be subject to approval of the Office of Management and Budget as prescribed by the Act.

41. Accordingly, *it is ordered*, That the cross-interest policy, except as applied to joint ventures, key employee relationships, and nonattributable equity interests as discussed herein, *is eliminated* effective *April 6, 1989.*

42. Authority for the policy decisions herein is contained in sections 4(i) and 303 of the Communications Act of 1934, as amended.

43. For further information on this proceeding contact Douglas Minster, Mass Media Bureau, (202) 632–7792.

[FR Doc. 89–5494 Filed 3–8–89; 8:45 am]

BILLING CODE 6712–01–M

---

[64] *Id.* at 999 n.4 (parenthetical statement added).

[65] *Id.* at 1025.

[66] *Id.* at 1020, 1022.

[67] At the time of modifying the attribution provisions, we stated that "[t]he attribution rules . . . are designed to measure what ownership interests will confer that amount of influence or control which must be limited." The scope of that proceeding, however, did not encompass the cross-interest policy, which addresses business relationships of broadcasters that do not rise to the level of attributable interests. Therefore, we did not revisit in that rulemaking whether the relationships covered by the cross-interest policy continued to confer sufficient influence or control to warrant limitations comparable to those governing attributable interests. Although we stated that the attribution rulemaking proceeding was not intended to affect the cross-interest policy and that the policy would continue to be applied except where, as a practical matter, it overlapped with specific provisions of the new attribution rules, *see id.* at 1000 n.4, it was not our intent to foreclose reexamination of the continued validity and effectiveness of the cross-interest policy. We note that any relationship covered by the cross-interest policy that is deemed to pose a serious threat to viewpoint diversity or competition, should be treated, if possible, as an attributable interest under the local ownership rules rather than subjecting it to *ad hoc* review as is our current practice. As noted previously, we are inviting further comment with respect to the appropriate regulatory treatment of key employees and certain joint ventures and nonattributable equity interests in a separate proceeding. With respect to nonattributable equity interests and joint ventures, however, if we decide in our separate proceeding that they require continued oversight, it may not be possible to incorporate them in the ownership rules. The multiplicity of possible relationships makes it difficult to forecast definitively all the relationships which threaten diversity or competition. Thus, should we decide at the conclusion of our separate proceeding that these interests continue to warrant Commission scrutiny, our current *ad hoc* review may be necessary for such interests. We would nonetheless like to develop, if possible, any guidelines that might identify, at least in general terms, those nonattributable equity and other interests that require continued oversight to minimize uncertainty caused by continued case-by-case review.

[68] *See Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, 2 FCC Rcd 1138 (1988) (*Notice of Proposed Rulemaking* in MM Docket No. 87–7).

[69] *See Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, ——— FCC Rcd ——— (1988) (*First Report and Order* in MM Docket No. 87–7, adopted October 27, 1988) (Radio Duopoly Rule); *Amendment of § 73.3555 of the Commission's Rules, the Broadcast Multiple Ownership Rules*, ——— FCC Rcd ——— (1988) (*Second Report and Order* in MM Docket No. 87–7, adopted December 12, 1988) (One-to-a-Market Rule). These decisions were adopted concurrent with, or shortly after, the Commission adopted the instant *Policy Statement*, but prior to its release.

[70] *See, e.g., Elimination of Unnecessary Broadcast Regulation*, 59 RR 2d at 1500; *Golden West Policy*, 87 FCC 2d at 866.

[71] The fact that broadcasters are subject to Federal licensing and regulation, of course, does not immunize them from antitrust oversight. In this regard, we note that, in addition to possible governmental enforcement actions in this area, the private parties injured by Federal antitrust law violations are entitled to bring a private action for treble damages against the defendant. Clayton Act, ch 323, Section 4, 38 Stat. 731 (1914) (15 U.S.C. 15 (1982)).

[72] In fact, it is within the discretion of the licensee, prior to retaining a consultant, to require disclosure of the consultant's other media interests, permitting the licensee to make an informed judgment regarding possible conflicts of interest.

---

## 47 CFR Part 80

**[PR Docket No. 87–491, FCC 89–48]**

## Amendment of the Maritime Services Rules Concerning the Use of Digital Selective Calling (DSC) Equipment

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rules.

**SUMMARY:** These amended rules provide for modified DSC equipment characteristics and for the use of a shipboard sensor-activated VHF alarm system for moored vessels using DSC technology. New international DSC equipment standards and the capability of VHF DSC equipment to accommodate a safety alarm system have created a need for this action. The amended rules will better serve the communications interests of the maritime community and tend to encourage early implementation of the DSC system.

**EFFECTIVE DATE:** April 14, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Robert E. Mickley, Federal Communications Commission, Private Radio Bureau, Washington, DC 20554, (202) 632–7175.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Report and Order* in PR Docket No. 87–491 adopted February 10, 1989 and released February 28, 1989. The full text of the Commission's decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

### Summary of Report and Order

1. Digital selective calling (DSC) is a signalling system that can be used to establish contact with a station or group of stations in the maritime radio services. DSC provides an improvement over the old method of establishing radio contact which required a ship operator to (1) be on duty, and (2) be monitoring for a call. The DSC system, therefore, promotes additional safety and more efficient use of the spectrum. DSC will eventually be an integral part of the Global Maritime Distress and Safety System (GMDSS) planned for implementation in the 1990's.

2. In 1985 the Commission amended its maritime services rules to provide for the optional use of DSC equipment. These rules were based on the then effective International Radio Consultative Committee (CCIR) Recommendation 493–2 which was developed primarily for large, ocean-going ships. In 1986 CCIR revised its recommendation in a document entitled "Digital Selective Calling System for Use in the Maritime Mobile Service" (CCIR Recommendation 493, Dubrovnik, 1986). This Recommendation provided for three levels of DSC equipment. The first level would be used by compulsorily fitted vessels that are required to have a sophisticated radio installation for safety purposes. Two simpler versions of DSC equipment specifications were also developed to fill the needs of the smaller vessel operators.

3. The rules were amended to remove the minimum operational characteristics

VOL 54 ISS 45 MR 9 1989 UMI

from our current rules to permit all classes of DSC equipment to be used on U.S. vessels in conformance with CCIR Recommendation 493, Dubrovnik, 1988. The three classes of DSC equipment contained in the revised CCIR Recommendation are:

- Class A—DSC equipment intended for large, ocean-going ships to meet the GMDSS carriage requirements.
- Class B—DSC equipment applicable to small ships equipped only with VHF and/or MF two-way communications equipment.
- Class C—DSC equipment intended as an add-on for VHF communications equipment to provide DSC alerting, transmitting ship identification only.

4. The rules authorize the use of shipboard sensor-activated VHF alarm systems using DSC technology to transmit brief digital messages that relate to the condition or safety of vessels while moored. Such systems utilize sensors capable of detecting fire, explosion, grounding, listing, sinking and the like. In the past, the use of marine frequencies for safety purposes on board unoccupied ships has been barred because of rule provisions that prohibit unattended transmitter operations and the lack of a frequency that could be dedicated to this purpose. However, Article 60 of the International Radio Regulations authorizes the use of marine frequencies in the port operations service for communications related to the safety of ships. Channel 70 (156.525 MHz) is already dedicated to VHF DSC and the rules are amended to use it for this purpose. The transmission of a VHF DSC message would take approximately 0.5 second and if a call is not acknowleged by the addressed coast station, the call sequence from the ship station is to be repeated after five seconds. Any subsequent repetitions of the call sequence cannot be made until at least fifteen minutes have elapsed and the number of repetitions of sensor-activated DSC transmissions are limited to no more than three after the fifteen minute waiting period.

**Ordering Clauses**

5. The Commission hereby certifies pursuant to section 605(b) of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) that this rulemaking proceeding will not have a significant economic impact on a substantial number of small entities. The new rules replace the minimum operational characteristics contained in our current Rules.

No U.S. manufacturer is known to be manufacturing DSC equipment under the rules proposed to be deleted in this proceeding. No new equipment carriage requirements are imposed.

6. The Rule amendments adopted herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease the burden hours imposed on the public. See 5 CFR 1320.7(c)(2).

7. *It Is Ordered* that Part 80 of our Rules *is amended* as shown at the end of this document. The authority for this action is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r).

8. *It Is Further Ordered* that these rule amendments shall become effective April 14, 1989.

9. *It Is Further Ordered* that a copy of this Report and Order shall be sent to the Chief Counsel for Advocacy of the Small Business Administration.

10. *It Is Further Ordered* that this proceeding *is Terminated*.

**List of Subjects in 47 CFR Part 80**

Coast stations, Ship stations, Marine safety, Radio communications equipment.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

**Amended Rules**

Part 80 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

## PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for Part 80 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–158, 301–609; 3 UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

2. Section 80.153 is amended by revising paragraph (a) to read as follows:

**§ 80.153 Coast station operator requirements.**

(a) Except as provided in § 80.179, operation of a coast station transmitter must be performed by a person holding a commercial radio operator license of the required class, who is on duty at the control point of the station. The operator is responsible for the proper operation of the station.

* * * * *

3. Section 80.155 is revised to read as follows:

**§ 80.155 Ship station operator requirements.**

Except as provided in §§ 80.177 and 80.179, operation of transmitters of any ship station must be performed by a person holding a commercial radio operator license or permit of the class required below. The operator is responsible for the proper operation of the station.

4. A new § 80.179 is added to read as follows:

**§ 80.179 Unattended operation.**

The following unattended transmitter operations are authorized:

(a) EPIRB operations when emergency conditions preclude attendance of the EPIRB transmitter by a person.

(b) Automatic use of a transmitter during narrow band-direct printing (NB-DP) operations in accordance with CCIR Recommendation 476 or 625.

(c) Automatic use of a transmitter during digital selective calling (DSC) operations in accordance with CCIR Recommendations 493 and 541.

(d) Automatic use of transmitter when operating as part of the Automated Maritime Telecommunications System (AMTS) or an automated multi-station system for which provisions are contained in this Part.

(e) Automatic use of a VHF transmitter to send brief digital communications relating to the condition or safety of vessels while moored when all of the following conditions are met:

(1) The equipment must be using DSC in accordance with CCIR Recommendations 493 and 541 as modified by this section.

(2) Sensors must automatically activate the transmitter only under one or more of the following conditions:

(i) Fire, explosion;
(ii) Flooding;
(iii) Collision;
(iv) Grounding;
(v) Listing, in danger of capsizing;
(vi) Sinking;
(vii) Disabled and adrift; and
(viii) Undesignated condition related to ship safety.

(3) The "ROUTINE" DSC category must be used.

(4) Communications must be selectively addressed to an individual station.

(5) Transmitter output power must not exceed one watt.

(6) The call must employ a fixed format and must be in conformity with Recommendation 493 as follows:

Format specifier: Individual call—symbol 120 sent twice.

Address: 9 digit maritime mobile service identity of called station.

Category: Routine—symbol 100.

Self-identification: 9 digit ship station identity.

Message 1: Telecommand symbol 126 sent twice.

Message 2: Telecommand symbol 128 sent 6 times.

End of sequence: Symbol 127.

Error-check character: Check sum.

(7) Such transmissions are permitted only on channel 70 and the transmitter must be inhibited automatically whenever there is another call in progress on Channel 70.

(8) The call sequence for any one alarm must not be repeated until after an interval of at least five seconds. Further repetition is permitted only after intervals of at least fifteen minutes each. Repetitions following fifteen-minute waiting intervals must not exceed three.

5. Section 80.225 is revised to read as follows:

**§ 80.225 Requirements for digital selective calling (DSC) equipment.**

This section specifies the requirements for optional DSC equipment installed in ship and coast stations. Reference to any CCIR Recommendation in this section is to the most recent CCIR approved Recommendation that does not prevent the use of existing equipment.

(a) DSC equipment installed in coast and ship stations must be designed in accordance with CCIR Recommendation 493. Classes A, B, and Class C DSC equipment must not be used with the sensors referred to in § 80.179(e)(2).

(b) Manufacturers of Class C DSC equipment to be used on United States vessels must affix a clearly discernible permanent plate or label visible from the operating controls containing the following:

Warning. This equipment is designed to generate a digital maritime distress and safety signal to facilitate search and rescue. To be effective as a safety device, this equipment must be used only within communication range of a shore-based VHF marine channel 70 distress and safety watch system. The range of the signal may vary but under normal conditions should be approximately 20 nautical miles.

(c) Selective calling equipment, other than that designed in accordance with CCIR Recommendation 493, is authorized as follows:

(1) Equipment used in conjunction with the Automated Maritime Telecommunications System (AMTS) in the band 216–220 MHz.

(2) Equipment used to perform a selective calling function during narrow-band direct-printing (NB–DP) operations in accordance with CCIR Recommendation 476 or 625, and

(3) Equipment functioning under the provisions of § 80.207(a) until at least three years after mandatory DSC requirements become effective.

BILLING CODE 6712-01-M

## DEPARTMENT OF TRANSPORTATION

### 49 CFR Parts 1 and 7

**[OST Docket No. 1; Amdt. 1-228; Docket No. 43466; Amdt. 7-1]**

### Organization and Delegation of Powers and Duties

**AGENCY:** Office of the Secretary, DOT.

**ACTION:** Final rule.

**SUMMARY:** This delegation transfers Departmental responsibility for functions related to the Freedom of Information Act from the Office of Public Information, Office of the Assistant Secretary for Public Affairs to the Office of the General Counsel. It also makes technical corrections to 49 CFR Part 7 to reflect the change in delegations.

**EFFECTIVE DATE:** February 27, 1989.

**FOR FURTHER INFORMATION CONTACT:** Samuel E. Whitehorn, Office of the General Counsel, C-50, (202) 366-9307, Department of Transportation, 400 Seventh Street, SW., Washington, DC, 20590.

**SUPPLEMENTARY INFORMATION:** The Departmental responsibility for ensuring uniform implementation of the Freedom of Information Act (FOIA) (5 U.S.C. 552) and responding to requests for records of the Office of the Secretary, including the Office of the Inspector General, currently is exercised by the Office of the Assistant Secretary of Public Affairs under authority delegated by the Secretary to that office (49 CFR 1.63 (a)). The Office of the General Counsel currently has the responsibility for reviewing and taking final action on applications for reconsideration of initial decisions not to disclose unclassified records of the Office of the Secretary under FOIA (49 CFR 1.57(m)). The General Counsel, or his or her designee, also reviews any final determination by the head of an operating element within the Department not to disclose a record (or a denial of a request for a fee waiver or reduction) under 49 CFR Part 7 (53 FR 30265, August 11, 1988). Appendix A to Part 7 also sets out, among other things, where documents may be inspected (paragraph 2), where requests for records should be submitted (paragraph 4), and the official that has authority to make determinations on requests (paragraph 5).

By this delegation, the Associate General Counsel, or his or her designee, will now be responsible for the functions currently exercised by the Office of the Assistant Secretary for Public Affairs. As a result of this change, all FOIA requests will be handled within the Office of the General Counsel. The requests should be submitted to the Associate General Counsel. In the event the position of Associate General Counsel is vacant, and no designation by the Associate General Counsel has been made, the General Counsel shall designate another person to make the determination on requests.

The review functions will continue to be exercised by the General Counsel, or his or her designee. This process will maintain a two-tiered approach to FOIA issues. The review procedures set forth in 49 CFR Part 7 generally remain intact. However, a technical correction to Part 7 is needed. Section 7.1(d) will be changed to reflect the reorganization of function. Appendix A to Part 7 will be amended as follows:

—Paragraph 2 explains, among other things, that document inspection facilities are maintained by the Office of the Assistant Secretary for Public Affairs. This facility remains unchanged, but the office designation will be changed to Office of the General Counsel.

—Paragraph 4 will be changed to the Associate General Counsel.

—Paragraph 5 will be changed to the Associate General Counsel, or his or her designee.

Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register**.

**List of Subjects**

## DEPARTMENT OF COMMERCE

**National Oceanic and Atmospheric Administration**

**50 CFR Part 651**

**[Docket No. 90251-9051]**

**Northeast Multispecies Fishery**

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Emergency rule.

**SUMMARY:** The Secretary of Commerce (Secretary) has determined that an emergency rule is necessary to promote effective management of the yellowtail flounder fishery and to prevent wastage of the yellowtail flounder stocks by closing the area, designated as the Southern New England/Mid-Atlantic Region closed area, earlier than specified in the existing regulations. The intended effect of this action is to provide protection to the juvenile yellowtail flounder stocks present in the area to enhance future spawning potential.

**EFFECTIVE DATE:** March 6, 1989 through April 1, 1989.

**ADDRESS:** A copy of the environmental assessment (EA) for this rule may be obtained from Douglas Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway, Saugus, MA 01908.

**FOR FURTHER INFORMATION CONTACT:** Jack Terrill (Resource Policy Analyst) 508-281-3600, ext. 252.

**SUPPLEMENTARY INFORMATION:** This notice of emergency action was prepared by NMFS at the request of the New England Fishery Management Council (Council) in response to a vote taken by the Council at its January 1989 meeting. This action is being implemented using emergency authority provided to the Secretary under section 305(e)(2)(B) of the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1855(e)(2)(B).

Regulations at 50 CFR Part 651 implement the Fishery Management Plan for the Northeast Multispecies Fishery (FMP) and specify that an area, designated as the Southern New England/Mid-Atlantic Region closed area, be closed during certain times of each year in order to protect yellowtail and winter flounder which concentrate there. By regulation, the area is divided into two areas with the eastern part closing on March 1 and the western remainder closing on April 1 of each year. The entire area will be reopened at 2400 hours on May 31 of each year, or at an earlier date after May 1 if the NMFS Northeast Regional Director, in consultation with the Council, determines that the closure has achieved the appropriate spawning level for yellowtail and winter flounder. Beginning at the end of December 1988, harvesters indicated the presence of large quantities of juvenile yellowtail flounder in both the eastern and western areas. The fish were reported to be of 6 to 8 inches in length (less than the legal minimum size of 12 inches) with discards of 50% and greater occurring. While mortality rates for the discarded undersized flounder are unknown, rates are expected to be high. Incidental mortality will vary depending upon length of tow, amount of fish caught by trawl, handling, and other factors, but is believed a serious threat to prerecruit flounders. Members of the Southern New England fishing industry contacted the Council and requested that action be taken to protect the flounders. They suggested that the closing dates for the area be moved up to help prevent the occurrence of any further takes.

Critical to their request was a recent report published by the NOAA/NMFS, Northeast Fisheries Center, that indicated that yellowtail flounder stocks are at record low levels of abundance with poor prospects for recovery. According to the report, yellowtail flounder landings are at a 30 year low, and recent weak year classes and continued fishing pressure are expected to continue this downward trend. The yellowtail flounder found in the Southern New England area spawn at approximately 10 inches so the continued take and discard with the resultant mortality of juvenile fish will be detrimental to any rebuilding.

Four sea sampling trips directed by NMFS were conducted in the Southern New England area. The trips confirmed that the juvenile flounder were present throughout the area, with discards measuring 8 to 12 inches in length comprising up to 95 percent of the tow. Total average lengths and discard percentages for these trips were 11 inches and 73 percent respectively.

Based on this information, the Secretary has determined that the need for emergency action does exist and that it is appropriate to close the entire area to fishing with groundfish gear. Continued effort on yellowtail flounder would not be in the best interest of the resource and the industry. The eastern portion of the area closed March 1 under existing regulations at 50 CFR 651.21(b). Accordingly, this emergency action provides for the early closure of the remaining western portion of the area.

**Classification**

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary to respond to an emergency situation and is consistent with the Magnuson Act and other applicable law.

The Assistant Administrator finds no potential negative impact on the groundfish resources as a result of this rule. An environmental assessment is available which explains the projected effects of the rule and finds that it has no significant effect on the human environment under the National Environmental Policy Act. A copy of the assessment may be obtained from the Council at the address listed above (see **ADDRESSES**).

This emergency rule is exempt from normal review procedures of Executive Order 12291 as provided in section 6(a)(1) of that Order. This rule is being reported to the Director of the Office of Management and Budget, with an explanation of why it is not possible to follow the regular procedures of that Order.

Pursuant to section 553(b)(B), the Assistant Administrator also finds that, because of the likelihood of high mortality of juvenile yellowtail flounder in the Southern New England/Mid-Atlantic closed area and because recent data indicate the yellowtail flounder stocks are at record low levels of abundance, notice and opportunity for public comment are impracticable and contrary to the public interest. Pursuant to section 553(d) and for the reasons stated above, the Assistant Administrator further finds good cause to make this rule immediately effective.

This emergency action is exempt from the requirements of the Regulatory Flexibility Act because it is being issued without opportunity for prior public comment.

This rule does not contain a collection of information requirement subject to the Paperwork Reduction Act.

The Assistant Administrator has determined that this rule does not directly affect the coastal zone of any State with an approved coastal zone management program.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

**List of Subjects in 50 CFR Part 651**

Fishing, Fisheries, Vessel permits and fees.

Dated: March 6, 1989.

**James W. Brennan,**

For the reasons set out in the preamble, NOAA amends 50 CFR Part 651 as follows:

**PART 651—NORTHEAST MULTISPECIES FISHERY**

1. The authority citation for 50 CFR Part 651 continues to read as follows:

**Authority:** 16 U.S.C. 1801 *et seq.*

2. Section 651.21 paragraph (b)(2)(i) is suspended until April 1, 1989, and a new paragraph (b)(4) is added to read as follows:

**§ 651.21 Closed areas.**

* * * * *

(b) * * *

(2)(i) [Suspended]

(3) * * *

(4)(i) The entire area defined in paragraph (b)(1) of this section shall be closed effective March 6, 1989, until 2400 hours on May 31, 1989, unless reopened in accordance with paragraph (b)(2)(ii) of this section.

(ii) The closure specified in paragraph (b)(4)(i) shall not apply to dredge gear designed and being used for the taking of scallops in the west of 71°30' W. longitude until April 1, 1989.

# Proposed Rules

Federal Register
Vol. 54, No. 45
Thursday, March 9, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 29

[TB-89-001]

### Tobacco Inspection; Flue-Cured and Burley Tobacco; Importation Prohibitions

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Dairy and Tobacco Adjustment Act of 1983, as amended, prohibits the importation of flue-cured and burley tobacco which contains any prohibited pesticide residue and establishes related certification and testing requirements. This proposal would amend the implementing regulations to: (1) Substitute the term "prohibited pesticide residue" for "banned pesticide"; (2) revise the list of pesticides for which testing is conducted; (3) revise the maximum allowable concentrations of residues; and (4) require that shipments of imported flue-cured and burley tobacco not be altered or moved from the point of entry until it has been determined that the tobacco does not exceed the maximum allowable concentrations of residues. These proposed changes would improve effective implementation of the 1983 Act.

**DATE:** Comments are due on or before April 10, 1989.

**ADDRESS:** Send comments to the Director, Tobacco Division, Agricultural Marketing Service (AMS), United States Department of Agriculture (USDA), Room 502 Annex Building, P.O. Box 96456, Washington, DC 20090-6456. Comments will be available for public inspection at this location during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** Director, Tobacco Division, AMS, USDA, Room 502 Annex Building, P.O. Box 96456, Washington, DC 20090-6456, telephone—(202) 447-2567.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that the Department proposes to amend the regulations governing the inspection and grading of tobacco (7 CFR Part 29, Subpart B) as they pertain to the testing of imported flue-cured and burley tobacco for prohibited pesticide residues and to related matters. The authority for these regulations is contained in the Dairy and Tobacco Adjustment Act of 1983, as amended (7 U.S.C. 511r) ("the Act") and the Tobacco Inspection Act (U.S.C. 511-511q).

The term "banned pesticide" is presently defined in section 29.401(p) with a reference to pesticides which have been canceled, suspended, revoked, or otherwise prohibited under the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA") (7 U.S.C. 135 *et seq.*). However, the term is used by various national and international organizations and others to refer to pesticides the use of which has been completely prohibited in a particular jurisdiction. In order to avoid any possible confusion, this proposed rule would substitute the term "prohibited pesticide residue," which would be defined as any pesticide residue exceeding the maximum concentration of residue for a specific pesticide or combination of pesticides as set forth in § 29.427. Also, conforming changes would be made in § 29.401(u), the definition of "Testing," and § 29.429, "Disposition of imported tobacco exceeding pesticide residue standards."

When the initial regulations concerning pesticide residues in tobacco were issued (51 FR 30196, August 22, 1986), it was stated in the supplementary information that the list of pesticides for which residue limits were established would be subject to revision from time to time as the circumstances require. The list comprises those pesticides which are not approved for use on tobacco in the United States (i.e., those pesticides which have been canceled, suspended, revoked, or otherwise prohibited under FIFRA) but which are not known or believed to be used on tobacco in foreign countries and for which reliable testing methodologies exist. Based upon information obtained from the Tobacco Pesticide Committee of the Tobacco Workers Conference, this proposed rule would add the following pesticides to the list in § 29.427: DDE, hexachlorobenzene (HCB), lindane, methoxychlor, tamaron, and cypermethrin. Maximum allowable concentrations of residues for these pesticides would be established in the manner described below.

The program for testing flue-cured and burley tobacco for pesticide residues has been under continual review since its inception. Initially, the maximum allowable concentrations of pesticide residues were established by analogy to the residue tolerances established by the Environmental Protection Agency (EPA), for food crops. The agency now believes that the program could be placed upon a more appropriate scientific footing. In proposing new maximum allowable concentrations of residues, the Department has relied upon research conducted by several land grant universities, information from the Codex Alimentarius Commission, published scientific literature, regulations of the Environmental Protection Agency, data from the Department's Agricultural Stabilization and Conservation Service (ASCS) domestic tobacco monitoring program, and data on pesticide residues in imported tobacco collected by testing imported tobacco under the present regulations. This information is available for inspection at the same address as for the comments.

During the 2½ years that the regulations have been in place, over 14,000 samples of imported flue-cured and burley tobacco have been tested for pesticide residues. The resulting data provide norms for expected pesticide residue levels. Residues significantly in excess of expected levels would indicate that good agricultural practices may not have been followed in the production of that tobacco. Consideration has been given to sources of pesticide residues which would not be inconsistent with good agricultural practices, such as incidental drift from the spraying of adjacent fields and unavoidable exposure to contaminated soil and ground water.

Some pesticides are persistent and degrade very slowly in the environment and thus may continue to occur in tobacco for many years after application of the pesticide has ceased. Limits for these unavoidable residues would be based upon the levels that are unavoidable in domestically grown tobacco. The proposed level for persistent pesticides were derived by analyzing results of tobacco monitoring samples taken from various areas of the United States. The pesticides involved are DDT, TDE, DDE, aldrin, dieldrin, toxaphene, heptachlor, heptachlor epoxide, chlordane, hexachlorobenzene (HCB), formotion, and dibromochloropropane (DBCP).

The available data for the pesticides dicamba, 2,4,—D, methamidophos, cypermethrin and permethrin are more limited than that for other pesticides. Although all of the proposed maximum allowable concentrations of residue are subject to change as new data may become available, the proposed levels for these pesticides would be denominated "temporary" in order to indicate a greater likelihood of revision. Interested persons are particularly invited to submit suggestions and data concerning the temporary levels at any time. These may be sent to the address given above for submitting comments on this proposed rule.

As is presently the case, no maximum allowable concentration of residue would be set below 0.1 ppm because this is the limit of reliable measurement.

The Act prohibits the entry into the United States of imported flue-cured and burley tobacco which is found to contain prohibited pesticide residues. The importer is required to complete a Pesticide and End User Certification form at the time of importation and must certify either that the tobacco is free of prohibited pesticide residues, or that it will not move in commerce until it has been tested and found to meet the tobacco pesticide residue requirements. Tobacco certified as not containing prohibited pesticide residues is subjected to random sampling and testing. If the test results are positive, the importer may request a retest. The testing process inherently involves a delay between the time samples are taken and the time that test results are available. In order to prevent the entry and use of tobacco later found to be contaminated, and to preserve the integrity of the testing and retesting process, it is necessary to require that imported flue-cured and burley tobacco not be mixed, blended, manipulated, altered, processed, manufactured, moved, shipped or transported from the point of entry until it has been determined that the tobacco does not exceed the maximum allowable pesticide residue concentrations set forth in § 29.427. This proposed rule would establish these requirements in a new § 29.431.

This proposed rule has been reviewed under USDA procedures established to implement Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be "nonmajor" because it does not meet any of the criteria established for major rules under the Executive Order.

The information collection requirements contained in the provisions of the regulations that would be amended by this proposed rule have been previously approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB No. 0581-0056.

Pursuant to the requirements set forth in the Regulatory Flexibility Act, full consideration has been given to the potential economic impact on small business of this proposed rule. Few, if any, of the firms which would be affected by these proposed regulations meet the definition of small business because of their individual size. The Administrator, Agricultural Marketing Service, has determined that this action would not have a significant economic impact upon a substantial number of small entities.

All persons who desire to submit written data, views or arguments for consideration in connection with this proposal may file them with the Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Room 502 Annex Building, P.O. Box 96456, Washington, DC 20090-6456.

For reasons set forth in the preamble, it is proposed that the regulations in 7 CFR Part 29, Subpart B, be amended as follows:

## PART 29—[AMENDED]

1. An authority citation for Part 29, Subpart B, is added to read as follows:

Authority: 7 U.S.C. 511m and 511r.

### Subpart B—Regulations

2. In § 29.401, paragraphs (p) and (u) are revised to read as follows:

**§ 29.401 Definitions**

* * * * *

(p) *Prohibited pesticide residue.* The maximum concentration of residue allowable for a specific pesticide or combination of pesticides as set forth in section 29.427.

* * * * *

(u) *Testing.* The chemical analysis of a pesticide test sample to determine levels of pesticide residues.

* * * * *

3. Section 29.427 is revised to read as follows:

**§ 29.427 Pesticide residue standards.**

(a) The maximum concentration of residues of the following pesticides allowed in flue-cured or burley tobacco, expressed as parts by weight of the residue per one million parts by weight of the tobacco (ppm) are:

(1) 0.2 ppm for the sum of op isomers of DDT, TDE (DDD) and DDE,

(2) 0.2 ppm for the sum of pp isomers of DDT, TDE (DDD) and DDE,

(3) 0.1 ppm for the sum of aldrin and dieldrin,

(4) 0.1 ppm for the sum of heptachlor and heptachlor epoxide,

(5) 0.1 ppm for hexachlorobenzene (HCB),

(6) 0.3 ppm for toxaphene,

(7) 1.0 ppm for disbromochloropropane (DBCP),

(8) 0.5 ppm for formothion,

(9) 3.0 ppm for chlordane,

(10) 0.1 ppm for endrin,

(11) 0.1 ppm for lindane,

(12) 0.1 ppm for methocychlor,

(13) 0.1 ppm for 2,4,5—T, and

(14) 0.1 ppm for ethylene dibromide (EDB).

(b) Temporary maximum concentrations of residues of the following pesticides allowed in flue-cured or burley tobacco expressed as parts by weight of the residue per one million parts by weight of the tobacco are:

(1) 5.0 ppm for dicamba,

(2) 5.0 ppm for 2,4,—D,

(3) 10.0 ppm for methamidophos, and

(4) 3.0 ppm for the sum of cypermethrin and permethrin.

4. Section 29.429 is revised to read as follows:

**§ 29.429 Disposition of imported tobacco exceeding pesticide residue standards.**

Within 10 days of the receipt of test results from pesticide test samples, the Director shall notify the importer or entity responsible for the lot of tobacco of the test results. If the test results indicate that the lot or any portion of the lot contains prohibited pesticide residues, the Director will notify the importer or entity responsible for the affected tobacco and the appropriate U.S. Customs officials that the tobacco cannot enter the United States. The importer or other entity shall notify the Director in writing of the methods by which the tobacco will be disposed of and provide 5 days advance notice of the time and place of final disposition. The Department will monitor the disposition procedures to verify that the tobacco has been accurately identified as to lot, kind, type, and grade.

5. A new § 29.431 is added to read as follows:

VOL 54 ISS 45 MR 9 1989 UMI

**§ 29.431 Handling of imported tobacco pending test results.**

After an individual shipment of imported flue-cured or burley tobacco has been sampled, regardless of whether it is certified as being free from prohibited pesticide residues, it must be kept in the original packages, and not be mixed, blended, manipulated, or altered in any manner, or moved, shipped, or transported from the point of entry until it has been determined that the tobacco does not contain prohibited pesticide residues.

Dated: March 6, 1989.

**J. Patrick Boyle,**

*Administrator.*

BILLING CODE 3410-02-M

---

**7 CFR Part 51**

**[Docket Number FV-88-210]**

**Christmas Trees; Grade Standards**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This action would revise the voluntary U.S. Standards for Grades of Christmas Trees. The National Christmas Tree Association, a trade association representing a cross section of growers, shippers, and other industry members who market Christmas trees in the United States, has requested that the U.S. standards be revised to reflect current cultural and marketing practices. The Agricultural Marketing Service (AMS), in cooperation with industry, has the responsibility to develop and improve standards of quality, condition, quantity, grade, and packaging in order to encourage uniformity and consistency in commercial practices.

**DATE:** Comments must be postmarked or courier dated on or before May 8, 1989.

**ADDRESS:** Interested parties are invited to submit written comments concerning this proposal. Comments must be sent, in duplicate, to the Standardization Section, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2056, South Building, Washington, DC 20090-6456. Comments should reference the date and page numbers of this issue of the Federal Register and will be made available for public inspection in the above office during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** Paul W. Manol at the above address, or call (202) 447-5410.

**SUPPLEMENTARY INFORMATION:** This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been designated as "nonmajor."

Pursuant to the requirements set forth in the Regulatory Flexibility Act, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities. The proposed revision of the U.S. standards for Christmas trees will not impose any substantial direct economic cost, recordkeeping, or personnel workload changes on small entities, and will not alter the market share or competitive position of these entities relative to large businesses. This action proposes changes to the U.S. Standards for Grades of Christmas Trees which brings the standards into conformity with current marketing practices. In addition, these standards are voluntary.

The United States Standards for Grades of Christmas Trees were last revised on April 1, 1973. These standards are applicable to sheared or unsheared coniferous trees which are normally marketed as Christmas Trees. Most of these trees are of the following categories: Douglas fir, Balsam fir, Black spruce, Eastern Red cedar, White spruce, Scotch pine, Norway spruce, Red pine, Eastern White pine, Red spruce, Fraser fir, and Virginia pine.

The following grades are currently provided for in the standards: U.S. Premium, U.S. No. 1 or U.S. Choice, and U.S. No. 2 or U.S. Standard. Provisions for tolerances are set forth in the standards, as well as definitions of various terms that are used in the standards. Finally, these standards contain a metric conversion table.

The Agricultural Marketing Service received a petition from the National Christmas Tree Association to amend the U.S. Standards for Grades of Christmas Trees. The Association contends that due to high levels of production in recent years and the fact that more trees are being "nursery bred," changes are necessary in the current standard. The Association believes that the industry requires a more uniform and simplified standard by which to market and grade Christmas trees. In addition, they feel that certain revisions will ultimately provide the consumer with a higher quality product, and bring the standards up to date with current marketing practices.

The National Christmas Tree Association has requested that the U.S. Standards be revised to reflect current cultural and marketing practices. In addition, the standards have been reviewed for need, currentness, clarity, and effectiveness as part of a periodic review. Accordingly, the following changes and additions are proposed:

—The general provisions regarding the majority of species marketed would be revised to reflect current marketing trends. Several species would be deleted while others would be added.

—The current standards allow a 10 percent tolerance for off-size, 20 percent tolerance for off-length handles, and 10 percent tolerance for defects, provided, that for the U.S. Premium and U.S. No. 1 grades, not more than 5 percent shall be allowed for trees failing to meet requirements of the text lower grade. As proposed, tolerances would be restricted to a total of 10 percent for defects, provided, that included in this tolerance, not more than the following percentages shall be allowed: not more than 5 percent for off-size, 10 percent for off-length handles, and 10 percent for defects failing to meet the remaining requirements of the grade. These proposed changes would reduce the amount of defects permitted thereby increasing the quality of Christmas trees available to the consumer.

—The use of the terms "U.S. Choice" and "U.S. Standard" as companion grades to U.S. No. 1 and U.S. No. 2 respectively, would be deleted so as to eliminate any confusion in the grade certification process.

—The cleanness requirement for the U.S. No. 1 grade would be changed from "clean" to "fairly clean," thereby differentiating the amounts of allowable vines or other foreign material between the U.S. Premium grade, which is required to be clean, and the U.S. No. 1 grade.

—Current standards require the U.S. Premium grade to have not less than medium density. As proposed, U.S. Premium grade Christmas trees would require not less than heavy density. This proposed change would provide that U.S. Premium graded trees have a fuller foliated appearance.

—The handle length requirement in the current standards, unless otherwise specified, is not less than 6 inches or more than 1¾ inches of each foot of tree length. This applies to both cut trees and those graded "on the stump." The proposed handle length, unless otherwise specified, would be not less than 6 inches or more than 1½ inches for each foot of tree length for all grades. Additionally, handle length requirements would be waived for trees graded "on the stump." It is the contention of the National Christmas Tree Association that lowering the specification from 1¾ inches per foot of tree length to 1½ inches provides the consumer with a trunk that is more proportional to tree height. Additionally, trees graded "on the stump," i.e. in the field prior to cutting, would have no handle length requirements because inspection personnel would have no way of knowing where on the trunk the tree would ultimately be cut.

—Currently, the U.S. No. 2 grade requires a candlestick, normal, or flaring taper. As proposed, only a "normal taper" would be required of U.S. No. 2 Christmas trees. This proposed change would provide that trees graded U.S. No. 2 have a shape that would be generally more desirable to consumers.

—The "face" requirements as pertaining to allowable defects would be revised in all grades to permit minor and/or noticeable defects not addressed in the current standards. This would provide a means of determining how defects affect the appearance of the tree in relation to the face requirements for each grade. For example, the current standards requires trees graded U.S. Premium to have four complete faces tree from any defects. In essence, a perfect tree. The proposed requirements for U.S. Premium trees would allow one minor defect to affect three complete faces and one minor defect to affect the remaining face.

It is the National Christmas Tree Association's contention that these proposed changes more closely reflect how Christmas trees actually grow and appear.

—In the current standards, size is stated in foot or half-foot increments and, unless otherwise specified, color codes may be used to designate respective sizes. As proposed, size would be stated in foot increments only and, unless otherwise specified, new color codes would be used to designatge respective sizes. Additionally, in any size range, a minimum of ⅓ of the trees in a lot would be required to be in the top half of that size range. Christmas trees are generally marketed in one foot increments. Therefore, this proposed change would eliminate any confusion in sizing trees per current size tolerances and would provide a standard for measurement determination.

—Definitions for "fresh," "clean," "height," "healthy," and "butt trimmed" would be reworded to better reflect current cultural and marketing conditions and new definitions would be established for "medium" and "light density" that would reflect the change whereby a tree's density would be based on individual species.

—A definition for "heavy density" would be established. This conforming change is necessary because of the proposed change establishing "heavy density" as the minimum requirement for the U.S. Premium grade.

—The current standards list only noticeable and materially detracting classifications of defects. As proposed, three new classes of defects would be established and defined: minor, noticeable, and culls. This proposed change would simplify the determination of defects by listing them in chart form in descending order, minor to cull.

—The grade standards format itself would be revised and updated to incorporate all of the above mentioned changes, and provide convenient use to the industry.

—Finally, the authority citation which is stated at the beginning of this subpart would be deleted. This would bring this subpart into conformity with the remainder of Part 51 as to the use of statutory authority citations.

**List of Subjects in 7 CFR Part 51**

Fresh fruits, vegetables, and other products (Inspection, certification, and standards).

For reasons set forth in the preamble, it is proposed that 7 CFR Part 51 be amended as follows:

**PART 51—FRESH FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)**

1. The authority citation for 7 CFR Part 51 continues to read as follows:

**Authority:** Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended [7 U.S.C. 1622-1624].

2. The authority citation at the beginning of subpart—United Standards for Grades of Christmas Trees is removed.

3. In Part 51, Subpart—United States Standards for Grades of Christmas Trees and the table of contents thereof are revised to read as follows:

* * * * *

**Subpart—United States Standards for Grades of Christmas Trees**

**General**

Sec.
51.3085 General.

51.3096 Butt trimmed.
51.3097 Density.
51.3098 Normal taper.
51.3099 Complete face.
51.3100 Fairly clean.
51.3101 Handle.
51.3102 Height.
51.3103 Minor defects.
51.3104 Noticeable defects.
51.3105 Classification of defects.

**Metric Conversion Table**

51.3106 Metric conversion table.

**Subpart—United States Standards for Grades of Christmas Trees**

**General**

**§ 51.3085 General.**

The standards contained in this subpart are applicable to sheared or unsheared trees of the coniferous species which are normally marketed as Christmas trees. The majority of the Christmas trees marketed are of the following species: Douglas Fir (Pseudotsuga Menziesii); Balsam Fir (Abies Balsamea); Red Fir (Abies Magnifica); White Fir (Abies Concolor); Fraser Fir (Abies Fraseri); Grand Fir (Abies Grandis); Noble Fir (Abies Procera); White Spruce (Picea Glauca); Blue Spruce (Picea Pungens); Eastern Red Cedar (Junperus Virginiana); Red Pine (Pinus Resionsa); White Pine (Pinus Strobus); Virginia Pine (Pinus Virginiana); Scotch Pine (Pinus Sylvestris).

**Grades**

**§ 51.3086 U.S. Premium.**

"U.S. Premium" consists of trees which meet the following requirements:

(a) Characteristics typical of the species;

(b) Butt trimmed, except for trees graded "on the stump";

(c) Normal taper;

(d) Fresh,

(e) Clean;

(f) Healthy;

(g) Well shaped;

(h) Not less than heavy density;

(i) Handle length, unless otherwise specified, shall be not less than 6 inches, or more than 1½ inches for each foot of tree height. For trees graded "on the stump", handle length will not be a requirement of the grade;

VOL 54 ISS 45 MR 9 1989 UMI

(j) Three complete faces with not more than 1 minor defect. Remaining face may not have more than 1 minor defect;
(k) For size see § 51.3090;
(l) For tolerances see § 51.3091.

**§ 51.3087 U.S. No. 1.**

"U.S. No. 1" consists of trees which meet the following requirements.
(a) Characteristics typical of the species;
(b) Butt trimmed; except for trees graded "on the stump";
(c) Normal taper;
(d) Fresh;
(e) Fairly clean;
(f) Healthy;
(g) Well shaped;
(h) Not less than medium density;
(i) Handle length, unless otherwise specified, shall be not less than 6 inches, or more than 1⅛ inches for each foot of tree length. For trees graded "on the stump", handle length will not be a requirement of the grade.
(j) Three complete faces with not more than 2 minor defects. Remaining face may not have more than 1 noticeable defect;
(k) For size see § 51.3090;
(l) For tolerances see § 51.3091.

**§ 51.3088 U.S. No. 2.**

"U.S. No. 2" consists of trees which meet the following requirements:
(a) Characteristics typical of the species;
(b) Butt trimmed; except for trees graded "on the stump";
(c) Normal taper;
(d) Fresh;
(e) Fairly clean;
(f) Healthy;
(g) Well shaped;
(h) Not less than light density;
(i) Handle length, unless otherwise specified, shall be not less than 6 inches or more than 1⅛ inches for each foot of tree length. For trees graded "on the stump," handle length will not be a requirement of the grade;
(j) Two complete adjacent faces with not more than 3 minor defects. Remaining faces may not have more than 2 noticeable defects;
(k) For size see § 51.3090;
(l) For tolerances see § 51.3091.

## Culls

**§ 51.3089 Culls.**

"Culls" consist of individual trees which fail to meet the requirements of the U.S. No. 2 grade. (See § 51.3105 Table II).

## Size

**§ 51.3090 Size.**

(a) Height of trees shall be stated in foot increments and unless otherwise specified, the following color codes will be used to designate the respective sizes:

| Color | Tree height (feet) |
|---|---|
| Lime | 3 feet or less. |
| Orange | Over 3 to 4. |
| Blue | Over 4 to 5. |
| Red | Over 5 to 6. |
| Yellow | Over 6 to 7. |
| Green | Over 7 to 8. |
| White | Over 8 to 9. |
| Ink | Over 9 feet. |

(b) In determining which designations apply, the measurement for the height is the distance from the base of the handle to the top of the main leader, excluding that portion of the leader that extends more than 4 inches above the apex of the cone of the taper applicable to the tree.

(c) In any size range, a minimum of ½ of the trees in a lot shall be in the top half of that size range.

## Tolerances

**§ 51.3091 Tolerances.**

In order to allow for variations incident to proper sizing, grading and handling in each of the foregoing grades the following tolerances, by count, shall apply when a lot of Christmas trees is required to meet a specific grade.

(a) For total defects, 10 percent for Christmas trees in any lot which fail to meet the requirements for the grade: Provided that included in this amount not more than the following percentage shall be allowed for defects listed:

(1) *Off-size.* Five percent for trees which fail to meet the height specified.

(2) *Off-length handle.* Ten percent for trees which fail to meet the requirement for handle length, but which meet all other requirements for the specified grade.

(3) *Defects.* Ten percent for trees which fail to meet the remaining requirements of the grade.

(b) [Reserved]

## Definitions

**§ 51.3092 Fresh.**

"Fresh" means the needles are green, pliable, and firmly attached; with not more than slight shedding.

**§ 51.3093 Clean.**

"Clean" means the tree is reasonably free from foreign material.

**§ 51.3094 Healthy.**

"Healthy" means the needles have a fresh, natural appearance characteristic of the species.

**§ 51.3095 Well shaped.**

"Well shaped" means that the tree is not flat on one side and the branches of the tree, whether sheared or unsheared, are of sufficient number and length to form a circular outline tapering from the lowest whorl of branches to the top.

**§ 51.3096 Butt trimmed.**

"Butt trimmed" means that all barren branches shall have been removed, and the trunk has been smoothly cut at approximately right angles to the trunk.

**§ 51.3097 Density.**

"Density" means the amount of foliage on the tree. Factors contributing to degree of density are: The number and size of branches within the whorl, distance between the whorls, number and arrangements of the branchlets on each branch, the extent of internodal branching, needle arrangement, and needle length. Species differ in their habit of growth and some species do not have internodal branches. Density is judged on the basis of species characteristics.

(a) "Heavy density" means the whorls or branches are relatively close together, the spaces between are filled with needles and twigs so that the following species have said percentage of foliage so the main stem is not visible and the needle content and length are adequate to cover the branches:

| Name | Percentage of main stem covered (percent) |
|---|---|
| Red Cedar | 90 to 100 |
| Balsam Fir | 80 to 100 |
| Douglas Fir | 90 to 100 |
| Fraser Fir | 70 to 100 |
| Red Fir | 70 to 100 |
| White Fir | 70 to 100 |
| Grand Fir | 80 to 100 |
| Noble Fir | 60 to 100 |
| Red Pine | 70 to 100 |
| Scotch Pine | 90 to 100 |
| Virginia Pine | 90 to 100 |
| White Pine | 90 to 100 |
| Spruce (all) | 80 to 100 |

(b) "Medium density" means the whorls or branches are reasonably close together, the spaces between are filled with twigs and needles so that the following species have said percentage of foliage so the main stem is not visible and the needle content and length are adequate to cover the branches:

| Name | Percentage of main stem covered (percent) |
|---|---|
| Red Cedar | 70 to 90 |
| Balsam Fir | 60 to 80 |
| Douglas Fir | 70 to 90 |
| Fraser Fir | 50 to 70 |
| Red Fir | 50 to 70 |

| Name | Percentage of main stem covered (percent) |
|---|---|
| White Fir | 50 to 70 |
| Grand Fir | 60 to 80 |
| Noble Fir | 50 to 60 |
| Red Pine | 60 to 70 |
| Scotch Pine | 70 to 90 |
| Virginia Pine | 70 to 90 |
| White Pine | 70 to 90 |
| Spruce (all) | 60 to 80 |

(c) "Light density" means the whorls or branches are reasonably spaced, the spaces between are only partially filled so that the following species have said percentage of foliage so the main stem is not visible and the needle content and length are adequate to cover the branches:

| Name | Percentage of main stem covered (percent) |
|---|---|
| Red Cedar | 50 to 70 |
| Balsam Fir | 40 to 60 |
| Douglas Fir | 50 to 70 |
| Fraser Fir | 40 to 50 |
| Red Fir | 40 to 50 |
| White Fir | 40 to 50 |
| Grand Fir | 40 to 60 |
| Noble Fir | 40 to 50 |
| Red Pine | 40 to 60 |
| Scotch Pine | 50 to 70 |
| Virginia Pine | 50 to 70 |
| White Pine | 50 to 70 |
| Spruce (all) | 40 to 60 |

**§ 51.3098 Normal taper.**

"Normal taper" means the relationship of the width of the tree at its lowest branches to the height of the tree, less the handle, judged from its best side. All trees shall form a cone, the base of which is from 40 to 100 percent of its height.

**§ 51.3099 Complete face.**

"Complete face" means the visible area of a tree as viewed from a distance of 8 to 10 feet from the tree. A tree shall be considered as having four complete faces, each consisting of one-quarter of the surface area of the tree.

**§ 51.3100 Fairly clean.**

"Fairly clean" means that the tree is moderately free from foreign material.

**§ 51.3101 Handle.**

"Handle" means that the portion of the trunk between the butt or base of the tree and the lowest complete whorl of foliated branches.

**§ 51.3102 Height.**

"Height" means the distance from the base of the handle to the top of the main leader, excluding that portion of the leader that extends more than 4 inches above the apex of the cone of the taper applicable to the tree.

**§ 51.3103 Minor defects.**

"Minor defects" are slight imperfections in the development of the tree or defects resulting from handling, which materially affect the appearance of the tree. While many minor defects may be visible from more than 1 face, a given defect shall be scored only once. (See § 51.3105 Table I).

**§ 51.3104 Noticeable defects.**

"Noticeable defects" are imperfections in the development of the tree or defects resulting from handling, which seriously affect the appearance of the tree. While many noticeable defects may be visible from more than 1 face; a given defect shall be scored only once. (See § 51.3105 Table I).

**§ 51.3105 Classification of defects.**

TABLE I

| Factor | Minor defects | Noticeable defects |
|---|---|---|
| 1. Density | Slight uneven density | Moderately uneven density. |
| 2. Curvature of main stem | Slight, visible crook in the main stem (4 inches or less from vertical) | Main stem visibly curved more than 4 but less than 6 inches from vertical. |
| 3. Insect or disease damage | Slight insect or disease damage | Moderate insect or disease damage. |
| 4. Broken branches | 1 broken whorl branch close to main stem | Broken leader or more than 1 broken whorl branch near mainstem. |
| 5. Physical damage | Slight physical damage | Moderate physical damage. |
| 6. Foreign material and/or vines | Slight amount of foreign material or vines | Moderate amount of foreign material or vines. |
| 7. Multiple leader stems | Multiple leaders | Crows nest. |
| 8. Extra long branches | Branch over 10 inches longer than other branches on corresponding whorl | N/A. |
| 9. Abnormal curling of needles | Slightly abnormal curling of needles | Moderately abnormal curling of needles. |
| 10. Weak lower branches | Free from | Weak lower branches affecting up to ¾ of branches on bottom whorl. |
| 11. Handle not proportionate to height | Free from | Handle not proportionate to height of tree |
| 12. Incomplete whorl of branches | Less than ¼ of branches are missing in a given whorl | ¼ but less than ½ of branches are missing in a given whorl. |
| 13. Holes or gaps in tree | Free from | Hole in the tree or tree or space considerably out of proportion with the uniform branch characteristics of the balance of the tree. |
| 14. Gooseneck | Free from | Free from. |
| 15. Loss of needles | Slight loss of needles | Moderate loss of needles. |

TABLE II

| Factor | Culls |
|---|---|
| 1. Density | Severely uneven density. |
| 2. Curvature of mainstem. | Main stem curved more than 6 inches. |
| 3. Insect or disease damage. | Severe insect or disease damage or abnormal curling of needles. |

TABLE II—Continued

| Factor | Culls |
|---|---|
| 4. Broken branches | Main stem broken below top whorl or more than three branches broken near trunk. |
| 5. Physical damage | Severe physical damage. |
| 6. Foreign material and/or vines | Heavy amounts of foreign material or vines. |
| 7 Multiple stems | Multiple main stems (not leaders). |

TABLE II—Continued

| Factor | Culls |
|---|---|
| 8. Extra long branches. | N/A. |
| 9. Abnormal curling of needles. | Severely abnormal curling of needles. |
| 10. Weak lower branches. | Weak lower branches affecting more than ¾ of branches on bottom whorl |

VOL 54 ISS 45 MR 9 1989 UMI

TABLE II—Continued

| Factor | Quite |
|---|---|
| 11. Handle not proportional to height. | N/A. |
| 12. Incomplete whorl of branches. | More than ¼ of branches missing in a given whorl or when missing branches create an shell. |
| 13. Holes or gaps in tree. | Shelf or a decided gap or space between whorls of branches noticeable on 2 or more faces. |
| 14. Gooseneck | Any gooseneck. |
| 15. Abnormal loss of needles. | Severe loss of needles. |

**Metric Conversion Table**

**§ 51.3106 Metric conversion table.**

| Feet | Centimeters (cm) | Feet | Centimeters (cm) |
|---|---|---|---|
| 1 | 30.48 | 6 | 182.88 |
| 2 | 60.96 | 7 | 213.36 |
| 3 | 91.44 | 8 | 243.84 |
| 4 | 121.92 | 9 | 274.32 |
| 5 | 152.40 | 10 | 304.80 |

Dated: March 6, 1989.

BILLING CODE 3410-02-M

**Packers and Stockyards Administration**

**9 CFR Part 203**

**Statement of General Policy; Antibiotic and Sulfa Residues, in Slaughter Animals**

**AGENCY:** Packers and Stockyards Administration, USDA.

**ACTION:** Withdraw notice of intent to institute proposed rulemaking.

**SUMMARY:** This document withdraws a Notice of Intent to Institute Proposed Rulemaking published May 24, 1988 (53 FR 18572), which proposed a "bill-back" mechanism intended to shift economic responsibility for violative drug residues from the meat packer to the person causing the violation. Withdrawal of this proposal does not alter the U.S. Department of Agriculture's commitment to assuring a residue free meat supply.

**DATE:** Effective March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Harold W. Davis, Director, Livestock Marketing Division, Room 3408-South Building, U.S. Department of Agriculture, Washington, DC 20250 (202) 447-6951.

**SUPPLEMENTARY INFORMATION:** Because of continuing concerns about the number of violative sulfa and antibiotic drug residues in carcasses of young calves, cull dairy cows and swine, a proposed "bill-back" mechanism was published in the **Federal Register** on May 24, 1988 (53 FR 18572). In addition to seeking public comments, the proposal sought alternative suggestions which would accomplish the objectives of deterring violative residues and shifting economic responsibility when violations occur. Pursuant to industry requests, the period for filing comments was extended to September 23, 1988 (53 FR 27174).

A total of 285 comments were received with 249 or 87 percent of these opposed to the "bill-back" concept. Thirty-four or twelve percent of the comments favored the proposal and two did not express a position. Six of the thirty-four comments favoring the "bill-back" proposal expressed reservations, such as whether there is sufficient animal identification to permit positive traceback and whether the actual violator could always be determined. Comments were filed by 99 livestock producers and producer trade associations, 146 livestock marketing businesses and marketing trade associations and 24 meat packers and packer trade associations with the remaining 16 filed by a variety of interests, including Government agencies and agri-businesses.

Almost all of the comments recognized the need to assure a meat supply free of illegal residues and expressed support for the proposition that the person causing the illegal residue should be held economically responsible. However, most of those commenting were strongly opposed to the "bill-back" proposal because they do not believe it will accomplish these objectives and they feel it is unfair and/or unworkable.

Valid questions were raised by the comments about the ability to accurately identify the source of illegal residues. While the comments generally acknowledged that livestock producers cause some of the illegal residues, persuasive arguments were made that livestock producers are not the sole cause of residue violations. Further, there was strong disagreement as to the number of residue violations caused by livestock producers and the source of the remaining violations.

Meat packers and the packer trade associations generally supported the "bill-back" concept pointing out that packers have absorbed the loss for most carcasses condemned because of violative residues. On the other hand, most of the comments filed by marketing businesses and a national trade association representing many of these businesses argued that the "bill-back" proposal would only shift the economic responsibility for illegal drug residues from the packer to the marketing sector. Since livestock producers are not subject to the Packers and Stockyards Act, the markets contend their only recourse would be the same as the packers' which is to file suit against the producer. This is not economically feasible in most instances because of the relatively small dollar amounts at issue in individual cases.

Other issues raised by the comments included the lack of adequate animal identification to permit positive trace back in all instances, concern that the drug residue tests being used are not 100 percent accurate and the declining number of residue violations has reduced the need for a program as drastic as the "bill-back" proposal. The residue violation rate in swine dropped dramatically during 1988 as a result of industry efforts and other programs administered within the Department of Agriculture. The residue violation rate in the other problem classes (young calves and cull dairy cows) has also been substantially reduced over the last 3 years.

Under these circumstances, a proposed rule permitting a "bill-back" with the right to offset from future purchases cannot be justified at this time without positive identification of the actual source of the residue contamination. Accordingly, the Notice of Intent to Institute Proposed Rulemaking is being withdrawn.

Withdrawal of the proposal will not preclude any person suffering financial harm because of an illegal residue from pursuing any rights they may have to obtain restitution, including seeking voluntary payment from the seller. An arbitrary offset from a future purchase, however, would not be permitted and could be considered an unfair practice under the provisions of the Packers and Stockyards Act. It should be noted that the Packers and Stockyards Administration recognizes a packer is entitled to know the identity of a consignor when a carcass is condemned as a result of an illegal residue. Such disclosure is subject to the packer furnishing official verification that the animal was condemned because of an illegal residue.

All segments of the industry have recognized the need for a residue free meat supply and expressed a willingness and desire to work with each other and the Department to solve this problem. Withdrawal of this proposal will afford the industry an opportunity to pursue a solution which may avoid the need for further rulemaking. However, the Department of Agriculture remains committed to assuring a residue free meat supply and will consider further rulemaking if necessary.

Done at Washington, DC this 6th day of March 1989.

B.H. (Bill) Jones,

*Administrator, Packers and Stockyards Administration.*

BILLING CODE 3410-KD-M

**DEPARTMENT OF THE TREASURY**

**Customs Service**

**19 CFR Parts 24, 132, 141, 142, and 143**

**Proposed Customs Regulations Amendments Concerning Statement Processing and Automated Clearinghouse**

**AGENCY:** U.S. Customs Service, Department of the Treasury.

**ACTION:** Proposed rule.

**SUMMARY:** This document proposes to amend the Customs Regulations to provide users of Customs Automated Broker Interface (ABI) with the option of paying their entry/entry summaries and entry summaries by the statement processing method. Statement processing allows entry/entry summaries and entry summaries to be grouped and payment made for the group with a single payment. The document further proposes that ABI filers who use statement processing must pay their statements through the use of the Automated Clearinghouse electronic payment mechanism.

Additionally, this document proposes that entries of quota class merchandise and other special classes of merchandise designated by Customs Headquarters can be paid through statement processing if the preponderance of the ABI filer's non-special class entry summaries are also processed under statement processing. This would mean that estimated duties would no longer be required to be attached to entry summary documentation for such entries, but could be electronically sent within 10 days from the date of entry.

**DATE:** Comments must be received on or before May 8, 1989.

**ADDRESS:** Written comments (preferably in triplicate) may be addressed to and inspected at the Regulations and Disclosure Law Branch, Room 2119, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229. Comments concerning the accuracy of the burden estimate and suggestions for reducing the burden should be directed to U.S. Customs Service, 1301 Constitution Avenue, NW, Reports Management Office, Washington, DC 20229 or the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** James Childress, Commercial Systems Division (202-343-0778).

**SUPPLEMENTARY INFORMATION:**

**Background**

Historically, Customs has generally required that estimated duties be attached to the submission of entry documentation or entry summary documentation. This payment was usually made by an individual check covering the entry or the entry summary. Through Customs Automated Commercial System (ACS), specifically its Automated Broker Interface (ABI), Customs has developed a method known as statement processing which now allows one payment to cover multiple entry summaries. Further, Customs has developed an enhancement to statement processing which no longer requires that the estimated duties be attached to the submission of entry summary documentation. The enhancement is known as the Automated Clearinghouse (ACH); ACH is an electronic payment mechnism. A filer who is on Customs ABI now may transmit his entry data to Customs through the ABI, may elect to use statement processing, and may utilize ACH to effect payment. The entry summary documentation must be submitted within 10 working days after entry of the merchandise. Payment through ACH for the entry summaries must be made on the same day the documentation is submitted.

This document proposes that amendments be made to the Customs Regulations providing for the voluntary use by ABI participants of statement processing. It also proposes the requirement that payment of all ABI statements be made through the use of the ACH electronic payment mechanism.

Additionally, this document proposes that the Customs Regulations be amended concerning the payment of estimated duties regarding special classes of merchandise, consisting of quota-class merchandise and other classes designated by Customs Headquarters. It is proposed that payment of estimated duties regarding these entry/entry summaries be allowed through ABI statement processing if the preponderance of the ABI participant's non-special class entry summaries are also processed under statement processing. As with all entry/entry summaries and entry summaries that are statement processed, these entry/entry summaries must appear on an ABI statement no later than 10 working days from date of entry and must be paid using ACH.

**Automated Commercial System**

The Automated Commercial System (ACS) was developed to enable Customs to process the rapidly increasing volume of commercial importations in an efficient and expeditious manner. As part of this effort, Customs has developed automated computer interfaces with various elements of the importing community. One of these is the Automated Broker Interface (ABI).

**Automated Broker Interface**

ABI is a voluntary system which pemits qualified trade participants to interface directly with the Customs computer and transmit entry release and entry summary data for merchandise being imported. The ABI system speeds entry processing and provides two-way communication between the user and Customs. In this manner, participants are able to ensure the accuracy and completeness of data by accessing Customs automated reference files.

The ABI was designed in cooperation with the trade, making use of standard technology available to both large and small businesses. Users are responsible for developing computer programs necessary to support the functional aspects of the system according to the specifications contained in the *ABI Broker Requirements Document* (Customs Publication No. 540). ABI requires that private sector systems have complete edit and verification programs which are utilized during entry preparation to ensure data accuracy and completeness. Costs for communications hardware, adapters, and supporting software are absorbed by the ABI participants. Customs provides access to toll-free lines for actual data transmissions.

Those entities which do not interface directly with Customs are able to submit entries through a service bureau or port authority which will communicate with Customs in the same way as other ABI users. One-time and occasional importers may elect to continue to file entries directly with Customs.

VOL 54 ISS 45 MR 9 1989 UMI

The general requirements for ABI participation are as follows:

- Demonstration of acceptable entry summary preparation capabilities in both a manual and an automated environment.
- The assembly and communication of entry data in conformity with the ABI Broker Requirements Document.
- Successful completion of a period of intensive testing on the Customs system.
- The continued meeting or exceeding of Customs established error and reject standards.

Participants who become operational in the ABI may elect to process entry summaries utilizing ABI statement processing.

**ABI Statement Processing**

Before ABI, pursuant to § 141.101, Customs Regulations (19 CFR 141.101), estimated duties were required, generally, upon submission of the entry documentation or the entry summary documentation, when the entry summary served as both the entry and entry summary. This payment was usually made by a check covering the individual entry or the entry summary. ABI statement processing is an option available to ABI participants. Through statement processing, the ABI filer elects to group entry summaries on a daily basis and pay the duties, taxes and fees on those entry summaries with a single payment. An ABI filer using statement processing must submit on the scheduled statement date the estimated duties, taxes, and fees along with the related entry summary documentation.

Currently, the payment of ABI statements may be accomplished through the use of check payment to the statement processing location. Customs is now proposing that the required method of payment for all ABI statements be through the use of ACH, an electronic payment mechanism.

**Mechanics of Statement Processing**

The mechanics of statement processing are as follows. When entry summary data is transmitted through ABI, the filer, who has been preapproved for statement processing, indicates whether he desires to pay a particular entry summary by an individual payment or by using statement processing. If statement processing is selected, the filer indicates if it is to be an importer or broker statement and provides a valid scheduled statement date, not a Saturday, Sunday, or holiday. ABI will not warn the filer if the scheduled statement date given may result in late payment. The ABI filer is responsible for ensuring that all entry/entry summaries and entry summaries are scheduled for payment within 10 working days after the date of entry.

During the evening prior to the scheduled statement date, the ACS system extracts the affected entries and generates a preliminary statement which is available to the ABI participant the morning of the scheduled statement date. The preliminary statements are to be printed by the ABI filer, who assembles entry summary packages by grouping the required entry summaries as listed on the statement and submitting them to Customs for acceptance.

If a filer must remove an entry summary appearing on a preliminary statement, he may request that it be deleted from the statement by lining the entry number out on the statement copy, adjusting totals and the payment amount accordingly. The actual deletions from the ABI statement are performed by Customs through ACS; the ABI filer cannot perform the deletions. The filer may then pay the deleted entry(s) by individual check, or schedule them for another statement by retransmitting the entry summary data through ABI with a future scheduled statement date.

During the ACS "end-of-day" processing, a final statement is generated for each preliminary statement where payment has been accepted. The filer prints the final statement which is a permanent record of the entry summaries and the related duty, tax, and fee amounts actually paid. The final statement will also provide the filer a listing of any entries which may have been deleted from the preliminary statement at the request of the filer.

**Automated Clearinghouse (ACH)**

The ACH process is a payment method for use by operational ABI filers to effect payment of ABI statements. The ACH is similar to a bank lockbox arrangement. Instead of the payment being made by check, however, the participant will electronically provide Customs authorization to notify a specific Treasury-designated ACH processor to perform an electronic debit to its bank account, wherever the account is currently located. The payment amount will subsequently be credited to the account of the Treasury.

The ACH process requires that the ABI statement filer provide to Customs in writing the bank transit routing number and the bank account number from which the ACH payments will be electronically debited by the Treasury-designated ACH processor. The information can be obtained from the bottom of the related check or by inquiring of the bank where the account is on file. Customs will prepare a Masterfile Maintenance Form which will be provided to the Treasury-designated ACH processor containing the account information with a unique participant unit number assigned by Customs. A copy of the maintenance form will be provided to the ABI filer identifying this unique number. All future ACH payment authorizations transmitted by the ABI filer must identify this unique number which will alert the Treasury-designated ACH processor as to the bank and account to which to issue the electronic debit transaction. If more than one account is to be used, the ABI filer must notify Customs so that unique numbers can be assigned to each account and the Treasury-designated ACH processor will have the information in their files for appropriate action. It will be the responsibility of the ABI participant to ensure that all bank account information is accurate and that the correct unique participant number is utilized in each ACH payment authorization transaction.

**Effect of ACH on Statement Processing**

The following overview shows the effect on statement processing resulting from the ACH payment process.

The preliminary statement will be generated in the current manner and available to the ABI filer on the morning of the scheduled statement date. This process will allow the ABI filer to identify any entry deletions which are to be removed from the statement. These deletions will be accomplished by Customs at the statement processing location before payment action is accomplished.

When the preliminary statement has been verified by both Customs and the ABI filer, Customs wil freeze the preliminary statement to prevent subsequent manipulation from occurring prior to the receipt of the ACH payment. The ABI filer will then transmit to Customs through the ABI the ACH payment authorization for that statement.

If by the close of business on the preliminary statement date the statement has not been frozen, the ACS system will automatically freeze the preliminary statement. If the preliminary statement is frozen by Customs without having performed any necessary deletions, the ABI participant should immediately notify the statement processing location so that deletions will be performed.

Currently, ABI participants are utilizing the ACH system by initiating payment transactions through a Treasury-designated ACH processor. In the near future, ABI participants will have the capability of remitting payment transactions directly to Customs for subsequent processing through the ACH system. When this capability is available to the ABI filer, the notification of acceptance of the ACH payment authorization will be transmitted to the filer through the ABI. Upon acceptance of the ACH payment authorization transaction by Customs, the statement will be identified as paid, and Customs, in the course of its normal end-of-day processing, will post the appropriate payment amounts (duties, taxes, fees) to the related entries.

Customs will electronically debit, through the Treasury-designated ACH processor, the payor's account on the second business day following the accepted payment date provided in the ABI acceptance notification record. The final statement will be available to the participant the morning following acceptance of the ACH payment authorization by Customs.

The ABI filer will also receive through ABI a notification that an ACH payment authorization cannot be accepted. The ABI filer will be given an error narrative(s) identifying the error(s) that were in the original authorization transmission. If the participant receives the ABI notification that the original payment authorization record contained errors, no payment will have been applied to the statement and the authorization cannot be provided to the Treasury-designated ACH processor for processing. It is the responsibility of the participant to timely retransmit a corrected authorization record or risk the potential of late payment claims on each statement entry.

**Statement Processing and ACH Transmission**

Entry presentation and processing will require discipline and supervisory oversight in both the ABI filers' and Customs offices to ensure timely transmission of ACH payments.

All preliminary statement entries are to be presented to Customs on the date of the preliminary statement. The ABI filer will indicate what, if any, deletions are to be performed. Customs will not initiate any deletions on its own. Customs will perform the deletions. After any deletions are processed, Customs will reconcile the statement and provide summary information to the ABI participant. Customs will then freeze the preliminary statement at the reconciled amount, thereby preventing further manipulation to the statement prior to ACH payment. When there are no deletions to be performed to the preliminary statement, Customs will simply freeze the preliminary statement, as originally presented. It will be the responsibility of the ABI filer to ensure that the ACH transmission via ABI is accomplished by close of business on the scheduled statement date.

As previously noted, Customs will electronically debit, through the Treasury-designated processor, the payor's account on the second business day following the accepted payment date, as provided in the ABI acceptance notification record.

**Statement Processing and Special Classes of Merchandise**

Special classes of merchandise defined in § 142.13(c) (1) and (2), Customs Regulations (19 CFR 142.13(c) (1) and (2)), consist of quota-class merchandise and other classes of merchandise designated by Customs Headquarters. Entry/entry summaries for these special classes of merchandise currently are not eligible to be statement processed. This document proposes to give an ABI filer who uses statement processing as a normal course of business an option to include such entry/entry summaries on a statement. However, if the filer chooses to use statement processing for those entry/entry summaries, they must remain on the statement. As discussed earlier in this document, ACH will be the required method of payment.

**Effect of Statement Processing on Quota Status and Priority**

"Quota priority" as defined in § 132.1(f), Customs Regulations (19 CFR 132.1(f)), is the precedence granted to one entry, or withdrawal from warehouse, for consumption of quota-class merchandise over other entries or withdrawals of merchandise subject to the same quota. "Quota status" as defined in § 132.1(g), Customs Regulations (19 CFR 132.1(g)), is the standing which entitles quota-class merchandise to admission under an absolute quota, or to a reduced rate of duty under a tariff-rate quota, or to any other quota benefit.

Under the current system, quota priority and status are determined as of the time of presentation to Customs of the entry/entry summary for consumption, or withdrawal from warehouse for consumption. The time of presentation is generally the time of delivery in proper form of an entry summary for consumption, which serves as both the entry and the entry summary, with estimated duties attached, or a withdrawal for consumption, with estimated duties attached.

The quota status of a commodity subject to a tariff-rate quota cannot be determined in advance of the entry. The quota rates of duty are ordinarily assessed on such commodities entered from the beginning of the quota period until such time in the period as it is determined that imports are nearing the quota level. District Directors of Customs are then instructed to require the deposits of estimated duties at the over-quota duty rate and to report the time of official presentation of each entry. A final determination of the date and time when a quota is filled is made, and all district directors are advised accordingly.

This document proposes that an ABI filer using statement processing may include quota-class merchandise on a statement. Customs is also proposing that quota status and quota priority can be acquired without estimated duties being attached to the entry/entry summary documentation. This can occur when Customs successfully receives from the ABI filer via ABI a transmission of entry/entry summary information and a valid scheduled statement date for the subsequent payment of duties, taxes and fees. It should be noted that the proposed amendments do not intend to change the requirement that an entry summary for consumption must be presented to Customs for quota-class merchandise to obtain quota status. Merely transmitting the entry/entry summary information to Customs via ABI and paying by statement processing is not sufficient. It also should be noted that it is not proposed to change the requirement that estimated duties must be attached to withdrawals from warehouse for consumption for such quota-class merchandise to obtain quota status and priority.

**Effect of Statement Processing on Release of Special Classes of Merchandise**

Section 141.101, Customs Regulations (19 CFR 141.101), currently provides that estimated duties must be deposited at the time of the filing of the entry summary documentation when it serves as both the entry and entry summary. Section 142.13(c), Customs Regulations (19 CFR 142.13(c)), provides that estimated duties must be attached to the entry summary documentation before quota-class merchandise and other special classes of merchandise designated by Customs Headquarters can be released.

This document proposes to amend the Customs Regulations to allow such merchandise to be released without the

VOL 54 ISS 45 MR 9 1989 UMI

estimated duties being attached to the entry/entry summary documentation, if Customs successfully receives from the ABI filer via ABI a transmission of the entry/entry summary information and a valid scheduled statement date for subsequent payment of duties, taxes and fees. Processing of these entries generally requires pre-release review for assurance of statistical accuracy or compliance with special entry requirements on trade sensitive commodities.

**Summary of Proposed Changes**

This document proposes to amend sections of Parts 24, 132, 141, 142 and 143 of the Customs Regulations. An amendment proposed to § 24.1 states that ABI participants may elect to pay duties, taxes and other charges through statement processing and, if so, such payment must be electronically through ACH. It is proposed to create a § 24.25 that describes statement processing. Various sections of Part 132 are proposed to be amended to reflect that statement processing of quota entries is permitted and that quota status and priority can be granted to those entries without the attachment of estimated duties, taxes and fees. It is also proposed to amend § 142.13(c) to state that ABI filers filing entry/entry summaries for other special classes of merchandise designated by Customs Headquarters may use the statement processing method. Numerous other sections of the regulations in Parts 141, 142 and 143 are also proposed to be amended to reflect that estimated duties need not be attached to entry/entry summaries and entry summaries for consumption if Customs successfully receives from the ABI filer via ABI a transmission of entry/entry summary information and a valid scheduled statement date.

**Comments**

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4 Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, Room 2119, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, DC 20229.

**Regulatory Flexibility Act**

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

**Executive Order 12291**

This document does not meet the criteria for a "major rule" as specified in E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

**Paperwork Reduction Act**

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget (OMB) for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(b)). Comments concerning the accuracy of this burden estimate and suggestions for reducing the burden should be directed to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503, with copies to the U.S. Customs Service at the address previously specified.

The collection of information in this regulation is in 19 CFR 24.25. This information is needed by Customs so that payments electronically transmitted to Customs are correctly debited to the right accounts. The likely respondents are businesses or other for-profit organizations and small businesses or organizations.

Estimated total annual reporting and/or recordkeeping burden: 35 hours.

Estimated average annual burden per respondent and/or recordkeeper: 15 minutes.

Estimated number of respondents and recordkeepers: 139.

Estimated annual frequency of responses: 1.

Part 178, Customs Regulations (19 CFR Part 178), which lists the information collections contained in the requirements and control numbers assigned by OMB would be amended accordingly if this proposal is adopted.

**Drafting Information**

The principal author of this document was Harold M. Singer, Regulations and Disclosure Law Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

**List of Subjects**

*19 CFR Part 24*

Accounting, Claims, Customs duties and inspection, Imports, Taxes, Wages

*19 CFR 132*

Customs duties and inspection, Imports, Quotas

*19 CFR Parts 141, 142 and 143*

Customs duties and inspection, Entry, Imports

**Proposed Amendments**

It is proposed to amend Parts 24, 132, 141, 142 and 143, Customs Regulations (19 CFR Parts 24, 132, 141, 142 and 143), as set forth below.

## PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The general and relevant specific authority citation for Part 24, Customs Regulations (19 CFR Part 24), continues to read as follows:

**Authority:** 5 U.S.C. 301; 19 U.S.C. 58a–58c, 66, 1202 (General Note 8, Harmonized Tariff Schedule of the United States), 1624; 31 U.S.C. 9701; Pub. L. 99–662 § 24.1 also issued under 19 U.S.C. 197, 198, 1648.

* * * * *

2. It is proposed to amend § 24.1(a) by adding a paragraph (8) to read as follows:

**§ 24.1 Collection of Customs duties, taxes and other charges.**

(a) * * *

(8) Participants in the Automated Broker Interface may use statement processing as described in § 24.25 of this part. Statement processing allows entry/entry summaries and entry summaries to be grouped either by importer or by filer, and allows payment of related duties, taxes and fees by a single payment, rather than by individual checks. Users of statement processing must pay Customs duties, taxes and fees electronically through the Automated Clearinghouse.

3. It is proposed to amend Part 24 by adding a new § 24.25 to read as follows:

**§ 24.25 Statement processing.**

Statement processing is a voluntary automated program for participants in the Automated Broker Interface (ABI), allowing the grouping of entry/entry summaries and entry summaries on a daily basis. The related duties, taxes and fees must be paid electronically through the Automated Clearinghouse (ACH) with a single payment.

(a) *How to elect participation.* An ABI filer must notify Customs in writing of the intention to utilize statement processing. All ABI statements must be paid electronically through ACH. The ABI filer must provide to Customs the bank transit routing number and the bank account number for each account from which the ACH payments will be electronically debited. Upon the determination by Customs that the ABI filer has the necessary software to participate and otherwise qualifies to participate, Customs shall assign a unique identifying number to the participant and provide that number to both the participant and the Treasury-designated ACH processor. This unique number assigned by Customs will alert the ACH processor as to which bank and account to issue the electronic debit. It is the responsibility of the participant to ensure that all bank account information is accurate and that the correct unique participant number is utilized for each ACH transaction.

(b) *Automated Clearinghouse.* A filer using ABI statement processing must make payment electronically through the Automated Clearinghouse (ACH). ACH is an arrangement in which the filer electronically provides payment authorization for the Treasury-designated ACH processor to perform an electronic debit to the payor's bank account. The payment amount will then be automatically credited to the account of the Department of the Treasury.

(c) *Procedure for filer.* (1) The filer shall transmit entry/entry summary and entry summary data through ABI indicating whether payment for a particular entry summary will be by individual check or by using statement processing. If statement processing is indicated, the filer shall designate whether the entry summary is to be grouped by importer or broker, and shall provide a valid scheduled statement date (not a Saturday, Sunday or holiday).

(2) Customs shall provide a preliminary statement to the ABI filer on the scheduled statement date. The preliminary statement shall contain all entry/entry summaries and entry summaries scheduled for that statement date. The preliminary statement shall be printed by the filer, who will review the statement entries, and the statement totals, assemble the required entry summaries as listed in the statement, and present them to Customs with the preliminary statement. This presentation to Customs shall be on the date of the preliminary statement. If a filer elects to perform deletions from the preliminary statement (other than items related to special classes of merchandise provided for in § 142.13(c) of this chapter), the filer shall notify Customs in such manner as designated by Customs Headquarters. Any entry number deleted from a statement may be paid by an individual check or scheduled for another statement by transmitting the entry summary data through ABI with a future payment date.

(3) When the preliminary statement is presented to Customs by the filer, Customs shall freeze the preliminary statement to prevent subsequent manipulation from occurring prior to the receipt of the ACH payment. If the filer does not present the preliminary statement by close of business on the scheduled statement date, Customs shall freeze the statement.

(4) Customs shall notify the filer when the preliminary statement is frozen. If the preliminary statement is frozen by Customs without having performed previously requested deletions, the ABI filer should immediately notify the statement processing location and the deletions will be performed. It is the responsibility of the filer to transmit the ACH payment authorization through ABI for that statement by no later than the close of business on the scheduled statement date.

(5) Upon acceptance of the ACH payment authorization transactions by Customs, the preliminary statement shall be identified as paid and Customs shall post the appropriate payment amounts to the related entries. The final statement generally shall be available to the filer the day following the acceptance of the ACH payment.

(d) *Choice of excluding certain entries from statement processing.* A filer, generally, has the right to inform Customs electronically whether he desires that a particular entry summary be paid by an individual payment rather than through statement processing. Entry/entry summaries for special classes of merchandise defined in § 142.13(c) of this chapter are not requried to be statement processed, but the filer has the option of including such entry/entry summaries. However, if statement processing is used for these special classes of merchandise, they cannot be deleted from a statement. In order to include entry/entry summaries for special classes of merchandise on a statement, a filer must use statement processing for a preponderance of the filer's non-special class entry summaries. If Customs determines that the preponderance of the non-special class entry summaries are not being processed through statement processing, the filer can be disqualified from using statement processing.

(e) *Scheduled statement date.* Entry/entry summaries and entry summaries must be designated for statement processing within 10 working days after the date of entry. It is the responsibility of the ABI filer using statement processing to ensure that the elected scheduled statement date is within that 10-day time frame. Customs will not warn the filer if the scheduled statement date given is late.

## PART 132—QUOTAS

1. The authority of Part 132, Customs Regulations (19 CFR Part 132), continues to read as follows:

**Authority:** 19 U.S.C. 66, 1202 (Gen. Headnote 11), 1624.

2. It is proposed to revise § 132.1(d) to read as follows:

**§ 132.1 Definitions.**

* * * * *

(d) *Presentation.* "Presentation" is the delivery in proper form to the appropriate Customs officer of:

(1) An entry summary for consumption, which shall serve as both the entry and the entry summary, with estimated duties attached (see § 141.0a(b)); or

(2) An entry summary for consumption, which shall serve as both the entry and the entry summary, without estimated duties attached, if the entry/entry summary information and a valid scheduled statement date (pursuant to § 24.25 of this chapter) have been successfully received by Customs via the Automated Broker Interface; or

(3) A withdrawal for consumption with estimated duties attached.

3. It is proposed to revise the text of § 132.11(b) to read as follows (the cross references at the end of paragraph (b) remain unchanged):

**§ 132.11 Quota priority and status.**

* * * * *

(b) *Documentation and deposit of duties in proper form required.* Merchandise covered by an entry summary for consumption, which serves as both the entry and entry summary, or by a withdrawal for consumption, shall be regarded as entered for purposes of quota priority and shall acquire quota status if:

(1) The entry summary or withdrawal for consumption is in proper form, and duties have been attached to the entry summary or withdrawal for consumption in proper form; or

(2) The entry summary for consumption is in proper form, and the entry/entry summary information and a valid scheduled statement date (pursuant to § 24.25 of this chapter) have

VOL 54 ISS 45 MR 9 1989 UMI

been successfully received by Customs via the Automated Broker Interface.

* * * * *

4. It is proposed to revise § 132.11a(a) to read as follows:

**§ 132.11a Time of presentation.**

(a) *General rule.* Except as provided in paragraph (b) of this section, the time of presentation of an entry/entry summary for quota purposes shall be the time of delivery in proper form of:

(1) An entry summary for consumption, which serves as both the entry and the entry summary, with estimated duties attached; or

(2) An entry summary for consumption, which shall serve as both the entry and the entry summary without estimated duties attached, if the entry/entry summary information and a valid scheduled statement date have been successfully received by Customs via the Automated Broker Interface (see § 132.1(d)(2); payment must be subsequently made by the statement processing method as set forth in § 24.25 of this chapter); or

(3) A withdrawal for consumption with estimated duties attached.

* * * * *

5. It is proposed to amend § 132.11a by adding a new paragraph (c) to read as follows:

**§ 132.11a Time of presentation.**

* * * * *

(c) *Failure to use statement processing method.* If presentation is chosen to be made pursuant to § 132.11a(a)(2) and payment is not made as required through the statement processing method, the district director may require filing of an entry summary for consumption with estimated duties attached as described in § 132.11(a)(1) for future filings.

**§ 132.14 [Amended]**

6. It is proposed to amend the first sentences of subparagraphs (1), (2), (3), (4)(i) and (4)(ii) in § 132.14(a), by inserting the word "proper" before the words "presentation of an entry summary for consumption, or withdrawal for consumption."

7. It is also proposed to amend the first sentences of subparagraphs (1), (2), (3), (4)(i) and (4)(ii) in § 132.14(a) by removing the words "with estimated duties attached" following the words "presentation of an entry summary for consumption, or a withdrawal for consumption" and replacing them with "pursuant to § 132.1 of this part".

## PART 141—ENTRY OF MERCHANDISE

1. The general and relevant specific authority for Part 141, Customs Regulations, continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624. Subprt G also issued under 19 U.S.C. 1505.

2. It is proposed to revise the opening paragraph of § 141.101 to read as follows:

**§ 141.101 Time of deposit.**

Estimated duties shall either be deposited with the Customs officer designated to receive the duties at the time of the filing of the entry documentation or the entry summary documentation when it serves as both the entry and entry summary, or be electronically transmitted to Customs by the scheduled statement date according to the statement processing method as described in § 24.25 of this chapter, except in the following cases:

* * * * *

**§ 141.62 [Amended]**

2. It is proposed to amend the second sentence of § 141.62(b)(2)(ii) by inserting the words "or without the estimated duties attached, if the entry/entry summary information and a scheduled statement date have been successfully received by Customs via the Automated Broker Interface," between the words "with the estimated duties attached," and "shall be the time of presentation for quota purposes."

**§ 141.68 [Amended]**

3. It is proposed to amend § 141.68(b) by deleting the period at the end of the paragraph and adding, "except as provided in § 142.13(c)."

4. It is proposed to amend § 141.68(d) by inserting between the words "with estimated duties attached," and "as provided in § 132.11a of this chapter," the words "or if the entry/entry summary information and a valid scheduled statement date (pursuant to § 24.25 of this chapter) have been successfully received by Customs via the Automated Broker Interface, without the estimated duties attached,".

## PART 142—ENTRY PROCESS

1. The authority citation for Part 142 continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

2. It is proposed to revise § 142.13(c) to read as follows:

**§ 142.13 When entry summary must be filed at time of entry.**

* * * * *

(c) *Special Classes of merchandise*—(1) *Quota-class merchandise.* Quota-class merchandise shall not be released upon delivery of entry documentation before presentation of:

(i) An entry summary for consumption with estimated duties attached; or

(ii) A withdrawal for consumption, with estimated duties attached; or

(iii) An entry summary for consumption, without the estimated duties attached, if the entry/entry summary information and a valid scheduled statement date have been successfully received by Customs via the Automated Broker Interface. (See Part 132 and § 24.25 of this chapter.

(2) *Other classes of merchandise.* Entry summary documentation, with estimated duties attached, or a withdrawal for consumption with estimated duties attached, or an entry summary for consumption, without the estimated duties attached if the entry/entry summary information and a valid scheduled statement date have previously been transmitted to Customs via the Automated Broker Interface (see § 24.25 of this chapter) shall be filed at the time of entry before release of any other merchandise of a class designated by Customs Headquarters.

3. It is proposed to revise § 142.21(e) to read as follows:

**§ 142.21 Merchandise eligible for special permit for immediate delivery.**

* * * * *

(e) *Quota-class merchandise*—(1) *Tariff rate.* At the discretion of the district director, merchandise subject to a tariff-rate quota may be released under a special permit for immediate delivery provided the importer has on file a bond on Customs Form 301, containing the bond conditions set forth in § 113.62 of this chapter. An entry summary shall be properly presented pursuant to § 132.1 of this chapter within the time specified in § 142.23, or within the quota period, whichever expires first. If proper presentation is not made until after the tariff-rate quota is filled, the merchandise shall not be entitled to the quota rate of duty, and the importer shall pay duties at the over-quota rate.

(2) *Absolute.* At the discretion of the district director, perishable merchandise of a class approved by Customs Headquarters which is subject to an absolute quota may be released under a special permit for immediate delivery for removal to the importer's premises, or to any other location approved by the district director, until an entry summary is properly presented pursuant to § 132.1 of this chapter. A proper entry summary must be presented for merchandise so released within the time specified in § 142.23, or within the quota period, whichever expires first. If the absolute quota is filled before the importer has properly presented an entry summary,

he may either present an entry summary for warehouse or, under Customs supervision, export or destroy the merchandise.

* * * * *

4. It is proposed to revise § 142.22(b)(1) to read as follows:

**§ 142.22 Application for special permit for immediate delivery.**

* * * * *

(b) *Customs custody.* * * *

(1) An entry summary for consumption, with estimated duties attached; an entry summary for consumption without estimated duties attached, if entry/entry summary information and a valid scheduled statement date (pursuant to § 24.25 of this chapter) have successfuly been received by Customs via the Automated Broker Interface; an entry summary for warehouse; or an entry summary for entry temporarily under bond, which may be field in any of the circumstances under § 142.21 of this part except for merchandise released from warehouse under § 142.21(f) of this part;

* * * * *

## PART 143—CONSUMPTION, APPRAISEMENT, AND INFORMAL ENTRIES

1. The authority citation of Part 143 continues to read as follows:

Authority: 19 U.S.C. 66, 1481, 1484, 1498 1624.

2. It is proposed to revise the first sentence of § 143.28 to read as follows:

**§ 143.28 Deposit of duties and release of merchandise.**

Unless statement processing is used pursuant to § 24.25 of this chapter, the estimated duties and taxes, if any, shall be deposited at the time the entry is presented and accepted by a Customs officer, whether at the customhouse or elsehwere.* * *

**William von Raab,**

*Commissioner of Customs.*

Approved: March 2, 1989.

**Salvatore R. Martoche,**

*Assistant Secretary of the Treasury.*

## EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

### 29 CFR Part 1626

### Procedures; Age Discrimination in Employment Act

**AGENCY:** Equal Employment Opportunity Commission (EEOC, Commission).

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Commission hereby publishes a notice of proposed rulemaking (NPRM) under section 9 of the Age Discrimination in Employment Act of 1969 (ADEA), 29 U.S.C. 621 *et seq.*, providing that the one-year tolling provision of section 7(e)(2) of the ADEA, 29 U.S.C. 626(e)(2), applies to private party litigation.

**DATE:** Comments should be submitted on or before April 10, 1989.

**ADDRESS:** Comments should be submitted in quadruplicate, if possible, to: Executive Secretariat, EEOC, 2401 E Street NW., Washington, DC 20507.

**FOR FURTHER INFORMATION CONTACT:** John K. Light, Office of Legal Counsel, Room 209, EEOC, 2401 E Street NW., Washington, DC 20507, (202) 634-7623.

**SUPPLEMENTARY INFORMATION:**

### Background

Section 7(e)(2) of the ADEA (29 U.S.C. 626(e)(2)) provides for tolling the statute of limitations (as provided in section 6 of the Portal-to-Portal Act of 1947)[1] for up to one year while the Commission "is attempting to effect voluntary compliance with the requirements of this Act through informal methods of conciliation, conference, and persuasion pursuant to subsection (b)." Subsection (b) of section 7 is the provision that requires the Commission to engage in conciliation, conference, and persuasion efforts before it can institute court action under the ADEA.

After considering the language of the statutory provision, overall statutory scheme favoring voluntary compliance, its legislative background, and the court discussions on the subject of tolling, the Commission believes that Congress neither required nor intended that the one year tolling period provided by section 7(e)(2) be applied only to suits brought by the government. It is the view of the Commission that once section 7(b) conciliation, conference, and persuasion have been commenced by the Commission, the period of tolling applies regardless of whether the EEOC or a private party files an ADEA suit after the attempt at informal resolution fails.

This view of tolling is consistent with Congress' express preference in the ADEA for voluntary settlement of age discrimination claims as well as the experienced reality that unsuccessful section 7(b) conciliation, even of an allegation deemed meritorious by the government, may not always result in the Commission bringing suit. Thus, limiting tolling during section 7(b) conciliation to the government's right of action encourages charging parties to file protective suits, thereby derailing the voluntary settlement process, and may also reward employers for not engaging in prompt or serious conciliation efforts.[2] An interpretation applying section 7(e)(2) tolling to private as well as government actions is fully consistent with the ADEA's statutory scheme.

There is nothing in the statutory language of section 7(e)(2) or its legislative history which would contradict or prohiblt an interpretation applying tolling to private litigants. The Conference Committee report stated that:

> The Senate amendment amends section 7(e) of the act to provide that the statute of limitations as provided in section 6 of the Portal-to-Portal Act of 1947 shall be tolled (for a period not exceeding 2 years [conference agreement substituted 1 year]) during the period in which the Secretary of Labor [now EEOC] is attempting to effect voluntary compliance pursuant to section 7(b). This amendment does not apply to conciliation required by section 7(d). House Conf. Report No. 95-950, supra, p. 13, 1978 U.S. Code Cong. and Admin. News, p. 534.

This discussion does not limit the benefits of section 7(b) tolling exclusively to an action filed by the enforcement agency, it simply requires 7(b), as opposed to 7(d), conciliation efforts as a prerequisite for tolling.[3] As

[1] Section 6 of the Portal-to-Portal Act is made applicable by section 7(e)(1) of the ADEA to all litigation under the Act whether brought by the Commission or by private individuals.

[2] For example, there may be persons with meritorious claims who, at some point beyond the applicable statute of limitations but within the 1 year tolling period, learn that the government is not going to litigate on their behalf. It would not be in keeping with simple notions of fairness, nor with the concept that aggrieved individuals act as "private attorneys general" under the ADEA, to interpret section 7(e) as tolling the time frames solely for government suits.

[3] Section 7(d) conciliation simply requires the EEOC, upon receiving a charge, to promptly notify all persons named as prospective defendants and to promptly seek to eliminate any alleged unlawful practice by informal methods of conciliation, conference and persuasion. It is the informal, predetermination action that promptly follows the filing of a charge and in no event can delay a private suit by more than 60 days.

Section 7(b) conciliation follows written notice from the EEOC to prospective defendant(s) that it is prepared to commence conciliation pursuant to that section of the Act and is required before the Commission itself can file suit. Commission regulations provide that section 7(b) conciliation may be commenced whenever the Commission has a reasonable basis to conclude that a violation of the ADEA has occurred or will occur (ordinarily issued in the form of a Letter of Determination). 29 CFR 1626.15(b). *See also* H.R. Conf. Rep. No. 950, 95th Cong., 2d Sess. 13 (1978) (tolling under section 7(e)(2) "begin[s] when the Department of Labor

Continued

VOL 54 ISS 45 MR 9 1989 UMI

**ACTION:** Further notice of inquiry/Notice of proposed rulemaking.

**SUMMARY:** The Commission seeks further comment on those aspects of its cross-interest policy that were not abolished in its companion *Policy Statement*. The cross-interest policy restricts broadcast licensees' ability to enter into certain kinds of business relationships. In particular, the Commission seeks comment regarding: (1) Whether "key" employee relationships should be included in the ownership rules; (2) whether joint ventures and nonattributable equity interests cause sufficient concern to justify their further review by the Commission under a continued cross-interest policy; and, if so, how the Commission could better state what principles should govern such *ad hoc* review of those two relationships.

**DATES:** Comments are due by April 21, 1989, and reply comments are due by May 8, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Douglas Minster, Mass Media Bureau, Policy and Rules Division, (202) 632-7792.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Further Notice of Inquiry/Notice of Proposed Rulemaking (Further Notice)* in MM Docket No. 87-154, adopted October 27, 1988, and released February 28, 1989. The complete text of this *Further Notice* is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

**Summary of Further Notice of Inquiry and Notice of Proposed Rulemaking**

1. In this *Further Notice* the Commission seeks further comment concerning the cross-interest policy as it applies to "key employee" relationships, certain nonattributable equity interests and joint ventures. The cross-interest policy was originally developed as a corollary to the multiple ownership rules to minimize the perceived negative effects on diversity of viewpoint and economic competition of certain relationships not addressed by the rules. In a companion *Policy Statement* in this proceeding, the Commission is eliminating the cross-interest policy, except as it is applied to key employees, nonattributable equity interests and joint ventures.

2. A key employee, under existing case law, is a person who has a position of authority to implement programming decisions, sales practices, or station operations. The *Policy Statement* does not eliminate the restriction on key employee relationships because of concern that such employees exercise a level of control which, in combination with an attributable interest in a competing media outlet in the same area, might reduce diversity of viewpoint and economic competition. Thus, the Commission specifically requests comment on: (1) Whether, for regulatory purposes, key employees are distinguishable from officers and directors, and, if so, in what ways; (2) what criteria, if any, should be used to determine if a position entails a level of control warranting regulatory restrictions; (3) whether the original concerns underlying key employee relationships are already addressed sufficiently by the types of marketplace mechanisms and alternative remedies that led to our decision to abolish the restriction on other cross-interests; and (4) whether the public interest benefits derived from permitting marginal stations to resolve financial or programming difficulties through the use of experienced employees would offset any concerns about the adverse effect of allowing these relationships on viewpoint diversity and competition. If the Commission decides, at the conclusion of this proceeding, that continued regulatory oversight of such cross-interests is required, our preference is to include key employees in the attribution rules rather than proceed on an *ad hoc* basis without guidelines with regard to key employee cases.

3. The initial *Notice of Inquiry (Notice)* in this proceeding (52 FR 22504, June 12, 1987) also questioned the continued need for limiting nonattributable equity interests through the cross-interest policy. That aspect of the policy generally involves an individual who has an attributable or controlling interest in one station and a *substantial* equity interest in another station in the same market that is not attributable under our ownership rules. On the one hand, it could be argued that such interests may, in certain circumstances, engender concerns about arms length competition and diversity in markets in which the interest holder also has an attributable interest in another outlet. Such an attributable interest may be used to take action which would benefit or protect the nonattributable investment in a competing station, thus hindering economic competition. On the other hand, in the *Notice* we questioned whether such an anticompetitive result is probable and whether such concerns are addressed by the same marketplace constraints which contributed to our decision to eliminate the limitation on other cross interests. The *Notice* produced little record evidence regarding these matters.

4. Although the Commission is not reopening the attribution proceeding (49 FR 19482, May 8, 1984), we invite comment on whether nonattributable equity interests confer a level of control or create concerns sufficient to require some kind of regulatory limitation. commenters are asked to provide, wherever possible, data, studies, and other evidence in support of their position. In the event that commenters deem some form of continued case-by-case review of nonattributable equity interests to be appropriate, we invite them to identify, at least in general terms, categories of nonattributable equity interests requiring such review. In addition, commenters should address whether such review should be confined to particular geographic markets. To the greatest extent possible, we seek to develop clear principles to govern any *ad hoc* review found necessary at the conclusion of this proceeding.

5. The Commission also received few comments directly addressing the joint venture aspect of the cross-interest policy. Although the Commission has never explicitly defined joint ventures that fall within the ambit of the policy, they usually involve an association of two or more parties to carry out a business enterprise for profit. The *Notice* questioned whether joint ventures involving multiple broadcast stations in a market seeking to build or purchase another broadcast facility continue to require Commission oversight. It might be argued that arms-length competition may be reduced as a result of the close business relationship between the stations engaged in the venture. On the other hand, it may be equally arguable that the competitive nature of local media markets eliminates any benefit which may result from anticompetitive behavior by the participants in a joint venture. In a market with many stations, even if two stations attempted to collude through a joint venture, we question whether there would be a substantial decrease in the overall level of competition among broadcast stations in the area. If the possibility of anticompetitive behavior still exists, it may be more appropriate, as with the cross-interests we are now

was articulated as dictum in *Fulton v. NCR Corp.*, 472 F. Supp. 377, 382 (W.D. Va. 1979):

> The court does not necessarily read this limitation as saying that a period of section 7(b) conciliation attempts will never work to toll the period of limitations for bringing private actions under section 7B(c) (for which the prior period of conciliation attempts under section 7(d) is required). It may mean only that section 7(d) conciliations will work to toll the limitations period for *no* ADEA action, while section 7(b) conciliations may work to toll the limitations period for *any* ADEA suit, whether brought under section 7(b) [by the government] section 7(c) [by a private litigant]. (Emphasis in original).[4]

Three courts, including one court of appeals, have reached a different conclusion, albeit without a thorough analysis of the question. In *Heiar v. Crawford County*, 746 F.2d 1190, 1198 (7th Cir. 1984), *cert. denied*, 472 U.S. 1027 (1985), the court, in an opinion by Judge Posner, stated, in *dictum*:

> The conciliation referred to [in section 7(e)(2)]—conciliation under section 7[(b)—is that preceding suits by the EEOC. Conciliation in private actions is provided for separately in section 7[(d) * * *. The point is not that there are different forms of conciliation; it is that only the EEOC can use the period of conciliation to toll the statute of limitations.

In *Leite v. Kennecott Copper Corp.*, 558 F. Supp. 1170, 1172-73 (D. Mass.), *aff'd without opinion*, 720 F. 2d 658 (1st Cir. 1983), the court held that, notwithstanding the Commission's advice that its conciliation efforts would extend the statute of limitations for a charging party's private suit, tolling was inapplicable. According to the court, the Commission's advice "misstate[d] the law" because sec. 7(e)(2)'s "reference to [sec. 7](b) makes clear [that] this tolling provision applies only to the conciliation efforts preceding the institution of legal action by the [government], not to those that might precede a private civil action." 558 F. Supp. 1173 & n. 1. Finally, in *Hovey v. Lutheran Medical Center*, 516 F. Supp. 554, 556 (E.D.N.Y. 1981), the court, in holding that tolling was not available in a private suit, stated that "the tolling provision of [sec. 7](e)(2) applies only to the conciliatory efforts required by [sec. 7](b) preceding the institution of legal action by the Secretary [; it] does not refer to conciliation before a private civil action..." [5]

The Commission believes that these decisions are unpersuasive and incorrect on the issue of tolling.[6] The decisions discussed the issue, largely in dicta, only in a brief and conclusory manner without articulated reasoning and using as authority the same legislative history discussed above that clearly does not mandate that tolling only applies to government actions. To the contrary, the Commission views the legislative history and general structure of the ADEA enforcement scheme as evidencing Congress' understanding that section 7(b) conciliation and section 7(e)(2) tolling may occur in cases where the Commission does not ultimately bring suit. A clear indication of this fact is the statement in the Conference Committee Report that tolling under section 7(e)(2) "begin[s] when the Department of Labor [now EEOC] states, in a letter to the prospective defendant[s], that it is prepared to commence conciliation pursuant to section 7(b) of the act." H.R. Conf. Rep. No. 950, 95 Cong., 2d Sess. 13 (1978). Had Congress intended section 7(e)(2) tolling to be limited to the government, it could easily have said so. Instead of such a limitation, Congress stated in that section that "the statute of limitations," which applies to both private and government actions, "shall be tolled."

Therefore, the Commission believes that it is in the best interest of effective and efficient enforcement of the ADEA that the one-year tolling period provided by section 7(e)(2) be interpreted to apply to both Commission and private litigation. In order to make this purpose clear, the Commission hereby provides notice that it intends to modify its procedural regulation at 29 CFR 1626.15(b) to add the following statement at the conclusion of this subsection:

> This tolling period pursuant to section 7(e)(2) is applicable to both Commission and private party litigation.

**I. Impact Analysis—Classification-Executive Order 12291**

The proposed rule in this document is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

Similarly, the Chairman of the EEOC certifies under 5 U.S.C. Sec. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96-354), that this amendment will not result in a significant impact on a substantial number of small employers.

**List of Subjects in 29 CFR Part 1626**

Aged, Equal employment opportunity

Accordingly, the Commission proposes to amend 29 CFR 1626.15(b) as follows:

**PART 1626—[AMENDED]**

1. The authority citation for Part 1626 continues to read as follows:

> Authority: Sec. 9, 81 Stat 605, 29 U.S.C. 628 sec. 2, Reorg. Plan No. 1 of 1978, 3 CFR 321 (1979).

2. By adding a new sentence at the end of paragraph (b) to read as follows

**§ 1626.15 Commission enforcement**

* * * * *

(b) * * * The tolling period pursuant to section 7[e](2) is applicable to both Commission and private party litigation

* * * * *

Signed on 6th day of February at Washington, DC, for the Commission

**Clarence Thomas,**

*Chairman, Equal Employment Opportunity Commission.*

[FR Doc. 89-5324 Filed 3-8-89; 8:45 am]

BILLING CODE 6570-06-M

---

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Parts 73 and 76**

**[MM Docket No. 87-154; FCC 89-345]**

**Broadcast Television and Cable Television Service; Cross-Interest Policy**

**AGENCY:** Federal Communications Commission.

---

[now EEOC] states in a letter to prospective defendant(s), that it is prepared to commence conciliation pursuant to section 7(b) of the act.")

[4] Two other courts have stated in *dicta* in private ADEA actions that tolling under section 7(e)(2) was available for the time spent in conciliation. *See Miller v. International Telephone and Telegraph Co.*, 756 F.2d 20, 24 (2d Cir. 1985), *cert. denied*, 474 U.S. 1013 (1986); and *Vukota v. Bathlehem Steel Corp.*, 540 F. Supp. 1278, 1280 n. 13 (E.D. Pa. 1982), *aff'd without opinion*, 707 F.2d 1406 (3d Cir. 1983), *cert. denied*, 464 U.S. 836 (1983).

[5] *Hovey* and *Leite* cite to and erroneously rely upon the decision in *Fulton v. NCR Corp.*, discussed earlier, which supports the opposite view, *i.e.*, that tolling is available in a private action.

[6] By letter dated February 28, 1979, the Department of Labor, then responsible for ADEA enforcement, expressed the view that sec. 7(e) tolling was limited to the government's right of action. For the reasons discussed in the text, the Commission rejects this view.

VOL 54 ISS 45 MR 9 1989 UMI

permitting, to rely on Federal and state antitrust laws to prevent or remedy any abuses of joint venture relationships.

6. Thus, we invite comment on whether the growth of the media marketplace, in conjunction with alternative deterrents and remedies, is sufficient to reduce our concern that joint ventures will adversely affect the level of competition in a market. Finally, eliminating this aspect of the cross-interest policy so as routinely to permit joint ventures, may result in a number of public interest benefits. We ask whether such benefits outweigh the negative effect joint ventures are thought to have on local media competition. In short, we seek comment on whether it is necessary to continue to review joint ventures under the cross interest policy. Those who favor continued review should comment on whether such oversight should concur in all cases or should be limited to particular kinds of joint ventures or geographic areas.

**Paperwork Reduction Act Statement**

7. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose a new or modified information collection requirement on the public. Implementation of any new or modified requirement will be subject to approval by the Office of Management and Budget, as prescribed by the Act.

**Ex Parte Consideration**

8. This is a non-restricted proceeding. *See* Section 1.1231 of the Commission's Rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

**Comment Information**

9. Pursuant to applicable procedures set forth in Section 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415, 1.419, interested parties may file comments on or before April 21, 1989, and reply comments on or before May 8, 1989. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

**Initial Regulatory Flexibility Act Analysis**

10. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, this proceeding could, dependent on the comments received as part of the record, relieve the burden that these aspects of the cross-interest policy place on the broadcast industry. The proceeding was initiated to seek ways of easing such a burden. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision.

11. As required by section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IFRA) of the expected impact on small entities of the proposals suggested in this document. Written public comments are requested on the IFRA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the *Further Notice*, but they must have a separate and distinct heading designating them as responses to the Regulatory Flexibility Analysis. The Secretary shall send a copy of this *Further Notice*, including the IFRA, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act (Pub. L. No. 96-354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.*, (1981)).

12. Authority for this proposed rule making is contained in sections 1, 3, 4(i) and (j), 303, 308, 309, and 403 of the Communications Act of 1934, as amended.

Vol. 54, No. 45

Thursday, March 9, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### Feed Grain Donations for the Yankton Sioux Tribe Indian Reservation in South Dakota

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Yankton Sioux Tribe Reservation in South Dakota has been materially increased and become acute because of severe and prolonged drought, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Yankton Sioux Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation (CCC) for livestock feed for such needy members of the Tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the Tribe to be acute distress areas and authorize the donation of feed grain owned by the CCC to livestock owners who are determined by the Bureau of Indian Affairs, United States Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the CCC may commence upon March 1, 1989, and shall be made available through May 15, 1989, or such other date as may be stated in a notice issued by the USDA.

Signed at Washington, DC on March 2, 1989.

**Milton J. Hertz,**

*Administrator, Agricultural Stabilization and Conservation Service.*

BILLING CODE 3410-05-M

## Forest Service

### Flathead National Forest, Glacier View District, Flathead County, State of Montana; Werner Creek Timber Sale

**AGENCY:** Forest Service, Agriculture.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Forest Service will prepare an Environmental Impact Statement (EIS) to analyze and disclose the environmental impacts of a proposal to harvest and regenerate timber in portions of Werner Creek, on the Glacier View Ranger District. This EIS will tier to the Flathead National Forest Land and Resource Management Plan of January, 1986, which provides overall guidance in achieving the desired future condition for the area. The primary purpose and goal for the proposed action is to help satisfy short-term demands for timber, and maintain a continous supply of timber in the future.

While some preliminary scoping was done for this project during the preparation of an Environmental Assessment for Werner Creek in 1987-88, the Forest Service is seeking information and comments from Federal, State, and local agencies and other individuals or organizations who may now be interested in or affected by the proposed actions. This input will be used in preparing the Draft EIS. This process will include;

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Identification of additional reasonable alternatives.
5. Identification of potential environmental effects of the alternatives.
6. Determination of potential cooperating agencies and task assignments.

The agency invites written comments and suggestions on the issues and management opportunities in the area being analyzed.

**DATE:** Comments concerning the scope of the analysis should be received by April 1989 to receive timely consideration in the preparation of the draft EIS.

**ADDRESS:** Send written comments to Tom Hope, District Ranger, Glacier View Ranger District, P.O. Box W, Columbia Falls, MT 59912.

**FOR FURTHER INFORMATION CONTACT:** Cathy Calloway, Werner Creek Interdisciplinary Team Leader, or Tom Hope, District Ranger, Glacier View Ranger District, Flathead National Forest, P.O. Box W, Columbia Falls, MT 59912.

**SUPPLEMENTARY INFORMATION:** Management activities under consideration would occur in an area encompassing approximately 5400 acres of National Forest lands in the Big Creek Geographic Unit, on the Glacier View Ranger District, as delineated in the Flathead Forest Plan. Included in the area of analysis are all or portions of the following: sections 1-5, T32N, R22W; sections 25-28 and 33-36, T33N, R22W; sections 5-6 T32N, R21W; and sections 30-32, T33N, R21W, Principal Montana Meridian.

The Land and Resource Management Plan for the Flathead National Forest provides the overall guidance for management activities in the potentially affected area through its goals, objectives, standards and guidelines, and management area direction. In the Forest Plan, timber harvest and reforestation was tentatively scheduled in the Werner Creek area in 1990.

Most areas of proposed harvest and reforestation for the Werner Creek project are within Management Area 15. Forest plan direction states that Management Area 15 consists of lands where timber management with roads is economical and feasible. The management goal is to manage those lands suitable for timber production for the long-term growth and production of commercially valuable wood products as well as provide for soil and water protection, wildlife habitat, and roaded recreation opportunities.

In addition, road construction, re-construction, and timber harvest and reforestation may occur within

VOL
54
ISS
45
MR
9
1989
UMI

Management Area 12 (riparian areas along perennial streams) or Management Area 17 (riparian areas with typically intermitten streams). Management goals for Management Area 12 are to emphasize old-growth habitat, water quality and fisheries and vegetative diversity for wildlife habitat. Goals for Management Area 17 are similar, and also include maintaining a sustained yield of timber.

The analysis will consider a range of alternatives. One of these will be the "no-action" alternative, in which all harvest and regeneration activities would be deferred. Other alternatives will examine various levels and locations of harvest and regeneration to provide emphasis on differing mixes of timber and non-timber resource values.

The analysis will disclose the environmental effects of alternative ways of implementing the Forest Plan. The Forests Service will analyze and document the direct, indirect, and cummulative environmental effects of the alternatives. In addition, the EIS will disclose the analysis of site specific mitigation measures and their effectiveness.

Public participation is especially important at several points of the analysis. People may visit with Forest Service officials at any time during the analysis and prior to the decision. However, two periods of time are identified for the receipt of comments on the analysis. The two public comment periods are during the scoping process (now thru April 15, 1989) and in the review of the Draft EIS (May–June, 1989).

The Fish and Wildlife Service, Department of the Interior, will be informally consulted throughout the analysis. To meet the requirements of the Endangered Species Act, the Fish and Wildlife Service will review the EIS and biological evaluation and if necessary, render a formal Biological Opinion of the effects on the Threatened and Endangered Species including grizzly bear, grey wolf, and bald eagle.

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review in May 1989. At that time the EPA will publish a notice of availability of the DEIS in the **Federal Register**. After a 45-day public comment period, the comments received will be analyzed and considered by the Forest Service in the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by August 1989. The Forest Service will respond in the FEIS to the comments received on the DEIS. The District Ranger who is responsible official for this EIS will make a decision regarding this proposal considering the comments, responses and environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies. The decision and reasons for the decision will be documented in a Record of Decision.

Tom Hope, District Ranger for the Glacier View Ranger District, Flathead National Forest, is the Responsible Official.

Date: February 28, 1989.

**Tom Hope,**

## Flathead National Forest, Glacier View Ranger District, Flathead County, Montana, Lakalaho Timber Sale

**AGENCY:** Forest Service, Agriculture.

**ACTION:** Notice of Intent To Prepare an Environmental Impact Statement.

**SUMMARY:** The Forest Service will prepare an Environmental Impact Statement (EIS) to analyze and disclose the environmental impacts of a proposal to harvest and regenerate timber in portions of Lakalaho Creek, on the Glacier View Ranger District, Flathead County, Montana. This EIS will tier to the Flathead National Forest Land and Resource Management Plan of January, 1986, which provides overall guidance in achieving the desired future condition for the area. The purpose and goals for the proposed action are to help satisfy short-term demands for timber and to maintain a continuous supply of timber in the future

Some preliminary scoping was done for this project during the preparation of an Environmental Assessment for Lakalaho Creek in 1987–88. The Forest Service is now seeking additional information and comments from Federal, State, and local agencies and other individuals or organizations who may now be interested in or affected by the proposed actions. This input will be used in preparing the Draft EIS. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Identification of additional reasonable alternatives.
5. Identification of potential environmental effects of the alternatives.
6. Determination of potential cooperating agencies and task assignments.

The agency invites written comments and suggestions on the issues and management opportunities in the area being analyzed.

**DATE:** Comments concerning the scope of the analysis should be received by April 7, 1989 to receive timely consideration in the preparation of the draft EIS.

**ADDRESS:** Send written comments to Tom Hope, District Ranger, Glacier View Ranger District, P.O. Box W, Columbia Falls, MT 59912.

**FOR FURTHER INFORMATION CONTACT:** Dave Cawrse, Lakalaho Interdisciplinary Team Leader, or Tom Hope, District Ranger, Glacier View Ranger District, Flathead National Forest, P.O. Box W, Columbia Falls, MT 59912.

**SUPPLEMENTARY INFORMATION:** Management activities under consideration would occur in an area encompassing approximately 3600 acres of National Forest lands in the Big Creek Geographic Unit, on the Glacier View Ranger District, as delineated in the Flathead Forest Plan. Included in the area of analysis are all or portions of the following: sections 12, 13, 14, and 24, T32N, R22W; and sections 5, 7, 8, 17–20, T32N, R21W, Principal Montana Meridian

The land Resource Management Plan for the Flathead National Forest provides the overall guidance for management activities in the potentially affected area through its goals, objectives, standards and guidelines, and management area direction. In the Forest Plan, timber harves and reforestation was tentatively scheduled in the Lakalaho Creek area in 1990. The Lakalaho Creek analysis will examine site specific activities that are consistent with the Forest Plan guidelines, standards, and management area goals. Road building and timber harvest are proposed to take place in the following management areas within the Lakalaho project area.

Management Area 7: Consists of timberlands in visually sensitive areas. Management activities are not dominant. A pleasing, naturally appearing landscape is maintained.

Management Area 15: Consists of lands classified as suitable for timber management, and timber harvest is scheduled. The management goal is to manage these lands for the long-term growth and production of commercially valuable wood products as well as provide soil and water protection, wildlife habitat maintenance, and roaded natural-appearing recreation opportunities.

The analysis will consider a range of alternatives. One of these will be the "no-action" alternative, in which all harvest and reforestation activities would not be done. Other alternatives will examine various levels, locations and cutting methods of harvest and reforestation to provide emphasis on different mixes of timber and non-timber resources.

The Forest Service will analyze and document the direct, indirect, and cumulative environmental effects of the alternatives. In addition, the EIS will disclose the analysis of site specific mitigation measures and their effectiveness.

Public participation is especially important at several points of the analysis. People may visit with Forest Service officials at any time during the analysis and prior to the decision. Two periods of time, however, are identified for the receipt of comments on the analysis.

The two public comment periods are during the scoping process (now thru April 7, 1989) and in the review of the Draft EIS (May, 1989).

The Fish and Wildlife Service, Department of the Interior, will be informally consulted throughout the analysis. To meet the requirements of the Endangered Species Act, the Fish and Wildlife Service will review the EIS and biological evaluation and if necessary, render a formal Biological Opinion of the effects on the Threatened and Endangered Species, the grizzly bear and gray wolf.

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review in May 1989. At that time the EPA will publish a notice of availability of the DEIS in the **Federal Register**. After a 45-day public comment period, the comments received will be analyzed and considered by the Forest Service in the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by August, 1989. The Forest Service will respond in the FEIS to the comments, responses and environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies. The decision and reasons for the decision will be documented in a Record of Decision.

Date: February 28, 1989.

## Packers and Stockyards Administration

### Amendment to Certification of Central Filing System—Louisiana

The Statewide central filing system of Louisiana has been previously certified, pursuant to section 1324 of the Food Security Act of 1985, on the basis of information submitted by Bob Odom, Commissioner of Agriculture, for farm products produced in that State (51 FR 47036, December 30, 1986; 53 FR 15722, May 3, 1988; and 53 FR 24755, June 30, 1988).

The same system is hereby certified on the basis of information submitted by the Lousiana Department of Agriculture & Forestry for additional farm products produced in that State as follows: Potatoes, Irish, Eggplant, Okra, Crabs.

This is issued pursuant to authority delegated by the Secretary of Agriculture.

**Authority:** Sec. 1324(c)(2), Pub. L. 99-198, 99 Stat. 1535, 7 U.S.C. 1631(c)(2); 7 CFR 2.17(e)(3), 2.56(a)(3), 51 FR 22795.

Dated: March 6, 1989.

## COMMISSION ON CIVIL RIGHTS

### Pennsylvania Advisory Committee Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of Pennsylvania Advisory Committee to the Commission will convene at 9:15 a.m. and adjourn at 12:45 p.m. on Thursday, April 6, 1989, in the Third Floor Public Information Room of the Federal Reserve Bank Building, 100 North Seventh Street, Philadelphia, Pennsylvania. The meeting will feature a forum entitled "Implementing the 1988 Fair Housing Amendments Act" which will begin at 9:45 a.m. in the same location. Federal, State, and local government officials and representatives of nonprofit institutions will make presentations on the subject.

Persons desiring additional information on this matter should contact Committee Chairperson Susan M. Wachter (215/898-6355) or John I. Binkley, Director of the Eastern Regional Division of the Commission at (202/523-5264 or TDD 202/376-8117). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 2, 1989.

**Melvin L. Jenking,**

*Acting Staff Director.*

**DEPARTMENT OF COMMERCE**

**International Trade Administration**

**Export Trade Certificate of Review Application**

**AGENCY:** International Trade Administration, Commerce.

**ACTION:** Notice of application.

**SUMMARY:** The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the Certificate should be issued.

**FOR FURTHER INFORMATION CONTACT:** Thomas H. Stillman, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

**SUPPLEMENTARY INFORMATION:** Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and Federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 303(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the Federal Register identifying the applicant and summarizing its proposed export conduct.

**Request for Public Comments**

Interested parties may submit written comments relevant to the determination whether the Certificate should be issued. An original and five (5) copies should be submitted not later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 12233, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 89-00005." A summary of the application follows.

**Summary of Application**

*Applicant:* CherreX Corporation ("CherreX"), 2220 University Park Drive, Suite 200, Contact: C. Richard Johnston, Telephone: 517/347-0010.

*Application No.:* 89-00005.

*Date Deemed Submitted:* February 28, 1989.

*Members:* Burnette Foods, Inc., Hartford, MI; Beukirk Processing, Inc., Lawrence, MI; Cherry Central Cooperative, Inc., Traverse City, MI; Cherry Marketing Institute, Inc., Okemos, MI; Comstock/Michigan Fruit Division (a division of Curtice Burns Foods), Rochester, NY; DeRuiter Farms, Hart, MI; Great Lakes International Trading, Inc., Traverse City, MI; Great Lakes Packing Company, Kewaskia, MI; Ludington Fruit Exchange, Inc., Ludington, MI; and Stanek & Sons, Inc., Traverse City, MI.

*Export Trade:*

Products. Processed red cherries (prunus cerasus) and cherry products, including cherry pie filling, water pack cherries, cherry juice concentrate, dried cherries, frozen pack cherries, individually quick frozen cherries, cherry sausage, and cherry jams, jellies, and sauces.

Export Trade Facilitation Services (as they relate to the export of Products). Trade promotion, marketing, sales, and transportation services (including packing, transportation, wharfing and handling, trade documentation, freight forwarding, storage, and customs clearance).

Technology Rights. Technology related to the processing of the Products.

*Export Markets:*

All parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

*Export Trade Activities and Methods of Operation:*

CherreX and the Members propose to engage in the joint export of the Products by:

1. Selling the Products in Export Markets under the CherreX or other common brand or label;

2. CherreX negotiating and entering into agreements, on behalf of and with the advice of the Members, for the transportation, storage, and promotion (including trade shows, advertising, and contracting marketing services) of the Members' Products in Export Markets;

3. Sharing transportation, storage, and promotion costs associated with the export of the Products through CherreX;

4. Establishing prices and terms for the sale of the Products in Export Markets;

5. Allocating export sales and export markets among the Members on the basis of each Member's commitment of Products for sale in Export Markets;

6. CherreX granting to nonmembers exclusive distributorship rights in specific Export Markets;

7. CherreX negotiating and entering into agreements, on behalf of and with the advice of the Members, with buyers in Export Markets for the sale of the Members' Products;

8. Advising and cooperating with the U.S. Government in establishing procedures regulating the export of the Products;

9. Negotiating and entering into agreements with foreign governments and foreign persons regarding the quantities, time periods, prices, and terms and conditions upon which the Members shall export the Products;

10. Developing new processing technology, new product applications and new products for Export Markets; and

11. Licensing processing technology to licensees in Export Markets.

Date: March 3, 1989.

**National Technical Information Service**

**Intent To Grant Exclusive Patent License; Uni-Star Industries, Ltd.**

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Uni-Star Industries, Ltd., having a place of business in Cuba, IL 61427, an exclusive license in the United States and certain foreign countries to practice the invention embodied in the U.S. Patent 4,454,268 (Patent Application Serial Number 6-607,191, "Starch-Based Semipermeable Films." The patent rights in this invention have been assigned to the United States of America, as represented by the Department of Commerce.

The intended license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended licenses would not serve the public interest.

Inquiries, comments and other materials relating to the intended license must be submitted to Douglas J. Campion, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Copies of the subject patent may be purchased from the Commissioner of Patents, U.S. Patent & Trademark Office, Washington, DC 20231.

**Douglas J. Campion,**

**Advisory Group on Electron Devices; Advisory Committee Meeting**

**SUMMARY:** Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

**DATE:** The meeting will be held at 0800, Wednesday, 5 April 1989.

**ADDRESS:** The meeting will be held at Palisades Institute for Research Services, Inc., 2940 Presidential Drive, Suite 210, Fairborn, Ohio 45433.

**FOR FURTHER INFORMATION CONTACT:** Harold Summer, AGED Secretariat, 2011 Crystal Drive, Suite 307, Arlington, Virginia 22202.

**SUPPLEMENTARY INFORMATION:** The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include classified program details throughout.

In accordance with section 10(d) of Pub. L. 92-463, as amended, (5 U.S.C. App. II 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

**Defense Science Board 1989 Summer Study on Improving Test and Evaluation Effectiveness**

**ACTION:** Notice of advisory committee meetings.

**SUMMARY:** The Defense Science Board 1989 Summer Study on Improving Test and Evaluation Effectiveness will meet in closed session on April 11-12, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will examine the contributions of modeling and simulation to Defense test and evaluation so as to improve the acquisition process.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

### Defense Science Board 1989 Summer Study on Non-Cooperative Identification

**ACTION:** Notice of advisory committee meetings.

**SUMMARY:** The Defense Science Board 1989 Summer Study on Non-Cooperative Identification will meet in closed session on April 13–14, May 17–18, and June 14–15, 1989 at the VEDA Corporation, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will receive classified briefings, study classified documents, and conduct classified interviews on technologies, intelligence data, and programs relating to noncooperative target identification techniques.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

### Defense Science Board Task Force on Low Observable Technology

**ACTION:** Notice of advisory committee meetings.

**SUMMARY:** The Defense Science Board Task Force on Low Observable Technology will meet in closed session on March 30 and April 20, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will evaluate low observable technology.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

## Department of the Air Force

### Privacy Act of 1974; Amended Record System Notice

**AGENCY:** Department of the Air Force, DoD.

**ACTION:** Notice of an amendment of an Air Force System of Record.

**EFFECTIVE DATE:** This amendment shall be effective without further notice on or before April 10, 1989, unless comments are received which result in a contrary determination.

**ADDRESS:** Send any comments to Ms. Linda G. Adams, SAF/AADAQI, The Pentagon, Washington, DC 20330–1000, telephone (202) 694–3488, Autovon: 224–3488.

**SUPPLEMENTARY INFORMATION:** The Air Force is amending a system of records subject to the Privacy Act of 1974 (5 U.S.C. 552a). The record system was previously published in the Federal Register at 50 FR 24365, June 28, 1985. Besides minor editorial changes, the Air Force is amending the Routine Uses provision of the notice so as to add additional users. Disclosures of information can now be made to Federal, state or local government investigative agencies if necessary to obtain information for a human/personnel reliability determination; and to the National Aeronautics and Space Administration (NASA) concerning its making, issuing, or retaining a human/personnel reliability determination regarding unescorted entry to specified space launch and operations related facilities or areas, or assignment to designated sensitive positions related to space launch and operations activities.

The publication of this amendment is required by subsection (e)(4)(11) of the Privacy Act (5 U.S.C. 552a). This amendment is not within the purview of subsection (r) of the Act that requires the submission of a new or altered system report.

The complete Air Force inventory of record system notices subject to the Privacy Act has been published in the Federal Register to this date as listed:

50 FR 22332 May 29, 1985 (Compilation, changes follow)
50 FR 24672 June 12, 1985
50 FR 25737 June 21, 1985
50 FR 48477 November 8, 1985
50 FR 50827 December 10, 1985
51 FR 4531 February 5, 1986
51 FR 7371 March 3, 1986
51 FR 16735 May 6, 1986

51 FR 41402 November 14, 1986
51 FR 44332 December 9, 1986
52 FR 11845 April 13, 1987
53 FR 24354 June 28, 1988
53 FR 45809 November 14, 1988
53 FR 50072 December 13, 1988
53 FR 51391 December 21, 1988

March 3, 1989.

**L.M. Bynum,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

**F205 AFSC A**

**SYSTEM NAME:**

Space Human Assurance and Reliability Program (SHARP).

**SYSTEM LOCATION:**

HQ SD/CLFRX, P.O. Box 92960, Los Angeles AFB, Los Angeles, CA 90009–2960; HQ SAMTO/XOO, Vandenberg AFB, CA 93437–6021; WSMC/SP, Vandenberg AFB, CA 93437–6021; ESMC/SPI, Patrick AFB, FL 32925–6215; and CSTC/VOB, P.O. Box 3430, Onizuka AFB, CA 94088–3430.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Military, civil service, and contractor personnel who require SHARP certification for unescorted entry to specified space launch and operations related facilities or areas at certain Air Force or National Aeronautics and Space Administration (NASA) installations or activities or for assignment to designated sensitive space launch and operations positions at such installations or facilities.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Documentation used to request certification, to include the applicant's name, social security number, date and place of birth, level of security investigation, medical, financial, and arrest information, and data pertaining to the applicant's certification, such as date of certification, date certification suspended, withdrawn, or denied (as appropriate) and date recertification required.

**AUTHORITY FOR MAINTAINING THE SYSTEM:**

Title 50, U.S.C. 797, Internal Security Act of 1950; 5 U.S.C. 301, Departmental Regulations; 10 U.S.C. 8013, "Secretary of the Air Force: Power and duties: Delegation by;" Executive Order 9397, November 1943 (SSN) Numbering System for Federal Register Accounts Relating to Individual Persons; 32 CFR 809a.1, Enforcement of Order at Air Force Installations, Air Force Regulation (AFR) 127–2, ¶¶ 3–6 & 4–4, U.S. Air Force Mishap Prevention Program; Space Division Regulation (SDR) 55–3, Space Human Assurance and Reliability Program (SHARP).

**PURPOSES:**

To obtain background information for investigative and evaluative purposes for use in making human/personnel reliability determinations under SHARP regarding personnel (a) seeking unescorted entry to specified space launch and operations related facilities or areas at certain Air Force or National Aeronautics and Space Administration (NASA) installations or activities, or (b) occupying sensitive positions related to space launch and operations designated by the commander of such installations.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

To federal, state, or local government investigative agencies if necessary to obtain information for a human/personnel reliability determination; to NASA concerning its making, issuing, or retaining a human/personnel reliability determination regarding unescorted entry to specified space launch and operations related facilities or areas, or assignment to designated sensitive positions related to space launch and operations activities. See also, the "Blanket Routine Uses" set forth at the beginning of the Department of the Air Force's listing of record system notices and reprinted in Air Force Pamphlet 12–36, Privacy Act Systems of Records.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Maintained in file folders, binders, card files, computer files, and computer products.

**RETRIEVABILITY:**

Filed by name and security number.

**SAFEGUARDS:**

Records are accessed by the custodian of the records system and by personnel responsible for maintaining and updating the record system in performing their official duties. Such personnel are screened and cleared for access to SHARP data on a need-to-know basis. Records are stored in locked cabinets or file containers. Computerized files reflecting the identity and program status of applicants for SHARP certification are protected against unauthorized access. Computers containing such data are located in controlled access areas or otherwise secured so as to preclude unauthorized access.

**RETENTION AND DISPOSAL:**

Records are destroyed in accordance with AFR 12–50, Table 205–5. Unit requests for investigation or unescorted entry are destroyed when no longer needed. AFR 12–50, Table 205–5, Rule 7. Completed personal history statements or comparable forms at units of assignment are destroyed when an individual's employment is terminated. AFR 12–50, Table 205–5, Rule 12. Documents are shredded, pulped, or burned to preclude the disclosure of Privacy Act information.

**SYSTEM MANAGER(S) AND ADDRESS:**

Headquarters Space Division, Deputy Commander for Launch Operations, Plans and Operations Division, SHARP Program Manager, SAMTO/XOO, Vandenberg AFB, CA 93437–6021; SHARP Administrator, HQ SD/CLFRX, P.O. Box 92960, Los Angeles AFB, Los Angeles, CA 90009–2960; SHARP Administrator, WSMC/SP, Vandenberg AFB, CA 93437–6021; SHARP Administrator, ESMC/SPI, Patrick AFB, FL 32925–6215; and SHARP Administrator, CSTC/VOB, P.O. Box 3430, Onizuka AFB, CA 94088–3430.

**NOTIFICATION PROCEDURES:**

Individuals can ascertain if their records are in the system by contacting the system manager or the system location where the requester applied for SHARP certification. Requesters should identify themselves by name and social security number to facilitate access.

**RECORD ACCESS PROCEDURES:**

Written requests should be addressed to the system manager or to the system location where the requester applied for SHARP certification. For personal visits, the requester may be asked to show a valid identification card, a driver's license, or some similar proof of identity.

**CONTESTING RECORDS PROCEDURES:**

The rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the system manager and are published in Air Force Regulation 12–35, 32 CFR Part 806b.

**RECORD SOURCE CATEGORIES:**

Information is provided by the individual; his or her supervisor; the servicing security police organization; various federal, state, and local investigative agencies; and the local SHARP Administrator or equivalent NASA official.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

## DEPARTMENT OF EDUCATION

**[CFDA No.: 84.129]**

### State Vocational Rehabilitation Unit In-Service Training Program; New Awards for Fiscal Year (FY) 1989

*Purpose of Program:* This program provides grants to State agencies and other public or nonprofit agencies and organizations, including institutions of higher education, to support special projects for training State vocational rehabilitation unit personnel in program areas essential to the effective management of the unit's program of vocational rehabilitation services or in skill areas that will enable State unit personnel to improve their ability to provide vocational rehabilitation services to individuals with severe disabilities. Pursuant to 34 CFR 385.33(a), fiscal year 1989 funds are available under this program for the support of new projects in Department of Education Regions I, II, IV, V, VII, IX, and X only.

*Deadline for Transmittal of Applications:* May 31, 1989.

*Applications Available:* March 10, 1989.

*Estimated Total Available Funds:* $1,576,400.

*Estimated Available Funds:*

Region I—$249,650
Region II—$9,500
Region IV—$858,100
Region V—$209,225
Region VII—$16,850
Region IX—$271,850
Region X—$161,225

*Estimated Range of Awards:* $5,500–$127,400.

*Estimated Average Size of Awards:* $39,410.

*Estimated Number of Awards:*

Region I—0
Region II—1
Region IV—13
Region V—4
Region VII—1
Region IX—5
Region X—7

**Note:** The Department is not bound by any estimates in this notice.

*Project Period:* Up to 36 months.

*Applicable Regulations:* (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 80, and 85; and (b) the regulations for this program in 34 CFR Parts 385 and 388.

*For Applications or Information Contact:* Mary Ford, U.S. Department of Education, 400 Maryland Avenue SW., Room 3332 (Switzer Building), Washington, DC 20202–2650. Telephone (202) 732–1351.

**Program Authority:** 29 U.S.C. 774.

Dated: March, 6, 1989.

BILLING CODE 4000–01–M

## DEPARTMENT OF ENERGY

### Floodplain/Wetlands Involvement for the Proposed Clean Coal Technology Project at City Water Light & Power, Lakeside Station, Unit 7, Springfield, IL

**AGENCY:** Department of Energy (DOE).

**ACTION:** Notice of floodplain/wetlands involvement.

**SUMMARY:** Under the Clean Coal Technology Program, DOE proposes to fund, in part, a project entitled "Enhancing the Use of Eastern and Midwestern Coals by Gas Reburning-Sorbent Injection at City Water Light & Power, Lakeside Station, Unit 7." Pursuant to 10 CFR Part 1022 (DOE's "Compliance with Floodplain/Wetlands Environmental Review Requirements"), DOE has determined that this action would involve activities within a floodplain/wetlands and, therefore, the following notice is submitted for public review and comment.

In accordance with DOE regulations for compliance with floodplain/wetland environmental review requirements (10 CFR Part 1022), DOE will prepare a floodplain/wetland assessment for this site. The floodplain/wetland assessment will be incorporated into the environmental assessment to be prepared for this proposed action. Maps and further information are available from DOE at the address shown below.

**DATE:** Any comments are due on or before March 24, 1989.

**ADDRESS:** Address comments to the Pittsburgh Energy Technology Center, Department of Energy, P.O. Box 10940, Pittsburgh, PA 15236. All comments should refer to the project title.

**FOR FURTHER INFORMATION CONTACT:** Dr. Earl Evans, Environmental Project Manager, Pittsburgh Energy Technology Center, Department of Energy, P.O. Box 10940, Pittsburgh, PA 15236, (412) 892–5709.

**SUPPLEMENTARY INFORMATION:** The proposed project is a field evaluation of the effectiveness of gas reburning-sorbent injection (GR–SI) technologies in controlling $NO_x$ and $SO_2$ emissions from a coal-fired boiler equipped with a cyclone combustor. The evaluation will be conducted at City Water Light and Power (CWLP), Lakeside Station. Lakeside Station includes three coal-fired steam generating electrical units with a total net generating capacity of 100 MWe. The project will be conducted in Unit 7, a 33 MWe cyclone-fired boiler.

Lakeside Station and the adjacent Dallman Station occupy a 75-acre site on the northwest shore of Lake Springfield in Sangamon County, Illinois. Coal combustion and flue gas cleaning wastes are transported to an existing on-site waste disposal area located immediately north of Lake Springfield. This disposal area includes three ash ponds for wet disposal of fly ash and bottom ash from the two stations, and three dry landfill cells for disposal of dewatered flue gas desulfurization sludge from Dallman Station. The flood zone map from the Federal Emergency Management Agency for the Lakeside Station area shows that the power station is not located within the floodplain. However, the waste disposal area is located within the 100-year floodplain of Lake Springfield, i.e. an area with a one percent chance of being flooded in any one year.

The power station area does not contain wetlands. However, information obtained from the U.S. Fish and Wildlife Service indicates that the existing ash pond and dry landfill cells contain wetland areas. The ash pond contains wetlands that are classified as lacustrine littoral unconsolidated shore seasonal diked/impounded wetlands and lacustrine limnetic unconsolidated bottom permanent diked/impounded wetlands. The dry landfill cells contain wetlands that are classified as palustrine unconsolidated bottom intermittently exposed diked/impounded wetlands.

The Illinois Department of Conservation, which compiled the wetlands map for the U.S. Fish and Wildlife Service, indicates that the ash pond and landfill wetlands are so identified because they contain standing water, and not because they support aquatic life. The ponds and landfill cells were excavated for the purpose of waste disposal, and did not contain standing water or support aquatic life prior to excavation.

Project construction will involve retrofit to the existing power plant. All construction will take place in the immediate vicinity of the boiler except pipeline installation, which will involve on-site construction of a 1400-foot natural gas pipeline. Once the equipment has been installed, the GR–SI demonstration will operate for a period of 12 months.

Construction of the GR–SI equipment will involve internal structural retrofit of the existing plant. The natural gas pipeline will be constructed entirely within the boundaries of the site and will not traverse floodplains or wetlands. The only project activity with the potential to impact the floodplain or wetlands involes use of the existing ash pond and dry landfill cells.

Gas burning is not expected to change the properties of either the fly ash or bottom ash produced. Sorbent injection will not affect the bottom ash, but the fly ash will be altered to contain appreciable amounts of calcium sulfate and unreacted sorbent. The sorbent-modified fly ash will be similar in character to the flue gas desulfurization scrubber sludge now produced at the adjacent Dallman Station. Thus, the by-product materials to be produced by Lakeside Station, Unit 7, during the GR–SI demonstration project will have esentially the same characteristics as the materials now generated at the CWLP plant.

During the GR–SI demonstration, fly ash from Unit 7 will be collected dry and placed in the landfill cells. Bottom ash will continue to be sluiced to the ash pond. The annual waste generated by the CWLP plant during the GR–SI demonstration is expected to result in a 3.0 percent decrease in the wet disposal requirement and an 11.2 percent increase in the dry disposal requirement. The waste placed in the dry disposal cells as a result of the GR–SI project will consume approximately 0.5 percent of the remaining usable volume and will shorten the life of the cells by approximately 0.15 years.

Issued at Washington, DC, this 2nd day of March, 1989, for the United States Department of Energy.

**J. Allen Wampler,**

*Assistant Secretary, Fossil Energy.*

BILLING CODE 6450–01–M

**[ERA Docket No. 89–05–NG]**

### Gas Masters, Inc.; Application To Export Natural Gas to Canada and Mexico

**AGENCY:** Office of Fossil Energy, Department of Energy.

**ACTION:** Notice of application for blanket authorization to export natural gas to Canada and Mexico.

**SUMMARY:** The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on January 31, 1989, of an application from Gas Masters, Inc. (GMI), for blanket authorization to export a total of up to 100 Bcf of natural gas from the United States to Canada and Mexico for short-term and spot makret sales over a two-year term beginning on the date of the first delivery. GMI, a Texas corporation with its principal place of business in Houston, proposes to export natural gas for its own account or act as broker for both U.S. suppliers and foreign purchasers. GMI intends to use existing pipeline facilities for the transportation of the volumes to be exported, and to submit quarterly reports detailing each transaction.

The application is filed pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–127. Protests, motions to intervene, notices of intervention, requests for additional procedures and written comments are invited.

**DATE:** Protexts, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than April 10, 1989.

**FOR FURTHER INFORMATION:**

Frank Duchaine, Office of Fuels Programs, Office of Fossil Energy, Forrestal Building, Room 3H–087, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6233.

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

**SUPPLEMENTARY INFORMATION:**

This export application will be reviewed pursuant to section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order No. 0204–127. In deciding whether the proposed export of natural gas is in the public interest, domestic need for the gas will be considered and any other issue determined to be appropriate, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties that may oppose this application should comment on these matters.

All parties should be aware that the approval of GMI's application may permit the export of the gas at any point of exit on the international border where existing transmission facilities are located.

GMI requests that an authorization be granted on an expedited basis. A decision on GMI's request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

**NEPA Compliance**

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to it guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, effective on an interim basis upon publication. In that notice, the DOE proposed to amend the department's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import-export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the action is not a major Federal action under NEPA. Unless comments are received indicating the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

**Public Comment Procedures**

In response to this notice, any person may file a protest, motion to intervene

VOL 54 ISS 45 MR 9 1989 UMI

or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590.

Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs, Fossil Energy, Room 3F-056, FE-50, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., April 10, 1989.

A decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. A request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request of a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of GMI's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on March 2, 1989.

**J. Allen Wampler,**

*Assistant Secretary Fossil Energy.*

BILLING CODE 6450-01-M

## Office of Nuclear Energy

### Certification of the Radiological Condition of the National Guard Armory in Chicago, IL

**AGENCY:** Office of Remedial Action and Waste Technology, Department of Energy.

**ACTION:** Notice of certification.

**SUMMARY:** The Department of Energy has completed radiological surveys and taken remedial action to decontaminate the National Guard Armory in Chicago, Illinois. The site was found to contain quantities of radioactive material remaining from wartime activities conducted at the site by the Manhattan Engineer District/Atomic Energy Commission.

**FOR FURTHER INFORMATION CONTACT:** James J. Fiore, Division of Facility and Site Decommissioning Projects, Office of Remedial Action and Waste Technology, U.S. Department of Energy, Washington, DC 20545, (301) 353-5272.

**SUPPLEMENTARY INFORMATION:** The Department of Energy (DOE), Office of Nuclear Energy, Office of Remedial Action and Waste Technology, Division of Facility and Site Decommissioning Projects, has implemented a remedial action project at the National Guard Armory (NGA) in the Chicago, Illinois area as part of the Formerly Utilized Sites Remedial Action Program (FUSRAP), which was initiated by the United States Government in 1974 to identify, clean up, or otherwise control sites where residual radioactive material (exceeding current guidelines) remains from the early years of the nation's atomic energy program or from commercial operations causing conditions that Congress has mandated DOE to remedy.

The NGA was used beginning in March 1942 by the Manhattan project when space shortages occurred at the University of Chicago. The Atomic Energy Commission (AEC), which succeeded the MED, ceased use of the NGA in 1951.

Available information indicates that the NGA was utilized to store and process uranium metal. The building was the shipping and central procurement location for the Metallurgical Laboratory in 1943, and records indicate that uranium metal stock was received and temporary stored at the NGA in 1944.

Apparently, the armory storeroom was used to store grinding wastes and uranium shavings, because one of the uranium fires in the armory occurred in the northeast corner of this room.

In 1987, the subject property was decontaminated. The post-remedial action survey has demonstrated and DOE has certified that radiological conditions at the affected property are consistent with applicable criteria and that use of the property presents no radiological hazard to the general public or to site occupants. These findings are supported by the DOE *Certification Docket for the Remedial Action Performed at National Guard Armory in Chicago, Illinois from April 1987 to June 1987.* Accordingly, this property is released from the Formerly Utilized Sites Remedial Action Program.

This certification docket will be available for review between 9:00 a.m. and 4:00 p.m., Monday through Friday (except on Federal holidays), in the Department of Energy Public Reading room located in Room 1E-190 of the Forrestal Building, 1000 Independence Avenue SW., Washington, DC. The certification docket will also be available in the Public Document Room, U.S. Department of Energy, Chicago Operations Office, 9800 S. Cass Avenue, Argonne, Illinois.

The Department of Energy, through the Oak Ridge Operations Office, Technical Services Division, has issued the following statement:

**Statement of Certification: National Guard Armory in Chicago, IL**

The Oak Ridge Operations Office, Technical Services Division, has reviewed the radiological data obtained following the remedial action at the subject property. Based on this review, DOE has certified that the property is in compliance with all applicable decontamination criteria and standards. This certification of compliance provides assurance that use of the property will result in no radiological exposure above applicable criteria and standards to members of the general public or to occupants of the site. Accordingly, the National Guard Armory property is released from the Formerly Utilized Sites Remedial Action Program.

Dated: February 17, 1989.

**J.E. Baublitz,**

*Acting Director, Office of Remedial Action and Waste Technology, Office of Nuclear Energy, U.S. Department of Energy.*

[FR Doc. 89-5526 Filed 3-8-89; 8:45 am]

BILLING CODE 6450-01-M

## Economic Regulatory Administration

### Final Consent Order With Quintana Energy Corp. et al.

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Final action on proposed consent order.

**SUMMARY:** The Department of Energy (DOE) hereby gives the notice required by 10 CFR 205.199J that it has adopted as final the Consent Order with Quintana Energy Corporation, Quintana Refinery Co., and Quintana Petrochemical Company (hereinafter collectively referred to as "Quintana"), executed on January 9, 1989, and published for comment in 54 FR 3833 (January 26, 1989).

As required by 10 CFR 205.199J, DOE provided a period of thirty days following publication of the Notice of Proposed Consent Order for the submission of comments. The Economic Regulatory Administration (ERA) received no comments in response to this Notice. Accordingly, ERA has determined that the Consent Order should be made final without modification. The Consent Order becomes effective as a Final Order of the DOE on the date of publication of this notice.

**FOR FURTHER INFORMATION CONTACT:** Dorothy Hamid, Office of Enforcement Litigation, Economic Regulatory Administration, U.S. Department of Energy, Room 3H-017, RG-32, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-1699.

Copies of the Consent Order may be obtained free of charge by written request to "Quintana Consent Order Request" at the above address or by calling Dorothy Hamid at the above telephone number. Copies may also be obtained in person at the same address or at the Freedom of Information Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

**SUPPLEMENTAL INFORMATION:** On January 26, 1989, DOE published notice in the **Federal Register**, Vol. 54 at page 3833, announcing the execution of a Proposed Consent Order between Quintana and DOE. That Notice summarized the proposed Consent Order and the relevant facts.

As a result of an audit of Quintana's compliance with the Federal petroleum price and allocation regulations, the Economic Regulatory Administration (ERA) raised certain issues with respect to Quintana's application of the Federal petroleum price and allocation regulations. A Proposed Remedial Order was issued to Quintana-Howell Joint Venture, a Texas joint venture comprised of Quintana Refinery Co. and Howell Corporation on June 24, 1988, in which ERA alleged failure to comply with obligations under the Crude Oil Allocation Program (Entitlements Program) during the period April 1978 through December 1979 in violation of those regulations.

The Consent Order resolves these matters and all other civil and administrative claims or causes of action regarding Quintana's compliance with its obligations under the Federal petroleum price and allocation regulations. As consideration, Quintana has agreed to pay $3.8 million to DOE within fifteen (15) days of the effective date of the Consent Order. The Howell Corporation would continue to be potentially liable for the remaining violation amount. The ERA will petition DOE's Office of Hearings and Appeals to implement special refund procedures pursuant to 10 CFR Part 205, Subpart V, to distribute all amounts paid by Quintana pursuant to the Consent Order.

As noted, no comments were received in response to the Notice of Proposed Consent Order. Accordingly, ERA has determined to adopt the Proposed Consent Order, without modification, as a final order of the DOE, pursuant to 10 CFR 205.199J. The Consent Order becomes effective upon publication of this Notice.

Issued in Washington, DC, on March 2, 1989.

**Milton C. Lorenz,**

*Chief Counsel for Enforcement Litigation, Economic Regulatory Administration.*

[FR Doc. 89-5523 Filed 3-8-89; 8:45 am]

BILLING CODE 6450-01-M

## Federal Energy Regulatory Commission

**[Docket Nos. CP89-866-000 et al.]**

### Trunkline Gas Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

**1. Trunkline Gas Co.**

[Docket No. CP89-866-000]

March 2, 1989.

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP89-866-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the authorization issued by the Commission on April 6, 1988, in Docket No. CP88-187-000 with respect to adding a new delivery point for sales service to Entex, Inc. (Entex), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Trunkline states that, by order issued April 6, 1988, the Commission granted Trunkline authorization to increase its level of contract demand sales from 1,900 Mcf per day to 4,900 Mcf per day, as well as authority to construct and operate measuring and regulatory facilities necessary to establish a new delivery point for deliveries of gas to Entex in Montgomery County, Texas. It is stated that Entex requested such additional service from Trunkline in anticipation of providing gas service to the new residential communities of Cumberland and White Oak Creek near the town of New Caney in Montgomery County, Texas. Trunkline states that, by a letter dated January 18, 1989, from Entex, Trunkline was advised that the developer of the subdivisions which Entex planned to serve has declared bankruptcy. Accordingly, Entex has stated that it no longer needs the new delivery station in Montgomery County, Texas; however, it does desire to maintain the authorized increased contract demand quantity to be delivered at existing delivery points, it is stated.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**2. Panhandle Eastern Pipe Line Co.**

[Docket No. CP89-851-000]

March 2, 1989.

Take notice that on February 21, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.PO. Box 1642, Houston, Texas 77001, filed in Docket No. CP89-851-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon part of its sales service provided to Northern Indiana Fuel & Light Company, Inc. (NIFL), an existing jurisdictional sales customer, all as more fully set forth in the application which is on file

VOL 54 ISS 45 MR 9 1989 UMI

with the Commission and open to public inspection.

Panhandle states that pursuant to § 284.10 of the Commission's Regulations, NIPL has elected to convert a portion of their firm sales entitlements to firm transportation, to be effective on March 1, 1989. Panhandle proposes to reduce NIPL's annual total contract demand from 4,743,707 Mcf to 3,997,690 Mcf under Rate Schedule G–1, to be effective March 1, 1989.

*Comment date:* March 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

**3. Transwestern Pipeline Co.**

[Docket No. CP89–888–000]

March 2, 1989.

It is stated that on December 30, 1988, Transwestern made a general rate filing under section 4 of the Natural Gas Act. On January 31, 1989, the Commission issued an order accepting and suspending the tariff sheets to become effective February 1, 1989. It is asserted that the January 31, 1989, order stated that notwithstanding the term of the settlement in Docket No. RP88–175–000, Transwestern cannot terminate the standby service without first obtaining abandonment authorization. It is therefore requested that the Commission issue an order granting Transwestern permission and approval to abandon its standby service obligation to SoCal effective February 1, 1989, consistent with the Stipulation and Agreement approved by the Commission in 36 FERC ¶61,061 (1987) and 41 FERC ¶61,128 (1987).

Take notice that on February 23, 1989, Transwestern Pipeline Company (Transwestern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89–888–000 an application pursuant to section 7 (b) of the Natural Gas Act for permission and approval to abandon standby service provided for Southern California Gas Company (SoCal) under Rate Schedules CDQ–1 and FTS, as set forth in Transwestern's rate settlement in Docket No. RP88–175–000, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is averred that on December 21, 1988, Transwestern and SoCal entered into a letter agreement whereby SoCal would reduce 39 percent of its contract demand quantity under Rate Schedule CDQ–1 to firm transportation under Rate Schedule FTS. It is alleged that the conversion is intended to replace the standby service that is scheduled to terminate the date Transwestern's new Section 4 rate filing is made effective.

*Comment date:* March 23, 1989, in accordance with Standard Paragraph F at the end of this notice.

**4. Tennessee Gas Pipeline Co.**

[Docket No. CP88–452–001]

March 2, 1989.

Take notice that on February 21, 1989, Tennessee Gas Pipeline Company (Tennessee) P.O. Box 2511, Houston, Texas, 77252, filed in Docket No. CP88–452–001 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act [18 CFR 157.205) for authorization to transport natural gas on behalf of G.A.S. Orange Development, Inc. (GAS) and to construct, prior to commencement of the transportation service, a sales tap to accommodate the delivery of natural gas under its blanket authorization issued in Docket Nos. CP82–413–000 and CP87–115–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that prior to commencement of the transportation service, Tennessee requested authorization to construct pursuant to § 157.211 of the Commission's Regulations and its blanket certificate authority, a sales tap to accommodate the delivery of natural gas. On January 3, 1989, the Commission issued a notice of request under blanket authorization in Docket No. CP89–452–000.

It is further stated that on February 2, 1989, Tennessee accepted and agreed to an amendment to the contract filed in the subject docket, which amendment states the following:

This Agreement shall become effective on the date of execution and shall remain in full force and effect for a term of two years and month to month thereafter provided, however, that either party may terminate this Agreement at any time upon at least thirty (30) days prior written notice to the other Party. Except as amended herein, all terms and provisions of the Agreement shall remain in full force and effect as written.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**5. United Gas Pipe Line Co.**

[Docket No. CP89–885–000]

March 2, 1989.

Take notice that on February 22, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–885–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Heath Petra Resources, Inc. (Heath Petra), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 20,600 MMBtu equivalent of natural gas on a peak day, 20,600 MMBtu equivalent on an average day, and 7,519,000 MMBtu equivalent on an annual basis. It is stated that United would receive the gas for Heath Petra's account at an existing interconnection between United and Sea Robin Pipeline Company near Erath, Vermilion Parish, Louisiana, and would deliver equivalent volumes at existing points on United's system in Louisiana. It is asserted that the transportation service would be effected utilizing existing facilities and would not require any construction of additional facilities. It is explained that the transportation service commenced January 11, 1989, as reported in Docket No. ST89–2185.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**6. Panhandle Eastern Pipe Line Co.**

[Docket No. CP89–880–000]

March 2, 1989.

Take notice that on February 21, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP89–850–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon part of its sales service provided to Kokomo Gas and Fuel Company (Kokomo), an existing jurisdictional sales customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle states that pursuant to § 284.10 of the Commission's Regulations, Kokomo has elected to convert a portion of their firm sales entitlements to firm transportation, effective on March 1, 1989. Panhandle proposes to reduce Kokomo's annual total contract demand from 16,769,700 Mcf to 11,738,790 Mcf under Rate Schedule G–1, to be effective March 1, 1989.

*Comment date:* March 23, 1989, in accordance with Standard Paragraph F at the end of this notice.

**7. Natural Gas Pipeline Co. of America**

[Docket No. CP89–883–000]

March 2, 1989.

Take notice that on February 23, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–883–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Sun Gas Transmission Limited Partnership (Sun Gas), an intrastate pipeline, under its blanket authorization issued in Docket No. CP86–582–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural would perform the proposed interruptible transportation service for Sun Gas, pursuant to an interruptible transportation service agreement dated January 18, 1989. The transportation agreement is effective for a primary term ending January 18, 1990, and shall continue month to month thereafter unless terminated by five days prior notice by either party. Natural proposes to transport up to a maximum of 20,000 MMBtu of natural gas per day (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule ITS); on an average day up to 10,000 MMBtu; and on an annual basis 3,650,000 MMBtu of natural gas for Sun Gas. Natural proposes to receive the subject gas at various points located in the states of Illinois and Texas. It is stated that the points of delivery are located in the states of Louisiana and Texas. Natural avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Natural commenced such self-implementing service on January 19, 1989, as reported in Docket No. ST89–2342–000.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**8. Texas Gas Transmission Corp.**

[Docket No. CP89–891–000]

March 2, 1989.

Take notice that on February 23, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–891–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for Hadson Gas Systems, Inc. (Hadson), under its blanket certificate issued in Docket No. CP86–686–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas proposes to transport for Hadson on an interruptible basis up to 50,000 MMBtu of natural gas on a peak day, 35,000 MMBtu on an average day, and 14,600,000 MMBtu on an annual basis. It is stated that service under § 284.223(a) commenced January 5, 1989, as reported in Docket No. ST89–1720. Texas Gas indicates that the service would have an initial term continuing through the end of the month in which the agreement is dated and continue on a monthly basis thereafter. Texas Gas proposes to charge Hadson a rate pursuant to Texas Gas' currently effective Rate Schedule T. No new facilities are proposed herein.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**9. Panhandle Eastern Pipe Line Co.**

[Docket No. CP89–848–000]

March 2, 1989.

Take notice that on February 21, 1989, Panhandle Eastern Pipe Line Company (Panhandle) P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–848–000 a request pursuant to § 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 284.223) for authority to provide interruptible transportation service for Marathon Oil Company (Marathon), a producer of natural gas, under Panhandle's blanket transportation certificate authority issued November 20, 1987, in Docket No. CP86–585–000, all as more fully set in the application which is on file with the Commission and open to public inspection.

Panhandle states it will receive the gas at various existing points on its system in the States of Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois and deliver the gas for the account of Marathon Trunkline Gas Company in Vermillion Block 321, offshore, Louisiana.

Panhandle proposes to transport up to 16,000 dt of gas per peak day and approximately 16,000 dt and 5,840,000 dt of gas per average day and annually, respectively. Panhandle states that the transportation service commenced under the 120-day automatic authorization of § 284.223(a) of the Commission's Regulations on January 2, 1989, pursuant to a transportation agreement dated December 29, 1988. Panhandle notified the Commission of the commencement of the transportation service in Docket No. ST89–2087–000.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**10. Tennessee Gas Pipeline Co.**

[Docket No. CP89–913–000]

March 2, 1989.

Take notice that on February 27, 1989, Tennessee Gas Pipeline Company, (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–913–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Catamount Natural Gas, Inc. (Catamount), a marketer, under the blanket certificate issued in Docket No. CP87–115–000 on June 18, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a transportation agreement dated January 19, 1989, under its Rate Schedule IT, it proposes to transport up to 100,000 dekatherms (dt) per day equivalent of natural gas for Catamount. Tennessee states that it would transport the gas from receipt points located in the State of Texas and deliver such gas to a delivery point at Colorado, Texas. Tennessee further states that the ultimate delivery point is located in the State of Tennessee.

Tennessee advises that service under § 284.223(a) commenced February 1, 1989, as reported in Docket No. ST89–2350 (filed February 23, 1989). Tennessee further advises that it would transport 100,000 dt on an average day and 36,500,000 dt annually.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**11. United Gas Pipe Line Co.**

[Docket No. CP89–909–000]

March 2, 1989.

Take notice that on February 27, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77152–1478, filed in Docket No. CP89–909–000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of MidCon Marketing Corp. (MidCon), a marketer of natural gas, under United's blanket certificate issued in Docket No. 88–6–000 pursuant to

VOL 54 ISS 45 MR 9 1989 UMI

Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport, on an interruptible basis, up to 827,000 MMBtu per day for MidCon. United states that construction of facilities would not be required to provide the proposed service.

United further states that the maximum day, average day, and annual transportation volumes would be approximately 827,000 MMBtu, 827,000 MMBtu and 336,355,000 MMBtu respectively.

United advises that service under § 284.223(a) commenced February 4, 1988, as reported in Docket No. ST88-2268.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**12. Williams Natural Gas Co.**

[Docket No. CP89-800-000]

March 2, 1989.

Take notice that on February 24, 1989, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-800-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86-631-000 pursuant to section 7 of the Natural Gas Act for Armco, Inc. (Armco), all as more fully set forth in the request on file with the Commission and open to public inspection.

Williams proposes to transport natural gas for Armco, an end user, on a firm basis, pursuant to a transportation agreement dated December 1, 1988. Williams explains that service commenced January 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-223(a) of the Commission's Regulations, as reported in Docket No. ST89-2180-000. Williams further explains that the peak day quantity would be 1,200 MMBtu and that the annual quantity would be 438,000 MMBtu. Williams explains that it would receive natural gas for the account of Armco at receipt points located in Kansas, Colorado and Missouri and would redeliver the gas at various delivery points in Kansas and Missouri.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**13. Texas Gas Transmission**

[Docket No. CP89-880-000]

March 2, 1989.

Take notice that on February 23, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-880-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transportation service for Bethlehem Steel Corporation (Bethlehem) under the blanket certificate issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas request authorization to transport on a peak day up to 18,500 MMBtu equivalent of natural gas for Bethlehem, with an estimated average daily quantity of 10,000 MMBtu equivalent of natural gas, and an estimated annual quantity of 4,000,000 MMBtu equivalent of natural gas. Texas Gas states that the transportation service is being rendered through the use of Texas Gas's existing facilities. It is stated that the location of the points of receipt and points of delivery are specified in Exhibits B and C, respectively, of the gas transportation agreement dated November 4, 1988, between Texas Gas and Bethlehem. Texas Gas further states that transportation service for Bethlehem commenced January 10, 1989, under the 120-day automatic provisions of 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-1819.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**14. Questar Pipeline Co.**

[Docket No. CP88-239-001]

March 2, 1989.

Take notice that on February 17, 1989 [1] Questar Pipeline Company (Questar), 79 South State Street, P.O. Box 11450 Salt Lake City, Utah 84147, filed in Docket No. CP88-239-001 a petition to amend its application filed on February 19, 1988, to construct and operate pipeline facilities, pursuant to section 7(c) of the Natural Gas Act, so as to change the preferred construction route from the Red Creek/Sears Canyon Alternative (Red Creek Alternative) to the Jesse Ewing Canyon/Rye Grass Draw Alternative (Jesse Ewing Alternative), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Questar states that the Bureau of Land Management and itself, after thoroughly evaluating the Jesse Ewing Alternative as part of the Environmental Assessment (EA) preparation process, found this alternative attractive primarily because this route would traverse the highest percentage (75 percent) of existing rights-of-way. It is stated that the Jesse Ewing Alternative would be 3.9 miles longer than the Red Creek Alternative and would extend in a southeast direction for approximately 61.3 miles from Questar's Storage Main Line No. 58 in Daggett County, Utah, to its Fidlar Compressor Station in Uintah County, Utah. Lastly, Questar estimates that the Jesse Ewing Alternative would (1) cost an additional $783,250 to install, (2) increase the first year's cost service by $168,376, (3) and reduce pipeline capacity by approximately 2.5 percent.

*Comment date:* March 23, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

[1] The petition to amend was tendered for filing on February 1, 1989; however, the fee required by 381.207 of the Commission's Rule (18 CFR 381.207) was not paid until February 17, 1989. Section 381.108 of the Commission's Rules provides that the filing date is the date on which the fee is paid.

**15. Enron Gas Processing Co.**

[Docket No. CI82-257-001 and CI82-360]

March 2, 1989.

Take notice that on February 9, 1989, Enron Gas Processing Company (EGP) of P.O. Box 1188, Houston, Texas 77251-1188, filed an application pursuant to Section 7(c) of the Natural Gas Act and § 154.92(d) of the Federal Energy Regulatory Commission's (Commission) regulations thereunder for authorization to continue sales of gas previously made by Northern Gas Products Company (NGP) to Northern Natural Gas Company, Division of Enron Corp. at the tailgate of EGP's processing plants in Martin County, Texas, and Crane and Pecos Counties, Texas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

EGP states that by Certificate of Amendment of Certificate of Incorporation dated June 9, 1986, the corporate name of Northern Gas Products Company was changed to Enron Gas Processing Company. EGP requests that the certificates of public convenience and necessity issued to NGP in Docket Nos. CI82-257 and CI82-360 be amended to reflect this name change and that NGP's FERC Gas Rate Schedule Nos. 1 and 2 be redesignated accordingly.

*Comment date:* March 22, 1989, in accordance with Standard Paragraph J at the end of this notice.

**16. United Gas Pipe Line Co.**

[Docket Nos. CP89-795-000 and CP89-795-001]

March 2, 1989.

Take notice that on February 9, 1989, United Gas Pipeline Company (United) [1] P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-795-000 a request pursuant to §§ 157.205 and 284.223 (18 CFR 157.205 and 284.223) of the Commission's Regulations under the Natural Gas Act for authority to provide interruptible transportation service for Reliance Gas Marketing Company (Reliance), a marketer of natural gas, under United's blanket transportation certificate which was issued by Commission order on January 15, 1988, in Docket No. CP88-6-000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United indicates that it will receive the gas from Reliance at various existing interconnections in Texas and deliver the gas for the account of Reliance at various interconnections in Louisiana. United will transport the gas pursuant to its Rate Schedule ITS.

United proposes to transport up to 30,900 MMBtu of gas per peak day and approximately 11,278,000 MMBtu of gas annually. United indicates that the transportation service commenced under the 120-day automatic authorization of § 284.223(a) of the Commission's Regulations on January 1, 1989, pursuant to a transportation agreement dated October 18, 1988, as amended November 15, and December 13, 1988. United notified the Commission of the commencement of the transportation service in Docket No. ST89-1963-000 on January 26, 1989.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

[1] United supplemented the request on February 21, 1989 in Docket No. CP89-795-001.

**17. Trunkline Gas Co.**

[Docket No. CP89-903-000]

March 3, 1989.

Take notice that on February 24, 1989, Trunkline Gas Company (Trunkline) P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-903-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Shell Gas Trading Company (Shell), under the authorization issued in Docket No. CP86-586-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Trunkline would perform the proposed interruptible transportation service for Shell, a shipper and marketer of natural gas, pursuant to a transportation agreement rate schedule PT dated April 11, 1989 (contract no. T-PLT-1117). The term of the transportation agreement is for a primary term of one month from the initial date for service, and shall continue in effect month-to-month thereafter unless terminated upon 30 days prior written notice by one party to the other party. Trunkline proposes to transport on a peak day up to 90,000 dekatherm; on an average day up to 70,000 dekatherm; and on an annual basis 25,550,000 dekatherm of natural gas for Shell. Trunkline proposes to receive the subject gas from various receipt points in Louisiana, Texas and Illinois. Trunkline would then transport and redeliver the subject gas, less fuel and unaccounted for line loss, to Columbia Gulf Transmission Company in St. Mary Parish, Louisiana. The ultimate delivery of the transportation volumes would be to various LDC's and end users. It is alleged that Shell would pay Trunkline the effective rate contained in Trunkline's rate schedule PT, which is currently 16.01 cents, which includes the ACA and GRI surcharge. Trunkline avers that construction of facilities would not be required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's regulations. Trunkline commenced such self-implementing service on January 7, 1989, as reported in Docket No. ST89-1906-000.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**18. Northern Natural Gas Co., Division of Enron Corp.**

[Docket No. CP89-887-000]

March 3, 1989.

Take notice that on February 23, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP89-887-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a firm transportation service provided by Northern for Natural Gas Pipeline Company of America (Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern states that it was authorized to provide the transportation service for Natural pursuant to the certificate granted in Docket No. CP81-18-000, as amended in Docket No. CP81-18-002 and that the underlying transportation agreement, as amended, expired on October 31, 1988. Northern further states that Natural ceased nominating volumes under the transportation agreement as of November 1, 1988, and began nominating volumes for transportation under Northern's blanket certificate authorization issued pursuant to Part 284 of the Commission's Regulations. Northern asserts that the duplicate transportation authorization is unnecessary and that transportation for Natural under Northern's blanket certificate will place Natural on an equal footing with other current and future shippers on Northern's system.

*Comment date:* March 24, 1989 in accordance with Standard Paragraph F at the end of the notice.

**19. ANR Pipeline Co.**

[Docket No. CP89-822-000]

March 3, 1989.

Take notice that on February 14, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-822-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Unicorp Energy, Inc. (Unicorp), a marketer, under its blanket authorization issued in Docket No. CP88-532-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR would perform the proposed interruptible transportation service for Unicorp, pursuant to an interruptible transportation service agreement dated November 1, 1988. The transportation agreement is effective for a term until 120 days from the day of initial deliveries, and thereafer until November 30, 1989, and month to month thereafter until terminated by either party on thirty days written notice. ANR proposes to transport approximately 100,000 dth

VOL 54 ISS 45 MR 9 1989 UMI

natural gas on a peak and average day; and on an annual basis 36,500,000 dth of natural gas for Unicorp. ANR proposes to receive the subject gas at various points located in ANR's Southeast and Southwest gathering areas and redeliver the gas for the account of Unicorp at existing interconnections located in the state of Illinois.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. ANR commenced such self-implementing service on January 1, 1989, as reported in Docket No. ST89-2068-000.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**Standard Paragraphs**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules [18 CFR 385.214] a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act [18 CFR 157.205] a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

**[Docket Nos. TA89-1-21-000 and TM89-2-21-000]**

**Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that Columbia Gas Transmission Corporation (Columbia) on Februrary 28, 1989, tendered for filing the following proposed changes to its FERC Gas Tariff, Original Volume No. 1, to be effective May 1, 1989:

One hundred and thirty-fourth Revised Sheet No. 16
Twenty-second Revised Sheet No. 16A2
Thirty-ninth Revised Sheet No. 64A

Columbia states that the sales rates set forth on One hundred and thirty-fourth Revised Sheet No. 16 reflect an overall decrease of .17¢ per Dth in the Commodity rate, and an increase of $.003 per Dth in the Demand-1 rate and a decrease of 3.32¢ per Dth in the Demand-2 rate. In addition, the transportation rates set forth on Twenty-second Revised Sheet No. 16A2 reflect a decrease in the Fuel Charge component of .02¢ per Dth.

Columbia states that the purpose of this filing is to reflect the following:

(1) A Current Purchased Gas Cost Adjustment Applicable to Sales Rate Schedules;

(2) Unrecovered Purchased Gas Cost Surcharges which are proposed to be effective during the 12-month period of May 1, 1989 through April 30, 1990;

(3) A surcharge adjustment to provide for the recovery, over the 12-month period ending April 30, 1990, of carrying charges related to take-or-pay reimbursements paid by Columbia to Panhandle Eastern Pipe Line Company (Panhandle) pursuant to the terms of a Commission approved settlement in Docket No. RP83-5-000; and

(4) A Transportation Fuel Charge Adjustment.

Columbia states that the instant filing is an annual PGA filed in compliance with Section 154.305 of the Commission's regulations. Accordingly, Columbia has reflected 12-month Unrecovered Purchased Gas Cost credit surcharges of $.075 per Dth applicable to the Demand-1 rate, 2.68¢ per Dth applicable to the Demand-2 rate, and a 12-month Unrecovered Purchased Gas Cost surcharge of 22.10¢ per Dth applicable to the Commodity rate to be effective May 1, 1989. Columbia further states that the filing reflects an annual surcharge of .53¢ per Dth to be effective May 1, 1989 to recover carrying charges related to the recoupable portion of take-or-pay payments made to Panhandle under a settlement in Docket No RP83-5-000.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

---

**Docket No. FA89-1-34-000]**

**Florida Gas Transmission Co.; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that on February 28, 1989, Florida Gas Transmission Company (FGT) tendered for filing the following tariff sheets to its FERC Gas Tariff, to be effective May 1, 1989.

*FERC Gas Tariff, First Revised Volume No. 1*

Third Revised 37th Revised Sheet No. 8

*FERC Gas Tariff, Original Volume No. 2*

Third Revised 59th Revised Sheet No. 128

FGT states that as required by Sect. 15 of its FERC Gas Tariff Rev. Volume No. 1 and the Commission's Order Nos. 483 and 483-A, the above referenced tariff sheets reflect FGT's first annual PGA filing under the Commission's revised regulations. FGT states that the proposed tariff sheets reflect a decrease in the average cost of gas purchased from that reflected in its Quarterly PGA filing, Docket No. TQ89-3-34-000, effective February 1, 1989.

FGT states that the effect of the purchased gas cost reduction being filed represents an decrease of 3.571 cents/therm for Rate Schedules G and I and 1.02 cents/Mcf for Rate Schedule T-3 as measured against FGT's Quarterly PGA filing in Docket No. TQ89-3-34-000 effective February 1, 1989.

FGT further states that the instant filing includes a surcharge adjustment to amortize amounts accumulated in the current deferral balance during the period January 1—December 31, 1989 over the twelve month period commencing May 1, 1989. The effect of the Surcharge Adjustment is (.660¢)/therm for Rate Schedules G and I and (0.73¢) Mcf for Rate Schedule T-3.

In addition, FGT states that it has satisfied the Commission's assesement of past performance as set forth in § 154.306 of the Commission's Regulations.

FGT also states that it has filed certain schedules in accordance with FERC Form No. 542-PGA (Revised). FGT has submitted a nine-track magnetic tape containing such schedules.

FGT states that copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 2 and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with § 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 27, 1989.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

**Lois D. Cashell,**

*Secretary.*

BILLING CODE 6717-01-M

---

**[Docket No. RP89-49-002]**

**National Fuel Gas Supply Corp.; Compliance Filing**

March 6, 1989

Take notice that on February 28, 1989, National Fuel Gas Supply Corporation ("National") tendered for filing as part of its FERC Gas Tariff, First Revised Volume Nos. 1 and 2, the following tariff sheets:

*First Revised Volume No. 1:*

Substitute Fifth Revised Sheet No. 1
Substitute Second Revised Sheet No. 1-A

VOL 54 ISS 45 MR 9 1989 UMI

Substitute Eighteenth Revised Sheet No. 4
Nineteenth Revised Sheet No. 4
Twentieth Revised Sheet No. 4
Substitute Second Revised Sheet No. 9
Substitute Fourth Revised Sheet No. 28
Substitute First Revised Sheet Nos. 31–33
Substitute Original Sheet No. 33–A
Substitute Original Sheet No. 33–B
Substitute Original Sheet No. 33–C
Substitute First Revised Sheet No. 112
Substitute First Revised Sheet No. 113
Substitute Original Sheet Nos. 114–118

*First Revised Volume No. 2:*

Substitute Second Revised Sheet No. 67
Substitute Fifth Revised Sheet No. 281
Substitute Seventh Revised Sheet No. 302
Substitute Original Sheet No. 302–A
Substitute Fifth Revised Sheet No. 321
Substitute Fifth Revised Sheet No. 341
Substitute Fourth Revised Sheet No. 536
Substitute Second Revised Sheet No. 558
Substitute Original Sheet No. 558–A
Substitute First Revised Sheet No. 640
Substitute First Revised Sheet No. 667
Substitute Second Revised Sheet No. 690

National states that the purpose of this compliance filing is to reflect National's rate change filed on December 30, 1988, in this proceeding, which became effective by operation of law on January 30, 1989.

National states that its compliance filing reflects the level of purchased gas costs that has been made effective by various Commission orders issued after December 30, 1988. First, National states that by order issued December 30, 1988, at Docket Nos. TA89–1–16–000 and TA89–1–16–001, the Commission accepted national's regularly-scheduled annual PGA. In addition, on December 30, 1988, National filed, at Docket No. TF89–1–16–000, an interim purchased gas cost adjustment which became effective on January 1, 1989. Substitute Eighteenth Revised Sheet No. 4 reflects, therefore, those adjustments to National's rates.

National further states that on January 30, 1989, National filed, at Docket No. TF89–2–16–000, an interim purchased gas cost adjustment which became effective on February 1, 1989. That adjustment to National's rates is reflected on Nineteenth Revised Sheet No. 4.

Finally, National States that on February 27, 1989, National filed, at Docket No. TF89–3–16–000, an interim purchased gas cost adjustment to be effective on March 1, 1989. That adjustment to National's rates is reflected on Twentieth Revised Sheet No. 4.

Copies of National's filing were served on National's jurisdictional customers and on the interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 13, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## FEDERAL COMMUNICATIONS COMMISSION

### Public Information Collection Requirement Submitted to the Office of Management and Budget for Review

March 2, 1989.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. 3507.

Copies of this submission may be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037, or telephone (202) 857–3815. Persons wishing to comment on an information collection should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, telephone (202) 395–3785. Copies of these comments should also be sent to the Commission. For further information contact Doris Benz, Federal Communications Commission, telephone (202) 632–7513.

*OMB No.:* 3060–0059.

*Title:* Statement Regarding the Importation of Radio Frequency Devices Capable of Causing Harmful Interference.

*Form No.:* FCC 740.

*Type of Review:* Extension. The Office of Management and Budget has set a common review period for all known Federal agency information collections used to obtain information necessary for the importation of merchandise into the United States. The purpose of the review is to plan for the elimination of the collection of duplicate information elements required from the importing public.

*Respondents:* Individuals, State or local governments, Business (including small business), and Non-profit institutions.

*Frequency of Response:* On occasion.

*Estimated Annual Burden:* 420,000 Responses, five minutes each.

*Needs and Uses:* Filing is required for each radio frequency device or subassembly which is imported into customs territory of the U.S. The data is used by the FCC Laboratory to ascertain whether equipment authorization is required, and if so, whether it has been granted. If not, FCC notifies the U.S. Customs Service.

Federal Communications Commission.

### Advisory Committee on Advanced Television Service; Schedule of Meetings

March 1, 1989.

The following schedule is based on information available as of 10:00 a.m. Tuesday, February 28, 1989. Meetings of Advisory Groups and Working Parties may be changed without advance public notice. Interested parties should contact the appropriate Chairmen or Vice Chairmen if additional information is desired. (New meetings are highlighted.) The schedule of meetings also is available on the FCC Laboratory Public Access Link (PAL). PAL can be accessed at (301) 725–1072 at either 300 or 1200 baud for five minute intervals, 8:00 a.m.–8:00 p.m. (EST) and fifteen minute intervals, 8:00 p.m.–8:00 a.m. (EST). After connection, PAL is accessed by striking one or more "carriage returns." The schedule of meetings is accessed through item 6 (Public Notices) of the user menu, which is displayed after proper connection with PAL has been completed.

BILLING CODE 6712–01–M

### New Tender Requirement for FM Broadcast Applications

**AGENCY:** Federal Communications Commission.

**ACTION:** New tender requirement for FM broadcast applications.

**SUMMARY:** The Commission has adopted a new tender requirement for FM broadcast applications processed pursuant to the new rule adopted in MM Docket 87–121. This new tender requirement will enable the staff to immediately identify the appropriate protection to be afforded proposed facilities and thus ensure that applications processed under the new rule will not receive more protection than they are entitled to.

**EFFECTIVE DATE:** April 14, 1989, or upon OMB approval of amendments to FCC Forms 301 and 340.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Lilo Cunningham, Mass Media Bureau (202) 632–6485.

### Processing of FM Applications Pursuant to MM Docket 87–121 New Tenderability Requirement

February 21, 1989

In the *Report and Order* in MM Docket 87–121, adopted December 12, 1988 (Amendment of Part 73 of the Commission's Rules to Permit short-spaced FM Station Assignments by Using Directional Antennas), the Commission adopted new rules by which FM broadcast station applicants are afforded additional flexibility in site selection. These rules allow FM broadcast station transmitters to be located at sites that do not meet one or more of the minimum distance separation requirements set forth in 47 CFR 73.207, provided that contour protection is demonstrated with the pertinent short-spaced assignments, applications and/or allotments.

Applications for stations that request authorization pursuant to the new rule (47 CFR 73.215) adopted in MM Docket No. 87–121 are entitled only to protection of the facilities proposed. Therefore, applicants for such stations must expressly request processing pursuant to the new rule and must include an appropriate exhibit demonstrating compliance. This will allow immediate identification of the appropriate protection to be afforded proposed facilities. Failure to provide this information would afford an application that is to be processed under the new rule more protection that it is entitled to and thus unnecessarily restrict other applicants. Therefore, omission of the appropriate exhibit will result in return of the application as not substantially complete at tender. This requirement for an exhibit has been added to the list of tender criteria established in MM Docket 84–750, 50 FR 19936, 19945 (1985) (Appendix D) and utilized in evaluating the substantial completeness of applications under the FM "hard look" processing procedures. A list of those tender criteria adopted in MM Docket 84–750 and reproduced in *Public Notice*, Mimeo No. 4580, May 16, 1985, is attached hereto as Attachment A.

In order to integrate this new tender criteria into the tender review process, the Commission has authorized the addition of a question to section V–B of FCC Forms 301 (Application for Authority to Construct or make Changes in a Commercial Broadcast Station) and 340 (Application for Authority to Construct or Make Changes in a Noncommercial Educational Broadcast Station). This question will require an engineering study to establish the lack of prohibited overlap of the protected and interfering contours of facilities separated by less than the minimum distance separation requirements set forth in 47 CFR 73.207. However, the revised Forms 301 and 340 will not be available immediately. Therefore, upon the effective date of the new rules and until the revised forms are available, applicants requesting authorization pursuant to the new rules adopted in MM Docket 87–121 must include, as a supplement to the Old Form 301 or 340, a copy of Attachment B hereto and the exhibit(s) required therein. (Attachment B also appears as Appendix C to the *Report and Order* in MM Docket 87–121). Failure of any applicant requesting authorization pursuant to the new rules adopted in MM Docket 87–121 to submit Attachment B and the exhibit(s)

VOL 54 ISS 45 MR 9 1989 UMI

required therein with their application form will result in return of the application as not substantially complete at tender.

For further information, please contact Lilo Cunningham at 632-6485.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

**Attachment A**

"Statement of New Policy Regarding Commercial FM Applications That Are Not Substantially Complete or Are Otherwise Defective." See 50 FR 19936 (May 13, 1985) (Appendix D).

**Attachment B**

Applicants requesting processing pursuant to 47 CFR 73.215 must submit this page and the required exhibits with FCC Form 301 ("Application for Authority to Construct or Make Changes in a Commercial Broadcast Station"), or FCC Form 340 ("Application for Authority to Construct or Make Changes in a Noncommercial Educational Broadcast Station"), as appropriate.

*Authorization Pursuant to 47 CFR 73.215*

If authorization pursuant to 47 CFR 73.215 is requested, attach as an Exhibit a complete engineering study to establish the lack of prohibited overlap of contours involving affected stations. The engineering study must include the following:

Exhibit No. —

(a) Protected and interfering contours, in all directions (360°), for the proposed operation.

(b) Protected and interfering contours, over pertinent arcs, of all short-spaced assignments, applications and allotments, including a plot showing each transmitter location, with identifying call letters or file numbers, and indication of whether facility is operating or proposed. For vacant allotments, use the reference coordinates as transmitter location.

(c) When necessary to show more detail, an additional allocation study utilizing a map with a larger scale to clearly show prohibited overlap will not occur.

(d) A scale of kilometers and properly labeled longitude and latitude lines, shown across the entire exhibit(s). Sufficient lines should be shown so that the location of the sites may be verified.

(e) The official title(s) of the map(s) used in the exhibit(s).

**Note:** Applicants not requesting processing pursuant to 47 CFR 73.215 do not need to submit this page with their application.

**Section 18 Study Advisory Committee; Meeting**

**AGENCY:** Federal Maritime Commission ("Commission" or "FMC").

**ACTION:** Notice of meeting of section 18 Study Advisory Committee.

**SUMMARY:** The Commission hereby announces the second meeting of the section 18 Study Advisory Committee. The Advisory Committee was formed to make continuing recommendations on the conduct of a study to evaluate the impact of the Shipping Act of 1984. The Committee is comprised of representatives of interests affected by the Shipping Act of 1984, including representatives of conferences, ocean common carriers, non-vessel-operating common carriers, ocean freight forwarders, customs brokers, shippers, shippers' associations, ports, non-port marine terminal operators, and other transportation service firms. This notice also announces the time and place of the Advisory Committee meeting, which will be open to the public.

**DATE:** The meeting of the Advisory Committee will begin at 10:00 a.m. on April 6, 1989.

**ADDRESS:** The meeting of the Advisory Committee will be held in Hearing Room No. 1 at 1100 L Street NW., Washington, DC 20573.

**FOR FURTHER INFORMATION CONTACT:**

Committee Chairperson, Commissioner Edward J. Philbin, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5715.

Committee Executive Secretary, John Robert Ewers, Director, Bureau of Administration, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5866.

**SUPPLEMENTARY INFORMATION:** The Federal Maritime Commission's Section 18 Study Advisory Committee will meet at 10:00 a.m. on April 6, 1989 in Hearing Room No. 1 at the Commission Headquarters Building, 1100 L Street NW., Washington, DC.

The Advisory Committee was established in December 1987 (52 FR 25632) to review, comment on, and give appropriate advice concerning all aspects of the five-year study that the Commission is conducting under the mandate of section 18 of the Shipping Act of 1984, 46 U.S.C. App. 1701 *et seq.* The Committee consists of 32 members which comprise a balanced representation of various segments of the shipping industry affected by the Shipping Act of 1984.

At the first meeting of the Advisory Committee, held March 24, 1988, Committee members were briefed on the progress of the Section 18 Study. Surveys which are being sent to various segments of the industry were reviewed and the Committee recommended several revisions. Other matters discussed included a possible third symposium on the impact of the 1984 Act and additional areas where the Committee believed the Commission should conduct research.

The agenda for the second Section 18 Study Advisory Committee is as follows:

1. Welcome of New Members
2. Administrative Matters
3. Briefing on the Status of the Section 18 Study, Including Result of 1988 Surveys
4. Discussion of Actions Taken on Committee Recommendations at First Meeting
5. Status Report on Other Matters Discussed at First Meeting
6. Briefing on Shipping Legislation and Other Development in Foreign Countries
7. Policy Discussion Roundtable—Discussion by Committee Members of Views about the 1984 Act and Any Revisions Deemed Appropriate
8. Any Other Business

The meeting will be open to public observation. A period will be set aside for oral comments or questions by the public, with a limit of ten minutes per person. More extensive questions or comments should be submitted in writing before April 3, 1989. Other public statements regarding Committee affairs may be submitted any time before or after the meeting. Approximately 35 seats will be available for the public (including five seats reserved for media representatives) on a first-come, first-served basis.

Copies of the summaries of the minutes will be available upon written request 30 days after the meeting. Requests should be addressed to the Secretary of the FMC and should be submitted by April 27, 1989.

Inquiries may be addressed to the Committee Executive Secretary, Mr. John Robert Ewers, Director, Bureau of Administration, Federal Maritime Commission, Room 12211, 1100 L Street NW., Washington, DC 20573.

By the Commission.

**Joseph C. Polking,**

BILLING CODE 6730-01-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

**Centers for Disease Control**

**Revision of Requirements for Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs**

On September 20, 1988, the Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1989 [Pub. L. 100-436] at 102 Stat. 1692, was signed by the President. This Act contained the following provision:

Notwithstanding any other provision of this Act, AIDS education programs funded by the Centers for Disease Control and other education curricula funded under this Act dealing with sexual activity—(1) shall not be designed to promote or encourage, directly, intravenous drug abuse or sexual activity, homosexual or heterosexual, and (2) in addition, with regard to AIDS education programs and curricula—(A) shall be designed to reduce exposure to and transmission of the etiologic agent for acquired immune deficiency syndrome by providing accurate information, and (B) shall provide information on the health risks of

VOL 54 ISS 45 MR 9 1989 UMI

promiscuous sexual activity and intravenous drug abuse.

Pursuant to this provision, CDC has revised the document titled "Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions." Accordingly, all AIDS education programs and education curricula funded by CDC from the 1989 appropriations must comply with the revised document which appears below. This revision has previously been published in the Program Announcement for Cooperative Agreements for Minority and Other Community-Based Human Immunodeficiency Virus (HIV) Prevention Projects No. 908, January 9, 1989 (54 FR 663). In complying with the Program Review Panel requirements contained in the document, recipients are encouraged to use an existing Program Review Panel such as one created by a health department's AIDS/HIV Prevention Program.

**Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs October 1988**

Controlling the spread of HIV infection and AIDS requires the promotion of individual behaviors that eliminate or reduce the risk of acquiring and spreading the virus. Messages must be provided to the public that emphasize the ways by which individuals can fully protect themselves from acquiring the virus. They include abstinence from the illegal use of IV drugs and from sexual intercourse except in a mutually monogamous relationship. For those individuals who do not eliminate risky behavior, methods of reducing their risk of acquiring or spreading the virus must also be communicated. Such messages can be controversial. This document is intended to provide guidance for the development of educational materials, and to require the establishment of local review panels to consider the appropriateness of messages designed to communicate with various population groups.

*1. Basic Principles*

a. Language used in written materials (i.e., pamphlets, brochures, fliers), audiovisual materials (i.e., motion pictures and video tapes), and pictorials (i.e., posters and similar educational materials using photographs, slides, drawings, or paintings) to describe dangerous behaviors and explain less risky practices concerning AIDS should use terms or descriptors necessary for the target audience to understand the messages.

b. Such terms or descriptors used should be those which a reasonable person would conclude should be understood by a broad cross-section of educated adults in society, or which when used to communicate with a specific group, such as homosexual men, about high risk sexual practices, would be judged by a reasonable person to be inoffensive to most educated adults beyond that group.

c. The language of items in questionnaires or survey instruments which will be administered in any fashion to any persons should use terms to communicate the information needed which would be understood by a broad cross-section of educated adults in society but which a reasonable person would not judge to be offensive to such people.

d. Educational sessions should not include activities in which attendees participate in sexually suggestive physical contact or actual sexual practices.

e. Messages provided to young people in schools and in other settings should be guided by the principles contained in "Guidelines for Effective School Health Education to Prevent the Spread of AIDS" (MMWR 1988;37 [suppl. no. S–2]).

f. AIDS education programs and education curricula funded by CDC from the 1989 appropriations must be consistent with language contained in the Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1989 (Pub. L. 100–436) at 102 stat. 1662. This language is as follows:

> Notwithstanding any other provision of this Act, AIDS education programs funded by the Centers for Disease Control and other education curricula funded under this Act dealing with sexual activity—(1) shall not be designed to promote or encourage, directly, intravenous drug abuse or sexual activity, homosexual or heterosexual, and (2) in addition, with regard to AIDS education programs and curricula—(A) shall be designed to reduce exposure to and transmission of the etiologic agent for acquired immune deficiency syndrome by providing accurate information, and (B) shall provide information on the health risks of promiscuous sexual activity and intravenous drug abuse.

The Surgeon General's Report on Acquired Immune Deficiency Syndrome (October 1986) contains messages which are consistent with the provisions of this legislation. (Pub. L. 100–436).

*2. Program Review Panel*

a. Recipients will be required to establish a program review panel whether the applicant plans to conduct the total program activities or plans to have part of them conducted through subvention to nongovernmental organization(s). This panel, guided by the CDC Basic Principles (in the previous section) in conjunction with prevailing community standards, will review and approve all written materials, pictorials, audiovisuals, questionnaires or survey instruments, and proposed educational group session activities to be used under the project plan. This panel is intended to review materials only and should not be empowered either to evaluate the proposal as a whole or to replace any other internal review panel or procedure of the local governmental jurisdiction. Specifically, applicants for cooperative agreements/grants will be required to include in the application the following:

(1) Identification of a panel of no less than five persons representing a reasonable cross-section of the general community [1] but which is not drawn predominantly from the target population or groups to whom the written materials, pictorials, audiovisuals, questionnaires, survey instruments, or educational groups sessions are directed; and

(2) A letter or memorandum from the proposed project director, countersigned by a responsible business official, which includes:

(a) Concurrence with this guidance and assurance that its provisions will be observed;

(b) The identity of proposed members of the Program Review Panel, including their names, occupations, and any organizational affiliations that were considered in their selection for the Panel;

b. When a cooperative agreement/grant is awarded, the recipient will: (1) Convene the Program Review Panel and present for its assessment copies of written materials, pictorials, and audiovisuals proposed to be used;

(2) Provide for assessment by the Program Review Panel text, scripts, or detailed descriptions for written materials, pictorials, or audiovisuals proposed to be used;

(3) Prior to expenditure of funds related to the ultimate program use of these materials, assure that their project files are documented with a statement(s) signed by the Program Review Panel specifying the vote for approval or disapproval for each proposed item submitted to them that is subject to this guidance.

(4) Provide to CDC in regular progress reports signed statement(s) of the chairperson of the program review panel specifying the vote for approval or disapproval for each proposed item which is subject to this guidance.

Dated: March 3, 1989.

**Robert L. Foster,**

*Acting Director, Office of Program Support, Centers for Disease Control.*

[FR Doc. 89–5451 Filed 3–8–89; 8:45 am]

BILLING CODE 4160–18–M

[1] Panels which review materials for use with school age populations should include representatives of such groups as teachers, school administrators, parents, and students.

## National Institutes of Health

### National Institute of Diabetes and Digestive and Kidney Diseases, National Kidney and Urologic Diseases Advisory Board; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Kidney and Urologic Diseases Advisory Board and representatives of relevant professional and voluntary organizations on March 30 and 31, 1989. The Board will receive input from the organizations regarding the development of the long-range plan to combat kidney and urologic diseases and then meet April 1, 1989, to discuss the Board's activities and its long-range plan. The meeting is being held at the Lincolnshire Marriott, 1 Marriott Drive, Lincolnshire, Illinois 60015, and is scheduled from 8:30 a.m. until approximately 5:30 p.m. each day. Although the meeting is open to the public, attendance by the public will be limited to space available. Notice of the meeting room will be posted in the hotel lobby.

Dr. Ralph Bain, Executive Director, National Kidney and Urologic Diseases Advisory Board, 1801 Rockville Pike, Suite 500, Rockville, Maryland 20852, (301) 496–6045, will provide on request an agenda and roster of the members. Summaries of the meeting may also be obtained by contacting his office.

Dated: March 3, 1989.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of Administration

**[Docket No. N–89–1951]**

### Submission of Proposed Information Collection to OMB

**AGENCY:** Office of Administration, HUD.

**ACTION:** Notice.

**SUMMARY:** The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

**ADDRESS:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

**SUPPLEMENTARY INFORMATION:** The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

**Authority:** Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: February 17, 1989.

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

### Issuance of Permit for Marine Mammals

On October 13, 1988, a notice was published in the **Federal Register** (Vol. 53, No. 198) that an application had been filed with the Fish and Wildlife Service by The New York Zoological Society (PRT 731847) for a permit to import one captive-born polar bear (*Ursus maritimus*) from Ruhr Zoo, Gelsenkirchen, West Germany for the purpose of public display.

Notice is hereby given that on February 10, 1989, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Endangered Species Act of 1972 (16 U.S.C. 1539), the Fish and Wildlife Service issued a permit subject to certain conditions set forth therein.

The permit is available for public inspection during normal business hours at the Office of Management Authority, Room 400, 1375 K Street, NW., Washington, DC.

Dated: March 3, 1989.

**R.K. Robinson,**
*Chief, Branch of Permits, Office of Management Authority.*

[FR Doc. 89–5537 Filed 3–8–89; 8:45 am]

BILLING CODE 4310–55–M

## Receipt of Application for Permit

The public is invited to comment on the following application for permits to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*, the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*) and the regulations governing marine mammals and endangered species (50 CFR Parts 17 and 18).

### Applicant

*Name:* Charles Monnett, PRT–716436.
*Address:* University of Minnesota, 109 Zoology Boulevard, Minneapolis, Minnesota 55455.
*Type of Permit:* Scientific Research.
*Name and Number of Animals:* 150 Alaska sea otter (*Enhydra lutris lutris*).
*Summary of Activity to be Authorized:* The applicant proposes to amend his current permit to increase the number of otters he is authorized to capture. Most will be tagged, weighed, have one premolar extracted, blood sampled, and lip tattooed. Ten male and ten female adults will be surgically implanted with radio-transmitters for tracking.
*Source of Marine Mammals for Display:* Prince William Sound and the Gulf of Alaska, AK.
*Period of Activity:* March 1989–May 1990.

Concurrent with the publication of this notice in the **Federal Register**, the Office of Management Authority is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application or requests for a public hearing on this application should be submitted to the Director, Office of Management Authority (OMA), P.O. Box 27329, Washington, DC 20038–7329, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connections with the above application is available for review during normal business hours (7:45 a.m. to 4:15 p.m.) at 1375 K Street NW., Room 400, Washington, DC.

Dated: March 3, 1989.

**R.K. Robinson,**
*Chief, Branch of Permit, Office of Management Authority.*

## Bureau of Land Management

**[AK–967–4213–15; AA–8447–A2; AA–8447–B]**

### Alaska Native Claims Selection; Eyak Corp.

In accordance with Departmental regulation 32 CFR 2650.7(d), notice is hereby given that the Decision to Issue Conveyance (DIC) to The Eyak Corporation, notice of which was published in the **Federal Register** on February 2, 1989, Vol. 54, No. 21, is modified by changes of easements EIN 156 D9, and EIN 171c E, and clarification of The Eyak Corporation's entitlement pursuant to section 12(a) and 12(b) of ANCSA.

A notice of the modified DIC will be published once a week, for four (4) consecutive weeks, in the *Cordova Times*. Copies of the modified DIC may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599.

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government, or regional corporation, shall have until April 10, 1989, to file an appeal on the issue in the modified DIC. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements in 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Except as modified, the decision, notice of which was given February 2, 1989, is final.

### Proposed Reinstatement of Terminated Oil and Gas Lease; Wyoming

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease WYW94760 for lands in Weston County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW94760 effective June 1, 1988, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

### Proposed Lease Under Section 302 of FLPMA (CA 20171); California

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The proposed action is a Notice of Realty Action for a five-year lease, renewable, intended to resolve a long-standing unauthorized occupancy (CA 20771), to bring occupancy under terms of section 302 of the Federal Land Policy and Management Act (FLPMA) of 1976, and 43 CFR 2920. The legal description of the site is:

Mount Diablo Meridian, T. 33 N., R. 9 W., Section 5, Lot 10, S½; Lot 31, N½, Aggregating 2.85 acres.

**DATES:** For a period of 45 days from the date of publication in the **Federal Register**, interested parties may submit comments to the Area Manager, Bureau of Land Management, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be evaluated by the State Director, who may vacate or modify this Realty Action and issue a final determination. In the absence of any action taken by the State Director, this Realty Action will become the final determination of the Department of the Interior.

**FOR FURTHER INFORMATION CONTACT:** Mark Morse, Area Manager, at (916) 246–5325, or write to 355 Hemsted Drive, Redding, California 96002.

**SUPPLEMENTARY INFORMATION:** An appraisal for the proposed lease area has been made, and the lessee will be required to make yearly rental payments in the amount of $3,300.00. Lessee shall reimburse the United States of reasonable administrative costs incurred, estimated to be $300.00. Reimbursement of costs shall be in accordance with the provisions of 43 CFR 2920.6.

The only application that will be accepted will be from Alma Korntved. The application must include reference to this notice, include the case file

VOL 54 ISS 45 MR 9 1989 UMI

number (CA 20171), and have a complete description of the facilities involved. This can be accomplished by providing details of the proposed use and activities; a description of all facilities; a map of sufficient scale to be legible; a legal description of the project location; and any other information that may aid in evaluating the proposal.

Stipulations to be included with the lease are as follows: (1) Subject improvements must be quitclaimed to the United States; (2) Subject improvements must remain lessee's sole place of residence; (2) Lease may not be transferred, assigned or inherited; (3) Upon termination of lease, all improvements must be removed from lease area within six months, and the site returned to a natural condition.

**[ID-060-09-4830-10-8751; I-20669]**

### Realty Action: Private Exchange Involving Public Lands in Blaine County, ID

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of realty action, I-20669: exchange of public and private lands in Blaine County, Idaho.

**SUMMARY:** The following described lands have been determined to be suitable for exchange through the development of land use decisions based upon public input, and resource and use evaluation. They are suitable for exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Boise Meridian, Blaine County, Idaho. T. 4 N., R. 18 E. Section 18: Lot 7 of Block 39 in Ketchum Townsite, Lots 6, 7, and 8 of Block 40 in Ketchum Townsite containing 0.52 acres.

In exchange for these lands, the United States will acquire the following described land from the American Public Land Exchange Co., Inc.

Boise Meridian, Blaine County, Idaho. T. 4 N., R. 17 E. Section 12: Lots 19 and 20, Resubdivision, Northwood P.U.D., Subdivision Lot 4. (Located within E2SE4) containing 1.72 acres.

The purpose of this exchange is to help enable the U.S. Forest Service to consolidate land holdings for construction of a new administrative and warehouse complex.

The values of the lands to be exchanged will be equalized through cash payments or provided services. Cash payments may not exceed twenty-five percent (25%) of the values of the Federal lands.

When issued, the patent will contain the following reservation to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, (26 Stat. 391; 43 U.S.C. 945).

Publication of this notice segregates the public lands from the operation of the public land laws, including the mining laws, for a period of two years from date of publication in the **Federal Register**, or until patent is issued.

Detailed information concerning the exchange is available from the Shoshone District Office of the Bureau of Land Management, 400 West F Street, Shoshone, ID 83352.

For a period of 45 days from the date of first publication, interested parties may submit comments to Bureau of Land Management, Shoshone District Office, P.O. Box 2-B, Shoshone, ID 83352.

**K. Lynn Bennett,**

*District Manager.*

### An Exchange of Public Land with the Nature Conservancy in Dona Ana County, NM

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of realty action.

**SUMMARY:** The following described lands and interests therein have been determined to be suitable for disposal by exchange under Section 206 of the Act of October 21, 1976 (43 U.S.C. 1716):

T. 23 S., R. 1W., NMPM
Sec. 27, W½ SE¼ SE¼
containing 20 acres, more or less

This 20-acre tract will be added to the Bureau of Land Management/The Nature Conservancy Exchange Pool. The land exchange pool is used whenever practical to facilitate land exchange and reduce unit costs.

**DATES:** Comments must be submitted on or before April 30, 1989.

**ADDRESSES:** Comments should be sent to District Manager, Bureau of Land Management, Las Cruces District Office, 1800 Marquess Street, Las Cruces, New Mexico 88005.

**FOR FURTHER INFORMATION CONTACT:** Marvin M. James at the address above or at (505) 525-8228 (FTS 571-8312).

**SUPPLEMENTARY INFORMATION:** The purpose of this exchange is to dispose of an isolated tract of public land in the Las Cruces West Mesa Industrial Park while consolidating ownership of other public land. This disposal by exchange is supported by a management decision in the Southern Rio Grande Management Framework Plan (February 1982).

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All valid existing rights and reservation of record including the following: Highway rights-of-way NM05204, NM014029, NM0566656, NM61192, NM77520; Telephone cable rights-of-way, NM38200, NM66376; Water pipeline rights-of-way NM032249, NM52926, NM77539.

Publication of this Notice will segregate the public land from all appropriations under the public land laws, including the mining laws but not mineral leasing laws. This segregation will terminate upon the issuance of a patent or 2 years from the date of publication of this Notice in the **Federal Register** or upon publication of a Notice of Termination.

Any adverse comments will be evaluated by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

**H. James Fox,**

### Realty Action; Private Exchange Involving Public Lands in Albany and Laramie Counties, WY

**AGENCY:** Bureau of Land Management Interior.

**ACTION:** Private exchange involving public lands in Albany and Laramie Counties, Wyoming.

The surface and mineral estates of the following described public land is being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756, 43 U.S.C. 1716):

Sixth Principal Meridian, Wyoming
T. 14 N., R. 70 W.;

Sec. 2, lots 1 & 2, SE¼NE¼, SW¼, E½ SE¼, SW¼SE¼;
Sec. 4, S½;
Sec. 6, lots 1-4, 6 & 7, N½SE¼;
Sec. 8, N½NE¼, NE¼NW¼;
Sec. 10, N½N½;
Sec. 12, NW¼;
T. 15 N., R. 70 W.;
Sec. 20, N½N½, SW¼SW¼, SE¼SE¼;
Sec. 22, S½SW¼; SE¼;
Sec. 28, N½, SW¼;
Sec. 30, lot 1, NE¼NW¼;
Sec. 32, all;
Sec. 34, all;
Containing 3677 acres, more or less

The publication of this notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect will terminate upon issuance of patent or upon expiration of two years from the effective date, or by publication of a Notice of Termination by the Authorized Officer, whichever comes first.

Private lands to be acquired by the United States are under negotiation but are generally located within T. 14 & 15 N., R. 70 W., Sixth Principal Meridian, Wyoming. A supplementary Notice with detailed information on lands to be exchanged will be published in the **Federal Register** when an agreement with the private landowner is reached.

### Proposed Withdrawal and Opportunity for Public Meeting; Idaho.

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The U.S. Forest Service has filed an application to withdraw and acquire the jurisdiction of 10 acres of public land for protection of the Clearwater Seed Orchard near Orofino, Idaho and adjacent to the Clearwater River. This notice closes the land for up to two years from surface entry and mining. The land will remain open to mineral leasing.

**DATE:** Comments and meeting requests should be sent to the Idaho State Director, BLM, 3380 Americana Terrace, Boise 83706.

**FOR FURTHER INFORMATION CONTACT:** Larry R. Lievsay, BLM, Idaho State Office, 208-334-1735.

**SUPPLEMENTARY INFORMATION:** On February 21, 1989, the U.S. Forest Service filed an application to withdraw the following-described public land from settlement, sale, location, or entry under general land laws, including the mining laws, subject to valid existing rights:

Boise Meridian, Idaho
T. 37 N., R. 1 W.,
sec. 32, N½S½NW¼SW¼.

The area described contains 10 acres in Nez Perce County.

The purpose of the proposed withdrawal is to protect the seed orchard.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Idaho State Director at the above address.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Idaho State Director within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

For a period of two years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. No temporary uses will be allowed during the segregative period.

The temporary segregation of the land in connection with this withdrawal application shall not affect administrative jurisdiction over the land, and the segregation shall not have the affect of authorizing any use of the land by the Forest Service.

## INTERSTATE COMMERCE COMMISSION

**[Finance Docket No. 31393]**

**Brandywine Valley Railroad Co.; Purchase; CSX Transportation, Inc., Lines in Florida**

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of decision accepting application for consideration.

**SUMMARY:** The Commission is accepting for consideration the application, filed February 10, 1989, by Brandywine Valley Railroad Company (BVRC) to purchase from CSX Transportation, Inc. (CSXT), 102.52 miles of rail line in Florida between: (1) Sebring (milepost AVC-873.94) and Palmdale (milepost AVC-918.6); (2) Palmdale (milepost AVD-918.58) and Lake Harbor (milepost AVD-957.99); and (3) Keela (milepost AVF-953.69) and Cane (milepost AVF-972.14). Pursuant to 49 CFR Part 1180, the Commission finds this a minor transaction.

**DATES:** Written comments must be filed with the Interstate Commerce Commission no later than April 10, 1989. Comments from the Secretary of Transportation and Attorney General of the United States must be filed by April 24, 1989. Applicants' reply is due by May 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Joseph H. Dettmar, (202) 275-7245. [TDD for hearing impaired: (202) 275-1721].

**ADDRESSES:** An original and 10 copies of all documents must be sent to: Office of the Secretary, Case Control Branch, Att'n: Finance Docket No. 31393, Interstate Commerce Commission, Washington, DC 20423.

In addition, one copy of all documents filed must be sent to each of applicants' representatives:

Lawrence H. Richmond, 100 North Charles Street, Baltimore, MD 21201.
Jeffrey S. Berlin, Suite 625, 2300 N Street, NW., Washington, DC 20037.

**SUPPLEMENTARY INFORMATION:** By application filed February 10, 1989, BVRC and CSXT (applicants) seek approval under 49 U.S.C. 11343, *et seq.*, for BVRC to acquire 102.52 miles of CSXT lines in Florida. BVRC will purchase CSXT's lines between: (1) Sebring (milepost AVC-873.94) and Palmdale (milepost AVC-918.6); (2) Palmdale (milepost AVD-918.58) and Lake Harbor (milepost AVD-957.99); and (3) Keela (milepost AVF-953.69), an intermediate point on the Palmdale-Lake Harbor segment, and Cane (milepost AVF-972.14). Applicants contend that this is a minor transaction under 49 CFR 1180.2(c), and they submitted a conforming application in accordance with the railroad consolidation procedures in 49 CFR Part 1180.

BVRC is a Class III common carrier controlled by a noncarrier, Lukins Steel Company, which in turn is controlled by Sponsors' Plan Asset Management, Inc., a subsidiary of Lukins, Inc. CSXT is a Class I common carrier and a unit of CSX Corporation. BVRC now operates a 4-mile line of railroad between Coatesville and Modena, PA. This 4-mile line will not connect with the lines being acquired. The lines being acquired connect at Lake Harbor with a line of the Florida East Coast Railway Company and at Clewiston, an intermediate point on the Palmdale-Lake Harbor segment, with a private line of railroad operated by the United States Sugar Corporation.

Approximately 15 shippers are using the lines. In 1987, CSXT moved approximately 25,000 carloads of sugar cane from local cane fields to an on-line processing plant, and 9,800 carloads of other originating or terminating traffic. During the first half of 1988, CSXT handled approximately 5,700 carloads of non-sugar traffic. Because of the seasonal nature of the sugar cane movements, applicants state that total 1988 carload data for this traffic were not available at the time the application was filed.

Applicants assert that the transaction will result in operating economies and improved service, and that this will enhance their financial viability. Specifically, the proposal will enable BVRC to enter a new market and spread its administrative, insurance, and operating costs over a larger base. Allegedly this will result in operating efficiencies that will allow BVRC to offer better service at more competitive rates. CSXT, on the other hand, will no longer be required to maintain what is for it a marginally profitable operation. Applicants assert that the transaction will improve service because, as a small, local carrier, BVRC will be better able to accommodate shipper needs.

Because BVRC will merely replace CSXT, applicants contend that the transaction will not result in a monopoly or reduce competition. Rather, they submit that the transaction will enhance competition by allowing BVRC to compete more effectively with other modes of transportation. They assert that there is a significant potential to divert traffic from water and motor carriers serving the area.

BVRC intends to operate the lines with its own employees. As a result, CSXT's work force would be reduced by 24 positions. No positions with BVRC would be eliminated. BVRC expects to hire additional employees to operate the acquired lines and states that it will first offer these positions to former CSXT employees.

CSXT states that it will negotiate employee protection agreements with affected employees pursuant to the conditions in *New York Dock Ry.—Control—Brooklyn East. Dist.*, 360 I.C.C. 60 (1979). These conditions are appropriate for employees affected by the acquisition.

Under § 1180.4(b)(2) of our consolidation regulations, we must determine initially whether a transaction is major, significant, or minor. The proposed transaction involves a Class I and a Class III railroad. It has no regional or national significance and will neither result in a major market extension nor reduce the present level of competition. Accordingly, we find the proposal a minor transaction under § 1180.2(c). Because the application complies with our regulations governing minor transactions, we are accepting it for consideration.

The application and exhibits are available for inspection in the Public Docket Room at the Offices of the Interstate Commerce Commission in Washington, DC. In addition, they may be obtained upon request from applicants' representatives named above.

Any interested persons, including government entities, may participate in this proceeding by submitting written comments. Comments must be filed no later than April 10, 1989. The United States Secretary of Transportation and the Attorney General of the United States must file their comments no later than April 24, 1989. Applicants' reply is due May 15, 1989. An original and 10 copies of all pleadings must be filed with the Secretary, Interstate Commerce Commission, Washington, DC 20423.

Written comments must be served concurrently by first-class mail on the Secretary of Transportation, the Attorney General and applicants' representatives. Written comments must also be served on all parties of record within 10 days of service of the service list by the Commission. We plan to issue the service list by May 15, 1989. Any person who files timely written comments shall be considered a party of record if the person's comments so request. In this event, no petition for leave to intervene need be filed. Consistent with 49 CFR 1180.4(d)(i)(iii), written comments must contain:

(a) The docket number and title of the proceeding;

(b) The name, address, and telephone number of the commenting party and its representative upon whom service shall be made;

(c) The commenting party's position, *i.e.*, whether it supports or opposes the proposed transaction;

(d) A statement of whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

(e) If desired, a request for an oral hearing with reasons supporting this request; the request must indicate the disputed material facts that can only be resolved at a hearing; and

(f) A list of all information sought to be discovered from applicant carriers.

Because we have determined that the proposal in this processing constitutes a minor transaction, no responsive applications will be permitted. The time limits for processing a minor transaction are set forth at 49 U.S.C. 11345(d).

Discovery may begin immediately. We admonish the parties to resolve all discovery matters expeditiously and amicably.

This action will not significantly affect either the quality of the human environment or energy conservation.

*It is ordered:*

1. This proposal is found to be a minor transaction under 49 CFR 180.2(c).

2. The application in Finance Docket No. 31393 is accepted for consideration.

3. The parties shall comply with all provisions as stated above.

4. This decision is effective on the date of service.

Decided: March 2, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

**Noreta R. McGee,**

*Secretary.*

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

### Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 16, 1989, Smithkline Chemicals, Division Smithkline Beckman C., 900 River Road, Conshohocken, Pennsylvania 19428, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basis classes of controlled substances listed below:

| Drug | Schedule |
|---|---|
| 4-methoxyamphetamine (7411) | I |
| Amphetamine, its salts, optical isomers and salts of its optical isomers (1100) | II |
| Phenylacetone (8501) | II |

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deupty Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 10, 1989.

**Gene R. Haislip,**

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

Dated: February 28, 1989.

[FR Doc. 89-5501 Filed 3-8-89; 8:45 am]

BILLING CODE 4410-09-M

### Importation of Controlled Substances; Application; Stepan Chemical Co.

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on January 24, 1989, Stepan Chemical Company, Natural Products Department, 100 W. Hunter Avenue, Maywood, New Jersey 07607, made application to the Drug Enforcement Administration to be registered as an importer of coca leaves (9040), a basic class of controlled substance in Schedule II.

Any manufacturer holding, or applying for, registration as a bulk

VOL 54 ISS 45 MR 9 1989 UMI

manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, DC 20537, Attention: DEA Federal Representative (Room 1112), and must be filed no later than April 10, 1989.

This procedure is to be conducted simulaneously with and independent of the procedures described in 21 CFR 1311.42(b), (c), (d), (e) and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42(a), (b), (c), (d), (e) and (f) are satisfied.

## DEPARTMENT OF LABOR

### Employment and Training Administration

### Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Alco Power Inc., et al.

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 20, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assitance, at the address shown below, not later than March 20, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Adminsitration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC this 21st day of February 1989.

**Marvin M. Fooks,**

### Employment Standards Administration, Wage and Hour Division

### Child Labor Advisory Committee; Subcommittee Meeting on Hazardous Occupations Order No. 11

The Child Labor Advisory Subcommittee on Hazardous Occupations Order No. 11, will convene at the Department of Labor, Frances Perkins Building, Room S-3504, 200 Constitution Avenue, NW., Washington, DC 20210, from 9:00 a.m.–5:00 p.m., on April 17 and 18, 1989. The discussion will focus on whether a recommendation is necessary with respect to the generic types of bakery product machines presently included in the scope of this Order, whether certain types of machines should be removed from prohibition under the Order, and whether certain types of machines should be added as being prohibited under the Order.

Members of the public are invited to attend the meeting. Individuals wishing to submit written data, views, or arguments pertaining to the business before the Subcommittee should submit them to Ms. Nila Stovall, Chief, Branch of Child Labor Programs, prior to the meeting date. Twenty-six copies are

VOL 54 ISS 45 MR 9 1989 UMI

needed for distribution to the members and for inclusion in the Subcommittee report.

Telephone inquiries and communications concerning this meeting should be directed to Ms. Stovall, Room S–3510, Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 523–7640.

Signed at Washington, DC, this 27th day of February 1989.

**Child Labor Advisory Committee; Subcommittee on Hazardous Occupations Order No. 12**

A meeting of the Child Labor Advisory Committee, Subcommittee on Hazardous Occupations Order No. 12 (HO 12), will be held on April 4, 1989, from 9:00 a.m. to 5:00 p.m. This meeting will be held in Room S–4215C, Frances Perkins Building, Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

The Subcommittee will consider whether changes in design and technology have increased/decreased the hazards of prohibited machinery; whether the machinery should be subject to the prohibitions of HO 12 regardless of the type of material being processed; and whether the paper shredder should be included in the prohibitions of this HO.

Members of the public are invited to attend these proceedings; however, since these are work sessions, seating is limited. Written data, reviews or arguments pertaining to the business before the Subcommittee must be received by Ms. Nila Stovall, Chief, Branch of Child Labor Programs, on or before March 21, 1989. Twenty-six copies are needed for distribution to the members and for inclusion in the Subcommittee Report. Telephone inquiries and communications concerning this meeting should be directed to Ms. Stovall, Room S–3510, Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 523–7640.

Signed at Washington, DC, this 27th day of February 1989.

## NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

**Agency Information Collection Under OMB Review**

**AGENCY:** National Endowment for the Humanities.

**ACTION:** Notice.

**SUMMARY:** The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**DATES:** Comments on this information collection must be submitted on or before April 10, 1989.

**ADDRESSES:** Send comments to Ms. Ingrid Reyes, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202–786–0233) and Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503 (202–395–7316).

**SUPPLEMENTARY INFORMATION:** All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries is subject to 44 U.S.C. 3504(h).

**FOR FURTHER INFORMATION CONTACT:** Ms. Ingrid Reyes, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202) 786–0233 from whom copies of forms and supporting documents are available.

*Category:* Revision.

*Title:* Panelist's Review Comments.

*Form Number:* 3136–0064.

*Frequency of Collection:* 1 per year from each respondent for each proposal.

*Respondents:* Panelists who evaluate proposals.

*Use:* To collect information that reflects a panelist's evaluation and rating of a proposal. The information is used to determine which grants should receive funding, and is provided (without names or other identifying information) to rejected applicants upon written request.

*Estimated Number of Respondents:* 56 per year.

*Frequency of Response:* Annually.

*Estimated Hours for Respondents to Provide Information:* 1 hour per proposal: includes time spent reading the proposal and writing evaluation on the "Panelist's Review Comments" Form.

*Estimated Total Annual Reporting and Recording Burden:* 1400.

**Susan Metts,**

*Assistant Chairman for Administration.*

BILLING CODE 7536–01–M

## NUCLEAR REGULATORY COMMISSION

**[Docket No. 72–3 (50–261)]**

**Environmental Assessment and Finding of No Significant Impact Related to Amendment of Materials License SNM–2502; Carolina Power and Light Co.**

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 4 to Materials License No. SNM–2502 held by the Carolina Power and Light Company (CP&L) for the receipt and storage of spent fuel at the H. B. Robinson Independent Spent Fuel Storage Installation (ISFSI) located on the H. B. Robinson Steam Electric Plant Unit No. 2 site, Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications concerning the removable beta and gamma contamination limit on the storage canister and associated surveillance requirements to assure that the limit is not exceeded.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was published in the **Federal Register** on November 2, 1988 (53 FR 44262).

**Environmental Assessment**

Identification of Proposed Action: By letter, dated August 11, 1988, and revised on September 9, 1988, CP&L requested an amendment to its Materials License No. SNM–2502 for the H. B. Robinson ISFSI. The amendment increases the limit in Technical Specification (TS) 2.4 for beta and gamma contamination on the surface of the Dry Shielded Canister (DSC) from the current limit to 220,000 disintegrations per minute per 100 square centimeters (dis/min/100 $cm^2$); a factor of ten increase. Corresponding changes in TS 4.5.1, Surveillance Requirements, are also made to provide assurance that the contamination limit is not exceeded.

*The Need for the Proposed Action*

The need for the increase in the removable beta and gamma contamination limit for the surface of the DSC was discovered as a result of preoperational tests conducted by CP&L, before loading spent fuel into the ISFSI. During preoperational heat transfer tests, contamination surveys of the IF300 shipping cask, used to transfer the DSC to the ISFSI, indicated that the internal surfaces of the drain line exceeded the previous limit for beta and gamma contamination on the surface of the DSC. The residual contamination in the shipping cask drain line was a result of previous spent fuel shipments conducted in accordance with 10 CFR Part 71. CP&L has taken measures to decontaminate the interior of the IF300 shipping cask and to remove and replace portions of the contaminated drain line to reduce the potential for the amount of contamination available for transfer to the outer surface of the DSC. Although the preoperational tests indicated that heat induced leaching of this contamination did not transfer to the DSC surface in levels that would exceed the previous limit, considering the potential for greater transfer of contamination than was previously anticipated, and increasing the beta and gamma contamination limit to account for this potential, is prudent and provides greater operational flexibility.

*Environmental Impacts of the Proposed Action*

The NRC staff has previously assessed the environmental impacts of the H. B. Robinson ISFSI in the "Environmental Assessment Related to the Construction and Operation of the H. B. Robinson Independent Spent Fuel Storage Installation," March 1986, and published a Finding of No Significant Impact in the **Federal Register** on April 8, 1986 (51 FR 12006). For this amendment, the NRC Staff evaluated the potential consequences from the release of radioactive material as a result of higher beta and gamma contamination levels on the outer surface of the DSC and found that the resultant inhalation dose at the site boundary, due to the release from all eight DSCs stored at the ISFSI, to be about $4\times10^{-6}$ Rem effective dose equivalent. The inhalation dose to the nearest resident would be about $3\times10^{-6}$ mrem. The effective dose equivalent from all airborne pathways is expected to be about 0.007 mrem. This dose is a small fraction of the 0.4 mrem/yr dose to the nearest resident estimated for ISFSI operations in the original EA cited above. Because the allowable contamination on the surface of the DSC is contained inside the IF300 shipping cask during the transfer to the ISFSI storage modules, no additional worker exposure is anticipated.

*Conclusion*

Based on the foregoing assessment, the NRC staff concludes that this revision of the Technical Specifications does not involve any changes in the scope or type of operations presently authorized and that the change in beta and gamma contamination limit (1) does not result in a significant offsite release of radioactive material, (2) does not result in any significant increase in individual or occupational exposure, and (3) does not result in a significant increase in the potential for or consequences from radiological accidents. Therefore, the staff concludes that the proposed action will not result in any significant environmental impacts.

*Alternative to the Proposed Action*

The principal alternative to the proposed action is that of no action. In view of the foregoing conclusion that the proposed action will not result in any significant impact, the preference of this alternative over the proposed action is not justified.

*Alternative Use of Resources*

Because the proposed action does not involve any changes in the scope or type of operations presently authorized, there are no alternative uses of resources other than those previously assessed.

*Agencies and Persons Contacted*

The Commission's staff did not contact any other agencies or individuals in connection with the preparation of this EA.

**Finding of No Significant Impact**

Based on the foregoing Environmental Assessment, the Commission has determined not to prepare an Environmental Impact Statement and has determined that a Finding of No Significant Impact is appropriate.

The August 11, 1988, application and the September 9, 1988, revision related to the proposed action along with the "Environmental Assessment Related to the Construction and Operation of the H. B. Robinson Independent Spent Fuel Storage Installation," March 1986, are available for public inspection and copying at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555.

Dated at Rockville, Maryland, this 2nd day of March 1989.

For the Nuclear Regulatory Commission.

**John P. Roberts,**

*Acting Chief, Fuel Cycle Safety Branch, Division of Industrial and Medical Nuclear Safety, NMSS.*

**Nuclear Fuel Cycle Licensee Workshop**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of workshop meeting with fuel cycle facility licensees.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) will sponsor a nuclear fuel cycle licensee workshop to bring together NRC officials and fuel cycle licensee representatives to discuss various NRC programs and policies and to aid in the management and implementation of radiological safety programs at fuel cycle facilities.

**DATES:** Workshop will be sponsored on May 3, 1989, from 8 a.m. to 5 p.m. and on May 4, 1989, from 8 a.m. to 2 p.m.

**ADDRESS:** Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Maryland.

**FOR FURTHER INFORMATION CONTACT:** Edwin Flack, Office of Nuclear Material Safety and Safeguards, (301) 492–0405 or George Bidinger, Office of Nuclear Material Safety and Safeguards, (301) 492–0683.

**SUPPLEMENTARY INFORMATION:** The workshop is designed to provide information on NRC policy and procedures applicable to fuel cycle licensees, develop an understanding of NRC program objectives, and provide an update on certain pending issues and policy matters. The workshop agenda will include such topics as critically specialist training, new Part 20

BILLING CODE 7590-01-M

**Advisory Committee on Nuclear Waste; Meeting**

The Advisory Committee on Nuclear Waste (ACNW) will hold a meeting on March 23-23, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD. Portions of this meeting will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy 5 U.S.C. 552b(c)(6). Notice of this meeting was published in the **Federal Register** on February 22, 1989 (54 FR 7620).

**Wednesday and Thursday, March 22-23, 1989—8:30 a.m.–5:00 p.m.**

1. Licensing Support System—Briefing on the development of the Licensing Support System for the High-Level Waste Repository (Open)

2. An update on the issue of mixed waste. Discussion of the issues involved in the disposal of wastes that contain both hazardous and radioactive constituents. (Open)

3. Discussion of a Division of High-Level Waste Management and Office of Nuclear Regulatory Research memorandum of understanding concerning performance assessment and status of activities. (Open)

4. An Administrative-Executive Session to discuss future schedules, ACNW discussions of critical issues related to the high-level waste repository, preparation of ACNW reports, new members, and other administrative matters. (Open/Closed)

5. The Committee will hear a discussion on the Center for Nuclear Waste Regulatory Analysis (CNWRA) related to the status of technical studies being conducted. (Open)

6. An update on the Site Characterization Plan including discussion of concerns regarding time limitations on data gathering. (Open)

7. Briefing by DOE on Site Characterization Study Plans. (Open)

Procedures for the conduct of and participation in ACNW meetings were published in the **Federal Register** on June 6, 1988 (53 FR 20699). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. The Office of the ACRS is providing Staff support for the ACNW. Persons desiring to make oral statements should notify the Executive Director of the Office of the ACRS as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the ACNW Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the Executive Director of the Office of the ACRS, Mr. Raymond F. Fraley (telephone) 301/492-4516), prior to the meeting. In view of the possibility that the schedule for ACNW meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

Dated: March 6, 1989.

John C. Hoyle,

*Advisory Committee Management Officer.*

[FR Doc. 89-5511 Filed 3-8-89; 8:45 am]

BILLING CODE 7590-01-M

**Docket No. 030-19788, License No. 12-21101-01, EA 88-290]**

**American Testing and Inspection, Inc.; Order To show Cause Why License Should not be Revoked and Order Suspending License (Effective Immediately)**

I

American Testing and Inspection, Inc. (ATI) Joliet, Illinois (the licensee) was the holder of Byproduct Material License No. 12-21101-01 which was issued by the Nuclear Regulatory Commission (NRC or Commission) on September 12, 1982, and which authorized ATI to possess and use licensed byproduct material to perform industrial radiography at field locations. The licensee continued to operate under NRC jurisdiction until June 1, 1987 at which time Illinois became an Agreement State and assumed regulatory jurisdiction over ATI for all work performed in the State of Illinois. In accordance with 10 CFR 150.20, ATI is authorized to possess and use licensed byproduct material to perform industrial radiography in non-agreement states. ATI's Illinois license, IL-01065-01, issued on January 6, 1988, is due to expire on August 31, 1992, at which time its authorization under the Commission's regulations would also terminate.

II

On March 24, 1987, the NRC Region III Office received several allegations of violations of NRC regultaory requirements during radiographic field operations at ATI. The allegers met with members of the technical staff in the NRC Region III office on March 25, 1987 and stated that ATI was willfully operating in violation of NRC license conditions. The NRC conducted an inspection of the ATI radiography program during the period March 25 through July 28, 1987 in response to the allegations. The inspection substantiated the allegations and concluded that ATI used unqualified radiographers, failed to complete and maintain utilization logs, and failed to perform quarterly field audits of radiographic operations. Since it was alleged that the violations were willful, the matter was referred to the NRC Region III Office of Investigations (OI) on April 21, 1987.

An investigation was conducted and in its report, dated August 31, 1988, OI sustantiated the allegations. It was concluded that ATI willfully used unqualified radiographers in violation of 10 CFR 34.31 on at least three occasions, as follows: An ATI employee who had not completed the required radiographer's training performed radiography on July 1, 1986, at the direction of the President (who is also the Radiation Safety Officer (RSO)) of ATI, and another ATI employee who was not trained as a radiographer performed radiography on February 3 and March 13, 1987. Further evidence revealed that the RSO of ATI was aware that this employee had performed radiography on these occasions even though the employee was not qualified as a radiographer.

The allegation that employees willfully failed to complete and maintain current utilization logs in violation of 10 CFR 34.27 was also substantiated. ATI also violated the record keeping requirements of 10 CFR 34.28, 34.33, and 34.43 which could have been satsified by properly completed utilization logs. evidence revealed that, contrary to 10 CFR 34.27, some NRC-required utilization logs were not completed until months after the jobs were completed. Further evidence revealed that the RSO personally failed to complete utilization logs between January 1986 and March 1987, even though he had regularly performed radiography during that time. It was determined that when utilization logs were completed late, employees fabricated lost information in the backfitted logs.

It was substantiated that the ATI RSO willfully failed to perform documented quarterly field audits for two employees, as required by License Condition No. 16 of ATI's NRC license. It was determined that one ATI employee had not been field audited for the fourth quarter of 1986, and another employee had not been field audited for the third and fourth quarters of 1986. The RSO stated that the latter employee had not been audited because he was not working as a radiographer the third and fourth quarters of 1986. This was subsequently determined to be a false statement as evidence revealed the individual had performed radiography in those two quarters. It was also determined that on August 27, 1986 the RSO willfully falsified documentation of a field audit for an ATI radiographer. Evidence revealed that the radiographer was not at the job site on the date that the RSO had documented the field audit.

On January 5, 1989, the State of Illinois performed an inspection at ATI. An NRC inspertor accompanied the State of Illinois inspector. During the inspection, the NRC inspector identified that on 55 occasions from January 13 to December 20, 1988, ATI violated the provisions of reciprocity as stated in 10 CFR 150.20(b)(1). Specifically, ATI failed to notify the Regional Administrator of USNRC Region III, either by telephone or by filing copies of Form-241 at least 3 days before engaging in licensed activities, requesting authorization to conduct such activities. ATI thus denied the NRC an opportunity to inspect the licensee's activities in Indiana, a non-Agreement state.

In Summary, evidence revealed that the RSO of ATI knowingly and willfully violated NRC regulatory requirements or knowingly and willfully permitted them to be violated. Additionally, the RSO made material false statements to the NRC by denying he was responsible for sending unqualified radiographers to perform radiography for ATI. The RSO made additional false statements to the NRC by stating that a field audit was not completed because the radiographer was not employed during two quarters, when the radiographer had, in fact, performed radiography during both quarters. The RSO made additional false statements by falsifying an NRC-required radiographer field audit.

Finally, ATI has violated the NRC's requirements under a general license granted pursuant to 10 CFR 150.20.

III

ATI is now licensed by Illinois, an Agreement State. 10 CFR 150.20 provides that any person holding a specific license from an Agreement State where the licensee maintains an office for directing the licensed activity is granted a general license to conduct the same activity in non-Agreement States, provided that the specific license does not limit authorized activities to specified installations or locations, the licensee complies with certain regulations specified including 10 CFR Parts 19 and 20 and Subpart B of 10 CFR Part 34, and that, at least 3 days before engaging in licensed activities in a non-Agreement state, the licensee either files copies of Form-241, or notifies by telephone the Regional Administrator of the NRC region in which the Agreement State that issued the license is located. Due to the nature of the violations and ATI's apparent liability or unwillingness to comply with regulatory requirements, the NRC lacks reasonable assurance that, in the future, ATI will conduct industrial radiography in accordance with regulatory requirements whenever it performs licensed activities in states which are under NRC jurisdiction (non-Agreement States). Accordingly, I have determined that ATI must show cause why its authorization (10 CFR 150.20) to possess and use byproduct material for industrial radiography in non-Agreement States under a general license should not be revoked.

Furthermore, I find that ATI willfully committed the violations stated in section II of this Order. On this basis, and because I find the public health, safety, and interest so requires, pursuant to 10 CFR 2.202(f), this order is effective immediately pending further order.

IV

Accordingly, in view of the foregoing and pursuant to sections 81, 161b, 161c, 161o, 161i, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and Parts 30 and 150, It is hereby ordered, Effective Immediately, That:

A. The general license granted to American, Testing and Inspection, Inc. by 10 CFR 150.20 is suspended.

B. American Testing and Inspection Company, Inc. of Joliet, Illinois shall show cause, in a manner hereinafter provided, why its general license under the provisions of 10 CFR 150.20 should not be revoked and why ATI should not be prohibited from conducting industrial radiography in non-Agreement States.

V

Pursuant to 10 CFR 2.202(b), the licensee may show cause why its general license should not be revoked by filing a written answer under oath or affirmation within 20 days of the date of issuance of this Order, setting forth the matters of fact and law on which the licensee relies to demonstrate that revocation of the license is not warranted. The licensee may answer, as provided in 10 CFR 2.202(d), by consenting to the entry of an order in substantially the form proposed in this Order, in which case the license will be revoked as stated in section IV. If the licensee fails to file an answer within the specified time, the Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support may issue, without further notice, an Order as described above.

VI

The licensee or any other person adversely affected by this Order may request a hearing within 20 days of this Order. Any answer to this Order and any request for a hearing shall be submitted to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Enforcement, Office of the General Counsel, at the same address, and to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois 60137. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by this Order and should address the criteria set forth in 10 CFR 2.714(d). An answer to this order or a request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission shall issue on Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at the hearing shall be whether this Order should be sustained.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

VOL 54 ISS 45 MR 9 1989 UMI

[Docket Nos. 50-369 and the 50-370]

**Duke Power Co.; Issuance of Amendments to Facility Operating Licenses**

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 93 to Facility Operating License No. NPF-9, and Amendment No. 74 to Facility Operating License No. NPF-17 issued to Duke Power Company, (the licensee) which revised the Technical Specifications (TS) for operation of the McGuire Nuclear Station, Units 1 and 2, (the facility) located in Mecklenburg County, North Carolina. The amendments were effective as of the date of issuance.

The amendments change TS 3/4 7.13, "Groundwater Level" to eliminate inconsistencies between the TS and the capabilities of the groundwater monitoring system as installed.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendments and Opportunity for Hearing in connection with this action was published in the **Federal Register** on April 21, 1988 (53 FR 18206). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has concluded that an environmental impact statement is not warranted and that the issuance of these amendments will not have a significant adverse effect on the quality of the human environment. (54 FR 8850)

For further details with respect to the action see (1) the application for amendments dated January 27, 1988, as supplemented April 28, June 21, and August 25, 1988, (2) Amendment No. 93 to License No. NPF-9 and Amendment No. 74 to License No. NPF-17 and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II.

Dated at Rockville, Maryland, this 2nd day of March 1989.

For the Nuclear Regulatory Commission.

[Docket No. 50-412]

**Duquesne Light Co. et. al.; Beaver Valley Power Station, Unit No. 2; Withdrawal of Amendment to Facility Operating License**

In the matter of Duquesne Light Co., Ohio Edison Co., the Cleveland Electric Illuminating Company, the Toledo Edison Company.

The U.S. Nuclear Regulatory Commission (the Commission) has denied a request by Duquesne Light Company, (licensee) for an amendment to Facility Operating License No. NPF-73, issued to the licensee for operation of the Beaver Valley Power Station, Unit No. 2, located in Beaver County, Pennsylvania. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on January 25, 1988 (53 FR 1998).

The purpose of the licensee's amendment request was to revise the Technical Specifications (TS) to reduce the number of incore instrument thimbles required operable during the first fuel cycle.

Subsequently the licensee informed the staff that all such thimbles were repaired and were therefore operable. The requested amendment was no longer needed, and is considered withdrawn by the licensee.

For further details with respect to this action, see (1) the application for amendment dated January 13, 1988, and (2) the staff's letter dated March 1, 1989.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington DC and at the B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, PA 15001.

Dated at Rockville, Maryland, this 1st day of March, 1989.

For the Nuclear Regulatory Commission.

**Forms Under Review by the Office of Management and Budget**

*Agency Clearance Officer:* Kenneth A. Fogash, (202) 272-2142.

*Upon Written Request Copy Available From:* Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street NW., Washington, DC 20549.

**Extension**

Rule 15c2-11
No. 270-196

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for extension of OMB approval rule 15c2-11 (17 CFR 240.15c2-11) under the Securities Exchange Act of 1934 (15 U.S.C. 78 et seq.) which regulates the initiation or resumption of quotations in a quotation medium by a broker-dealer for over-the-counter securities. Brokers and dealers incur an estimated average burden of eight hundred hours in order to comply with this rule.

The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even representative summary or study of the cost of SEC rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street NW., Washington, DC 20549-6004, and Gary Waxman, Clearance Officer, Office of Management and Budget, Paperwork Reduction Act Project (3235-0196) Room 3208 New Executive Office Building, Washington, DC 20543.

[File 500-1]

**Acrotech, Inc. et al.; Order of Suspension of Trading**

March 6, 1989.

It appears to the Securities and Exchange Commission that there is a lack of adequate current information concerning the securities of Acrotech, Inc., Advanced Technical Systems, Inc., Ameritex, Inc., Ayin Corporation, Centre Laboratories, Inc., Iosotonix Inc., OmniSource, Inc., and Primeritexx, Inc., and that questions have been raised about the adequacy and accuracy of publicly disseminated information concerning, among other things, the companies' business, operations, products, and claims for exemptions from the registration provisions of the Securities Act of 1933 pursuant to which their securities are trading. The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed companies.

Therefore, it is ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that trading in the above-listed companies, over-the-counter or otherwise, is suspended for the period from 9:00 a.m. (e.s.t.), March 7, 1989 through 11:59 p.m. (e.s.t.), on March 16, 1989.

By the Commission.

[File No. 500-1]

**U.S.A. Medical Corp.; Order of Suspension of Trading**

March 6, 1989.

It appears to the Securities and Exchange Commission that there is a lack of adequate and accurate current information concerning the securities of USA Medical Inc., and that questions have been raised about recent market activity in USA Medical, and about the adequacy and accuracy of publicly disseminated information concerning, among other things, the financial condition of the company, the identities of its shareholders, and the beneficial ownership and control of the company's shares. The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed company.

Therefore, it is ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that trading in the above-listed company, over-the-counter or otherwise, is suspended for the period from 9:30 a.m. EST, March 6, 1989 through 11:59 p.m. EST, on March 15, 1989.

By the Commission.

**Shirley E. Hollis,**

*Assistant Secretary.*

**DEPARTMENT OF TRANSPORTATION**

**Federal Highway Administration**

**Environmental Impact Statement; Maricopa County, AZ**

**AGENCY:** Federal Highway Administration, (FHWA), DOT.

**ACTION:** Notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Maricopa County, Arizona.

**FOR FURTHER INFORMATION CONTACT:** Kenneth H. Davis, District Engineer, Federal Highway Administration, 234 North Central Avenue, Suite 330, Phoenix, AZ 85004. Telephone: (602) 261-3648.

**SUPPLEMENTARY INFORMATION:** The FHWA, in connection with the Arizona Department of Transportation, will prepare an environmental impact statement (EIS) on a proposal to improve State Route 87 in Maricopa County, Arizona. The proposed improvement would widen the existing two-lane highway to four traffic lanes (including some sections where the roadways would be split) for a distance of approximately 25 miles. An additional two traffic lanes are needed to meet current, as well as future, traffic demand. In addition, the existing highway was constructed in 1953 and does not meet current standards in terms of geometrics and safety.

Several location alternatives are being considered, including the "no action" alternative. The "build" alternatives include design variations of grade and alignment, as well as a variety of environmental issues.

Letters describing the proposed action and soliciting comments have been sent to appropriate Federal, State, and local agencies and to private interest groups. Two public information meetings were held in early 1988. Upon completion of the draft EIS, one or more public hearings will be held. A formal scoping meeting was held on February 7, 1989.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments are invited from all interested parties. Comments or questions concerning this proposed action and EIS should be directed to the Federal Highway Administration at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal Programs and activities apply to this program.)

Issued on: March 3, 1989.

**Environmental Impact Statement; Mecklenburg County, NC**

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Rescind notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that an environmental impact statement will not be prepared for a proposed highway project in Mecklenburg County, North Carolina.

**FOR FURTHER INFORMATION CONTACT:** Mr. J. Max Tate, District Engineer, Federal Highway Administration, 4505 Falls of the Neuse Road, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 790-2852.

**SUPPLEMENTARY INFORMATION:** A Notice of Intent to prepare an Environmental Impact Statement (EIS) for a proposed highway project to improve U.S. 521 in Mecklenburg County, North Carolina, was issued on January 6, 1989 and published in the January 13, 1989 **Federal Register.** The FHWA, in cooperation with the North Carolina Department of Transportation, has since determined that preparation of an EIS is not necessary for this proposed highway project and hereby rescinds the previous Notice of Intent. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: February 28, 1989

**FEDERAL DEPOSIT INSURANCE CORPORATION**

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5. U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, March 14, 1989, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 47,283
Knoxville Consolidated Office, Knoxville, Tennessee

Memorandum re: Delegations of Authority relating to certain Corporation activities.

Reports of action approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Memorandum and resolution re: Final amendments to Part 303 of the Corporation's rules and regulations, entitled "Applications, Requests, Submittals, Delegations of Authority, and Notices of Acquisition of Control," and Part 346 of the Corporation's rules and regulations, entitled "Foreign Banks," which amendments affect the deposit insurance requirement, the capital equivalency requirement, the country exposure provision, the pledge of assets requirement, and the delegations of authority concerning it, as well as miscellaneous provisions throughout the regulation.

Memorandum and resolution re: Final Statement of Policy on Risk-Based Capital which: (1) Establishes a risk-based capital framework that is more sensitive than the current leverage ratios to risk factors, including off-balance sheet exposures; (2) encourages international banks to strengthen their capital positions; and (3) mitigates a source of competitive inequity arising from different supervisory capital requirements across countries.

Memorandum and resolution regarding the Corporation's budget for 1989.

Preliminary review of the Corporation's unaudited 1988 financial position.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550-17th Street NW., Washington, DC.

Requested for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: March 6, 1989.

requests that an item be moved to the discussion agenda.

Application for Federal deposit insurance:

1st San Diego Thrift and Loan Company, a proposed new industrial bank to be located at 3755 Sixth Avenue, San Diego, California

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii).

Note: Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Memorandum relating to a request for financial assistance pursuant to section 13(c) of the Federal Deposit Insurance Act

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Crossroads Bank Assistance Agreement, (Memo dated January 27, 1989)

Audit Report re: San Jose Consolidated Office, Cost Center-604, (Memo dated January 18, 1989)

Audit Report re: Bossier City Consolidated Office, Cost Center-105, (Memo dated February 17, 1989)

Audit Report re: Orlando Consolidated Office, Cost Center—104, (Memo dated February 17, 1989)

Discussion Agenda:

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, N.W., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: March 6, 1989.

**Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1988; Notice**

VOL 54 ISS 45 MR 9 1989 UMI

**DEPARTMENT OF STATE**

**Office of Protocol**

**[Public Notice 1099]**

**Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1988**

The Department of State submits the following comprehensive listing of the statements which, as required by law, Federal employees filed with their employing agencies during calendar year 1988 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined by statute.

Publication of this listing in the **Federal Register** is required by section 7342(f) of Title 5, United States Code, as added by section 515(a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Pub. L. 95-105, August 17, 1977, 91 Stat. 865).

Date: February 24, 1989.

**Ronald I. Spiers,**

*Under Secretary for Management.*

MR
9
1989
UMI

**DEPARTMENT OF LABOR**

**Employment and Training Administration**

**Federal-State Unemployment Compensation Program; Unemployment Insurance Program Letters Interpreting the Federal Unemployment Insurance Law**

The Employment and Training Administration (ETA) interprets Federal law pertaining to unemployment insurance as part of the fulfillment of its role in administration of the Federal-State unemployment insurance system. These interpretations are issued in Unemployment Insurance Program Letters (UIPLs) to State Employment Security Agencies (SESAs). The Three UIPLs described below are published in the **Federal Register** in order to inform the public.

**Unemployment Insurance Program Letter No. 13-87 and Change 1**

This directive transmits a revised interpretation of section 3304(a)(14) of the Federal Unemployment Tax Act (FUTA) relating to the wages for services of aliens which may be used for computing monetary entitlement to benefits. This interpretation permits States to pay benefits based on wages from otherwise covered services performed on or after November 6, 1986, by aliens granted lawful temporary resident status under section 210(a)(1) or section 245A(a) of the Immigration and Nationality Act (INA).

**Unemployment Insurance Program Letter No. 6-89**

This directive advises SESAs of section 902 of the Foreign Relations Authorization Act (Pub. L. 100-204) establishing another class of aliens eligible for temporary resident status under section 210(a) and section 245(A) of the INA. This class includes certain nationals of Poland, Ethiopia, Afghanistan, and Uganda. States may pay benefits based on wages from otherwise covered services performed on or after December 22, 1987, by aliens granted lawful temporary resident status under section 902, FRAA.

**Unemployment Insurance Program Letter No. 11-89**

This directive advises SESAs of amendments made by the Family Support Act of 1988, Pub. L. 100-485, and the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, Pub. L. 100-628, to the Social Security Act affecting the disclosure of wage and unemployment insurance (UI) claim information. The Family Support Act requires SESAs to take such actions as may be necessary to enable the Secretary of Health and Human Services (HHS) to obtain prompt access to any wage and UI claim information available to the SESA for the purpose of assisting the Federal Parent Locator Service (FPLS) in carrying out the child support enforcement program. It also requires the Secretary of Labor to enter into an agreement with HHS to give the FPLS access to this information. The McKinney Act Amendments require SESAs to disclose wage and UI claim information to the Department of Housing and Urban Development and public housing agencies under certain circumstances.

Dated: March 1, 1989.

**Roberts T. Jones,**

*Assistant Secretary of Labor.*

DIRECTIVE: UNEMPLOYMENT INSURANCE PROGRAM LETTER NO. 12-87

TO: ALL STATE EMPLOYMENT SECURITY AGENCIES

FROM: DONALD J. KULICK
Administrator
for Regional Management

SUBJECT: Amendments Made by the Tax Reform Act of 1986 (P.L. 99-514), the Alien Farmworker Act (P.L. 99-595), and the Immigration Reform and Control Act of 1986 (P.L. 99-603), Which Affect the Federal-State Unemployment Compensation Program

1. Purpose. To advise State agencies of recent amendments to Federal law affecting the Federal-State Unemployment Compensation (UC) program.

2. References. The Tax Reform Act of 1986, the Alien Farmworker Act, the Immigration Reform and Control Act of 1986.

3. Background. In late 1986, the President signed into law three bills containing provisions affecting the UC program. These are the: a) Tax Reform Act of 1986 (P.L. 99-514), signed into law on October 22, 1986; b) Alien Farmworker Act (P.L. 99-595), signed into law on October 31, 1986; and, c) Immigration Reform and Control Act of 1986 (P.L. 99-603), signed into law on November 6, 1986.

a. The Tax Reform Act of 1986 provides that all unemployment benefits will become taxable income with respect to benefits received after December 31, 1986. Currently, unemployment insurance (UI) is taxable only if the combination of taxable income and UI payments exceeds $18,000 for joint returns or $12,000 for single returns.

The Act also provides a two-year extension of the exclusion from the definition of wages of employer-financed educational assistance and group legal service plans (Sections 3306(b)(12) and (13) of the Federal

| RESCISSIONS | EXPIRATION DATE<br>March 31, 1988 |
|---|---|

DISTRIBUTION

Unemployment Tax Act (FUTA)); makes technical changes to Sections 3302(c)(2), 3302(f)(8), and 3306(o) of the FUTA; amends the Internal Revenue Code of 1954 concerning exclusions from the definition of "gross income" of certain prizes and awards; and temporarily excludes from the FUTA coverage services performed for certain Indian tribal governments.

b. The Alien Farmworker Act extends for five years, through December 31, 1992, the exemption from "employment" under Section 3306(c)(1)(B), FUTA, of agricultural labor performed by certain nonimmigrant farmworkers admitted to work temporarily under specific provisions of the Immigration and Nationality Act.

c. The Immigration Reform and Control Act of 1986 contains provisions relating to a system to verify alien eligibility for unemployment benefits.

These amendments made several technical and significant changes affecting the Federal-State UC program which may require changes in State law or procedures. However, only the alien verification provisions of the Immigration Reform and Control Act of 1986 may require changes in State laws for compliance with Section 303(f) of the Social Security Act (SSA). The amendments are explained in attachments to this UIPL.

4. Action Required. SESAs are requested to notify appropriate staff of these amendments and take necessary action to implement required changes in State laws or procedures.

5. Inquiries. Inquiries should be directed to your Regional Office.

6. Attachments. Text, explanation and interpretation of UC amendments.

TEXT. EXPLANATION AND INTERPRETATION OF UC AMENDMENTS
Made by Public Law 99-514, The Tax Reform Act of 1986

I. Section 121. Taxation of Unemployment Compensation.

A. Text of Amendment.
1. Amendment to Section 85 of the Internal Revenue Code (IRC) of 1986:

SEC. 85. UNEMPLOYMENT COMPENSATION.

(a) GENERAL RULE--In the case of an individual, gross income includes unemployment compensation.

(b) UNEMPLOYMENT COMPENSATION DEFINED.--For purposes of this section, the term "unemployment compensation" means any amount received under a law of the United States or of a State which is in the nature of unemployment compensation.

2. Effective Date:

SECTION 151. EFFECTIVE DATES.

(b) UNEMPLOYMENT COMPENSATION.--The amendment made by section 121 shall apply to amounts received after December 31, 1986, in taxable years ending after such date.

B. Discussion. The Revenue Act of 1978 designated specific income levels at which unemployment benefits were taxable ($25,000 for joint returns or $20,000 for single returns). The Tax Equity and Fiscal Responsibility Act of 1982 lowered the applicable income levels to $18,000 for joint returns or $12,000 for single returns. Section 121 of the Tax Reform Act of 1986 amends the law to provide that gross income shall include all unemployment benefits.

C. Implementation. Each claimant should be informed of this change in income tax law. Notices should be furnished to each claimant currently filing, and to new and reopening claimants as claims are filed. Informational pamphlets should be revised when reprinted. A brief supplemental form can be issued in the interim.

II. Section 122. Exclusion From the Definition of "Gross Income" Certain Prizes and Awards

A. General. Section 122 of the Tax Reform Act of 1986 amends Section 74 of the Internal Revenue Code of 1954 concerning exclusions from the definition of "gross income" of certain prizes and awards. The amendment specifies conditions which must be met to allow such exclusions. Determination of FUTA tax liability will be based upon such definition of gross income.

B. Effective Date. The amendments made by Section 122 apply to prizes and awards granted after December 31, 1986 (Section 151(c)).

C. Implementation. Since the Internal Revenue Service has the primary authority for administering the FUTA tax provisions, it will be responsible for interpreting and applying this provision.

III. Section 1162. 2-YEAR EXTENSION OF EXCLUSIONS FOR EDUCATIONAL ASSISTANCE PROGRAMS AND GROUP LEGAL PLANS.

A. Text of Amendments to Sections 120 and 127 of the IRC of 1986.

(a) EDUCATIONAL ASSISTANCE PROGRAMS.--

(1) EXTENSION.--Subsection (d) of section 127 (relating to termination of exclusion for amounts received under educational assistance programs) is amended by striking out "1985" and inserting in lieu thereof "1987".

(2) INCREASE IN AMOUNTS.--Paragraph (2) of section 127(a) is amended by striking out "$5,000" each place it appears in the text and the heading thereof and inserting in lieu thereof "$5,250".

(b) GROUP LEGAL PLANS.--Subsection (e) of section 120 (relating to termination of exclusion for amounts received under qualified group legal services plans) is amended by striking out "1985" and inserting in lieu thereof "1987".

(c) EFFECTIVE DATES.--

(1) SUBSECTION (a).--The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 1985.

(2) SUBSECTION (b).--The amendment made by subsection (b) shall apply to years ending after December 31, 1985.

(3) CAFETERIA PLAN WITH GROUP LEGAL BENEFITS.--If, within 60 days after the enactment of this Act, an employee elects under a cafeteria plan under Section 125 of the Internal Revenue Code of 1986 coverage for group legal benefits to which Section 120 of such Code applies, such election may, at the election of the taxpayer, apply to all legal services provided during 1986. The preceding sentence shall not apply to any plan which on August 16, 1986, offered such group legal benefits under such plan.

B. Discussion. Section 1162 of the Tax Reform Act of 1986 provides a two-year extension of the exclusion from the definition of wages under the FUTA of employer-financed educational assistance and group legal service plans (through December 31, 1987).

C. Implementation. Since the Internal Revenue Service (IRS) has the primary authority for administering the FUTA tax provisions, it will be responsible for interpreting and applying this provision.

IV. Section 1705. APPLICABILITY OF UNEMPLOYMENT COMPENSATION TAX TO CERTAIN SERVICES PERFORMED FOR CERTAIN INDIAN TRIBAL GOVERNMENTS (This provision does not amend the FUTA).

A. Text of Section 1705 of the Tax Reform Act of 1986:

(a) IN GENERAL.--For purposes of the Federal Unemployment Tax Act, service performed in the employ of a qualified Indian tribal government shall not be treated as employment (within the meaning of section 3306 of such Act) if it is service--

(1) which is performed--

(A) before, on, or after the date of the enactment of this Act, but before January 1, 1988, and

(B) during a period in which the Indian tribal government is not covered by a State unemployment compensation program, and

(2) with respect to which the tax imposed under the Federal Unemployment Tax Act has not been paid.

(b) DEFINITION.--For purposes of this section, the term "qualified Indian tribal government" means an Indian tribal government the service for which is not covered by a State unemployment compensation program on June 11, 1986.

B. Discussion. Section 1705 of the Tax Reform Act of 1986 excludes from the definition of employment for Federal unemployment tax purposes services performed for a qualified Indian tribal government during the period prior to January 1, 1988 if the service was not covered by a State law on June 11, 1986. Presently, the only Indian tribal government we are aware of that meets this requirement is the Ute tribe in Colorado.

C. Implementation. Since the IRS has the primary authority for administering the FUTA tax collections, it will be responsible for interpreting and applying this provision.

V. Section 1706 of the Tax Reform Act of 1986. Treatment of Certain Technical Personnel.

A. Text of Amendment.

(a) IN GENERAL.--Section 530 of the Revenue Act of 1978 is amended by adding at the end thereof the following new subsection:

"(d) EXCEPTION.--This section shall not apply in the case of an individual who, pursuant to an arrangement between the taxpayer and another person, provides services for such other person as an engineer, designer, drafter, computer programmer, systems analyst, or other similarly skilled worker engaged in a similar line of work."

(b) EFFECTIVE DATE.--The amendment made by this section shall apply to remuneration paid and services rendered after December 31, 1986.

B. Discussion. Section 530 of the Revenue Act of 1978 (P.L. 95-600) provides that taxpayers who in the past had a reasonable basis, under specified criteria, for not treating workers as employees may continue such treatment without incurring employment tax liability. Section 1706 of the Tax Reform Act of 1986 amends Section 530 to limit its applicability by providing that the section shall not apply to firms engaging the services of such person as an engineer, designer, drafter, computer programmer, systems analyst, or other similarly skilled worker engaged in a similar line of work. This means that the IRS will apply common-law rules to these firms in determining liability for employment taxes, including the FUTA tax.

C. Implementation. Since the IRS has the primary authority for administering the FUTA tax provisions, it will be responsible for interpreting and applying this provision.

VI. Section 1884 of the Tax Reform Act of 1986. Technical Corrections in Federal Unemployment Tax Act.

A. Text of Amendment:

The Federal Unemployment Tax Act is amended as follows:

(1) Subparagraph (B) of section 3302(c)(2) (relating to a limit on the credit against the unemployment tax) is amended--

(A) By striking out "determination" the second place it appears in the material preceding clause (i) and inserting in lieu thereof "denominator", and

(B) in clause (i)--

(i) by striking out "percent" immediately preceding the comma at the end thereof, and

(ii) by inserting "percent" after "2.7".

(2) Subparagraph (A) of section 3302(f)(8) (relating to a partial limitation on the reduction of the credit against the unemployment tax) is amended by striking out "1987" and inserting in lieu thereof "1986".

TEXT, EXPLANATION AND INTERPRETATION OF UC AMENDMENTS Made by Public Law 99-595, the Alien Farmworker Act, to Extend the Exclusion From Unemployment Tax of Wages Paid to Certain Alien Farmworkers.

A. Amendment. Section 3306(c)(1)(B), of the FUTA is amended to read as follows:

(B) such labor is not agricultural labor performed before January 1, 1993, by an individual who is an alien admitted to the United States to perform agricultural labor pursuant to sections 214(c) and 101(a)(15)(H) of the Immigration and Nationality Act;

B. Discussion. This provision amends Section 3306(c)(1)(B), FUTA, by extending for five years, until December 31, 1992, the FUTA exemption from coverage of farmworkers who are aliens temporarily admitted to the United States to work in agricultural employment pursuant to Sections 214(c) and 101(a)(15)(H) of the Immigration and Nationality Act.

Prior to the amendments made by Section 4 of P.L. 96-84, effective January 1, 1980, service performed by an alien referred to in Section 3306(c)(1)(B), FUTA, was not required to be covered or taken into account in determining the size of a firm under Section 3306(c)(1)(A)(i) and (ii), FUTA. Subsequent amendments by Congress extended until December 31, 1985, the exemption from coverage of agricultural work under Section 3306(c)(1)(B), FUTA, but required consideration of such service in determining the size of a firm. P.L. 99-595 further extends the exemption from coverage of the same type of agricultural services through December 31, 1992, and continues the required consideration of such service in determining the size of the firm.

C. Implementation. Since the IRS has the primary authority for administering the FUTA tax provisions, it will be responsible for interpreting and applying this provision. While States have the option of providing a similar exclusion in State law, it is not a Federal requirement for conformity.

EXPLANATION AND INTERPRETATION
of the Immigration Reform and Control Act of 1986
(Public Law 99-603) Relating to the Federal and
Federal-State Unemployment Compensation Programs

I. Section 121. Provisions for Determining and Verifying Alien Status for Entitlement to Unemployment Compensation.

A. General. Section 121 of the Immigration Reform and Control Act of 1986, P.L. 99-603, contains three provisions affecting the Federal and Federal-State UC programs. Section 121(a)(1) amends Part A of Title XI of the SSA by adding new subsections (d) and (e) to Section 1137 - "Income and Eligibility Verification System." These new subsections establish immigration status verification procedures for UC programs. Section 121(b)(3) of the Act amends Section 302(a) of the SSA to provide for reimbursement to State agencies of 100 percent of the reasonable costs of implementing and operating the immigration status verification system. Section 121(c) of the Act establishes effective dates, and includes provisions for waiver of verification system requirements and certain reports to Congress. Section 121(d) also requires certain General Accounting Office reports, which involve the Department of Labor and the State agencies. Following is an explanation of these new provisions. Detailed instructions for implementing these provisions will be issued at a later date.

The purpose of these provisions is to require States who do not receive a waiver to verify through Immigration and Naturalization Service (INS) records the legal status of all aliens applying for benefits under certain Federally-assisted and Federally-funded programs beginning October 1, 1988. The UC program is included through an amendment to the existing provisions for the income and eligibility verification system in Section 1137 of the SSA. Existing Section 303(f) of the SSA requires State UC agencies to participate in the income and eligibility verification system as described in Section 1137.

Under these new requirements, States who do not qualify for a waiver under conditions spelled out in the law must determine, as a condition of an individual's eligibility for benefits, that an individual is either a United States citizen or in a "satisfactory immigration status" and verify through INS records the authenticity of any immigration document submitted by the individual. However, prior to denying benefits because of immigration status, the State agency must follow certain minimum procedural safeguards. The requirement for a State agency to participate in the immigration status verification system may be waived by the Secretary of Labor if specified conditions are met. To the extent these new requirements apply to the States for the purposes of the Federal-State UC program, they will also apply to Federal unemployment benefit and allowance programs administered by the States under agreements with the Secretary of Labor.

B. Effective Dates. Section 121(c) of the Immigration Reform and Control Act of 1986 contains several effective dates which impact State employment security agencies.

1. All States must begin complying with the requirements for immigration status determination and verification on October 1, 1988, unless participation is waived by the Secretary of Labor.

2. The INS is required to implement a system for verifying immigration status and make the system available to all States not later than October 1, 1987.

3. An amendment to Section 302(a) of the SSA providing for funding the costs of implementing and operating the immigration status verification system is effective October 1, 1987.

4. The Secretary of Labor is required to submit a report by April 1, 1988 to the House Ways and Means Committee and to the Senate Finance Committee on implementation of the new requirements for the UC programs. The Comptroller General is required to submit a report to Congress and to the Commissioner of INS by October 1, 1987, on the effectiveness of current pilot projects relating to the INS System for Alien Verification of Eligibility (SAVE). In addition, the Comptroller General must submit a report to the Congress and to the Secretary of Labor by April 1, 1989, on implementation of the new immigration status verification system requirements.

C. Declaration of Citizenship or Satisfactory Immigration Status. Section 1137(d)(1) specifies that the State shall require, as a condition of eligibility, that each individual sign a declaration under penalty of perjury stating:

1. whether the individual is a citizen or national of the United States, and

2. If not, whether the individual is in a "satisfactory immigration status."

D. Satisfactory Immigration Status. Section 1137(d)(1)(B)(ii)(III) defines "satisfactory immigration status" as an immigration status that does not make the individual ineligible for unemployment benefits.

1. Section 3304(a)(14)(A), FUTA, prescribes the conditions under which benefits may be paid based on services performed by an alien. Specifically, the FUTA requires that compensation shall not be payable on the basis of services performed by an alien unless:

a. the alien was lawfully admitted for permanent residence at the time the services were performed,

b. the alien was lawfully present for the purposes of performing the services, or

c. the alien was permanently residing in the United States under color of law at the time the services were performed.

2. In addition, an alien must be legally authorized to work at the time benefits are claimed to be considered "available for work."

A complete explanation of the Federal requirements relating to alien eligibility for unemployment benefits is found in UIPL 1-86, issued October 29, 1985.

E. Provisions Relating to Determining Alien Status. The Act contains provisions requiring State action to verify that an alien is in "satisfactory immigration status." However, in making any determination of eligibility based on immigration status, the State agency must provide an individual with certain procedural safeguards.

1. Verification of Status. If on the declaration of citizenship statement an individual indicates that he or she is in a satisfactory immigration status, the individual must present documentary evidence. Section 1137(d)(2), SSA, specifies that the individual must present either:

a. an alien registration document or other proof of immigration registration from INS that contains the individual's alien admission number or alien file number (or numbers if the individual has more than one number), or,

b. such other documents as the State determines constitute reasonable evidence indicating a satisfactory immigration status.

In addition, Section 3304(a)(14)(B), FUTA, requires that the same information be uniformly required of all claimants. Section 1137(d)(3), SSA, further requires the State agency to verify documentation referred to in (a) above with the INS through an automated system or other system designated by the INS. Under subsection (3)(B), this system must protect "the individual's privacy to the maximum degree possible." The State agency must use the individual's alien file number or alien admission number as the basis for verifying alien status. If instead of an alien number the State agency has other documents which the State determines constitute reasonable evidence of satisfactory immigration status, Section 1137(d)(4)(B), SSA, requires the State agency to submit a photocopy of the documents to INS for verification.

2. Procedural Safeguards. The Act contains specific requirements relating to procedures for fact-finding, promptness of payment, and a right to a hearing. A summary and explanation of these requirements follow.

a. The State agency must provide the individual with a reasonable opportunity to submit documentation indicating satisfactory immigration status if such documentation is not presented at the time of filing for UC. The State must also provide the individual reasonable opportunity to submit evidence of satisfactory immigration status if the documentation presented is not verified by the INS. Time periods under State law for providing information needed to determine eligibility for benefits will meet the requirement for "reasonable opportunity." Attachment 1 to UIPL 15-78, issued January 24, 1978, contains guidance in handling cases where the claimant declines to provide information with respect to immigration status. This guidance is still applicable.

b. Under Section 1137(d)(4)(A)(ii), SSA, a State agency may not delay, deny, reduce or terminate an individual's eligibility for benefits on the basis of immigration status until a reasonable opportunity has been provided for the individual to present required documentation. If the alien does present such documentation, pending its verification, a State may not delay, deny, reduce, or terminate the individual's eligibility for benefits on the basis of the individual's status. Section 1137(d)(4)(B)(ii), SSA. However, under Section 1137(d)(4)(B)(iii), SSA, the State shall not be liable for the consequences of INS action, delay or failure to conduct such verification.

c. Section 1137(d)(5) provides if a State determines that an individual is not in a satisfactory immigration status, the individual must be given the opportunity for a fair hearing. This is already a requirement of Section 303(a)(3), SSA, and thus adds nothing to existing Federal requirements.

In addition, Section 3304(a)(14)(C), FUTA, requires an evidentiary burden to be met that is not present in Section 1137(d), SSA. Thus, Section 3304(a)(14)(C) requires that no determination denying benefits based on alien status shall be made except on the preponderance of the evidence. Attachment 1 to UIPL 15-78 contains guidance on what constitutes preponderance of evidence.

F. Limitations on Federal Agency Action. Under Section 1137(e), the Department of Labor may not take any compliance, disallowance, penalty or other regulatory action against the State agency because of an error in a determination holding an individual eligible for benefits based on citizenship or immigration status:

1. if the determination was based on verification provided by the INS;

2. because the State was required under Section 1137(d)(4)(A) or (B), to pay benefits to the individual during the period required to provide the individual with reasonable opportunity to submit documentation or pending official verification of immigration status by the INS;

3. as a result of the outcome of the determination and hearing process afforded the individual under State law.

G. Title III Funding. Section 121(b)(3) amends Section 302(a) of the SSA to permit the use of Title III funds for "100 percent of so much of the reasonable expenditures of the State as are attributable to the costs of the implementation and operation of the immigration status verification system described in section 1137(d)." Section 302(a) of the SSA authorizes the Secretary of Labor to provide payment to the States for the costs of administering the employment security program.

H. Waiver of Requirements. Under Section 121(c)(4)(B), the Secretary of Labor may waive the requirements of the Act on his own initiative or upon an application by a State and based on information the Secretary deems persuasive, provided certain conditions are met.

1. In order to waive the requirements with respect to a State, the Secretary must determine that:

a. the State agency is using an alternative system which is as effective and timely as the INS immigration status verification system and which provides for hearing and appeal rights at least to the extent required under Section 1137(d)(5), or

b. the costs of administering the immigration status verification system exceed the estimated savings.

2. Section 121(c)(4)(C) contains the following criteria by the Secretary of Labor to be used in determining cost effectiveness:

a. the proportion of aliens claiming unemployment benefits to the total number of individuals claiming unemployment benefits,

b. any savings in benefit outlays resulting from implementation of the verification system,

c. the labor and nonlabor costs of administering the verification system,

d. the degree to which the INS is capable of providing timely and reliable information to the State agency, and

e. such other factors as the Secretary of Labor deems relevant.

A letter will be sent to each State early in 1987 requesting the information the Secretary needs to determine whether a waiver will apply.

I. Reports to Congress. The Act requires reports by the applicable Secretary and Comptroller General on the immigration status verification system.

1. Report by the Secretary. Under Section 121(c)(4)(A), the Secretary of Labor must report to the House Ways and Means Committee and the Senate Finance Committee by April 1, 1988, whether (and the extent to which) application of the SAVE program in the UC program is cost-effective and appropriate to the program and whether there should be a waiver of the application of the SAVE program under Section 121(c)(4)(B).

2. Reports by the Comptroller General. By October 1, 1987, the Comptroller General is required by Section 121(d) to report to Congress and to the Commissioner of INS on current pilot projects using the INS System for Alien Verification of Eligibility (SAVE). The report must examine the effectiveness of the projects and any problems with implementation. In addition, the Comptroller General is directed to monitor and analyze implementation of the new system. By April 1, 1989, the Comptroller General must report to Congress and the appropriate Secretaries on implementation of the immigration status verification system, including recommendations for change, as appropriate.

II. Provisions for Legalization of Status Relating to Entitlement to Unemployment Compensation.

A. General. Section 201(a) of the Immigration Reform and Control Act of 1986, P.L. 99-603, amends the Immigration and Nationality Act to add a new Section 245A to authorize the adjustment of status of certain aliens who entered the United States before January 1, 1982, to that of "lawfully admitted for temporary residence." Section 245A(a) establishes a new category of "lawfully admitted for temporary residence" and specifies the requirements that must be met to obtain an adjustment of status. Section 245A(b) provides for termination of temporary resident status and otherwise specifies the terms and conditions of temporary resident status. This section also prescribes the conditions for subsequent adjustment of status from "lawfully admitted for temporary residence" to that of "lawfully admitted for permanent residence." Section 245A(e) provides for the temporary stay of deportation and work authorization for certain applicants.

Following is an explanation of these new provisions as they affect the UC program.

B. Temporary Resident Status. Section 245A(a) establishes a new category of "lawfully admitted for temporary residence."

1. This new category allows for the adjustment of status of an alien with no documentation of legal entry to that of an alien lawfully admitted for temporary residence if the alien:

a. Makes a timely application as specified in Section 245A(a)(1); that is, files a proper application within

a 12-month period beginning on a date (not later than 180 days after the date of enactment) designated by the Attorney General;

b. Had continuous unlawful residence beginning with entry into the United States before January 1, 1982;

c. Has been continuously present in the United States, with the exception of brief, casual, and innocent absences, since November 5, 1986;

d. Is admissible as an immigrant under Section 245A(a)(4).

2. After 18 months of temporary resident status, an alien has one year to apply for an adjustment of status to that of lawfully admitted for permanent residence. To be eligible for adjustment of status, the alien must meet the four conditions specified in Section 245A(b)(1).

3. Section 245A(b)(2) specifies the conditions under which the Attorney General shall provide for termination of temporary resident status; and

4. Section 245A(b)(3) provides that an alien with temporary resident status shall be granted "authorization to engage in employment in the United States and be provided with an 'employment authorized' endorsement or other appropriate work permit." Paragraph (3) also spells out the conditions on authorization to travel abroad.

C. Temporary Stay of Deportation and Work Authorization for Certain Applicants. Section 245A(e) provides for a hold on deportation and the furnishing of work authorization to an alien who presents a prima facie case or application for change of status before or during the application period.

1. Before Application Period. An alien may not be deported and must be granted employment authorization if the alien is apprehended before the beginning of the application period and can establish a prima facie case of eligibility for an adjustment of status to temporary residence. The alien must then apply for adjustment within the first 30 days of the application period as provided in Section 245A(e)(1).

2. During Application Period. An alien may not be deported and must be granted employment authorization, pending a final determination of alien status, if the alien can establish prima facie application for adjustment of status to temporary resident.

D. Impact on Federal Requirements. For the UC program there are two separate aspects to alien eligibility: non-monetary eligibility during the benefit year, and monetary eligibility during the base period.

1. Availability for Work. When an individual is granted work authorization under these new provisions, the individual becomes legally available for work. The individual must have some dated documentation from INS substantiating the work authorization issued under Section 245A. An alien with INS issued work authorization is eligible, if also able to work, unemployed, and otherwise entitled to benefits under the State law.

2. Section 3304(a)(14), FUTA. Even though an individual has work authorization, the requirements of Section 3304(a)(14), FUTA, still apply. The State must determine monetary eligibility during the base period. The FUTA prescribes the conditions under which benefits may be paid based on services performed by an alien who was in a proper status "at the time services were performed." Benefits based on services performed while an alien is lawfully admitted for temporary residence, or is granted work authorization pending a ruling on his/her application, is payable because the work authorization grants an alien the status of being lawfully present for purposes of performing services. The status of temporary residence or granting of work authorization does not, however, confer retroactive lawful presence for purposes of monetary eligibility.

Further, an alien whose status is adjusted to "lawfully admitted for permanent residence" is, from the date such status is granted, "permanently residing in the United States under color of law" within the meaning of that phrase as used in Section 3304(a)(14)(A), FUTA, and further consideration is being given to whether an alien in such status falls under the first category of Section 3304(a)(14)(A), FUTA, as "lawfully admitted for permanent residence."

III. Admission of Temporary Agricultural (H-2A) Workers and Their Entitlement To Unemployment Compensation.

A. General. Title III of the Immigration Reform and Control Act of 1986, P.L. 99-603, provides for the reform of legal immigration. Section 301 of the Act establishes a new "H-2A" nonimmigrant classification for temporary agricultural worker. Section 301(a) and (b) amends Sections 101(a)(15)(H)

and 214(c) of the Immigration and Nationality Act to provide for this new classification. Following is an explanation of these new provisions as they effect the UC programs.

B. New "H-2A" Workers. Section 301(a) provides a new "H-2A" nonimmigrant classification for temporary agricultural labor by amending Section 101(a)(15)(H) of the Immigration and Nationality Act. Section 301(c) added a new Section 216 to the Immigration and Nationality Act which allows for the admission of "H-2A" workers to perform agricultural labor or services "of a temporary or seasonal nature" as defined by the Secretary of Labor.

C. Impact on States. The services performed by the new "H-2A" workers are excludable from coverage on the same basis as those performed by "H-2" workers. Section 3306(c)(1)(B), FUTA, exempts from coverage services performed by aliens in agricultural labor, including the new "H-2A" workers through calendar year 1992. However, it requires consideration of such service in determining the size of a firm under Section 3306(c)(1)(A), FUTA.

IV. Provisions for Lawful Residence of Certain Special Agricultural Workers and Their Entitlement to Unemployment Compensation.

A. General. Title III of the Immigration Reform and Control Act of 1986, P.L. 99-603, provides for the lawful residence of certain agricultural workers. Section 302(a)(1) of Title III adds a new Section 210 to the Immigration and Nationality Act that allows for the adjustment of status of special agricultural workers to that of an alien lawfully admitted for temporary residence, and further adjustment of such lawful temporary residents' status to permanent resident.

B. Lawful Residence. The new Section 210 creates a new category of special agricultural worker.

1. This new category allows for the adjustment of status to an alien lawfully admitted for temporary residence if the following requirements are met:

a. The alien must apply for the adjustment during the period specified in Section 210(a)(1)(A), and

b. The alien must establish residence in the United States, and have performed seasonal agricultural services in the United States for at least "90 man-days" during the period specified in Section 210(a)(1)(B).

BEST COPY AVAILABLE

c. Except as provided in subsection (c)(2) of Section 210, the alien must establish that he/she is admissible to the United States as an immigrant.

2. Once granted the status of lawful temporary resident under Section 210(a)(1), an alien "shall be granted authorization to engage in employment in the United States and shall be provided an 'employment authorized' endorsement or other appropriate work permit, in the same manner as for aliens lawfully admitted for permanent residence." (Section 210(a)(4)).

3. In accordance with the specific dates listed in Section 210(a)(2), the Attorney General shall adjust the status of any alien with temporary resident status under Section 210(a)(1) to that of an alien lawfully admitted for permanent residence.

4. Section 210(a)(3) provides for the termination of "temporary resident status" by the Attorney General only upon a determination that the alien is deportable.

C. Temporary Stay of Exclusion or Deportation and Work Authorization for Certain Applicants. New Section 210(d) allows for a stay of exclusion or deportation and work authorization for certain aliens.

1. Before Application Period. An alien may not be excluded or deported and must be granted employment authorization if apprehended before the beginning of the application period and can establish a nonfrivolous case of eligibility to have an adjustment of status. The alien must then apply for adjustment within the first 30 days of the application period as provided in Section 245A(e)(1).

2. During Application Period. An alien may not be excluded or deported and must be granted employment authorization if the alien can present a nonfrivolous application for adjustment of status, and until a final determination of the application has been made.

3. In both cases the alien must be granted work authorization and provided documentation of work authorization.

D. Impact on States. For the UC program, there are two separate aspects to alien eligibility: non-monetary eligibility during the benefit year, and monetary eligibility during the base period.

1. Availability for Work. When an individual is granted work authorization under these new provisions, the individual becomes legally available for work. The individual must have some dated documentation from INS substantiating the work authorization.

2. Section 3304(a)(14)(A), FUTA. Even though an individual has work authorization, the requirements of Section 3304(a)(14), FUTA, still apply. The State must determine monetary eligibility during the base period. The FUTA prescribes the conditions under which benefits may be paid based on the status of the alien "at the time services were performed." It is possible that an agricultural worker's base period wage credits may meet the criteria under 3304(a)(14), FUTA. For example, if all the wage credits were performed as an H-2 worker, then the worker "was lawfully present for purposes of performing such services. . . ." Benefits based on services performed while an alien is lawfully admitted for temporary residence are payable under the FUTA because the work authorization grants the alien the status "lawfully present for purposes of performing services." The status of "temporary resident" does not, however, confer retroactive lawful presence for purposes of monetary eligibility under the FUTA. An alien granted the status of "lawfully admitted for permanent residence" is at least a third category of "permanently residing in the United States under color of law" under Section 3304(a)(14)(A), and consideration is being given to whether such alien also falls into the first category of "lawfully admitted for permanent residence."

DIRECTIVE : UNEMPLOYMENT INSURANCE PROGRAM LETTER NO. 12-87, CHANGE 1

TO : ALL STATE EMPLOYMENT SECURITY AGENCIES

FROM : DONALD J. KULICK
Administrator
for Regional Management

SUBJECT : Revised Interpretation of Section 3304(a)(14) of the Federal Unemployment Tax Act Relating to the Adjustment of Status of Certain Aliens to Lawfully Admitted for Temporary Residence

1. Purpose. To advise State agencies of a revised interpretation of Section 3304(a)(14) of the Federal Unemployment Tax Act (FUTA) relating to the wages for services of aliens which may be used for computing monetary entitlement to unemployment benefits. This revised interpretation permits States to pay benefits based on wages from otherwise covered services performed on or after November 6, 1986, by aliens granted lawful temporary resident status under Section 210(a)(1) or Section 245A(a) of the Immigration and Nationality Act (INA).

2. References. UIPL 1-86; UIPL 12-87; Section 3304(a)(14), FUTA; Section 210 and Section 245A, INA.

3. Background. Section II of Attachment III to UIPL 12-87 transmitted information to the States concerning implementation of Section 245A of the INA. Section 245A(a), INA, authorizes the adjustment of status of certain aliens who entered the United States before January 1, 1982, to that of lawfully admitted for temporary residence. Section 245A(e) provides for the temporary stay of deportation and the granting of work authorization for certain aliens before and during the application period for adjustment of status. Section 245A(b)(3) provides for work authorization while the alien is in lawful temporary resident status.

| RESCISSION | EXPIRATION DATE<br>October 31, 1989 |
|---|---|

DISTRIBUTION

Section IV of Attachment III to UIPL 12-87 transmitted information concerning implementation of Section 210 of the INA. Section 210(a)(1) sets forth the conditions for the adjustment of status of special agricultural workers to that of lawfully admitted for temporary residence. Section 210(d) provides for temporary stay of deportation and the granting of work authorization for certain aliens before and during the application period for adjustment of status. Section 210(a)(4), INA, provides, among other things, that during the period an alien is in lawful temporary resident status under Section 210(a), the alien "shall be granted authorization to engage in employment in the United States and shall be provided an 'employment authorized' endorsement or other appropriate work permit, in the same manner as for aliens lawfully admitted for permanent residence."

For aliens to receive unemployment benefits, they must satisfy two eligibility requirements: non-monetary eligibility during the benefit year, and monetary eligibility during the base period. With respect to the first requirement, when an alien's status is adjusted to lawfully admitted for temporary residence or when the alien is granted work authorization under Section 245A or Section 210 of the INA, the alien becomes legally available for work. Such an alien is eligible for unemployment benefits if the alien is also unemployed, able and available for work, and otherwise satisfies the State's eligibility requirements for receiving benefits.

With respect to the second requirement, monetary eligibility during the base period, the requirements of Section 3304(a)(14), FUTA, apply. The second category under Section 3304(a)(14) specifies that services performed while an alien was "lawfully present for purposes of performing such services" may be used for computing monetary eligibility if the State law includes the second category and the State construes the State law provision as including such aliens. Therefore, benefits based on wages for otherwise covered services performed while an alien is lawfully admitted for temporary residence under Section 245A(a) or Section 210(a)(1), or after the alien is granted work authorization under Section 245A or Section 210, may be paid (if the State law so provides and the alien is otherwise eligible) because the services were performed while the alien was lawfully present for purposes of performing services.

However, Section II.D.2 and Section IV.D.2 of Attachment III to UIPL 12-87 state that the status of lawful temporary resident or the granting of work authorization does not confer retroactive lawful presence for purposes of monetary entitlement. This means that an alien's services may only be used for establishing monetary entitlement from the date INS grants lawful temporary resident status or work authorization. This interpretation is now partially revised as set forth below.

4. Revised Interpretation. Although Section 210 and Section 245A were effective November 6, 1986, INS did not start accepting applications for lawful temporary resident status until May 5, 1987. INS could have accepted applications for, and granted lawful temporary resident status, as early as November 6, 1986, if it had been able to set up its application process by that date. ETA, therefore, has modified its interpretation of Section 3304(a)(14) to permit States, if State law so allows, to pay benefits based on wages from otherwise covered services performed on or after November 6, 1986, by aliens granted lawful temporary resident status under Section 245A(a) or Section 210(a)(1), INA. This is optional for each State and not a requirement for conformity. The retroactive use of an alien's wages to November 6, 1986, is permitted only if the alien is granted lawful temporary resident status. However, to use such retroactive wages in computing monetary entitlement, the alien must present the agency with documentation of the lawful temporary resident status, i.e., temporary resident card (INS Form I-688).

A distinction exists between INS Form I-688, which is issued to an alien granted lawful temporary resident status and includes work authorization, and INS Form I-688A which is the work authorization issued to an applicant for legalization along with the application fee receipt. The work authorization on INS Form I-688A is effective on the date stated on the form itself, and may never be given retroactive effect for any purpose. The retroactive use of an alien's wages for computing monetary entitlement, as discussed above, only occurs in connection with the granting of lawful temporary resident status and the issuance of INS Form I-688.

When an alien is granted lawful temporary resident status under Section 245A(a) or Section 210(a), INA, the alien falls within the second category of Section 3304(a)(14), FUTA -- lawfully present for purposes of performing such services -- and each State, at its option, may treat such status as retroactive as far back as November 6, 1986, for the purpose of computing monetary eligibility. Therefore, if the State law includes the second category, and the State construes the State law provision as including such an alien, then wages paid to the alien for otherwise covered services performed on or after November 6, 1986, or such later date as the State construes its law, may be used to compute monetary eligibility. If a State decides to use such wages in computing monetary eligibility, it must first examine its State law to determine if such retroactive use of an alien's wages is permissible.

5. Action Required. State Administrators are requested to provide this information to appropriate staff.

6. Inquiries. Questions should be directed to the appropriate Regional Office.

7. Attachments. Attachment I of this UIPL should be substituted for the last sentence of the first paragraph of Section II.D.2, page 9, Attachment III to UIPL 12-87, which reads as follows:

> The status of temporary residence or granting of work authorization does not, however, confer retroactive lawful presence for purposes of monetary eligibility.

Attachment II of this UIPL should be substituted for the following sentence contained in Section IV.D.2, page 12, Attachment III to UIPL 12-87:

> The status of temporary residence or granting of work authorization does not, however, confer retroactive lawful presence for purposes of monetary eligibility under the FUTA.

Although Section 245A of the INA was effective November 6, 1986, INS will not start accepting applications for lawful temporary resident status until May 5, 1987. INS could have accepted applications for and granted lawful temporary resident status as early as November 6, 1986, if it had been able to set up its application process by that date. ETA, therefore, has modified its interpretation of Section 3304(a)(14) to permit States, at each State's option, and if State law so allows, to pay benefits based on wages from otherwise covered services performed on or after November 6, 1986 (i.e., as far back as that date) by aliens granted lawful temporary resident status under Section 245A(a), INA. This is optional for each State and not a requirement for conformity. For the purpose of conformity, however, the use of an alien's wages for services retroactive to November 6, 1986, is permitted only after the alien is granted lawful temporary resident status. To justify the use of such wages in computing monetary entitlement, the alien must present the agency with documentation of the lawful temporary resident status, i.e., temporary resident card (INS Form I-688).

A distinction exists between INS Form I-688, which is issued to an alien granted lawful temporary resident status and includes work authorization, and INS Form I-688A which is the work authorization issued to an applicant for legalization along with the application fee receipt. The work authorization on INS Form I-688A is effective on the date stated on the form itself, and may never be given retroactive effect for any purpose. The retroactive use of an alien's wages for computing monetary entitlement, as discussed above, occurs only in connection with the granting of lawful temporary resident status and the issuance of INS Form I-688.

For the same reason given on page 9, item II.D.2 of this Attachment, a State may, if State law so allows, pay benefits based on wages from otherwise covered services performed on or after November 6, 1986, by aliens granted lawful temporary resident status under Section 210(a)(1), INA. This is optional for each State and not a requirement for conformity. For the purpose of conformity, however, the use of an alien's wages for services retroactive as far back as November 6, 1986, is permitted only if the alien is granted lawful temporary resident status. To justify the use of such services in computing monetary entitlement, the alien must present the agency with documentation of the lawful temporary resident status, i.e., temporary resident card (INS Form I-688).

A distinction exists between INS Form I-688, which is issued to an alien granted lawful temporary resident status and includes work authorization, and INS Form I-688A which is the work authorization issued to an applicant for legalization along with the application fee receipt. The work authorization on INS Form I-688A is effective on the date stated on the form itself, and may never be given retroactive effect for any purpose. The retroactive use of an alien's wages for computing monetary entitlement, as discussed above, only occurs in connection with the granting of lawful temporary resident status and the issuance of INS Form I-688.

DIRECTIVE: UNEMPLOYMENT INSURANCE PROGRAM LETTER NO. 6-89

TO: ALL STATE EMPLOYMENT SECURITY AGENCIES

FROM: DONALD J. KULICK
Administrator
for Regional Management

SUBJECT: Provisions of the Foreign Relations Authorization Act (P.L. 100-204), Which Affect the Federal-State Unemployment Compensation Program

1. Purpose. To advise State agencies of Section 902 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989, which establishes another class of aliens eligible for temporary resident status.

2. References. Section 902 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (P.L. 100-204); Section 245A of the Immigration and Nationality Act; and UIPLs 1-86, 12-87, 12-87, Change 1 and 11-88.

3. Background. On December 22, 1987, the President signed into law the Foreign Relations Authorization Act (FRAA) which contains provisions affecting the unemployment compensation (UC) program. Section 902, FRAA, establishes another class of aliens who are eligible to apply for temporary residence status as provided by the Immigration and Nationality Act (INA). The Immigration Reform and Control Act of 1986 (IRCA) added a new Section 245A to the INA to authorize the adjustment of status of certain aliens. Section 245A established a new category, that of "lawfully admitted for temporary residence." Section 902, FRAA, does not amend IRCA or INA, but does add a new class of aliens eligible for the lawfully admitted for temporary residence status to the classes of aliens authorized by Section 245A. FRAA also makes specific provisions of Section 245A applicable to the Section 902 class.

This new class of aliens includes any alien who is a national of a foreign country whose nationals were provided (or allowed to continue in) "extended voluntary departure" (EVD) by the Attorney General on the basis of a nationality

| RESCISSIONS | EXPIRATION DATE<br>November 30, 1989 |
|---|---|

DISTRIBUTION

group determination at any time during the 5-year period ending on November 1, 1987. In this 5-year period EVD was provided to the nationals of Poland, Ethiopia, Afghanistan, and Uganda.

FRAA extends most of the same benefits, conditions and responsibilities to qualifying applicants as to those applicants qualifying under Section 245A, INA. However, the eligibility requirements and application period under FRAA differ from those under Section 245A, INA.

4. Adjustment of Status. Section 902(a), FRAA, establishes the criteria for eligibility for adjustment of status. The Section applies to any alien who is a national of a foreign country whose nationals were provided (or allowed to continue in) "extended voluntary departure" by the Attorney General on the basis of a nationality group determination at any time during the 5-year period ending on November 1, 1987. The status of an alien shall be adjusted to lawfully admitted for temporary residence if the alien:

a. applies for such adjustment within two years of the date of the enactment of FRAA (that is, by December 22, 1989);

b. establishes that the alien entered the United States before July 21, 1984, and has resided continuously in the United States since that date, and through December 22, 1987;

c. establishes continuous physical presence in the United States (other than brief, casual, and innocent absences) since December 22, 1987;

d. in the case of an alien who entered the United States as a nonimmigrant before July 21, 1984, establishes that the alien's period of authorized stay as a nonimmigrant expired not later than six months after such date through the passage of time or the alien applied for asylum before July 21, 1984; and

e. meets the requirements of Section 245A(a)(4), INA.

5. Applicable Subsections of Section 245A of INA.

Section 902(b), FRAA, provides that subsections (b), (c)(6), (d), (f), (g), (h), and (i) of Section 245A, INA, apply to the aliens whose status is adjusted under

Section 902(a). These subsections apply in the same manner as they apply to aliens provided lawful temporary resident status under Section 245A(a), INA.

Subsection 245A(b), INA, specifies certain terms and conditions of temporary resident status and prescribes the conditions for subsequent adjustment to "lawfully admitted for permanent residence." It allows an alien, after 18 months of temporary resident status, one year to apply for an adjustment of status to that of lawfully admitted for permanent residence. Paragraph (1) of subsection 245A(b) lists the conditions an alien must meet to be eligible for subsequent adjustment to that of an alien admitted for permanent residence. Paragraph (2) of subsection 245A(b) specifies the conditions under which the Attorney General shall provide for termination of temporary resident status.

Paragraph (3) of subsection 245A(b) provides that an alien with temporary resident status shall be granted "authorization to engage in employment in the United States and be provided with an 'employment authorized' endorsement or other appropriate work permit." Paragraph (3) also lists the conditions for authorization to travel abroad.

Paragraph (1) of subsection 245(g) requires the Attorney General to publish regulations necessary to carry out Section 245A. An interim rule implementing Section 902, FRAA, was published and became effective March 21, 1988, at 53 FR 9274. This interim rule created a new regulatory Section 245a.4 of 8 CFR Part 245a entitled "Adjustment to Lawful Resident Status of Certain Nationals of Countries for Which Extended Voluntary Departure has been made Available." Section 245a.4(b)(14) of this Part lists the provisions regarding employment and travel authorization for aliens applying for adjustment of status to lawfully admitted for temporary residence status as well as those granted such status under Section 902, FRAA. Form I-688A, Employment Authorization, is issued to applicants. Form I-688, Temporary Resident Card, is issued to an alien granted temporary resident status.

6. Impact on Federal UC Requirements. For the UC program there are two separate aspects to alien eligibility: (A) non-monetary eligibility during the benefit year and (B) monetary eligibility during the base period.

A. Availability for Work. When an individual is granted work authorization under these new provisions the individual is lawfully present for purposes of performing services and may be considered legally available for work.

The individual must have dated documentation (I-688A or I-688) from INS substantiating the work authorization. An alien with INS issued work authorization may be eligible for unemployment compensation under the State law if the alien is also able to work, is otherwise available for work, is unemployed, and is otherwise entitled to benefits under the State law, including monetary entitlement.

B. Section 3304(a)(14), FUTA. Even though an individual has work authorization, the requirements of Section 3304(a)(14), FUTA, still apply. The State must determine if an alien has established monetary eligibility during the base period. FUTA prescribes the conditions under which benefits may be paid based on services performed by an alien who is in proper status "at the time services were performed." Benefits based on services performed while an alien is lawfully admitted for temporary residence or is granted work authorization pending a ruling on his/her application, may be paid because the work authorization grants an alien the status of being lawfully present for purposes of performing services.

Although Section 902 was effective December 22, 1987, INS did not start accepting applications for lawful temporary resident status until March 21, 1988. INS could have accepted applications for, and granted lawful temporary resident status, as early as December 22, 1987, if it had been able to set up its application process by that date. Therefore, States may, if State law so allows, pay benefits based on wages from otherwise covered services performed on or after December 22, 1987, by aliens granted lawful temporary resident status under Section 902. This is optional for each State and not a requirement for conformity. The retroactive use of an alien's wages to December 22, 1987, is permitted only if the alien is granted lawful temporary resident status. However, to use such retroactive wages in computing monetary entitlement, the alien must present the agency with documentation of the lawful temporary resident status, i.e., temporary resident card (INS Form I-688).

A distinction exists between INS Form I-688, which is issued to an alien granted lawful temporary resident status and includes work authorization, and INS Form I-688A which is the work authorization issued to an applicant for legalization along with the application

fee receipt. The work authorization on INS Form I-688A is effective on the date stated on the form itself, and may never be given retroactive effect for any purpose. The retroactive use of an alien's wages for computing monetary entitlement, as discussed above, is permitted only in connection with the granting of lawful temporary resident status and the issuance of INS Form I-688.

When an alien is granted lawful temporary resident status under Section 902, the alien falls within the second category of Section 3304(a)(14), FUTA -- lawfully present for purposes of performing such services -- and each State, at its option, may treat such status as retroactive as far back as December 22, 1987, for the purpose of computing monetary eligibility. Therefore, if the State law includes the second category, and the State construes the State law provision as including such an alien, then wages paid to the alien for otherwise covered services performed on or after December 22, 1987, or such later date as the State construes its law may be used to compute monetary eligibility. If a State decides to use such wages in computing monetary eligibility, it must first examine its State law to determine if such retroactive use of an alien's wages is permissible.

7. Action Required. SESAs should notify the appropriate staff of the provisions of P.L. 100-204 which affect the UC program and this program letter.

8. Inquiries. Inquiries should be directed to your Regional Office.

9. Attachments.

I. Text of Section 902 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (P.L. 100-204).

II. Section 245A of the Immigration and Nationality Act.

III. Copy of INS Interim Final Rule, 8 CFR 245a.4.

Note: These attachments are not published in the Federal Register.

DIRECTIVE : UNEMPLOYMENT INSURANCE PROGRAM LETTER NO. 11-89

TO : ALL STATE EMPLOYMENT SECURITY AGENCIES

FROM : DONALD J. KULICK
Administrator
for Regional Management

SUBJECT : Amendments Made by the Family Support Act of 1988, P.L. 100-485, and the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, P.L. 100-628, Which Affect the Federal-State Unemployment Compensation Program.

1. Purpose. To advise State employment security agencies (SESAs) of amendments to the Social Security Act (SSA) affecting the Federal-State Unemployment Compensation (UC) Program.

2. References. Section 124 of P.L. 100-485; Section 904 of P.L. 100-628; Sections 303(h), 303(i), 304(a)(2), and 453, SSA.

3. Background. In late 1988, the President signed into law two bills containing provisions affecting the UC program. These bills are the Family Support Act of 1988, P.L. 100-485, signed into law on October 13, 1988; and the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, P.L. 100-628, signed into law on November 7, 1988.

The pertinent provisions of the Family Support Act require SESAs to take such actions as may be necessary to enable the Secretary of Health and Human Services to obtain prompt access to any wage and UC claims information available to the SESA for purposes of assisting the Federal Parent Locator Service in carrying out the child support enforcement program under Title IV, SSA. This requirement is effective January 1, 1990.

In addition, the provisions of the Family Support Act require the Secretary of Labor to enter into an agreement with the Secretary of Health and Human Services to give the FPLS prompt access to the above wage and UC information. This agreement will govern the specific details of implementation. Further details regarding this agreement will be issued at a later date.

| RESCISSIONS | EXPIRATION DATE<br>January 31, 1991 |
|---|---|

DISTRIBUTION

The relevant provisions of the Stewart B. McKinney Homeless Assistance Amendments Act require SESAs to disclose wage and UC claims information to the Department of Housing and Urban Development and public housing agencies under certain circumstances. This requirement is effective for most States beginning September 30, 1989, and ceases to be effective beginning October 1, 1994. The amendments make provision for optional early implementation by States as well as for a grace period for individual States under described circumstances. The text, explanations and interpretations of each of these amendments are provided in the attachments to this UIPL.

The provisions of the McKinney Act Amendments also require the Secretary of Labor to prescribe regulations governing how often and in what form information may be disclosed, and to provide for safeguards on disclosed information. The Department is currently working on these regulations which will be published for comment in the Federal Register.

Finally, the McKinney Act Amendments contain provisions creating the "Jobs for Employable Dependent Individuals Act." Although these provisions do not place any new requirements on SESAs, SESAs may receive requests from State agencies administering these provisions for certain wage information. The Employment and Training Administration is currently working on the implementation of these amendments. A separate UIPL will be issued discussing disclosure made under these new provisions.

4. Action Required. SESAs are requested to notify appropriate staff of these amendments.

5. Inquiries. Inquiries should be directed to the appropriate Regional Office.

TEXT, EXPLANATION AND INTERPRETATION OF AMENDMENTS MADE TO THE SOCIAL SECURITY ACT BY SECTION 124 OF P.L. 100-485, THE FAMILY SUPPORT ACT OF 1988

1. Text of Amendments to the Social Security Act Made by Section 124 of P.L. 100-485.

a. Amendment to Section 453(e), SSA. Section 124(a), P.L. 100-485, amended Section 453(e), SSA, by adding at the end the following new paragraph:

> (3) The Secretary of Labor shall enter into an agreement with the Secretary [of Health and Human Services] to provide prompt access for the Secretary (in accordance with this subsection) to the wage and unemployment compensation claims information and data maintained by or for the Department of Labor or State employment security agencies.

b. Amendment to Section 303, SSA. Section 124(b)(1) of P.L. 100-485 amended Section 303, SSA, by adding at the end the following new subsection:

> (h)(1) The State agency charged with the administration of the State law shall take such actions (in such manner as may be provided in the agreement between the Secretary of Health and Human Services and the Secretary of Labor under section 453(e)(3)) as may be necessary to enable the Secretary of Health and Human Services to obtain prompt access to any wage and unemployment compensation claims information (including any information that might be useful in locating an absent parent or such parent's employer) for use by the Secretary of Health and Human Services, for purposes of section 453, in carrying out the child support enforcement program under Title IV.
>
> (2) Whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency charged with the administration of the State law, finds that there is a failure to comply substantially with the requirement of paragraph (1), the Secretary of Labor shall notify such State agency that further payments will not be made to the State until such Secretary is satisfied that there is no longer any such failure. Until the Secretary of Labor is so satisfied, such Secretary shall make no further certification to the Secretary of the Treasury with respect to such State.

c. Companion Amendment to Section 304(a)(2), SSA. Section 124(b)(2) amended Section 304(a)(2), SSA, by striking

"or (e)" and inserting in lieu thereof "(e), or (h)".

2. Discussion.

a. In General. Section 453, SSA, requires the Secretary of Health and Human Services to establish and conduct a Federal Parent Locator Service (FPLS). The mission of the FPLS is to obtain and transmit to any authorized person (as defined under Section 453(c)) information as to the whereabouts of any absent parent. This information is to be used to locate the parent for the purpose of enforcing child support obligations.
